Cautionary Note on Forward-Looking Statements

This Quarterly Report on Form 10-Q contains both historical and forward-looking statements. Forward-looking statements in this 10-Q are subject to a number of risks and uncertainties, some of which are beyond the Company's control. The potential risks and uncertainties that could cause our actual financial condition, results of operations and future performance to differ materially from those expressed or implied include:

changes in laws, regulations, rules, quotas, tariffs and import laws;

weather conditions, including freezes, that affect the production, transportation, storage, import and export of fresh produce;

market responses to industry volume pressures;

increased pressure from disease, insects and other pests;

disruption of water supplies or changes in water allocations;

product and raw materials supplies and pricing;

energy supply and pricing;

changes in interest and current exchange rates;

availability of financing for land development activities;

political changes and economic crises;

international conflict;

acts of terrorism;

labor disruptions, strikes or work stoppages;

loss of important intellectual property rights; and

other factors disclosed in our public filings with the Securities and Exchange Commission.

The Company's actual results, performance, prospects or opportunities could differ materially from those expressed in or implied by the forward-looking statements. Additional risks of which the Company is not currently aware or which the Company currently deems immaterial could also cause the Company's actual results to differ, including those discussed in the section entitled "Risk Factors" included elsewhere in this Quarterly Report on Form 10-Q and in our Annual Report on Form 10-K for the fiscal year ended October 31, 2011. Although we believe the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. You should not place undue reliance on these forward-looking statements, which apply only as of the date of this Quarterly Report on Form 10-Q. We undertake no obligation to update these forward-looking statements, even if our situation changes in the future.

The terms the "Company," "we," "our" and "us" as used throughout this Quarterly Report on Form 10-Q refer to Limoneira Company and its consolidated subsidiaries, unless otherwise indicated.

Limoneira Company

Consolidated Financial Statements (unaudited)

Preface

The preparation of the unaudited interim consolidated financial statements requires management to make use of estimates and assumptions that affect the reported amount of assets and liabilities, revenue and expenses and certain financial statement disclosures. Actual results may differ from these estimates.

The unaudited interim consolidated financial statements for the three and nine months ended July 31, 2012 and 2011 and balance sheet as of July 31, 2012 included herein have not been audited by an independent registered public accounting firm, but in management's opinion, all adjustments (consisting of normal recurring adjustments) necessary to make a fair statement of the financial position at July 31, 2012 and the results of operations and the cash flows for the periods presented herein have been made. The results of operations for the three and nine months ended July 31, 2012 are not necessarily indicative of the operating results expected for the full fiscal year.

The consolidated balance sheet at October 31, 2011 included herein has been derived from the audited consolidated financial statements at that date but does not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements.

The unaudited interim consolidated financial statements included herein have been prepared pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (the "SEC"). Although we believe the disclosures made are adequate to make the information presented not misleading, certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted pursuant to such rules or regulations. These unaudited interim consolidated financial statements should be read in conjunction with the October 31, 2011 consolidated financial statements and notes thereto included in the Company's Form 10-K for the fiscal year ended October 31, 2011.

Limoneira Company

Notes to Consolidated Financial Statements (unaudited)

1. Business

Limoneira Company, a Delaware corporation (the “Company”), engages primarily in growing citrus and avocados, picking and hauling citrus and packing, marketing and selling lemons. The Company is also engaged in housing and other rental operations and real estate development activities.

The Company markets and sells lemons directly to foodservice, wholesale and retail customers throughout the United States, Canada, Asia and other international markets. The Company is a member of Sunkist Growers, Inc. (“Sunkist”), an agricultural marketing cooperative, and sells its oranges, specialty citrus and other crops to Sunkist-licensed and other third-party packinghouses.

The Company sells all of its avocado production to Calavo Growers, Inc. (“Calavo”), a packing and marketing company listed on NASDAQ under the symbol CVGW. Calavo’s customers include many of the largest retail and foodservice companies in the United States and Canada. The Company’s avocados are packed by Calavo, sold and distributed under Calavo brands to its customers primarily in the United States and Canada.

The unaudited interim consolidated financial statements include the accounts of the Company and the accounts of all the subsidiaries and investments in which a controlling interest is held by the Company. The unaudited interim consolidated financial statements represent the consolidated balance sheets, consolidated statements of operations, consolidated statements of comprehensive income and consolidated statements of cash flows of the Company and its wholly-owned subsidiaries. The Company’s subsidiaries include: Limoneira Land Company, Limoneira Company International Division, LLC, Limoneira Mercantile, LLC, Windfall Investors, LLC and Templeton Santa Barbara, LLC. All significant intercompany balances and transactions have been eliminated in consolidation. The Company considers the criteria established under the Financial Accounting Standards Board – Accounting Standards Code (“FASB ASC”) 810, *Consolidations*, and the effect of variable interest entities, in its consolidation process. These unaudited consolidated financial statements should be read in conjunction with the notes thereto included in this quarterly report.

