CHANGE IN CONTROL - THE STOCK TRANSACTIONS

Stock Purchase and Recapitalization Agreement

On September 18, 2006, Australian Forest Industries, a Nevada corporation (the "Company") and SIMBA Mines, Inc., a Nevada corporation ("SIMBA") entered into Stock Purchase and Recapitalization Agreement (the "Stock Purchase Agreement") pursuant to which the Company purchased from SIMBA all of the issued and outstanding shares of its wholly-owned subsidiary Simbajamba Mines Limited, a company incorporated pursuant to the laws of Samoa ("Simbajamba") (the "Simbajamba Stock Transaction"). The Stock Purchase Agreement was approved by the Board of Directors of each of the Company and SIMBA on September 18, 2006.

In consideration for the Simbajamba Stock Transaction, the stockholders of SIMBA shall receive a convertible promissory note of the Company in favor of SIMBA in the amount of US\$41,547,000 (the "Convertible Note"); and (ii) the settlement of all outstanding loan balances between the Company and SIMBA. The Convertible Note is due in 28 days from the date of the consummation of the Stock Purchase. The terms of the Note provide that the Note will, upon maturity, at the option of SIMBA, convert to 5,193,375 shares of common stock of the Company (post Consolidation as discussed herein) with a book value of US\$8.00 per share. In addition, the Agreement provides that, immediately after the effective closing date of the Stock Purchase Agreement, with the exception of the Chairman, Mr. Michael Timms, the members of the Board of Directors and officers of the Company shall resign and Board of Directors of the Company will consist of Michael Timms, Ian R. Egan, Mark Smyth, David Furlong, Teddy Lourenco de Almeida and Luis Cupenala. Each of these events undertaken without respect to the other constitutes a "change in control."

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

The Stock Purchase Agreement provides that the Company's name will be changed to Zebra Copper, Inc. through an amendment to its Certificate of Incorporation (referred to herein as the "Amendment"). In addition, in order to consummate the transaction contemplated by the Stock Purchase Agreement, the Company prior to the consummation of the transactions contemplated by the Stock Purchase Agreement shall: (i) complete a reverse split of its common stock on a 515.20136 -for-1 basis; and (ii) incorporate an Australian company, Australian Forest Industries Limited ("AFIL") and transfer all of the issued and outstanding equity of Integrated Forest Products Pty Ltd, a company incorporated pursuant to the laws of Australia and a wholly-owned subsidiary of the Company, to AFIL; (iii) following the IFP Transfer, distribute all of the issued and outstanding equity of AFIL to the shareholders of the Company in the form of a dividend.

Share Sale Agreement of Shares in Rockbury Properties Limited

Also on September 18, 2006, the Company and Bongani International Group Limited ("BIG"), a company incorporated pursuant to the laws of the British Virgin Islands, entered into a shares sale agreement of Shares in Rockbury Properties Limited (the "Share Sale Agreement") pursuant to which the Company purchased from BIG all of the issued and outstanding shares of its wholly-owned subsidiary, Rockbury Properties Limited ("Rockbury"), a company incorporated pursuant to the laws of the British Virgin Islands (the "Rockbury Share Transaction" and together with the Simbajamba Stock Transaction, the "Stock Transactions"). The Share Sale Agreement was approved by the Board of Directors of each of the Company and BIG on September 18, 2006. In consideration for the Share Sale Agreement, the stockholders of BIG shall receive 4,806,625 shares of common stock of the Company (post consolidation); and (b) the settlement of all outstanding loan balances between BIG and Rockbury. The Rockbury Share Transaction will not be consummated until the completion of an audit of Rockbury Properties Limited by an auditor which is approved by the Company.

The following are answers to some of the questions about the Stock Transactions that you, as one of our stockholders, may have. We urge you to read this Information Statement, including the Stock Purchase Agreement and the Share Sale Agreement, (together, the "Agreements"), attached hereto as Appendix A and B, carefully because the information in this section is not complete.

Has the Board of Directors approved the Stock Transactions?

Yes. On September 18, 2006 our Board of Directors approved the Agreements and all of the transactions and developments contemplated thereby (including the change of our name to "Zebra Copper, Inc." and the reverse split of the Company's common stock on a 515.20136 -for-1 basis ").

Why are the companies entering into the Stock Transaction?

The Board of Directors of each of our company, SIMBA and BIG have determined that a business combination between the three represents an opportunity for the shareholders of each company to participate in the attractive business of copper mining. The Stock transactions will give the Company access to resources and capital which is necessary to effectively implement its business plans.

How are the number of issued and outstanding shares of our Common Stock decreased?

The Board approved resolutions to effect a reverse split of the Company's common stock on a 515.20136 -for-1 basis. Under this reverse stock split each 515.20136

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

shares of our Common Stock will be converted automatically into 1 share of Common Stock. To avoid the issuance of fractional shares of Common Stock, the Company will issue an additional share to all holders of a fractional share. The effective date of the reverse stock split will be January 12, 2007.

PLEASE NOTE THAT THE REVERSE STOCK SPLIT WILL NOT CHANGE YOUR PROPORTIONATE EQUITY INTERESTS IN THE COMPANY, EXCEPT AS MAY RESULT FROM THE ISSUANCE OR CANCELLATION OF SHARES PURSUANT TO THE FRACTIONAL SHARES.

What are the material effects of the reverse stock split?

As a result of the Stock Purchase Agreement, the Company must recapitalize itself by performing a reverse stock split. When a company engages in a reverse stock split, it substitutes one share of stock for a predetermined amount of shares of stock. It does not increase the market capitalization of the company. An example of a reverse split is the following. For example, a company has 10,000,000 shares of common stock outstanding. Assume the market price is \$.01 per share. Assume that that company declares a 1 for 5 reverse stock split. After the reverse split, that company will have 1/5 as many shares outstanding or 2,000,000 shares outstanding. The stock will have a market price of \$.05. If an individual investor owned 10,000 shares of that company before the split at \$.01 per share, he will own 2,000 shares at \$.05 after the split. In either case, his stock will be worth \$100. He's no better off before or after. Except that such company hopes that the higher stock price will make that company look better and thus the company will be a more attractive merger target for potential business. There is no assurance that that Company's stock will rise in price after a reverse split or that a suitable merger candidate will emerge.

The reverse split will affect all of our stockholders uniformly and will not affect any stockholder's percentage ownership interests in the Company or proportionate voting power, except to the extent that the reverse split results in any of our stockholders owning a fractional share. In lieu of issuing fractional shares, one share will be issued to all holders of a fractional share .50 or greater and the fractional share of less than .50 will be cancelled.

The principal effect of the reverse split will be that the number of shares of Common Stock issued and outstanding will be reduced from 257,400,680 shares as of January 11, 2007 to approximately 501,249 shares on January 12, 2007 (depending on the number of fractional shares that are issued or cancelled). The number of authorized shares of Common Stock will not be affected.

The reverse split will not affect the par value of our Common Stock. As a result, on the effective date of the reverse split, the stated capital on our balance sheet attributable to our Common Stock will be reduced to up to 1/515.20136 of its present amount, and the additional paid-in capital account shall be credited with the amount by which the stated capital is reduced. The per share net income or loss and net book value of our Common Stock will be increased because there will be fewer shares of our Common Stock outstanding.

The reverse split will not change the proportionate equity interests of our stockholders, nor will the respective voting rights and other rights of stockholders be altered, except for possible immaterial changes due to the cancellation of fractional shares. The Common Stock issued pursuant to the reverse split will remain fully paid and non-assessable. The reverse split is not intended as, and will not have the effect of, a "going private transaction" covered by Rule 13e-3 under the Securities Exchange Act of 1934. We will continue to be subject to the periodic reporting requirements of the Securities Exchange Act of 1934.

