LCNB CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1 - Basis of Presentation

Substantially all of the assets, liabilities and operations of LCNB Corp. ("LCNB") are attributable to its wholly-owned subsidiary, LCNB National Bank (the "Bank"). The accompanying unaudited consolidated financial statements include the accounts of LCNB and the Bank. LCNB completed the sale of its subsidiary, Dakin Insurance Agency, Inc. ("Dakin") on March 23, 2011. The financial results of Dakin are included as income from discontinued operations, net of tax, in the accompanying unaudited consolidated financial statements through the date of sale.

The unaudited interim consolidated financial statements, which have been reviewed by J.D. Cloud & Co. L.L.P., LCNB's independent registered public accounting firm, in accordance with standards established by the Public Company Accounting Oversight Board, as indicated by their report included herein and which does not express an opinion on those statements, have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and the rules and regulations of the Securities and Exchange Commission (the "SEC"). Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, the unaudited interim consolidated financial statements include all adjustments (consisting of normal, recurring accruals) considered necessary for a fair presentation of financial position, results of operations, and cash flows for the interim periods, as required by Regulation S-X, Rule 10-01.

Certain prior period data presented in the financial statements have been reclassified to conform with the current year presentation.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Results of operations for the three and six months ended June 30, 2011 are not necessarily indicative of the results to be expected for the full year ending December 31, 2011. These unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements, accounting policies, and financial notes thereto included in LCNB's 2010 Annual Report on Form 10-K filed with the SEC.

Note 2 - Investment Securities (continued)

Substantially all securities in unrealized loss positions at June 30, 2011 have been in a loss position less than twelve months. Management has determined that the unrealized losses at June 30, 2011 are primarily due to fluctuations in market interest rates and do not reflect credit quality deterioration of the securities. Because the Company does not have the intent to sell the investments and it is more likely than not that the Company will not be required to sell the investments before recovery of their amortized cost bases, which may be at maturity, the Company does not consider these investments to be other-than-temporarily impaired.

Note 3 - Loans

Major classifications of loans at June 30, 2011 and December 31, 2010 are as follows (in thousands):

	June 30, 2011	December 31, 2010

Note 3 - Loans (continued)

Non-accrual, past-due, and restructured loans as of June 30, 2011 and December 31, 2010 were as follows (in thousands):

	June 30, 2011	December 31, 2010
Non-accrual loans	\$ 3,086	3,761
Past-due 90 days or more and still accruing	670	300
Restructured loans	9,503	9,088
Total	\$ 13,259	13,149
Percent to total loans	2.90 %	2.89 %

Non-accrual loans at June 30, 2011 decreased from the balance at December 31, 2010 primarily due to the receipt of a \$594,000 guarantee payment on a Small Business Administration loan during the first quarter 2011. Restructured loans at June 30, 2011 increased from the balance at December 31, 2010 primarily due to the modification of two commercial real estate loans to the same borrower totaling \$626,000 during the first quarter 2011.

Loans sold to and serviced for others are not included in the accompanying consolidated balance sheets. The unpaid principal balances of those loans at June 30, 2011 and December 31, 2010 were \$67,942,000 and \$70,705,000, respectively. Loans sold to the Federal Home Loan Mortgage Corporation during the three and six months ended June 30, 2011 totaled \$976,000 and \$2,698,000, respectively, and \$954,000 and \$2,554,000 during the three and six months ended June 30, 2010, respectively.

Note 3 – Loans (continued)

The Company uses a risk-rating system to quantify loan quality. A loan is assigned to a risk category based on relevant information about the ability of the borrower to service the debt including, but not limited to, current financial information, historical payment experience, credit documentation, public information, and current economic trends. The categories used are:

- Pass – loans categorized in this category are higher quality loans that do not fit any of the other categories described below.
- Other Assets Especially Mentioned (OAEM) - loans in this category are currently protected but are potentially weak. These loans constitute a risk but not to the point of justifying a classification of substandard. The credit risk may be relatively minor yet constitute an undue risk in light of the circumstances surrounding a specific asset.
- Substandard – loans in this category are inadequately protected by the current sound net worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the possibility that the Company will sustain some loss if the deficiencies are not corrected.
- Doubtful – loans classified in this category have all the weaknesses inherent in loans classified substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

All advances from the Federal Home Loan Bank of Cincinnati are secured by a blanket pledge of LCNB’s 1-4 family first lien mortgage loans in the amount of approximately \$146 million and \$148 million at June 30, 2011 and December 31, 2010, respectively. Additionally, LCNB was required to hold minimum levels of FHLB stock, based on the outstanding borrowings.

Note 6 - Commitments and Contingent Liabilities

LCNB is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments included commitments to extend credit. They involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the balance sheets. Exposure to credit loss in the event of nonperformance by the other parties to financial instruments for commitments to extend credit is represented by the contract amount of those instruments.