2. Summary of Significant Accounting Policies

Recently Adopted Accounting Pronouncements

FASB ASU 2011-04, Fair Value Measurement (Topic 820).

In May 2011, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS*, which amends FASB ASC 820, *Fair Value Measurement*. The amended guidance changes the wording used to describe many requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements. Additionally, the amendments clarify the FASB’s intent about the application of existing fair value measurement requirements. The guidance provided in ASU 2011-04 is effective for interim and annual periods beginning after December 15, 2011 and is applied prospectively. The Company’s adoption of these provisions in the third quarter of fiscal year 2012 did not have a material impact on the Company’s financial statements.

Recent Accounting Pronouncements

FASB ASU 2011-05, Comprehensive Income (Topic 220).

In June 2011, the FASB issued guidance regarding the presentation of comprehensive income. The new standard requires the presentation of comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The new standard also requires presentation of adjustments for items that are reclassified from other comprehensive income to net income in the statement where the components of net income and the components of other comprehensive income are presented. The updated guidance is effective on a retrospective basis for financial statements issued for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2011.

Limoneira Company**Notes to Consolidated Financial Statements (unaudited) (continued)****2. Summary of Significant Accounting Policies (continued)**

In December 2011, the FASB issued ASU 2011-12, *Comprehensive Income (Topic 220)*, to defer the effective date for those aspects of ASU 2011-05 relating to the presentation of reclassification adjustments out of accumulated other comprehensive income. The adoption of this standard will only impact the presentation of the Company's consolidated financial statements and will have no impact on the reported results of operations.

3. Fair Value Measurements

Under the FASB ASC 820, *Fair Value Measurement and Disclosures*, a fair value measurement is determined based on the assumptions that a market participant would use in pricing an asset or liability. A three-tiered hierarchy draws distinctions between market participant assumptions based on (i) observable inputs such as quoted prices in active markets (Level 1), (ii) inputs other than quoted prices in active markets that are observable either directly or indirectly (Level 2) and (iii) unobservable inputs that require the Company to use present value and other valuation techniques in the determination of fair value (Level 3).

The following table sets forth the Company's financial assets and liabilities as of July 31, 2012, that are measured on a recurring basis during the period, segregated by level within the fair value hierarchy:

	Level 1	Level 2	Level 3	Total
Assets at fair value:				
Available-for-sale securities	\$17,942,000	\$—	\$ —	\$17,942,000
Liabilities at fair value:				
Derivative instruments	\$—	\$4,094,000	\$ —	\$4,094,000

Available-for-sale securities consist of marketable securities in Calavo common stock. The Company currently owns approximately 4.5% of Calavo's outstanding common stock. These securities are measured at fair value by quoted market prices. Calavo's stock price at July 31, 2012 was \$26.98 per share.

Derivative instruments consist of interest rate swaps, the fair values of which are estimated using industry-standard valuation models. Such models project future cash flows and discount the future amounts to a present value using market-based observable inputs. The fair values of the interest rate swaps are included in current liabilities and other long-term liabilities in the consolidated balance sheet at July 31, 2012.

4. Accounts Receivable

The Company grants credit in the course of its operations to customers, cooperatives, companies and lessees of the Company's facilities. The Company performs periodic credit evaluations of its customers' financial condition and generally does not require collateral. The Company provides allowances on its receivables, as required, based on accounts receivable aging and certain other factors. At July 31, 2012 and October 31, 2011, the allowances totaled \$119,000 and \$65,000, respectively.

5. Concentrations

Sales to a customer for lemons were 8% and 10% of total revenues in the three and nine months ended July 31, 2012, respectively. The Company sells all of its avocado production to Calavo. Lemons procured from third-party growers were 25% and 44%, of lemon supply in the three and nine months ended July 31, 2012, respectively, of which one third party-grower was 1% and 14% of lemon supply in the three and nine months ended July 31, 2012, respectively.

Limoneira Company**Notes to Consolidated Financial Statements (unaudited) (continued)****6. Real Estate Development Assets**

Real estate development assets consist of the following:

	July 31, 2012	October 31, 2011
East Areas 1 and 2	\$46,578,000	\$44,431,000
Templeton Santa Barbara, LLC	10,129,000	9,325,000
Windfall Investors, LLC	19,516,000	18,867,000
	\$76,223,000	\$72,623,000

East Areas 1 and 2

In fiscal year 2005, the Company began capitalizing the costs of two real estate development projects east of Santa Paula, California, for the development of 550 acres of land into residential units, commercial buildings and civic facilities. During the three months ended July 31, 2012 and 2011, the Company capitalized \$832,000 and \$945,000, respectively, of costs related to these projects. During the nine months ended July 31, 2012 and 2011, the Company capitalized \$2,147,000 and \$2,943,000, respectively, of costs related to these projects. Additionally, in relation to these projects, the Company has incurred net expenses of \$16,000 and \$14,000 in the three months ended July 31, 2012 and 2011, respectively, and \$55,000 and \$70,000 in the nine months ended July 31, 2012 and 2011, respectively.