Stockholders should recognize that they will own a fewer number of shares than they presently own (a number equal to the number of shares owned immediately prior to the filing of the certificate of amendment divided by 515.20136) and

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

will be significantly diluted as a result of the issuances contemplated in the Stock Purchase Agreement.

What is the procedure for exchange of stock certificates?

The reverse split will become effective on January 12, 2007, which we will refer to as the "effective date." Beginning on the effective date, each certificate representing pre-reverse split shares will be deemed for all corporate purposes to evidence ownership of post-reverse split shares.

3

Our transfer agent, Transfer Online, will act as exchange agent for purposes of implementing the exchange of stock certificates and payment of fractional share interests. We refer to such person as the "exchange agent." Holders of pre-reverse split shares are asked to surrender to the exchange agent certificates representing pre-reverse split shares in exchange for certificates representing post-reverse split shares in accordance with the procedures set forth in the letter of transmittal enclosed with this Information Statement. No new certificates will be issued to a stockholder until that stockholder has surrendered the stockholder's outstanding certificate(s) together with the properly completed and executed letter of transmittal.

Our stockholders are not entitled to appraisal rights under the Nevada Revised Statutes in connection with the reverse stock split.

STOCKHOLDERS SHOULD NOT DESTROY ANY STOCK CERTIFICATE AND SHOULD NOT SUBMIT ANY CERTIFICATES WITHOUT THE LETTER OF TRANSMITTAL.

Will Fractional Shares be issued?

We will not issue fractional certificates for post-reverse split shares in connection with the reverse split. Instead, an additional share shall be issued to all holders of a fractional share

STOCKHOLDERS SHOULD NOT DESTROY ANY STOCK CERTIFICATE AND SHOULD NOT SUBMIT ANY CERTIFICATES WITHOUT THE LETTER OF TRANSMITTAL.

Summary of Reverse Stock Split

Below is a brief summary of the reverse stock split:

- o The issued and outstanding Common Stock shall be reduced on the basis of 1 post-split share of the Common Stock for every 515.20136 pre-split shares of the Common Stock outstanding. The consolidation shall not affect any rights, privileges or obligations with respect to the shares of the Common Stock existing prior to the consolidation.

4

- o Stockholders of record of the Common Stock as of January 11, 2007 shall have their total shares reduced on the basis of one post-split share of Common Stock for every 515.20136 pre-split shares outstanding.
- o As a result of the reduction of the Common Stock the pre-split total of issued and outstanding shares of 257,400,680 shall be consolidated to a total of approximately 501,249 issued and outstanding shares (depending on the number of fractional shares

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

that are be issued or cancelled).

- o The Company's authorized number of common stock shall remain at 300,000,000 shares of the Common Stock.

This action has been approved by the Board and the written consents of the holders of the majority of the outstanding voting capital stock of the Company.

Do I have the right to vote on the Stock Transfers?

No, you do not. If we were holding a meeting to approve such proposals, our stockholders would be entitled to consider and vote upon the Stock Transfers. Stockholders of the Company representing 93.24% of all of the issued and outstanding common stock of the Company have executed a written consent approving the Stock Transactions, so no further approval is required.

Do I have the right to vote on the Amendment?

No, you do not. If we were holding a meeting to approve such proposals, our stockholders would be entitled to consider and vote upon the Amendment. However, we are not holding a meeting of our stockholders, nor are we soliciting proxies in favor of such a proposal. Stockholders of the Company representing 93.24% of all of the issued and outstanding common stock of the Company have executed a written consent approving the Amendment, so no further approval is required.

Will the Stock Transactions effect where our shares of common stock are traded?

Our shares of common stock are currently traded on the over the counter electronic bulletin board ("OTC") under the symbol AUF1. The Stock Transactions will not affect where our shares are traded.

When do you expect the Stock Transactions to be completed?

We hope to complete the Stock Transactions as soon as possible, assuming that all of the conditions to the closing of the Stock Transactions as set forth in the Agreements are either waived or completed to the satisfaction of the parties.

Change in Control

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

The change in the majority of the directors of the Company will occur by virtue of the closing of the transactions contemplated by the Stock Purchase Agreement (the "Closing"). The Company's Board of Directors currently consists of Michael Timms, Colin Baird, Antony Esplin and Roger Timms (the "Board"). Messrs. Baird, Esplin and R. Timms have submitted letters of resignation from the Board to take effect contemporaneously with the Closing. The members of the Board and stockholders of the Company representing 93.24% of the issued and outstanding common stock of the Company have also executed written consents that in the event of Closing appoint Ian R. Egan, Mark Smyth, David Furlong, Teddy Lourenco de Almeida and Luis Cupenala to fill the vacancies on the Board to be created by the foregoing resignations. Michael Timms shall remain Chairman of the Board.

In consideration for the Simbajamba Stock Transaction, SIMBA shall receive a convertible promissory note of the Company in favor of SIMBA in the amount of US\$41,547,000 (the "Convertible Note"); and (ii) the settlement of all outstanding loan balances between the Company and SIMBA. The Convertible Note is due in 28 days from the date of the consummation of the Stock Purchase. The terms of the Note provide that the Note will, upon maturity, at the option of SIMBA, convert to 5,193,375 shares of common stock of the Company (post Consolidation as discussed herein) with a book value of US\$8.00 per share which, following the reverse stock split will equal 49.45% of the issued and outstanding common stock of the Company assuming the consummation of each the Simbajamba and Rockbury transactions.

In addition, in consideration for the Share Sale Agreement, BIG shall receive: (i) 4,806,625 shares of common stock of the Company (post reverse stock split) (ii) the settlement of all outstanding loan balances between the Company and BIG. Thus the shares of common stock issueable upon the conversion of the convertible note and the shares to be issued upon the closing of the Share Sale Agreement will equal 45.77% of the issued and outstanding common stock of the Company assuming the consummation of each the Simbajamba and Rockbury transactions.

6

The Agreements and the Stock Transactions contemplated thereby has been approved by the Company's Board of Directors and consented to by stockholders of the Company representing 93.24% of the issued and outstanding common stock of the Company. The amendment to the Company's Certificate of Incorporation changing the name of the Company from "Australian Forest Industries" to "Zebra Copper, Inc." has been approved by the Company's Board of Directors and consented to by stockholders of the Company representing 93.24% of the issued and outstanding common stock of the Company. Accordingly, none of the actions described in this Information Statement will be submitted for a vote to the stockholders of the Company. The Company prepared this notice on its own behalf.

BUSINESS OF THE COMPANY

General

The business of the Company consists of a pine sawmilling and timber facility at Canberra, Australia which has a capacity to process 200,000 cubic meters of sawn timber. This sawmill produced 120,000 cubic meters of log in the Fiscal Year 2005. The Company is currently in the process of arranging the financing for the construction of a second sawmill.

13

With this second sawmill, the Company intends to exploit the log resource generated by our contract with Timbermans Group which grants us the right to the Bombala Agreement described below.

The majority of the issued and outstanding ordinary shares in the capital of the Company are held by Timbermans Group, a leading supplier of softwood timber products in Australia. The shareholders of Timbermans Group are the same individuals who comprise the Company's board of directors (except for Norman Backman who resigned from the board of directors on September 27, 2006).

The timber industry in Australia experienced a strong demand from internal growth in residential and commercial construction along the Eastern coast of Australia. Additionally, export demand from China and elsewhere in Asia for lumber and other wood products continued to be very strong in recent years and management expects that this trend will continue in the foreseeable future.