LCNB offers the Bounce Protection product, a customer deposit overdraft program, which is offered as a service and does not constitute a contract between the customer and LCNB.

LCNB uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments. Financial instruments whose contract amounts represent off-balance-sheet credit risk at June 30, 2011 and December 31, 2010 were as follows (in thousands):

	June 30, 2011	December 31, 2010
Commitments to extend credit:

Note 6 – Commitments and Contingent Liabilities (continued)

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Unused lines of credit include amounts not drawn in line of credit loans. Commitments to extend credit and unused lines of credit generally have fixed expiration dates or other termination clauses.

Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. At June 30, 2011 and December 31, 2010, outstanding guarantees of approximately \$408,000 and \$998,000, respectively, were issued to developers and contractors. These guarantees generally are fully secured and have varying maturities. In addition, LCNB has a participation in a letter of credit securing payment of principal and interest on a bond issue. The participation amount at June 30, 2011 and December 31, 2010 was approximately \$5.3 million and \$5.5 million, respectively. The agreement has a final maturity date of July 15, 2012.

LCNB evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary, is based on management's credit evaluation of the borrower. Collateral held varies, but may include accounts receivable; inventory; property, plant and equipment; residential realty; and income-producing commercial properties.

Capital expenditures include the construction or acquisition of new office buildings, improvements to LCNB's 26 offices, purchases of furniture and equipment, and additions or improvements to LCNB's information technology system. Material commitments for capital expenditures outstanding as of June 30, 2011 totaled approximately \$800,000.

Management believes that LCNB has sufficient liquidity to fund its lending and capital expenditure commitments.

LCNB and its subsidiaries are parties to various claims and proceedings arising in the normal course of business. Management, after consultation with legal counsel, believes that the liabilities, if any, arising from such proceedings and claims will not be material to the consolidated financial position or results of operations.

Note 7 – Regulatory Capital

The Bank and LCNB are required by regulators to meet certain minimum levels of capital adequacy. These are expressed in the form of certain ratios. Capital is separated into Tier 1 capital (essentially shareholders' equity less goodwill and other intangibles) and Tier 2 capital (essentially the allowance for loan losses limited to 1.25% of risk-weighted assets). The first two ratios, which are based on the degree of credit risk in LCNB's assets, provide for weighting assets based on assigned risk factors and include off-balance sheet items such as loan commitments and stand-by letters of credit. The ratio of Tier 1 capital to risk-weighted assets must be at least 4.0% and the ratio of Total capital (Tier 1 capital plus Tier 2 capital) to risk-weighted assets must be at least 8.0%. The capital leverage ratio supplements the risk-based capital guidelines. Banks are required to maintain a minimum ratio of Tier 1 capital to adjusted quarterly average total assets of 3.0%.

Note 7 – Regulatory Capital (continued)

For various regulatory purposes, financial institutions are classified into categories based upon capital adequacy. The highest "well-capitalized" category requires capital ratios of at least 10% for total risk-based, 6% for Tier 1 risk-based, and 5% for leverage. As of the most recent notification from their regulators, The Bank and LCNB were categorized as "well-capitalized" under the regulatory framework for prompt corrective action. Management believes that no conditions or events have occurred since the last notification that would change the Bank's or LCNB's category. A summary of the regulatory capital and capital ratios of LCNB follows (dollars in thousands):

	At June 30, 2011		At December 31, 2010	
Regulatory Capital:				
Shareholders' equity	\$ 74,116		70,707

Note 8 – Employee Benefits

LCNB participates in a noncontributory defined benefit retirement multi-employer plan that covers substantially all regular full-time employees hired before January 1, 2009.

Employees of LCNB also participate in a defined contribution retirement plan. Employees hired on or after January 1, 2009 receive a 50% employer match on their contributions into the 401(k) plan, up to a maximum LCNB contribution of 3% of each individual employee's annual compensation. Employees hired before January 1, 2009 who received a benefit reduction under certain amendments to the defined benefit retirement plan receive an automatic contribution of 5% or 7% of annual compensation, depending on the sum of an employee's age and vesting service, into the 401(k) plan, regardless of the contributions made by the employees. This contribution is made annually and these employees do not receive any employer matches to their 401(k) contributions.

Funding and administrative costs of the qualified noncontributory defined benefit retirement plan and 401(k) plan charged to pension and other employee benefits in the consolidated statements of income for the three and six-month periods ended June 30, 2011 and 2010 were as follows (in thousands):

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2011	2010	2011	2010
Qualified noncontributory defined benefit retirement plan	\$ 134	61	258	121
401(k) plan	82	79	157	153

Certain highly compensated employees participate in a nonqualified defined benefit retirement plan. The nonqualified plan ensures that participants receive the full amount of benefits to which they would have been entitled under the noncontributory defined benefit retirement plan in the absence of limits on benefit levels imposed by certain sections of the Internal Revenue Code.