Templeton Santa Barbara, LLC

The four real estate development parcels within the Templeton Santa Barbara, LLC project are described as Centennial Square ("Centennial"), The Terraces at Pacific Crest ("Pacific Crest"), Sevilla and East Ridge.

In February 2010, the Company and HM Manager, LLC formed a limited liability company, HM East Ridge, LLC ("East Ridge"), for the purpose of developing the East Ridge parcel. The Company's initial capital contribution into East Ridge was the land parcel with a net carrying value of \$7,207,000. The Company made cash contributions of zero to East Ridge during each of the three month periods ended July 31, 2012 and 2011 and \$88,000 during each of the nine month periods ended July 31, 2012 and 2011. Since the Company has significant influence over, but less than a controlling interest in East Ridge, the Company is accounting for its investment in East Ridge using the equity method of accounting and the investment is included in equity in investments in the Company's consolidated balance sheets.

In December 2011, the Company resumed real estate development activities on Centennial, Pacific Crest and Sevilla after a period of being idle. During the three months ended July 31, 2012 and 2011, the Company capitalized \$298,000 and zero, respectively, of costs related to these real estate parcels. During the nine months ended July 31, 2012 and 2011, the Company capitalized \$804,000 and zero, respectively, of costs related to these real estate parcels. Additionally, in relation to these parcels, the Company incurred net incidental income of \$3,000 and net expenses of \$62,000 in the three months ended July 31, 2012 and 2011, respectively and net expenses of \$13,000 and \$179,000 in the nine months ended July 31, 2012 and 2011, respectively.

The net carrying values of Centennial, Pacific Crest and Sevilla at July 31, 2012 were \$2,719,000, \$3,044,000 and \$4,366,000, respectively, and at October 31, 2011 were \$2,433,000, \$2,800,000 and \$4,092,000, respectively.

Windfall Investors, LLC

On November 15, 2009, the Company acquired Windfall Investors, LLC, comprised of \$17,699,000 of total assets which included \$16,842,000 of real estate development assets. During the three months ended July 31, 2012 and 2011, the Company capitalized \$247,000 and \$360,000, respectively, of costs related to this real estate development project. During the nine months ended July 31, 2012 and 2011, the Company capitalized \$649,000 and \$890,000, respectively, of costs related to this real estate development project. In March 2012, Windfall Investors, LLC received \$428,000 of insurance proceeds for wind damage to roofs, reducing the capitalized costs of this project. Repairs commenced in May 2012 and were approximately 80% complete at July 31, 2012. Additionally, in relation to this project, the Company has incurred net expenses of \$175,000 and \$216,000, in the three months ended July 31, 2012 and 2011, respectively, and \$524,000 and \$586,000 in the nine months ended July 31, 2012 and 2011, respectively.

7. Investment in Calavo Growers, Inc.

In June 2005, the Company entered into a stock purchase agreement with Calavo. Pursuant to this agreement, the Company purchased 1,000,000 shares, or approximately 6.9%, of Calavo's common stock for \$10,000,000 and Calavo purchased 172,857 shares, or approximately 15.1%, of the Company's common stock for \$23,450,000. Under the terms of the agreement, the Company received net cash consideration of \$13,450,000.

In fiscal year 2009, the Company sold 335,000 shares of Calavo stock for a total of \$6,079,000, recognizing a gain of \$2,729,000. The Company has classified its marketable securities investment as available-for-sale. Additionally, changes in the fair value of the available-for-sale securities result in unrealized holding gains or losses for the remaining shares held by the Company. The Company recorded unrealized holding losses of \$1,130,000 (\$680,000 net of tax) and \$219,000 (\$132,000 net of tax), during the three months ended July 31, 2012 and 2011, respectively. The Company recorded unrealized holding gains (losses) of \$2,933,000 (\$1,766,000 net of tax) and (\$818,000) ((\$494,000) net of tax), during the nine months ended July 31, 2012 and 2011, respectively.

8. Notes Receivable

In connection with the Company's stock grant program, the Company has recorded total notes receivable and accrued interest from certain related parties of \$57,000 and \$92,000 at July 31, 2012 and October 31, 2011, respectively.

9. Other Assets

10. Long-Term Debt

Long-term debt is comprised of the following:

	July 31, 2012	October 31, 2011
Rabobank revolving credit facility secured by property with a net book value of \$12,260,000 at July 31, 2012 and October 31, 2011. The interest rate is variable based on the one-month London Interbank Offered Rate (LIBOR), which was 0.25% at July 31, 2012 plus 1.50%. Interest is payable monthly and the principal is due in full in June 2018.	\$58,699,000	\$53,802,000
Farm Credit West term loan secured by property with a net book value of \$11,629,000 at July 31, 2012 and \$11,638,000 at October 31, 2011. The interest rate is variable and was 3.25% at July 31, 2012. The loan is payable in quarterly installments through November 2022.	5,861,000	6,208,000
Farm Credit West term loan secured by property with a net book value of \$11,629,000 at July 31, 2012 and \$11,638,000 at October 31, 2011. The interest rate is variable and was 3.25% at July 31, 2012. The loan is payable in monthly installments through May 2032.	869,000	892,000
Farm Credit West non-revolving line of credit secured by property with a net book value of \$3,858,000 at July 31, 2012 and \$3,839,000 at October 31, 2011. The interest rate is variable and was 3.50% at July 31, 2012. Interest is payable monthly and the principal is due in full in May 2018.	13,000,000	12,966,000
Farm Credit West term loan secured by property with a net book value of \$19,516,000 at July 31, 2012 and \$18,867,000 at October 31, 2011. The interest rate is fixed at 3.65% until November 2014, becoming variable for the remainder of the loan. The loan is payable in monthly installments through October 2035.	8,831,000	9,003,000
Subtotal	87,260,000	82,871,000
Less current portion	754,000	736,000
Total long-term debt, less current portion	\$86,506,000	\$82,135,000

In November 2011, the Company entered into a Second Amendment to Amended and Restated Line of Credit Agreement dated as of December 15, 2008, between the Company and Rabobank in order to (i) increase the revolving line of credit from \$80,000,000 to the lesser of \$100,000,000 or 60% of the appraised value of any real estate pledged as collateral, which was \$87,000,000 at July 31, 2012, (ii) amend the interest rate such that the line of credit bears interest equal to LIBOR plus 1.80% effective July 1, 2013 and (iii) extend the maturity date from June 30, 2013 to June 30, 2018. The Company is subject to an annual financial covenant and certain other restrictions measured at its fiscal year end.

On May 1, 2012, the Company entered into a new non-revolving line of credit facility with Farm Credit West (the "New Loan Agreement"), replacing the existing non-revolving line of credit. The terms of the New Loan Agreement are substantially similar to the existing line of credit including a commitment of \$13,000,000 and monthly interest only payments at a variable rate, which was 3.50% as of July 31, 2012. The New Loan Agreement extends the maturity date from May 2013 until May 2018, removes Windfall Farms, LLC as a borrower under the agreement and requires the Company remit to Farm Credit West special principal payments of a minimum of \$175,000 per lot sold on the Windfall Investors, LLC real estate development project.

Interest is capitalized on non-bearing orchards, real estate development projects and significant construction in progress. The Company capitalized interest of \$746,000 and \$625,000 during the three months ended July 31, 2012 and 2011, respectively and \$2,118,000 and \$1,773,000 during the nine months ended July 31, 2012 and 2011, respectively. Capitalized interest is included in property, plant and equipment and real estate development assets in the Company's consolidated balance sheets.

11. Derivative Instruments and Hedging Activities

The Company enters into interest rate swaps to minimize the risks and costs associated with its financing activities. Derivative financial instruments are as follows:

	Notional Amount		Fair Value Liability	
	July 31, 2012	October 31, 2011	July 31, 2012	October 31, 2011
Pay fixed-rate, receive floating-rate interest rate swap, maturing June 2013	\$42,000,000	\$42,000,000	\$1,420,000	\$2,352,000
Pay fixed-rate, receive floating-rate forward interest rate swap, beginning July 2013 until June 2018	\$40,000,000	\$-	\$2,674,000	\$-

In April 2010, the Company cancelled two interest rate swaps with notional amounts of \$10,000,000 each and amended the remaining interest rate swap from a notional amount of \$22,000,000 to a notional amount of \$42,000,000. This remaining interest rate swap was also amended to a pay-fixed rate of 3.63%, which is 62 basis points lower than the original pay-fixed rate. The receive floating-rate and maturity date of the amended interest rate swap remain unchanged. The Company did not incur any out-of-pocket fees related to the cancellation or amendment of these interest rate swaps.

These interest rate swaps previously qualified as cash flow hedges and were accounted for as hedges under the short-cut method. On the amendment date of the swap agreements, the fair value liability and the related accumulated other comprehensive loss balance was \$2,015,000. The accumulated other comprehensive loss balance is being amortized and included in interest income (expense) from derivative instruments over the remaining period of the original swap agreements. Amortization for each of the three month periods ended July 31, 2012 and 2011 was \$135,000. Amortization for the nine month periods ended July 31, 2012 and 2011 was \$405,000 and \$425,000, respectively. The remaining accumulated other comprehensive loss balance is \$497,000, net of amortization of \$1,518,000 at July 31, 2012.

As a result of the re-negotiated terms of the derivatives above, the remaining interest rate swap with a notional amount of \$42,000,000 no longer qualified for hedge accounting as of April 30, 2010. Therefore, mark to market adjustments to the underlying fair value liability are being recorded in interest income (expense) from derivative instruments and the liability balance is recorded in current liabilities at July 31, 2012 and other long-term liabilities at October 31, 2011 in the Company's consolidated balance sheets. The mark to market adjustments recognized by the Company during the three month periods ended July 31, 2012 and 2011 resulted in non-cash interest income of \$307,000 and \$48,000, respectively. The mark to market adjustments recognized by the Company during the nine month periods ended July 31, 2012 and 2011 resulted in non-cash interest income of \$932,000 and \$853,000, respectively.