In April 2003, Timbermans Group Pty Ltd entered into an agreement with the government of New South Wales which granted Timbermans the 20 year wood supply rights to timber from the Bombala forest, equal to approximately 300,000 cubic meters of wood ("Bombala Agreement"). This Agreement was assigned to the Company at that time with the full knowledge of the New South Wales Government. Management believes that this is the last significant undeveloped pine forest in Eastern Australia. The Bombala Agreement provides, inter alia, that the log purchase price review mechanism is linked to the sawn timber actual price achieved for the products produced at the new sawmill to be built at Bombala, the market price for structural radiata pine timber, the ABS producer price index for softwood in Sydney and input costs such as wages and fuel. This mechanism is expected to adequately protect the Company from any decreasing market prices and in part from increased costs during the term of the Bombala Agreement. With the signing of the Bombala Agreement, the Company has insured its supply for at least 20 years and is renewable at the Company's option. With this asset the Company believes it has secured a major asset.

The Company's core markets are Australia and Southern Asia. The Company's revenues are generated solely in its core markets.

Trademarks and Service Marks

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

The Company has not registered any marks with the United States Patent and Trademark Office.

14

Employees

At the end of December 2006, we employed 121 full time employees. In the Company's vision, employees play a crucial role in the success of the Company. The Company encourages its employees to take initiative to further enhance the Company's efficiency in timber production. The Company has never experienced a work stoppage resulting from labor problems.

The Company's employees are members of the CFMEU which is one of the largest unions in Australia. As a result, each non-executive employee is a party to a collective bargaining agreement known as an Enterprise Bargaining Agreement which determines the terms of employment of each non-executive employee. Management believes that its relations with such union are impeccable and the risk of work stoppages is extremely unlikely.

Indemnification

Section 78.751 of the Nevada Revised Statutes enables a corporation in its original articles of incorporation or an amendment to eliminate or limit the personal liability of a director to a corporation or its stockholders for violations of the director's fiduciary duty, except:

- o for any breach of a director's duty of loyalty to the corporation or its stockholders;
- o for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law; or

The Company's Articles of Incorporation provides in effect for the elimination of the liability of directors to the extent permitted by the Nevada Revised Statutes.

Section 78.7502 of the Nevada Revised Statutes provides, in summary, that directors and officers of Nevada corporations are entitled, under certain circumstances, to be indemnified against all expenses and liabilities (including attorney's fees) incurred by them as a result of suits brought against them in their capacity as a director or officer, if they acted in good faith and in a manner they reasonably believed to be in or not opposed to the best interests of the corporation, and, with respect to any criminal action or proceeding, if they had no reasonable cause to believe their conduct was unlawful; provided, that no indemnification may be made against expenses in respect of any claim, issue or matter as to which they shall have been adjudged to be liable to the corporation, unless and only to the extent that the court in which such action or suit was brought shall determine upon application that, despite the adjudication of liability but in view of all the circumstances of the case, they are fairly and reasonably entitled to indemnity for such expenses which the court shall deem proper. The mineral rights for the Cachoeiras de Binga license were granted by the Government of Angola in January 2006. The rights for the Benguela and Zenza/Dondo license were also granted in January 2006. Each License is more fully described below. Simbajamba was incorporated in the country of Samoa on January 19, 2004 pursuant to Samoa's International Companies Act of 1987 and is in the development stage.

Business Strategy

A major work program is required to convert the measured resource to a proven reserve status so that plant construction can commence. The directors of SIMBA decided that the optimum way to fund their program would be to transfer everything to a company with a fully reporting 12g status and OTCBB exchange listing to provide the financial transparency related to secure efficient financing. Accordingly on September 18, 2006 SIMBA entered into the Stock Purchase Agreement with the Company.

Competition

Copper is readily tradable on the open market. Thus any production from the company's deposits should be able to place in the market at the market price for product. Currently copper metal is priced at around \$3.00 per pound. Copper is a malleable and ductile metal used heavily in building construction, transportation, electrical, automotive and telecommunications. With China and India and other growing economies drawing down global inventories, supply has difficulty keeping pace with demand.

19

The mineralogy and geometry of the Cachoeiras de Binga ore bodies is relatively simple and it is anticipated that an extraction system can be based upon:-

- o opencast mining or underground mining, depending upon overburden thickness: underground mining would be low-cost, trackless and

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

- o linked to the developing open cuts
- o heap leach of the ore
- o electro winning of the copper on site or export of a processed product to a toll refinery

A final proposal for an operational program can be designed after the Company's exploration program is complete.

Overview

BIG is a private investment company. A subsidiary of BIG is Rockbury Properties Limited ("Rockbury") which holds a 40% interest in the Cachoeiras de Binga license and a 35% interest in each of two nearby licenses known as Benguela and Zenza. Each License is more fully described below. Rockbury Properties Limited was incorporated in the British Virgin Islands on 21 July 2005.

Benguela and Zenza are still at the exploration stage. However Cachoeiras de Binga, according to compiled reports, has a measured resource of approximately 131 thousand tons of copper metal and an inferred copper resource of 918 thousand tons of copper metal.

CACHOEIRAS DE BINGA LICENSE

The Cachoeiras de Binga License was granted by the Republic of Angola Ministry of Geology and Mining on January 18, 2006 for a term of three years at which time the exploration license will be converted to a mining license that will be held by the Company for the life of the mine. Under the terms of the License, the Company is required to perform certain tasks and to make annual payments of US\$30,000 to the Angola Ministry of Geology and Mining. Assuming the consummation of each of the Simbajamba and Rockbury transactions, the Company (through its subsidiaries) would control 80% of the License rights. The Company is currently in negotiations to purchase the remaining 20% of the License rights.

Location

The Cachoeiras de Binga license block lies immediately to the east of the regional town of Sumbe, some 385 kilometers south of Luanda on the main coastal road. The block is defined by the following coordinates.

Vertex	Latitude			Longitude		
	Deg.	Min.	Sec.	Deg.	Min.	Sec.
A	10	44	12	13	50	48
B	10	44	12	14	08	12
C	11	45	18	14	08	12
D	11	45	18	14	00	00
E	11	53	30	14	00	00
F	11	53	30	13	50	48

The block covers an area of 3,615 square kilometers and extends approximately 35 kilometers east - west and 127 kilometers north - south.

Geology

The block straddles the Cretaceous Kwanza Basin and the Pre - Cambrian Basement. The copper occurrences lie within the Lower Cretaceous of the Kwanza Basin. The copper ores are present in the basal sediments of the Lower Cretaceous (mainly the Upper Cuvo Formation) and they are contained in stratiform ore - bodies in finely bedded mudstones, siltstones and conglomeratic sandstone.

Three broad stratigraphic units can be distinguished in the area, a basal terrigenous unit of lower Aptian age, unconformably overlying the Pre -Cambrian Basement, a middle evaporitic unit of Aptian - Albian age and an overlying, predominantly marine succession that extends up into the Miocene.

Lower Cuvo Formation

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

The Lower Cuvo Formation consists of reddish continental beds. The formation varies in thickness from 0 - 100 meters as it infills depressions in the underlying basement. Deeply incised palaeovalleys, indicating drainage towards the west, contain boulders of more than 1 meter diameter, directly overlying the basement gneisses, followed by conglomerate and sandstone in a fining - upward sequence. These sediments were derived from a deeply weathered crust on which continental sediments had accumulated since the Palaeozoic and Cretaceous beds with a pure continental affiliation cover vast areas of north - east Angola.