The components of net periodic pension cost of the nonqualified defined benefit retirement plan for the three and six months ended June 30, 2011 and 2010 are summarized as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,

Note 9 - Stock Based Compensation

LCNB established an Ownership Incentive Plan (the "Plan") during 2002 that allows for stock-based awards to eligible employees, as determined by the Board of Directors. The awards may be in the form of stock options, share awards, and/or appreciation rights. The Plan provides for the issuance of up to 200,000 shares.

Options granted to date vest ratably over a five year period and expire ten years after the date of grant. Stock options outstanding at June 30, 2011 were as follows:

Exercise Price Range	Outstanding Stock Options			Exercisable Stock Options		
	Number	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)	Number	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)
\$ 9.00 - 10.99	29,110	\$ 9.00	7.6	11,644	\$ 9.00	7.6

The aggregate intrinsic value (the amount by which the current market value of the underlying stock exceeds the exercise price of the option) for options outstanding at June 30, 2011 that were "in the money" (market price greater than exercise price) was \$95,000. The aggregate intrinsic value at that date for only the options that were exercisable was \$36,000. The intrinsic value changes based on changes in the market value of LCNB's stock.

Note 9 - Stock Based Compensation (continued)

The fair value of options granted is estimated at the date of grant using the Black-Scholes option-pricing model. The following table shows the estimated weighted-average fair value and the assumptions used in calculating that value for options granted during the six month periods ended June 30:

	2011		2010	
Estimated weighted-average fair value of options granted	\$	2.09		2.27
Risk-free interest rate		2.84	%	3.34
Average dividend yield		4.43	%	4.31
Volatility factor of the expected market price of the Company's common stock		27.37	%	28.32
Average life in years		6.5		7.0

Total expense related to options included in salaries and employee benefits in the consolidated statements of income for the three and six months ended June 30, 2011 were \$11,000 and \$22,000, respectively, and \$10,000 and \$19,000 for the three and six months ended June 30, 2010, respectively.

A total of 2,511 restricted shares were granted to an executive officer in February 2010 and vested in November 2010. Until they vested, they were restricted from sale, transfer, or assignment in accordance with the terms of the agreement under which they were issued. At the date of vesting, the shares were issued from treasury stock and, therefore, did not affect the number of securities remaining available for future issuance in the table above. No restricted shares were granted prior to February 2010 or during the first six months of 2011.

Note 10 - Earnings per Common Share

Basic earnings per common share is calculated by dividing net income available to common shareholders by the weighted average number of common shares outstanding during the period. Diluted earnings per common share is adjusted for the dilutive effects of stock options, warrant, and restricted stock. The diluted average number of common shares outstanding has been increased for the assumed exercise of stock options, warrant, and restricted stock with proceeds used to purchase treasury shares at the average market price for the period. The computations were as follows for the three and six months ended June 30, 2011 and 2010 (dollars in thousands, except share and per share data):

Note 11 - Fair Value of Financial Instruments

The inputs to valuation techniques used to measure fair value are assigned to one of three broad levels:

- Level 1 – quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the reporting date.
- Level 2 – inputs other than quoted prices included within level 1 that are observable for the asset or liability either directly or indirectly. Level 2 inputs may include quoted prices for similar assets in active markets, quoted prices for identical assets or liabilities in markets that are not active, inputs other than quoted prices (such as interest rates or yield curves) that are observable for the asset or liability, and inputs that are derived from or corroborated by observable market data.
- Level 3 - inputs that are unobservable for the asset or liability.

The majority of LCNB's financial debt securities are classified as available-for-sale. The securities are reported at fair value with unrealized holding gains and losses reported net of income taxes in accumulated other comprehensive income.

LCNB utilizes a pricing service for determining the fair values of most of its investment securities. Fair value for U.S. Treasury notes and corporate securities are determined based on market quotations (level 1). Fair value for most of the other investment securities is calculated using the discounted cash flow method for each security. The discount rates for these cash flows are estimated by the pricing service using rates observed in the market (level 2). Cash flow streams are dependent on estimated prepayment speeds and the overall structure of the securities given existing market conditions. The investments in mutual funds are considered to have level 3 inputs because LCNB does not have precise information about the methods used by the mutual fund companies to assign fair values or full information on the investments made by the funds. Additionally, LCNB Corp. owns trust preferred securities in various financial institutions and equity securities in non-financial companies. Market quotations (level 1) are used to determine fair values for these investments.