In November 2011, the Company entered into a forward interest rate swap agreement with Rabobank International, Utrecht to fix the interest rate at 4.30% on \$40,000,000 of its outstanding borrowings under the Rabobank line of credit beginning July 2013 until June 2018. This interest rate swap qualifies as a cash flow hedge and is accounted for as a hedge under the short-cut method. Therefore, the fair value adjustments to the underlying debt are deferred and included in accumulated other comprehensive income (loss) and the liability is recorded in other long-term liabilities in the Company's consolidated balance sheet at July 31, 2012.

12. Basic and Diluted Net Income per Share

Basic net income per common share is calculated using the weighted-average number of common shares outstanding during the period without consideration of the dilutive effect of stock-based compensation. Diluted net income per common share is calculated using the weighted-average number of common shares outstanding plus the dilutive effect of stock-based compensation calculated using the treasury stock method. Diluted weighted-average shares were zero for each of the three month periods ended July 31, 2012 and 2011 and zero and 4,000 for the nine month periods ended July 31, 2012 and 2011, respectively. The Series B convertible preferred shares are anti-dilutive.

14. Income Taxes

The Company's projected annual effective tax rate for fiscal year 2012 is approximately 33.7%. As such, a 34.9% effective tax rate, after certain discrete items, was utilized by the Company for the third quarter of fiscal year 2012 to calculate its income tax provision.

There are no uncertain tax positions as of July 31, 2012 and there has been no material change to the Company's uncertain tax position for the three and nine month periods ended July 31, 2012. The Company does not expect its unrecognized tax benefits to change significantly over the next 12 months.

The Company's policy is to recognize interest expense and penalties related to income tax matters as a component of income tax expense. The Company has not accrued any interest and penalties associated with uncertain tax positions as of July 31, 2012 and October 31, 2011.

15. Retirement Plans

The Limoneira Company Retirement Plan (the "Plan") is a noncontributory, defined benefit, single employer pension plan, which provides retirement benefits for all eligible employees of the Company. Benefits paid by the Plan are calculated based on years of service, highest five-year average earnings, primary Social Security benefit and retirement age. Effective June 2004, the Company froze the Plan and no additional benefits accrued to participants subsequent to that date. The Plan is administered by City National Bank and Mercer Human Resource Consulting.

The Plan is funded consistent with the funding requirements of federal law and regulations. There were funding contributions of \$159,000 and \$107,000 during the three month periods ended July 31, 2012 and 2011, respectively, and \$425,000 and \$228,000 during the nine month periods ended July 31, 2012 and 2011, respectively.

Limoneira Company

Notes to Consolidated Financial Statements (unaudited) (continued)

19. Sheldon Ranches Operating Leases

In January 2012, the Company entered into a series of operating leases for approximately 1,000 acres of lemon, orange, specialty citrus and other crop orchards in Lindsay, California. Each of the leases is for a ten-year term and provides for four five-year renewal options with an aggregate base rent of approximately \$500,000 per year. The leases also contain profit share arrangements with the lessors as additional rent on each of the properties and a provision for the potential purchase of the properties by the Company in the future. In accordance with the terms of the lease agreements, the Company will not share in the citrus crop revenue in its fiscal year ending October 31, 2012. The Company incurred \$144,000 and \$303,000 of net lease expense in the three and nine month periods ended July 31, 2012, respectively.

20. Agriculture Property Acquisitions

In April 2012, the Company purchased land for use as a citrus orchard for a purchase price of \$430,000, paid in cash. The acquisition was for 60 acres of agricultural property located in close proximity to the Company's existing orchards in Porterville, California. This acquisition was accounted for as an asset purchase with substantially the entire purchase price allocated to land and included in property, plant and equipment on the Company's consolidated balance sheets at July 31, 2012.

In July 2012, the Company purchased land for use as a citrus orchard for a purchase price of \$800,000, paid in cash. The acquisition was for 65 acres of agricultural property located in close proximity to the Company's existing orchards in Porterville, California. This acquisition is being accounted for as a business combination and as of July 31, 2012 the Company is in the process of determining the fair value of the assets acquired. The acquisition is recorded in property, plant and equipment in the Company's consolidated balance sheet at July 31, 2012.

In July 2012, the Company entered into an agreement to acquire land for use as a citrus orchard for a purchase price of \$1,360,000, to be paid in cash. The acquisition is for 230 acres of agricultural property adjacent to the Company's leased orchards in Lindsay, California. This acquisition will be accounted for as an asset purchase with substantially the entire purchase price allocated to land. The acquisition was in escrow at July 31, 2012 and closed in August 2012.