Upper Cuvo Formation

The transitional continental - lagoonal deposits of the Upper Cuvo Formation show the first marine influence and mark the beginning of the marine transgression accompanying Lower Cretaceous oceanic rifting. The Upper Cuvo contains a fining upwards, cyclic sequence of coarse and fine sandstones -with increasingly abundant intercalations of siltstone, marl, limestone and limestone shell beds rich in ostracods. The lagoonal sediments, which include thin beds of anhydrite, gypsum and other salts and finely bedded siltstones with plant and coal remains are typical of euxinic environments in restricted basins. The sulphides (Cu at Cachoeiras de Binga and Zn at Loeta) are contained in the Upper Cuvo Formation.

Evaporite Beds

Towards the centre of the basin, the Upper Cuvo formation passes laterally into and is overlain by a sequence of saline evaporitic cycles and calcareous units of lagoonal and marine origin. The evaporites regionally total 2000 meters in thickness. The basal unit, the so - called "Sel Massif" consisting of 350 meters of halite with anhydrite in the basin centre is considered to be a lateral equivalent of the Upper Cuvo Formation. At Cachoeiras de Binga, the hanging wall limestones are considered to be part of the overlying Binga evaporitic cycle.

Copper Mineralization

The copper mineralization at Cachoeiras de Binga is stratiform and contained in a finely bedded mudstone and siltstone of the Upper Cuvo Formation, and lies just below a massive limestone.

A typical sample of mineralized siltstone is composed of quartz and feldspar grains in calcareous cement, forming light grey bands that alternate with thinner dark laminae containing carbonaceous material. Bornite and chalcopyrite are concentrated in discrete bands that are concordant with the sedimentary laminations of the rock, following such minor primary features as cross laminations. The sulphides are extremely fine grained and occur as irregularly shaped patches intergranular with the detrital particles. Minor chalcocite occurs as small patches throughout the rock but is mostly associated with Bornite. Covellite is rare.

22

The mineralization is remarkably stratiform; lateral thinning of the ore zone corresponds to a diminishing thickness of the sedimentary host. Some drill hole intersections show that the mineralization may extend into the footwall conglomerate or into the overlying limestone. There is an indication of mineral zoning with chalcocite as a principal mineral in the sandstone just below the main ore zone and a greater abundance of pyrite towards the top of the mineralized zone. Peres, the chief of the Angolan Geological Survey research program noted that mineralization appeared to be overlying palaeotroughs in the basement that were filled in by a greater thickness of conglomeratic sandstone.

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

Palaeogeographically, the deposit is located at the southern extremity of the Kwanza Basin where it narrows to an approximately 10 kilometer wide trough. This trough is squeezed between the continental coast of that time and an offshore barrier, the Morro Lisa Ridge, which is located inland from Porto Amboim. The copper bearing formations are laterally transitional into the evaporitic beds (Sel Massif), but the mineralization is not found within the evaporite environment itself. The heavy metals are associated with euxinic environments of small isolated basins along the upland coast, whereas the evaporites are indicative of more open environments with easier access to seawater across low reefs and other barriers.

Historical Work

Two major phases of work have taken place at Cachoeiras de Binga. These are summarized in two reports:

- o Peres, 1971 (Angolan Geological Survey)
- o Croese, 1983 (UNDP)

In 1970 and 1971, Peres of the Angolan Geological Survey reported on an intensive study of the Cachoeiras de Binga Copper Deposit. This report detailed the results of an approximately 5,000m drilling program over 5 areas of the deposit known as Cachoeiras I-V. The result of this program was a 'Proven Reserve' as calculated by Peres of approximately 7.3 Mt @ 2.25%Cu.

The area was re - evaluated in 1982 - 1983 in a UNDP Program led by Croese. This program effectively confirmed the Peres study of Cachoeiras I to III but examined the untested extensions. The testing was based on a limited program of drilling (7 boreholes), some geophysics (resistivity and electromagnetic) and geochemistry carried out under the direction of Russian geologist, Vassiliev. The Vassiliev study, reported in 1983, consisted of geochemical studies of an area of "approximately 90 square kilometers" to the north of the Cuvo River, This demonstrated a northwards extension of the mineral field, of which Cachoeiras de Binga was part. According to Vassiliev, the geochemical results showed that the mineralization was likely to underlie an area of 15 km x 30 km, i.e. 450 to 500 square kilometers extending to the village of Cholo Cholo. Given the grades and thickness encountered at Cachoeiras de Binga, and analysis of his geochemical data, Vassiliev proposed a potential for up to 3 million tones of copper in the area.

A recent independent review by Dr, Michael Smith, consultant to Simbajaiaba, has concluded the following resources at Cachoeiras de Binga (based on the Peres and Croese Reports):

23

Resource	Tons	Grade Cu	Tons Cu
Measured	7,285,800	2.25	163,931
Inferred	51,000,000	2.14	1,147,500

These are of course only based on analysis of data, and have not been verified by drilling. In this regard they are subject to due-diligence and are not N143-101 compliant.

Recent Work

Simbajamba and is currently undertaking an extensive soil geochemistry program at Cachoeiras de Binga, The purpose of this program is to test for extensions of

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

the known mineralization over an area approximately 20 km to the north and south of Cachoeiras I. This program is currently in progress, and to date approximately 700 samples have been taken.

Simbajamba also has also recently commissioned and completed a satellite imagery interpretation and structural geology interpretation of the entire Cachoeiras de Binga license. The results of this study indicate that copper mineralization in the Cachoeiras district is considered to have been controlled by euxinic basins which developed during the early stages of the rifting of the south Atlantic. In addition to the generation of new extensional faults, many of the basement structures would have been reactivated during extension associated with the rifting event, and some of these may have controlled the development of local basins. The Cachoeiras de Binga Copper Deposit is speculated to lie on the northern part of a transtensional basin. As a result of this study, a further 12 exploration targets have been identified and are based on criteria including the presence of possible Cretaceous transtensional or fault bounded basins, major fault zones, inflections and intersections between major faults and proximity to known copper mineralization.

Future Work

The Company's strategy at Cachoeiras de Binga is two-fold; to fast track the project to production, whilst expanding known resources.

The Company's immediate concern at Cachoeiras de Binga is to verify and upgrade the current Measured Resource (7.3 Mt @ 2.25%) to a Proven and Probable Resource. This will be done through a drilling program and associated works over a period of 11 months. It is anticipated that a full bankable feasibility document can be produced within this timeframe.

The verification, expansion and conversion of inferred resources to reserves will be an ongoing program over the project's lifetime.

BENGUELA LICENSE

The Benguela License was granted by the Republic of Angola Ministry of Geology and Mining on January 18, 2006 for a term of three years at which time the exploration license will be converted to a mining license that will be held by the Company for the life of the mine. Under the terms of the License, the Company is required to perform certain tasks and to make annual payments of US\$30,000 to the Angola Ministry of Geology and Mining. Assuming the consummation of each of the Simbajamba and Rockbury transactions, the Company (through its subsidiaries) would control 70% of the License rights. The Company is currently in negotiations to purchase the remaining 30% of the License rights.