Note 11- Fair Value of Financial Instruments (continued)

The following table is a reconciliation of the beginning and ending balances of recurring fair value measurements that use significant unobservable inputs (level 3) for the six months ended June 30, 2011 (in thousands):

	Mutual Funds
Beginning balance	\$ 1,053
Purchases	500
Dividends reinvested	17
Net change in unrealized gains (losses) included in other comprehensive income	11
Ending balance	\$ 1,581

Assets that may be recorded at fair value on a nonrecurring basis include impaired loans, other real estate owned, and other repossessed assets. A loan is considered impaired when management believes it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement. Impaired loans are carried at the present value of estimated future cash flows using the loan's existing rate or the fair value of collateral if the loan is collateral dependent and if this value is less than the loan balance. When the fair value of the collateral is based on an observable market price or current appraised value, the inputs are considered to be level 2. When an appraised value is not available and there is not an observable market price, the inputs are considered to be level 3.

Other real estate owned is adjusted to fair value upon transfer of the loan to foreclosed assets, usually based on an appraisal of the property. Subsequently, foreclosed assets are carried at the lower of carrying value or fair value. The inputs for a valuation based on current appraised value are considered to be level 2.

Note 11- Fair Value of Financial Instruments (continued)

The fair value of off-balance-sheet financial instruments at June 30, 2011 and December 31, 2010 was not material.

Fair values of financial instruments are based on various assumptions, including the discount rate and estimates of future cash flows. Therefore, the fair values presented may not represent amounts that could be realized in actual transactions. In addition, because the required disclosures exclude certain financial instruments and all nonfinancial instruments, any aggregation of the fair value amounts presented would not represent the underlying value of LCNB. The following methods and assumptions were used to estimate the fair value of certain financial instruments:

Cash and cash equivalents

The carrying amounts presented are deemed to approximate fair value.

Investment securities

Fair values for securities, excluding Federal Home Loan Bank and Federal Reserve Bank stock, are based on quoted market prices, if available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities and/or discounted cash flow analyses or other methods. The carrying value of Federal Home Loan Bank and Federal Reserve Bank stock approximates fair value based on the respective redemptive provisions.

Loans

Fair value is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities, incorporating assumptions of current and projected prepayment speeds.

Deposits

The fair value of demand deposits, savings accounts, and certain money market deposits is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is estimated using the rates currently offered for deposits of similar remaining maturities.

Borrowings

The carrying amounts of federal funds purchased, repurchase agreements, and U.S. Treasury demand note borrowings are deemed to approximate fair value of short-term borrowings. For long-term debt, fair values are estimated based on the discounted value of expected net cash flows using current interest rates.

Note 14 – Recent Accounting Pronouncements

Accounting Standards Update No. 2011-02, “A Creditor’s Determination of Whether a Restructuring Is a Troubled Debt Restructuring” was issued by the Financial Accounting Standards Board (the “FASB”) in April 2011. A loan modification is considered a Troubled Debt Restructuring when the restructuring constitutes a concession by the lender and the debtor is experiencing financial difficulties. The update provides additional guidance in determining whether a concession has been granted and whether a debtor is experiencing financial difficulty. The amendments in the update are effective for public entities for the first interim or annual period beginning on or after June 15, 2011 and are to be applied retrospectively to the beginning of the annual period of the adoption. LCNB management does not anticipate that adoption of this update will have a material effect on its consolidated financial statements.

Accounting Standards Update No. 2011-04, “Fair Value Measurement (ASC Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs” was issued by the FASB in May 2011. The update does not extend the use of fair value accounting, but provides guidance on how it should be applied where its use is already required or permitted by other standards within IFRS or U.S. GAAP. It supersedes most of the guidance in ASC Topic 820, although many of the changes are clarifications of existing guidance or wording changes to align with IFRS 13. Changes to current guidance include:

- Clarification on using premiums and discounts in calculating fair value when level 2 or 3 inputs are used,
 - An expansion of disclosures about fair value measurements, and
- The categorization by level of the fair value hierarchy for items that are not measured at fair value in the statement of financial position, but for which the fair value is required to be disclosed.

The amendments in the update must be applied prospectively. For public entities, the amendments are effective during interim and annual periods beginning after Dec. 15, 2011. Early application by public entities is not permitted.

Accounting Standards Update No. 2011-05, “Comprehensive Income (ASC Topic 220): Presentation of Comprehensive Income,” was issued by the FASB in June 2011. The update eliminates the option to present the components of other comprehensive income as part of the statement of shareholders’ equity. Instead, a company is required to report comprehensive income in either a single continuous statement of comprehensive income which contains two sections, net income and other comprehensive income, or in two separate but consecutive statements. The amendments in the update are effective for public companies during the interim and annual periods beginning after Dec. 15, 2011 with early adoption permitted. LCNB’s presentation of the Consolidated Statements of Comprehensive Income already complies with the requirements of the update.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders
LCNB Corp. and subsidiaries
Lebanon, Ohio