21. Subsequent Events

The Company has evaluated events subsequent to July 31, 2012 to assess the need for potential recognition or disclosure in this Quarterly Report on Form 10-Q. Based upon this evaluation, except as disclosed in the notes to consolidated financial statements, it was determined that no subsequent events occurred that require recognition or disclosure in the unaudited consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Limoneira Company was incorporated in Delaware in 1990 as the successor to several businesses with operations in California since 1893. We are an agribusiness and real estate development company founded and based in Santa Paula, California, committed to responsibly using and managing our approximately 8,205 acres of land, water resources and other assets to maximize long-term shareholder value. Our current operations consist of fruit production and marketing, real estate development and capital investment activities.

We are one of California's oldest citrus growers. According to Sunkist Growers, Inc. ("Sunkist"), we are one of the largest growers of lemons in the United States and, according to the California Avocado Commission, the largest grower of avocados in the United States. In addition to growing lemons and avocados, we grow oranges and a variety of specialty citrus and other crops. We have agricultural plantings throughout Ventura and Tulare counties in California, which plantings consist of approximately 2,060 acres of lemons, 1,250 acres of avocados, 1,745 acres of oranges and 675 acres of specialty citrus and other crops. We also operate our own packinghouse in Santa Paula, California, where we process and pack lemons that we grow, as well as lemons grown by others.

Our water resources include water rights, usage rights to the water in aquifers under, and canals that run through, the land we own. Water for our farming operations is sourced from the existing water resources associated with our land, which includes rights to water in the adjudicated Santa Paula Basin (aquifer) and the un-adjudicated Fillmore and Paso Robles Basins (aquifers). We also use ground water and water from local water districts in Tulare County, which is in the San Joaquin Valley.

For more than 100 years, we have been making strategic investments in California agribusiness and real estate development. We currently have six active real estate development projects in California. Our real estate developments range from apartments to single-family homes and include approximately 200 completed units and another approximately 2,000 units in various stages of planning and development.

Recent Developments

In January 2012, our Company entered into a series of operating leases for approximately 1,000 acres of lemon, orange, specialty citrus and other crop orchards in Lindsay, California (collectively, the "Sheldon Ranches Leases"). Each of the leases is for a ten-year term and provides for four five-year renewal options with an aggregate base rent of

approximately \$500,000 per year. Each of the leases also contains profit share arrangements with the lessors as additional rent on each of the properties and a provision for the potential purchase of the properties by our Company in the future. In accordance with the terms of the lease agreements, we will not share in the citrus crop revenue in our fiscal year ended October 31, 2012. During the three and nine months ended July 31, 2012, we incurred \$144,000 and \$303,000, respectively, of net lease expense related to the Sheldon Ranches Leases.

On June 26, 2012, we declared a \$0.03125 per share dividend paid on July 16, 2012 in the aggregate amount of \$350,000 to common shareholders of record on July 9, 2012.

In April 2012, we purchased land for use as a citrus orchard for a purchase price of \$430,000, paid in cash. The acquisition was for 60 acres of agricultural property located in close proximity to the Company's existing orchards in Porterville, California. This acquisition was accounted for as an asset purchase with substantially the entire purchase price allocated to land and included in property, plant and equipment on our Company's consolidated balance sheets at July 31, 2012.

In July 2012, our Company purchased land for use as a citrus orchard for a purchase price of \$800,000, paid in cash. The acquisition was for 65 acres of agricultural property located in close proximity to our Company's existing orchards in Porterville, California. This acquisition is being accounted for as a business combination and as of July 31, 2012 we were in the process of determining the fair value of the assets acquired.

In August 2012, our Company purchased land for use as a citrus orchard for a purchase price of \$1,360,000, paid in cash. The acquisition was for 230 acres of agricultural property adjacent to our Company's leased orchards in Lindsay, California. This acquisition will be accounted for as an asset purchase with substantially the entire purchase price allocated to land.

In August 2012, our Company entered into an agreement with Associated Citrus Packers of Yuma, Arizona to pack and market lemons. Associated Citrus Packers has historically packed approximately 850,000 cartons of lemons grown on nearly 2,000 acres. The commercial citrus harvesting and packing season in Southwestern Arizona typically begins in late August and is completed during the spring of the following year.

Business Segment Summary

We have three business segments: agribusiness, rental operations and real estate development. Our agribusiness segment currently generates the majority of our revenue from its farming and lemon packing operations; our rental operations segment generates revenue from our housing, organic recycling and commercial and leased land operations; and our real estate development segment generates revenue from the sale of real estate development projects. Generally, we see the Company as a land and farming company that generates annual cash flows to support its progress into diversified real estate development activities. As real estate development projects are monetized, our agribusiness will then be able to expand more rapidly into new regions and markets.

