### Principles of Consolidation

-----

The consolidated financial statements include the accounts of SJPI and its wholly owned subsidiary, Nanning Sonic Jet, LLC. All inter-company balances and transactions are eliminated in consolidation.

### Basis of Presentation

-----

The accompanying unaudited, condensed financial statements have been prepared in conformity with generally accepted accounting principles for interim financial information and with the instructions to Form 10-QSB and Article 10 of Regulation S-B. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (which comprise only normal recurring accruals) necessary for a fair presentation have been included. Operating results for the nine months ended September 30, 2001 are not necessarily indicative of the results that may be expected for the year ended December 31, 2001. For further information, refer to the financial statements and notes thereto for the year ended December 31, 2000.

### Estimates

-----

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

### Going Concern

-----

The Company has received a report from its independent auditors that includes an explanatory paragraph concerning the Company's uncertainty to continue as a going concern. These consolidated financial statements contemplate the ability to continue as such and do not include any adjustments that might result from this uncertainty.

### Loss per Share

-----

The Company utilizes SFAS No. 128, "Earnings per Share" Basic and diluted loss per share is computed by dividing loss available to common stockholders by the weighted-average number of common shares outstanding.