We have reviewed the accompanying consolidated balance sheet of LCNB Corp. and subsidiaries as of June 30, 2011, and the related consolidated statements of income and comprehensive income for each of the three-month and six-month periods ended June 30, 2011 and 2010, and the related consolidated statements of shareholders' equity and cash flows for each of the six-month periods ended June 30, 2011 and 2010. These interim financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the accompanying consolidated interim financial statements for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of LCNB Corp. and subsidiaries as of December 31, 2010, and the related consolidated statements of income, comprehensive income, shareholders' equity, and cash flows for the year then ended (not presented herein), and in our report dated March 1, 2011, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet as of December 31, 2010, is fairly stated in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Forward Looking Statements

Certain matters disclosed herein may be deemed to be forward-looking statements that involve risks and uncertainties. Forward looking statements are statements that include projections, predictions, expectations or beliefs about future events or results or otherwise are not statements of historical fact. Such statements are often characterized by the use of qualifying words and their derivatives such as “expects,” “anticipates,” “believes,” “estimates,” “plans,” “projects” other statements concerning opinions or judgments of LCNB and its management about future events. Factors that could influence the accuracy of such forward looking statements include, but are not limited to, regulatory policy changes, interest rate fluctuations, loan demand, loan delinquencies and losses, general economic conditions and other risks. Such forward-looking statements represent management's judgment as of the current date. Actual strategies and results in future time periods may differ materially from those currently expected. LCNB disclaims, however, any intent or obligation to update such forward-looking statements. LCNB intends such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

Results of Operations

LCNB's net income for the three and six months ended June 30, 2011 was \$1,992,000 (total basic and diluted earnings per common share of \$0.30) and \$4,294,000 (total basic and diluted earnings per common share of \$0.64), respectively. This compares to \$2,752,000 (total basic and diluted earnings per common share of \$0.41) and \$4,964,000 (total basic and diluted earnings per common share of \$0.74) for the same three and six-month periods in 2010.

In late 2010, LCNB's board of directors resolved to sell its insurance agency subsidiary, Dakin Insurance Agency, Inc., and, therefore, the subsidiary's financial results are reported in the income statement as income from discontinued operations, net of taxes. Net income for the six months ended June 30, 2011 includes income from discontinued operations, net of taxes of \$793,000, which is a \$655,000 increase from the same period in 2010. This increase was caused by the sale of LCNB's insurance agency subsidiary during the first quarter 2011 and reflects the gain recognized on the sale less certain related closing costs, taxes, and a curtailment expense recognized in LCNB's nonqualified defined benefit retirement plan due to the sale.

Income from continuing operations for the three and six months ended June 30, 2011 was \$2,023,000 and \$3,501,000, respectively. This compares to \$2,685,000 and \$4,826,000 for the comparable periods in 2010.

Net loan charge-offs for the first six months of 2011 and 2010 totaled \$420,000 and \$567,000, respectively. Non-accrual loans and loans past due 90 days or more and still accruing interest totaled \$3,756,000 or 0.82% of total loans at June 30, 2011, compared to \$4,061,000 or 0.89% of total loans at December 31, 2010. The decrease was primarily due to the receipt of a guarantee payment on a Small Business Administration loan that had been classified as non-accrual at December 31, 2010. Other real estate owned (which includes property acquired through foreclosure or deed-in-lieu of foreclosure and also includes property deemed to be in-substance foreclosed) and other repossessed assets totaled approximately \$2,226,000 at June 30, 2011 and \$2,114,000 at December 31, 2010. The increase was primarily due to inventory repossessed from a commercial borrower that ceased operations.

Net interest income for the three months ended June 30, 2011 increased \$5,000 over the comparative period in 2010. Net interest income for the six months ended June 30, 2011 decreased \$77,000 over the comparative period in 2010, primarily due to a reduction in general market rates. Non-interest income for the three and six-month periods in 2011 were \$658,000 and \$480,000, respectively, less than the comparative periods in 2010 primarily due to death

benefits received from bank owned life insurance during the second quarter 2010.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Non-interest expense for the three and six months ended June 30, 2011 increased \$110,000 and \$704,000, respectively, from the comparative periods in 2010 primarily due to increases in salaries and employee benefits.

Net Interest Income

Three Months Ended June 30, 2011 vs. 2010.

LCNB's primary source of earnings is net interest income, which is the difference between earnings from loans and other investments and interest paid on deposits and other liabilities. The following table presents, for the three months ended June 30, 2011 and 2010, average balances for interest-earning assets and interest-bearing liabilities, the income or expense related to each item, and the resulting average yields earned or rates paid.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

The following table presents the changes in taxable-equivalent basis interest income and expense for each major category of interest-earning assets and interest-bearing liabilities and the amount of change attributable to volume and rate changes for the three months ended June 30, 2011 as compared to the same period in 2010. Changes not solely attributable to rate or volume have been allocated to volume and rate changes in proportion to the relationship of absolute dollar amounts of the changes in each.

	Three Months Ended June 30, 2011 vs. 2010

Net interest income	\$ 155	(223)	(68)

Net interest income on a fully tax-equivalent basis for the three months ended June 30, 2011 totaled \$6,762,000, a decrease of \$68,000 from the comparable period in 2010. Total interest income decreased \$506,000, partially offset by a decrease in total interest expense of \$438,000.