Agribusiness

We are one of the largest growers of lemons and the largest grower of avocados in the United States and, as a result, our agribusiness segment is the largest of our three segments, representing approximately 88%, 87% and 89% of our fiscal year 2011, 2010 and 2009 consolidated revenues, respectively. Our Company markets and sells lemons directly to foodservice, wholesale and retail customers throughout the United States, Canada, Asia and other international markets. During the three months ended July 31, 2012, lemon sales were comprised of approximately 86% to U.S. and Canada-based customers and 14% to domestic exporters. During the nine months ended July 31, 2012, lemon sales were comprised of approximately 78% to U.S. and Canada-based customers and 22% to domestic exporters. Our Company is a member of Sunkist, an agricultural marketing cooperative, and sells its oranges and specialty citrus to Sunkist-licensed and other third-party packinghouses.

Historically, our agricultural operations have been seasonal in nature with the least amount of our annual revenue being generated in our first quarter, increasing in the second quarter, peaking in the third quarter and declining in the fourth quarter. Cultural costs in our agribusiness segment tend to be higher in the first and second quarters and lower in the third and fourth quarters because of the timing of expensing cultural costs in the current year that were inventoried in the prior year. Our harvest costs generally increase in the second quarter and peak in the third quarter coinciding with the increasing production and revenue.

Fluctuations in price are a function of global supply and demand with weather conditions, such as unusually low or high temperatures, typically having the most dramatic effect on the amount of lemons supplied in any individual growing season. We believe we have a competitive advantage by operating our own lemon packing operation, even though a significant portion of the costs related to our lemon packing operations are fixed. As a result, cost per carton is a function of fruit throughput. While we regularly monitor our costs for redundancies and opportunities for cost reductions, we also supplement the number of lemons we pack in our packinghouse with additional lemons from third-party growers. Because the fresh utilization rate for our lemons, or the percentage of lemons we harvest and pack that go to the fresh market, is directly related to the quality of lemons we pack and, consequently, the price we receive per 40-pound box, we only pack lemons from third-party growers if we determine their lemons are of high quality.

Our avocado producing business is important to us yet nevertheless faces some constraints on growth as there is little additional land that can be cost-effectively acquired to support new avocado orchards in Southern California. The California avocado crop typically experiences alternating years of high and low production due to plant physiology. While our avocado production remains volatile, the profitability and cash flow realized from our avocados frequently offsets occasional losses in other crops we grow and helps to diversify our fruit production base.

In addition to growing lemons and avocados, we also grow oranges and specialty citrus and other crops, typically utilizing land not suitable for growing high quality lemons. We regularly monitor the demand for the fruit we grow in the ever-changing marketplace to identify trends. For instance, while per capita consumption of oranges in the United States has been decreasing since 2000 primarily as a result of consumers increasing their consumption of mandarin oranges and other specialty citrus, the international market demand for U.S. oranges has increased. As a result, we have focused our orange production on high quality late season Navel and Valencia oranges primarily for export to Japan, China and Korea, which are typically highly profitable niche markets. We produce our specialty citrus and other crops in response to consumer trends we identify and believe that we are a leader in the niche production and sale of certain of these high margin fruits. Because we carefully monitor the respective markets of specialty citrus and other crops, we believe that demand for the types and varieties of specialty citrus and other crops that we grow will continue to increase throughout the world.

Rental Operations

Our rental operations segment represented approximately 7% of our fiscal year 2011 and 2010 consolidated revenues and approximately 11% of our fiscal year 2009 consolidated revenues. Our rental housing units generate reliable cash flows which we use to partially fund the operations of all three of our business segments, and provide affordable housing to many of our employees, including our agribusiness employees, a unique employment benefit that helps us maintain a dependable, long-term employee base. In addition, our leased land business provides us with a profitable diversification. Revenue from our rental operations segment is generally consistent throughout the year.

Real Estate Development

Our real estate development segment represented 5% of our consolidated revenues in fiscal year 2011, 6% of our consolidated revenues in fiscal year 2010 and less than 1% of our consolidated revenues in fiscal year 2009. We recognize that long-term strategies are required for successful real estate development activities. We plan to redeploy any financial gains into other income producing real estate as well as additional agricultural properties.

Non-GAAP Financial Measures

Due to significant depreciable assets associated with the nature of our operations and interest costs associated with our capital structure, management believes that earnings before interest, income taxes, depreciation and amortization (“EBITDA”) and adjusted EBITDA, which excludes impairments on real estate development assets, is an important measure to evaluate our results of operations between periods on a more comparable basis. Such measurements are not prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) and should not be construed as an alternative to reported results determined in accordance with GAAP. The non-GAAP information provided is unique to our Company and may not be consistent with methodologies used by other companies. EBITDA and adjusted EBITDA are summarized and reconciled to net loss which management considers to be the most directly comparable financial measure calculated and presented in accordance with GAAP as follows:

	Quarter ended July 31,		Nine Months Ended July 31,	
	2012	2011	2012	2011
Net income	\$5,081,000	\$4,635,000	\$3,009,000	\$1,044,000

Third Quarter Fiscal Year 2012 Compared to Third Quarter Fiscal Year 2011*Revenues*