Location

24

The Benguela license lies to the south of the Cachoeiras de Binga license, centered around the coastal towns of Benguela and Lobito. The license is defined by the following co-ordinates:

Vertex	Latitude			Longitude		
	Deg.	Min.	Sec.	Deg.	Min.	Sec.
A	13	43	05	12	00	00
B	13	51	16	12	00	00
C	13	51	16	12	45	16
D	13	00	00	11	45	15

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

Geology

The geology of the Benguela district is essentially the same as at Cachoeiras de Binga, and consists of three broad stratigraphic units - a basal terrigenous, unit of Lower Aptian age, unconformably overlying the Pre - Cambrian Basement, a middle evaporitic unit of Aptian - Albian age and an overlying, predominantly marine succession that extends up into the Miocene. The stratigraphy can be summarized as follows:

A - CENOZOIC

1 - Quaternary Formations

1.1 -Recent

1.2-Pleistocene

2 - Tertiary Formations

1.3 - Miocene

1.4 - Oligocene

1.5 -Eocene

B - MEZOZOIC

1 - Cretaceous Formations

1.1 -Santonian

1.2- Cenomanian

1.3 -Albian

1.4 - Aptian - Calcareous Formation

1.5 - Basal Formations

C - PROTEROZOIC

1 - Basement Complex

Copper Mineralization

Copper mineralization at Benguela occurs in two different styles:

- o Vein type copper mineralization in the Basement Complex
- o Stratiform copper mineralization in the lower sedimentary sequence

Vein type mineralization in the basement consists of "infiltration of malachite, chrysocolla and more rarely azurite, in the migmatized gneisses of rock fissures of the region". It would appear that these occurrences are relatively sparse, and are not of any economic interest.

Stratiform copper mineralization occurs in a grey arkosic sandstone at the base of the Cretaceous. This unit is in turn overlain by conglomerates and calcareous and dolomitic limestones. The copper bearing arkosic sandstone unit would appear to be variable in thickness.

25

Historical Work

Whilst no formal, modern exploration appears to have taken place, a number of small mines have been active in the Benguela district during the last century. The most important of these were:

1. Biopio Mine

Small surface pit exploiting oxidized copper ore in sandstones

2. Unhande Mine

Small surface pit exploiting oxidized copper ore in silicified limestones and Sandstones

3. English Mine

Small underground mine (galleries) exploiting oxidized copper ore in red beds,

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

dipping at approximately 25 degrees west

Recent Work

Simbajamba has recently acquired a number of reports and maps relating to the Benguela district. These are currently being translated and digitized.

Future Work

The Company regards the Benguela license as a grass roots exploration project. This is reflected in the proposed work program which details initially a two-phase program consisting of:

- o Reconnaissance and ground truth
- o Phase 1 Exploration
 - |_| Soil Geochemistry
 - |_| Drilling

Given the Benguela license's close proximity to Cachoeiras de Binga, opportunities for cost savings exist, and it is anticipated that both programs can be run together.

ZENZA/DONDO LICENSE

The Zenza/Dondo License was granted by the Republic of Angola Ministry of Geology and Mining on January 18, 2006 for a term of three years at which time the exploration license will be converted to a mining license that will be held by the Company for the life of the mine. Under the terms of the License, the Company is required to perform certain tasks and to make annual payments of US\$30,000 to the Angola Ministry of Geology and Mining. Assuming the consummation of each of the Simbajamba and Rockbury transactions, the Company (through its subsidiaries) would control 70% of the License rights. The Company is currently in negotiations to purchase the remaining 30% of the License rights.

26

Location

The Zenza/Dondo license lies approximately 135 km south east of Luanda in Caunza Norte province. The co-ordinates of the license are as follows:

Vertex	Latitude			Longitude		
	Deg.	Min.	Sec.	Deg.	Min.	Sec.
A	14	06	0	09	05	00
B	14	20	0	09	05	00
C	14	20	0	09	22	00
D	14	06	0	09	22	00

Geology

The regional geology of the Zenza / Dondo is the same as that at Cachoeiras de Binga and Benguela, and consists broadly three stratigraphic units - a basal terrigenous unit of Lower Aptian age, unconformably overlying the Pre - Cambrian Basement, a middle evaporitic unit of Aptian - Albian age and an overlying, predominantly marine succession that extends up into the Miocene. Locally, the stratigraphy is as follows:

- 1) - Superficial deposits with debris of Basement Complex igneous and metamorphic rock

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

2) - Superior clayey limestone, micaceous, fossiliferous, with small, lenticular, embedded sandstone, with a thickness greater than 60 meters.

3) - Red, micaceous, sandstone, clayey-calcareous cement with embedded white, arkosic sandstone, of calcareous cement, part mineralized, with an average thickness of 15 meters.

4) - Inferior limestone, clay, micaceous rock, fossiliferous rock, with lenticular sandstone embedding, with an average thickness of 20 meters.

5) - Pink conglomeratic sandstone, of calcareous-clayey and fossiliferous cement, rock, with clay and limestone embedding, with an average thickness over 50 meters.

These units dip at approximately 12-18 degrees to the south-west and strike approximately 50-60 degrees to the north-west.

The lenticular structure of the observed formations, the granular nature of the sandstones and the existence of conglomeratic levels with remnants of a gneissic-granite complex, demonstrate that the strata were formed under torrential conditions, in shallow waters, near the flank of the continental margins, composed of Pre-Cambrian formations. The white, arkosic sandstone contains abundant fragments of feldspar, becoming at times a type of conglomerate. The facies of this rock is distinctly torrential. There is no clear discordance in the facies in the contacts of the different formations. The passage from one formation to another occurs generally in a gradual way, where one finds intermediate types, with sandy limestone and calcareous sandstone.

Copper Mineralization

Copper ore, in the form of chalcocite, malachite, azurite and chrysocolla, occurs in the white, arkosic sandstone, interstratified in the sandstone and limestone formations detailed above. The layer of white sandstone is present in a lenticular form, with great variety in thickness, from 0.6 to 7 meters. The layer, which strikes between N 60 W and N 50 (degree) W, dips generally towards the SW.

27

Chalcocite is found disseminated irregularly. Malachite, some azurite, and chrysocolla impregnate the cement of the arkosic sandstone, surrounding, at times, the grains of quartz with a thin film, or encrust the walls of small joints. Associated with the copper are tiny grains of galena, dispersed irregularly.

Generally speaking the distribution of the ore is quite irregular. Copper grades taken from trenches and pits through the mineralized zone range up to 8%.

Historical Work

The Zenza Copper deposit was first discovered in 1900, and between 1901 and 1917 a large amount of prospecting was reportedly carried out by the first licensee, a German known as Hans Grundler. It is said that he conducted a pitting, trenching and drilling program, although no records are in existence to verify this.

A report dated 1950 by Trigo Mira, an Engineer from the Angolan Geological Survey, details a substantial amount of work carried out at this time. This consisted of 18 trenches, 70 pits and 7 drill holes, the deepest drilled to a depth of 104 meters. Approximately 370 samples from these activities were

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

assayed for copper.

A topographical survey covering some 700 hectares was also carried out in the area.

Recent Work

Simbajamba has recently acquired a number of reports and maps relating to the Zenza/Dondo copper deposit. These data mostly relate to the 1950 drilling trenching and pining program. This data is currently being digitized and analyzed.

Future Work

As with Benguela, the Company considers the Zenza / DONDO license as a grass roots exploration project. Even though there is a reasonable amount of historical data available, it relates to a relatively small area. The grass roots nature of the project is reflected in the proposed work program, which details initially a two-phase program consisting of:

- o Reconnaissance and ground truth
- o Phase 1 Exploration
 - |_| Soil Geochemistry
 - |_| Drilling

The Zenza / DONDO license is located quite close to the capital, Luanda. It is anticipated that there will be certain common logistical elements with the Cachoeiras de Binga and Benguela Projects.

While the Company considers Benguela and Zenza/Dondo to be at the exploration stage, according to historic reports of previous geological exploration, Cachoeiras de Binga has a "measured resource" of approximately 131 thousand tons of copper metal and an inferred copper resource of 918 thousand tons of copper metal and is close to the coast, with available water, power and is close to a nearby town and deep water port.