The decrease in total interest income was due to a 55 basis point (one basis point equals 0.01%) decrease in the average rate earned on earning assets, partially offset by a \$38.7 million increase in average earning assets. The increase in interest earning assets was primarily due to a \$38.5 million increase in average investment securities. The decrease in the average rate earned on earning assets was primarily due to general decreases in market interest rates.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

The decrease in total interest expense was primarily due to a 35 basis point decrease in the average rate paid, partially offset by a \$27.3 million increase in average interest-bearing liabilities. The decrease in the average rate paid on interest-bearing liabilities was primarily due to general decreases in market interest rates. The increase in average interest-bearing liabilities was due to a \$22.3 million increase in average interest-bearing deposits primarily resulting from an increase in public funds and continuing consumer trends and a \$6.7 million increase in average short-term borrowings.

Six Months Ended June 30, 2011 vs. 2010.

The following table presents, for the six months ended June 30, 2011 and 2010, average balances for interest-earning assets and interest-bearing liabilities, the income or expense related to each item, and the resultant average yields earned or rates paid.

- (1) Includes nonaccrual loans, if any. Income from tax-exempt loans is included in interest income on a tax-equivalent basis, using an incremental rate of 34%.
- (2) Income from tax-exempt securities is included in interest income on a taxable-equivalent basis. Interest income has been divided by a factor comprised of the complement of the incremental tax rate of 34%.
- (3) The net interest spread is the difference between the average rate on total interest-earning assets and interest-bearing liabilities.
- (4) The net interest margin is the taxable-equivalent net interest income divided by average interest-earning assets.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

The following table presents the changes in taxable-equivalent basis interest income and expense for each major category of interest-earning assets and interest-bearing liabilities and the amount of change attributable to volume and rate changes for the six months ended June 30, 2011 as compared to the same period in 2010.

	Six Months Ended June 30, 2011 vs. 2010 Increase (decrease) due to:		
	Volume	Rate (In thousands)	Total
Interest-earning Assets:			
Loans	\$ 11	(647)	(636)

Total interest income	376	(1,407)	(1,031)
Interest-bearing Liabilities:			
Deposits	107	(928)	(821)
Short-term borrowings	9	(5)	4
Long-term debt	(6)	(5)	(11)
Total interest expense	110	(938)	(828)
Net interest income	\$ 266	(469)	(203)

Net interest income on a fully tax-equivalent basis for the first half of 2011 totaled \$13,484,000, a \$203,000 decrease from the first half of 2010. Total interest income decreased \$1,031,000, largely offset by an \$828,000 decrease in total interest expense.

The decrease in total interest income was due to a 52 basis point decrease in the average rate earned on earning assets, partially offset by a \$31.4 million increase in average total earning assets. The increase in average earning assets was due to a \$33.5 million increase in average investment securities. The decrease in the average rate earned on earning assets was primarily due to general decreases in market interest rates.

LCNB CORP. AND SUBSIDIARIES

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

The decrease in total interest expense was due primarily to a 32 basis point decrease in the average rate paid on interest-bearing liabilities, partially offset by a \$20.9 million increase in average interest-bearing liabilities. The increase in average interest-bearing liabilities was due to a \$15.6 million increase in average interest-bearing deposits primarily resulting from an increase in public funds and continuing consumer trends and a \$5.7 million increase in average short-term borrowings. The decrease in the average rate paid also reflects a general decrease in market rates.

Provision and Allowance For Loan Losses

The total provision for loan losses is determined based upon management's evaluation as to the amount needed to maintain the allowance for loan losses at a level considered appropriate in relation to the risk of losses inherent in the portfolio. In addition to historic charge-off percentages, factors taken into consideration to determine the adequacy of the allowance for loan losses include the nature, volume, and consistency of the loan portfolio, overall portfolio quality, a review of specific problem loans, and current economic conditions that may affect borrowers' ability to pay. The provision for loan losses for the three months ended June 30, 2011 and 2010 was \$224,000 and \$511,000, respectively, and \$888,000 and \$719,000 for the six months ended June 30, 2011 and 2010, respectively. The increase in the provision for the six-month period reflects an increase in non-accrual and delinquent loans, the net charge-off trend, and current economic conditions. The decrease for the three-month period reflects a decrease in the volume of newly identified impaired loans.

Non-Interest Income

Three Months Ended June 30, 2011 vs. 2010.

Non-interest income for the second quarter of 2011 was \$658,000 less than for the comparable period in 2010. The decrease was due to bank owned life insurance income, which decreased \$796,000 primarily due to the absence of death benefits received during the second quarter 2010.

Six Months Ended June 30, 2011 vs. 2010.

Non-interest income for the first half of 2011 was \$480,000 less than for the comparable period in 2010. The decrease was due to an \$803,000 decrease in bank owned life insurance income for the same reason discussed above. Partially offsetting this decrease was a \$291,000 increase in net gains from sales of securities and a \$109,000 increase in trust income. Gains from sales of securities increased due to a greater volume of sales and trust income increased primarily due to an increase in the amount of trust assets managed.

Non-Interest Expense

Three Months Ended June 30, 2011 vs. 2010.

Total non-interest expense increased \$110,000 during the second quarter 2011 as compared to the second quarter 2010 primarily due to increases in salaries and employee benefits.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Six Months Ended June 30, 2011 vs. 2010.

Total non-interest expense increased \$704,000 during the first half of 2011 as compared to the first half of 2010 primarily due to a \$468,000 increase in salaries and employee benefits and a \$225,000 increase in other non-interest expense. Other non-interest expense for the first half of 2011 includes a \$56,000 loss, net of recoveries received during the second quarter 2011, recognized on a standby letter of credit, \$52,000 in environmental remediation costs for the lot on which LCNB's new Lebanon Drive-Up facility is located, and other smaller miscellaneous increases.

Income Taxes

LCNB's effective tax rates for continuing operations for the six months ended June 30, 2011 and 2010 were 23.2% and 19.4%, respectively. The difference between the statutory rate of 34.0% and the effective tax rate is primarily due to tax-exempt interest income from municipal securities and tax-exempt earnings from bank owned life insurance.

Financial Condition

Total assets at June 30, 2011 were \$32.8 million greater than at December 31, 2010. The increase in total assets is primarily due to a \$15.8 million increase in cash and cash equivalents and a \$14.9 million increase in available-for-sale investment securities. Most of the growth in available-for-sale investment securities was in U.S. Agency notes, which increased \$25.4 million. This increase was partially offset by a \$9.1 million decrease in non-taxable municipal securities.

Net loans increased \$2.1 million. This increase was composed of a \$2.6 million increase in gross loans, partially offset by a \$468,000 increase in the allowance for loan losses. Commercial real estate loans increased \$10.8 million, partially offset by decreases in other loan categories. Consumer loans decreased \$2.7 million due to weak demand for new loans, commercial and industrial loans decreased \$2.6 million, and residential real estate loans decreased \$2.7 million largely because the majority of loans originated during the first half of 2011 were sold to the Federal Home Loan Mortgage Corporation. Residential mortgage loans sold during the first half totaled \$2.7 million.

Total deposits were \$40.2 million greater at June 30, 2011 than at December 31, 2010, primarily due to a \$32.9 million increase in public fund deposits by local government entities. Public fund deposits can be relatively volatile due to seasonal tax collections and the financial needs of the local entities. LCNB believes that much of the increase during the first half was due to seasonal property and other tax receipts. The deposit growth was used to reduce short-term borrowings, which decreased \$9.5 million between June 30, 2011 and December 31, 2010, fund growth in the loan and investment portfolios, and enhance LCNB's liquidity position for anticipated future needs.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Liquidity

LCNB depends on dividends from its subsidiaries for the majority of its liquid assets, including the cash needed to pay dividends to its shareholders. National banking law limits the amount of dividends the Bank may pay to the sum of retained net income, as defined, for the current year plus retained net income for the previous two years. Prior approval from the Office of the Comptroller of the Currency, the Bank's primary regulator, is necessary for the Bank to pay dividends in excess of this amount. In addition, dividend payments may not reduce capital levels below minimum regulatory guidelines. Management believes the Bank will be able to pay anticipated dividends to LCNB without needing to request approval.

Liquidity is the ability to have funds available at all times to meet the commitments of LCNB. Asset liquidity is provided by cash and assets which are readily marketable or pledgeable or which will mature in the near future. Liquid assets include cash and cash equivalents and securities available for sale. At June 30, 2011, LCNB's liquid assets amounted to \$277.6 million or 35.0% of total assets, an increase from \$246.9 million or 32.5% of total assets at December 31, 2010.

Liquidity is also provided by access to core funding sources, primarily core depositors in the bank's market area. Approximately 77.7% of total deposits at June 30, 2011 were "core" deposits, compared to 81.8% of deposits at December 31, 2010. Core deposits, for this purpose, are defined as total deposits less public funds and certificates of deposit greater than \$100,000. The percentage of core deposits to total deposits decreased because of the growth in public fund deposits discussed above in relation to total growth in deposits.

Secondary sources of liquidity include LCNB's ability to sell loan participations, borrow funds from the Federal Home Loan Bank, purchase federal funds, issue repurchase agreements, or use a line of credit established with another bank.

Management closely monitors the level of liquid assets available to meet ongoing funding needs. It is management's intent to maintain adequate liquidity so that sufficient funds are readily available at a reasonable cost. LCNB experienced no liquidity or operational problems as a result of the current liquidity levels.