Current Mineral Policy and Law of the Republic of Angola

28

The Mining Law of 1992 (1/92) of the Republic of Angola reflects the current mining policy which aims at reducing the dominance of the state owned companies by eliminating monopoly of mineral rights and providing opportunities for the private sector to invest in the mining sector. The Mining Law is consistent with the Law on Foreign Investment emphasizing:

Participation of the private sector

Joint venture opportunities of private with state mining enterprise

Enabling fiscal regime

All minerals belong to the State. This is enshrined in the Constitution. The Ministry of Geology and Mines manages mineral exploration and development activities through the granting of relevant prospecting and mining titles as well as supervision.

A Prospecting License is issued for a maximum period of five years, including extension. Surface charges are 1 or 3 US\$/km²/year at issue and US\$3/km²/year for renewal.

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

A work plan must be provided together with minimum expenditure, technology to be used, staff qualifications and skills, and any other requirements that may be imposed. A program of employment and training of Angolans must also be given. At renewal, 50% of the area must be relinquished.

Periodic reports by the license holder must be made covering all data and information obtained during the carrying out of the program.

Compensation must be made by the license holder for any damages to third parties.

A Prospecting License holder may apply for and be granted a Mining Title, after submission of a feasibility study. An applicant may also be a respondent to tenders promoted by Government on deposits already evaluated. Operations can only be carried out by mining companies, either state owned, mixed, private or joint, and partnership.

The period of title varies from deposit to deposit and is dependent on the life of the mine and extended by one or more extension periods on the same or negotiated conditions.

Prospecting licenses and Mining Titles are not transferable, assignable or negotiable without prior approval by the Council of Ministers.

29

The Government has the option to participate in companies undertaking mining. For large projects of investments more than US \$50m the Government requires 10-15% free equity. Any excess shares would be bought at market rates.

Generally rights and obligations are specified in the license. Based on the fiscal regime indicated below, applicants make proposals which can be negotiated as a package during the process of granting a Mining Title.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTANT

To the Board of Directors and Shareholders of Simbajamba Mines Ltd.

I have audited the accompanying balance sheet of Simbajamba Mines Ltd. (a development stage company), as of December 31, 2004 and the related statements of operations, stockholders deficit and cash flows for the period January 19, 2004 (date of inception) to December 31, 2004. These financial statements are

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

the responsibility of the Company's management. My responsibility is to express an opinion on these financial statements based on my audit.

I conducted my audit in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. I believe that my audit provides a reasonable basis for my opinion.

In my opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Simbajamba Mines LTD. (a development stage company), as of December 31, 2004, and the results of their operations and their cash flows for the period January 19, 2004, (date of inception) to December 31, 2004 in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company has sustained continuing operating losses and lacks sources of revenue, which raises substantial doubts about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 1. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

financial statement presentation. I believe that my audit provides a reasonable basis for my opinion.

In my opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Simbajamba Mines LTD. (a development stage company), as of December 31, 2005 and 2004, and the results of their operations and their cash flows for the period January 19, 2004, (date of inception) to December 31, 2005 in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company has sustained continuing operating losses and lacks sources of revenue, which raises substantial doubts about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 1. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES

Use of Estimates

The preparation of financial statements, in conformity with generally accepted accounting principles and generally accepted in the United States of America, requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reporting period. Deferred tax liabilities and assets are determined based on the difference between the financial statement carrying amounts and the tax basis of assets and liabilities and are measured using the enacted statutory tax rates in effect at the balance sheet date. The Company records a valuation allowance to reduce its deferred tax assets when uncertainty regarding their realizability exists. There have been no material income tax transactions during the development stage of the business.

Report of Independent Registered Public Accounting Firm

To the Board of Directors
Australian Forest Industries
Melbourne, Australia

We have audited the accompanying balance sheets of Australian Forest Industries as of December 31, 2005 and 2004 and the related statements of operations, stockholders' equity, and cash flows for each of the two years in the period ended December 31, 2005. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Australian Forest Industries as

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

of December 31, 2005 and 2004, and the results of its operations and its cash flows for each of the two years in the period ended December 31, 2005, in conformity with accounting principles generally accepted in the United States of America.

AUSTRALIAN FOREST INDUSTRIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2005

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Business

Australian Forest Industries ("the Company"), through its wholly owned subsidiary Integrated Forest Products Pty Ltd ("Integrated"), operates a saw mill in Australia which cuts pine timber into building products to supply the commercial and residential industry along the eastern coast of Australia.

Reverse Merger

On September 1, 2004, Integrated, owned by the Timberrmans Group Pty Ltd ("Timberrmans"), entered into a share exchange agreement with the Company and issued 240,000,000 shares of its common stock to acquire Integrated. In connection with the share exchange agreement, Integrated became a wholly owned subsidiary of the Company and Integrated's officers and directors became the officers and directors of the Company. Prior to the merger, the Company was a non-operating "shell" corporation. Pursuant to Securities and Exchange Commission rules, the merger of a private operating company (Integrated) into a non-operating public shell corporation with nominal net assets is considered a capital transaction. Accordingly, for accounting purposes, the merger has been treated as an acquisition of the Company by Integrated and a recapitalization of the Company. The historical financial statements for the years ended December 31, 2005 and 2004 are those of Integrated. Since the merger is a recapitalization and not a business combination, pro forma information is not presented.

Foreign Currency Translation

For 2005 and 2004, the Company considered the Australian dollar to be its functional currency. Assets and liabilities were translated into US dollars at the year-end exchange rates. Statement of operations amounts were translated using the average rate during the year. Gains and losses resulting from translating foreign currency financial statements were accumulated in other comprehensive income, a separate component of stockholders' equity.

Cash Equivalents

For purposes of reporting cash flows, cash equivalents include investment instruments purchased with a maturity of three months or less. There were no cash equivalents in 2005 or 2004.

Use of Estimates

The preparation of financial statements in conformity with generally

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Inventories

Inventories are stated at the lower of cost or market value. Cost is determined using the first-in, first-out (FIFO) method.

FFF-6

AUSTRALIAN FOREST INDUSTRIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2005

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Equipment and Depreciation

Equipment is stated at cost and is depreciated using the straight line method over the estimated useful lives of the respective assets. Routine maintenance, repairs and replacement costs are expensed as incurred and improvements that extend the useful life of the assets are capitalized. When equipment is sold or otherwise disposed of, the cost and related accumulated depreciation are eliminated from the accounts and any resulting gain or loss is recognized in operations.

Net Loss Per Common Share

The Company computes per share amounts in accordance with Statement of Financial Accounting Standards ("SFAS") No. 128, "Earnings per Share". SFAS No. 128 requires presentation of basic and diluted EPS. Basic EPS is computed by dividing the income (loss) available to Common Stockholders by the weighted-average number of common shares outstanding for the period. Diluted EPS is based on the weighted-average number of shares of Common Stock and Common Stock equivalents outstanding during the periods.

Comprehensive Income (Loss)

SFAS No. 130 establishes standards for the reporting and disclosure of comprehensive income and its components to be presented in association with a company's financial statements. Comprehensive income is defined as the change in a business enterprise's equity during a period arising from transactions, events or circumstances relating to non-owner sources, such as foreign currency translation adjustments and unrealized gains or losses on available-for-sale securities. It includes all changes in equity during a period except those resulting from investments by or distributions to owners. Comprehensive income is accumulated in accumulated other comprehensive income (loss), a separate component of stockholders' equity.

Stock Based Compensation

The Company accounts for stock issued for services using the fair value method. In accordance with the Emergency Issues Task Force ("EITF") 96-18, the measurement date of shares issued for service is the date at

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

which the counterpart's performance is complete.