Item 3. Quantitative and Qualitative Disclosures about Market Risks

Market risk for LCNB is primarily interest rate risk. LCNB attempts to mitigate this risk through asset/liability management strategies designed to decrease the vulnerability of its earnings to material and prolonged changes in interest rates. LCNB does not use derivatives such as interest rate swaps, caps, or floors to hedge this risk. LCNB has not entered into any market risk instruments for trading purposes.

The Bank's Asset and Liability Management Committee ("ALCO") primarily uses a combination of Interest Rate Sensitivity Analysis ("IRSA") and Economic Value of Equity ("EVE") analysis for measuring and managing interest rate risk. IRSA is used to estimate the effect on net interest income during a one-year period of instantaneous and sustained movements in interest rates, also called interest rate shocks, of 100, 200, and 300 basis points. Management considers the results of the down 200 and down 300 basis point scenarios to not be meaningful in the current interest rate environment. The base projection uses a current interest rate scenario. As shown below, the June 30, 2011 IRSA indicates that both an increase and a decrease in interest rates would have a positive effect on net interest income ("NII"), except for the up 100 basis points scenario. The changes in NII for all rate assumptions are within LCNB's acceptable ranges.

Rate Shock Scenario in Basis Points	Amount	\$ Change in NII (Dollars in thousands)	% Change in NII	
Up 300	\$ 25,264	135	0.54	%
Up 200	25,189	60	0.24	%
Up 100	25,107	(22)	-0.09	%
Base	25,129	-	-	%
Down 100	25,240	111	0.44	%

IRSA shows the effect on NII during a one-year period only. A more long-range model is the EVE analysis, which shows the estimated present value of future cash inflows from interest-earning assets less the present value of future cash outflows for interest-bearing liabilities for the same rate shocks. As shown below, the June 30, 2011 EVE analysis indicates that an increase in interest rates would have a negative effect on the EVE and a decrease in rates would have a positive effect on the EVE. The changes in EVE for the up 300 basis points scenario is slightly outside LCNB's policy range of a 25% change, but management has determined the changes are acceptable in the current economic environment.

Rate Shock Scenario in Basis Points	Amount	\$ Change in EVE (Dollars in thousands)	% Change in EVE	
Up 300	\$ 64,228	(22,725)	-26.13	%
Up 200	71,136	(15,817)	-18.19	%
Up 100	78,644	(8,309)	-9.56	%
Base	86,953	-	-	%
Down 100	95,164	8,211	9.44	%

Item 3. Quantitative and Qualitative Disclosures about Market Risks (continued)

The IRSA and EVE simulations discussed above are not projections of future income or equity and should not be relied on as being indicative of future operating results. Assumptions used, including the nature and timing of interest rate levels, yield curve shape, prepayments on loans and securities, deposit decay rates, pricing decisions on loans and deposits, and reinvestment or replacement of asset and liability cash flows, are inherently uncertain and, as a result, the models cannot precisely measure future net interest income or equity. Furthermore, the models do not reflect actions that borrowers, depositors, and management may take in response to changing economic conditions and interest rate levels.

Item 4. Controls and Procedures

a) Disclosure controls and procedures. The Chief Executive Officer and the Chief Financial Officer have carried out an evaluation of the effectiveness of LCNB's disclosure controls and procedures that ensure that information relating to LCNB required to be disclosed by LCNB in the reports that it files or submits under the Securities and Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to LCNB's management, including its principal executive officer and principal financial officer, as appropriate, in order to allow timely decisions to be made regarding required disclosures. Based upon this evaluation, these officers have concluded, that as of June 30, 2011, LCNB's disclosure controls and procedures were effective.

b) Changes in internal control over financial reporting. During the period covered by this report, there were no changes in LCNB's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, LCNB's internal control over financial reporting.

Item 1A. Risk Factors

The Dodd-Frank Act directs the Federal Reserve to set interchange rates in electronic debit card transactions involving issuers with more than \$10 billion in assets. On June 29, 2011, the Federal Reserve issued a final rule, which goes into effect on October 1, 2011, setting the maximum interchange fee an issuer may receive at the sum of 21 cents per transaction plus five basis points multiplied by the value of the transaction. The Federal Reserve also issued an interim final rule that allows for an upward adjustment of at most one cent to an issuer's debit card interchange fee if the issuer develops and implements policies and procedures to achieve the fraud prevention standards detailed in the interim final rule. Although institutions with \$10 billion or less in total assets will be exempt from the new rules, many within the financial institutions industry believe that smaller institutions will need to match the pricing of those institutions with assets greater than \$10 billion or lose business to the larger institutions. The effect of the new rules on LCNB's income statement cannot be predicted at this time.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

During the period of this report, LCNB did not sell any of its securities that were not registered under the Securities Act.

During the period covered by this report, LCNB did not purchase any shares of its equity securities.