Fair Values of Financial Instruments

The Company uses financial instruments in the normal course of business. The carrying values of cash, accounts receivable, advance receivable, bank overdraft, accounts payable and accrued expenses approximate their fair value due to the short-term maturities of these assets and liabilities. The carrying values of notes payable and loans payable approximate their fair value based upon management's estimates using the best available information.

Recent Accounting Pronouncements

In December 2004, the FASB issued Statement of Financial Accounting Standards No. 153 (SFAS 153), "Exchanges of Non-monetary Assets." SFAS 153 amends the guidance in APB No. 29,

FFF-7

AUSTRALIAN FOREST INDUSTRIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS December 31, 2005

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Recent Accounting Pronouncements (Continued)

"Accounting for Non-monetary Assets." APB No.29 was based on the principle that exchanges of non-monetary assets should be measured on the fair value of the assets exchanged. SFAS 153 amends APB No. 29 to eliminate the exception for non-monetary exchanges of similar productive assets and replaces it with a general exception for exchanges of non-monetary assets that do not have commercial substance if the future cash flows of the entity are expected to change significantly as a result of the exchange. SFAS 151 is effective for financial statements issued for fiscal years beginning after June 15, 2005. The adoption of SFAS 153 is not expected to have a material effect on the Company's financial position or results of operations.

In December 2004, the FASB revised Statement of Financial Accounting Standards No. 123 (SFAS 123(R)), "Accounting for Stock-Based Compensation." The SFAS 123(R) revision established standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services and focuses primarily on accounting for transactions in which an entity obtains employee services in share-based payment transactions. It does not change the accounting guidance for share-based payment transactions with parties other than employees. For public entities that file as small business issuers, the revisions to SFAS 123(R) are effective as of the beginning of the first interim or annual reporting period that begins after December 15, 2005. The adoption of SFAS 123(R) is not expected to have a material effect on the Company's financial position or results of operations.

In May 2005, the FASB issued SFAS no. 154, "Accounting Changes and Error Corrections ("SFAS No. 154") which replaces APB Opinion No. 20, "Accounting Changes" and SFAS No. 3, "Reporting Accounting Changes in Interim Financial Statements—An Amendment of ABP Opinion No. 28. SFAS No. 154 provides guidance on the accounting for and reporting of accounting changes and error corrections. Specially, this statement

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

requires "retrospective application" of the direct effect for a voluntary change in accounting principle to prior periods' financial statements, if it is practical to do so. SFAS No. 154 also strictly defines the term "restatement" to mean the correction of an error revising previously issued financial statements. SFAS No. 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005 and are required to be adopted by the Company in the first quarter of fiscal year 2006. Management does not anticipate that adoption will have a material impact on our results of operations, financial position or cash flows.

Revenue Recognition

The Company's policy is to recognize revenue at the time products are shipped from its facilities.

NOTE B - VARIABLE INTEREST ENTITIES

In January 2003, the FASB issued FIN 46 and in December 2003, it issued a revised interpretation of FIN 46 (FIN 46-R), which supersedes FIN 46 and clarifies and expands current accounting guidance for determining whether certain entities should be consolidated in the Company's consolidated financial statements. An entity is subject to FIN 46 and is called a Variable Interest Entity (VIE) if it has (1) equity that is insufficient to permit the entity to finance its activities without additional subordinated financial support from other parties, or (2) equity investors that cannot make significant decisions about

NOTE H - DUE TO AUSTRALIAN NATIONAL BANK

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

The Timbermans Group has a loan with the National Bank of Australia in the amount of \$4,818,000 at December 31, 2005. The loan is secured by the assets of the Company and personal guarantees of the Company's Directors. The loan bears interest at the rate of 5.9% and is due July 7, 2008.

NOTE I - INCOME TAXES

The Company has adopted Financial Accounting Statement SFAS No. 109, Accounting for Income Taxes. Under this method, the Company recognizes a deferred tax liability or asset for temporary differences between the tax basis of an asset or liability and the related amount reported on the financial statements. The principal types of differences, which are measured at current tax rates, are net operating loss carry forwards. At December 31, 2004, these differences resulted in a deferred tax asset of approximately \$887,700. SFAS No. 109 requires the establishment of a valuation allowance to reflect the likelihood of realization of deferred tax assets. Since realization is not assured, the Company has recorded a valuation allowance for the entire deferred tax asset, and the accompanying financial statements do not reflect any net asset for deferred taxes at December 31, 2005.

The Company's net operating loss carry forwards amounted to approximately \$2,958,000 at December 31, 2004, which have unlimited expiration.

NOTE J - STOCKHOLDERS' EQUITY

ARTICLE VI

INDEMNIFICATION

SECTION 6.1 Survival of Representations, Warranties and Covenants. (a) Notwithstanding any right of Purchaser fully to investigate the affairs of the Company and Seller and the rights of Seller to fully investigate the affairs of Purchaser, and notwithstanding any knowledge of facts determined or determinable by Seller, Purchaser, or the Company, pursuant to such investigation or right of investigation, Seller and Purchaser have the right to rely fully upon the representations, warranties, covenants and agreements of the Company, and Seller and Purchaser respectively, contained in this Agreement, or listed or disclosed on any Schedule hereto or in any instrument delivered in connection with or pursuant to any of the foregoing. All such representations, warranties,

Edgar Filing: MULTI TECH INTERNATIONAL CORP - Form PRE 14C

covenants and agreements shall survive the execution and delivery of this Agreement and the Closing hereunder. Notwithstanding the foregoing, all representations and warranties of Seller and Purchaser respectively, contained in this Agreement, on any Schedule hereto or in any instrument delivered in connection with or pursuant to this Agreement shall terminate and expire twelve (12) months after the date of Closing.

(b) All representations and warranties of Seller and Purchaser shall terminate and expire twelve (12) months after the date of Closing; provided, however, that the liability of Seller and Purchaser shall not terminate as to any specific claim or claims of the type referred to in Section 6.3 hereof, whether or not fixed as to Liability or liquidated as to amount, with respect to which Seller and/or Purchaser has been given specific notice on or prior to the date on which such Liability would otherwise terminate pursuant to the terms of this Section 6.1(b), or which arise or result from or are related to a Claim for fraud.

SECTION 6.2 Obligation of Seller to Indemnify. Seller agrees to indemnify, defend and hold harmless Purchaser (and their respective directors, officers, employees, Affiliates, successors and assigns) from and against all Claims, losses, Liabilities, Regulatory Actions, damages, deficiencies, judgments, settlements, costs of investigation or other expenses (including Taxes, interest, penalties and reasonable attorneys' fees and fees of other experts and disbursements and expenses incurred in enforcing this indemnification) (collectively, the "Losses") suffered or incurred by Purchaser, or any of the foregoing persons arising out of any breach of the representations and warranties of Seller contained in this Agreement, or of the covenants and agreements of Purchaser contained in this Agreement or in the Schedules or any other Transaction Document.

A-21

SECTION 6.3 Obligation of Purchaser to Indemnify. Purchaser jointly and severally agree to indemnify, defend and hold harmless Seller (and any heirs, successor or assignee thereof) from and against any Losses suffered or incurred by Seller or any of the foregoing persons arising out of any breach of the representations and warranties of Purchaser, or of the covenants and agreements of Purchaser contained in this Agreement or in the Schedules or any other Transaction Document.

SECTION 6.4 Notice and Opportunity to Defend Third Party Claims. (a) Within ten (10) days following receipt by any party hereto (the "Indemnatee") of notice of any demand, claim, circumstance or Tax Audit which would or might give rise to a claim, or the commencement (or threatened commencement) of any action, proceeding or investigation that may result in a Loss (an "Asserted Liability"), the Indemnatee shall give notice thereof (the "Claims Notice") to the party or parties obligated to provide indemnification pursuant to Sections 6.2, or 6.3 (collectively, the "Indemnifying Party"). The Claims Notice shall describe the Asserted Liability in reasonable detail and shall indicate the amount (estimated, if necessary, and to the extent feasible) of the Loss that has been or may be suffered by the Indemnatee.

(b) The Indemnifying Party may elect to defend, at its own expense and with its own counsel, any Asserted Liability unless: (i) the Asserted Liability includes a Claim seeking an Order for injunction or other equitable or declaratory relief against the Indemnatee, in which case the Indemnatee may at its own cost and expense and at its option defend the portion of the Asserted Liability seeking equitable or declaratory relief against the Indemnatee, or (ii) the Indemnatee shall have reasonably, and in good faith, after consultation with the Indemnifying Party, concluded that: (x) there is a conflict of interest between the Indemnatee and the Indemnifying Party which could prevent or

negatively influence the Indemnifying Party from impartially or adequately conducting such defense; or (y) the Indemnitee shall have one or more defenses not available to the Indemnifying Party but only to the extent such defense cannot legally be asserted by the Indemnifying Party on behalf of the Indemnitee. If the Indemnifying Party elects to defend such Asserted Liability, it shall within ten (10) days (or sooner, if the nature of the Asserted Liability so requires) notify the Indemnitee of its intent to do so, and the Indemnitee shall cooperate, at the expense of the Indemnifying Party, in the defense of such Asserted Liability. If the Indemnifying Party elects not to defend the Asserted Liability, is not permitted to defend the Asserted Liability by reason of the first sentence of this Section 6.4(b), fails to notify the Indemnitee of its election as herein provided or contests its obligation to indemnify under this Agreement with respect to such Asserted Liability, the Indemnitee may pay, compromise or defend such Asserted Liability at the sole cost and expense of the Indemnifying Party. Notwithstanding the foregoing, neither the Indemnifying Party nor the Indemnitee may settle or compromise any claim over the reasonable written objection of the other, provided that the Indemnitee may settle or compromise any claim as to which the Indemnifying Party has failed to notify the Indemnitee of its election under this Section 6.4(b) or as to which the Indemnifying Party is contesting its indemnification obligations hereunder. If the Indemnifying Party desires to accept a reasonable, final and complete settlement of an Asserted Liability so that such Indemnitee's Loss is paid in full and the Indemnitee refuses to consent to such settlement, then the Indemnifying Party's liability to the Indemnitee shall be limited to the amount offered in the settlement. The Indemnifying Party will exercise good faith in accepting any reasonable, final and complete settlement of an Asserted Liability. In the event the Indemnifying Party elects to defend any Asserted Liability, the Indemnitee may participate, at its own expense, in the defense of such Asserted Liability. In the event the Indemnifying Party is not permitted by the Indemnitee to defend the Asserted Liability, it may nevertheless participate at its own expense in the defense of such Asserted Liability. If the Indemnifying Party chooses to defend any Asserted Liability, the Indemnitee shall make available to the Indemnifying Party any books, records or other documents within its control that are necessary or appropriate for such defense. Any Losses of any Indemnitee for which an Indemnifying Party is liable for indemnification hereunder shall be paid upon written demand therefor.

A-22

SECTION 6.5 Limits on Indemnification. (a) Notwithstanding the foregoing or the limitations set forth in Section 6.5(b) below, in the event such Losses arise out of any fraud related matter on the part of any Indemnifying Party, then such Indemnifying Party shall be obligated to indemnify the Indemnitee in respect of all such Losses.

(b) Seller shall not be liable to indemnify Purchaser pursuant to Section 6.2 above and Purchaser shall not be liable to indemnify Seller pursuant to Section 6.3 above: (i) unless a Claims Notice describing the loss is delivered to the Indemnifying Party within 6 months after the Closing (except for Losses arising out of an Indemnifying Party's fraud); and; (ii) with respect to special, consequential or punitive damages; or (iii) in respect of any individual Loss of less than \$10,000.

SECTION 6.6 Exclusive Remedy. The parties agree that the indemnification provisions of this Article VI shall constitute the sole or exclusive remedy of any party in seeking damages or other monetary relief with respect to this Agreement and the Contemplated Transactions, provided that, nothing herein shall be construed to limit the right of any party to seek: (i) injunctive relief for a breach of this Agreement; (ii) legal or equitable relief for a Claim for fraud; or (iii) indemnity under the bylaws of Purchaser if they are or have been a director or officer of Purchaser.

ARTICLE VII

SPECIFIC PERFORMANCE; TERMINATION

SECTION 7.1 Specific Performance. Seller and Purchase acknowledges and agrees that, if Seller or Purchaser fails to proceed with the Closing in any circumstance other than those described in clauses (a), (b), (c) or (d) of Section 7.2 below, the others will not have adequate remedies at law with respect to such breach. In such event, and in addition to each party's right to terminate this Agreement, each party shall be entitled, without the necessity or obligation of posting a bond or other security, to seek injunctive relief, by commencing a suit in equity to obtain specific performance of the obligations under this Agreement or to sue for damages, in each case, without first terminating this Agreement. Seller or Purchaser specifically affirms the appropriateness of such injunctive, other equitable relief or damages in any such action.

A-23

SECTION 7.2 Termination. This Agreement may be terminated and the Contemplated Transactions may be abandoned at any time prior to the Closing:

(a) By mutual written consent of Seller and Purchaser;

(b) By Seller if: (i) there has been a misrepresentation or breach of warranty on the part of Purchaser in the representations and warranties contained herein and such misrepresentation or breach of warranty, if curable, is not cured within thirty days after written notice thereof from Seller; (ii) Purchaser has committed a breach of any covenant imposed upon it hereunder and fails to cure such breach within thirty days after written notice thereof from Seller; or (iii) any condition to Seller's obligations under Article V becomes incapable of fulfillment through no fault of Seller and is not waived by Seller;

(c) By Purchaser, if: (i) there has been a misrepresentation or breach of warranty on the part of Seller in the representations and warranties contained herein and such misrepresentation or breach of warranty, if curable, is not cured within thirty days after written notice thereof from Purchaser; (ii) Seller has committed a breach of any covenant imposed upon it hereunder and fails to cure such breach within thirty days after written notice thereof from Purchaser; or (iii) any condition to Purchaser's obligations under Article V becomes incapable of fulfillment through no fault of Purchaser and is not waived by Purchaser; and

(d) By Seller or by Purchaser, if any condition under Section 5.1 becomes incapable of fulfillment through no fault of the party seeking termination and is not waived by the party seeking termination.

SECTION 7.3 Effect of Termination; Right to Proceed. Subject to the provisions of Section 7.1 hereof, in the event that this Agreement shall be terminated pursuant to Section 7.2, all further obligations of the parties under this Agreement shall terminate without further liability of any party hereunder except that: (i) the agreements contained in Section 4.2 shall survive the termination hereof; and (ii) termination shall not preclude any party from seeking relief against any other party for breach of Section 4.2. In the event that a condition precedent to its obligation is not met, nothing contained herein shall be deemed to require any party to terminate this Agreement, rather than to waive such condition precedent and proceed with the Contemplated Transactions.

Seller and Purchaser irrevocably and unconditionally waive and agree not to plead, to the fullest extent permitted by law, any objection that they may now or hereafter have to the laying of venue or the convenience of the forum of any action or proceeding with respect to this Agreement in any such courts.