Total revenue for the third quarter of fiscal year 2012 was \$24.7 million compared to \$23.2 million for the third quarter of fiscal year 2011. The 6% increase of \$1.5 million was primarily the result of increased agribusiness revenue, partially offset by a decrease in real estate development revenues. The components of agribusiness revenues are detailed below:

	Agribusiness Revenues for the Quarters Ended July 31,			
	2012	2011	Change	
Lemons	\$15,460,000	\$11,447,000	\$4,013,000	35%
Avocados	5,530,000	6,299,000	(769,000)	(12)%

Edgar Filing: Limoneira CO - Form 10-Q

Navel and Valencia oranges	2,057,000	1,537,000	520,000	34%
Specialty citrus and other crops	617,000	627,000	(10,000)	(2)%
Agribusiness revenues	\$ 23,664,000	\$ 19,910,000	\$ 3,754,000	19%

Lemons: The increase in the third quarter of fiscal year 2012 was primarily the result of increased volume of fresh lemons sold at higher prices. During the third quarters of fiscal years 2012 and 2011, fresh lemon sales were \$13.3 million and \$10.5 million, respectively, on 794,000 and 670,000 cartons of lemons sold at average per carton prices of \$16.75 and \$15.67, respectively. The higher average per carton price in fiscal year 2012 compared to fiscal year 2011 was primarily due to more favorable overall market conditions. Additionally, lemon by-product and other lemon sales were \$2.2 million in the third quarter of fiscal year 2012 compared to \$0.9 million during the same period in fiscal year 2011.

Avocados: The decrease in the third quarter of fiscal year 2012 was primarily the result of lower prices, partially offset by increased volume. The California avocado crop typically experiences alternating years of high and low production due to plant physiology. During the third quarter of fiscal year 2012, 6.8 million pounds of avocados were sold at an average per pound price of \$0.81 compared to 3.8 million pounds sold at an average per pound price of \$1.66 during the same period in fiscal year 2011. Lower prices in fiscal year 2012 were due to increased supply in the marketplace.

Navel and Valencia oranges: The increase in the third quarter of fiscal year 2012 was primarily the result of increased volume of oranges sold at higher prices compared to the same period in fiscal year 2011. During the third quarter of fiscal year 2012, 182,000 field boxes of oranges were sold at an average per field box price of \$11.30 compared to 138,000 field boxes sold at an average per field box price of \$11.14 during the same period in fiscal year 2011.

Real estate development revenues for the third quarter of fiscal year 2012 were \$0.1 million compared to \$2.3 million for the same period in fiscal year 2011. The decrease was primarily due to the \$2.3 million sale of our real estate development project in Paradise Valley, Arizona (“Donna Circle”) in May 2011. There were no sales of real estate development projects in the third quarter of fiscal year 2012.

Costs and Expenses

Our total costs and expenses in the third quarter of fiscal year 2012 were \$17.0 million compared to \$16.0 million in the third quarter of fiscal year 2011, for a 7% increase of \$1.0 million. This increase was primarily attributable to increases in our agribusiness costs and selling, general and administrative expenses, offset by a decrease in real estate development expenses. Costs associated with our agribusiness include packing costs, harvest costs, cultural costs, costs related to the lemons we process and sell for third-party growers and depreciation expense. These costs are discussed further below:

	Agribusiness Costs and Expenses for the Quarters Ended July 31,			
	2012	2011	Change	
Packing costs	\$ 3,959,000	\$ 3,042,000	\$ 917,000	30%
Harvest costs	2,931,000	2,007,000	924,000	46%
Cultural costs	3,677,000	3,439,000	238,000	7%
Third-party grower costs	2,641,000	1,635,000	1,006,000	62%
Depreciation and amortization	346,000	395,000	(49,000)	(12)%
Agribusiness costs and expenses	\$ 13,554,000	\$ 10,518,000	\$ 3,036,000	29%

Packing costs: The increase in the third quarter of fiscal year 2012 was primarily attributable to a higher volume of fresh lemons packed and sold compared to the same period in fiscal year 2011.

Harvest costs: The increase in the third quarter of fiscal year 2012 was primarily attributable to higher lemon, avocado and orange harvest volumes compared to the same period in fiscal year 2011.

Third-party grower costs: The increase in the third quarter of fiscal year 2012 was primarily attributable to higher sales of fresh lemons and a higher percentage of lemons procured from third-party growers relative to the total volume of fresh cartons sold. Of the 794,000 and 670,000 cartons sold during the third quarters of fiscal years 2012 and 2011, respectively, 218,000 (27%) and 148,000 (22%) were procured from third-party growers at average per carton costs of \$12.11 and \$11.05, respectively.

Selling, general and administrative costs in the third quarter of fiscal year 2012 were \$2.5 million compared to \$2.2 million for the third quarter of fiscal year 2011. This 13% increase of \$0.3 million is primarily due to an increase in

incentive compensation.

Real estate development expenses in the third quarter of fiscal year 2012 were \$0.3 million compared to \$2.6 million in the third quarter of fiscal year 2011. In the third quarter of fiscal year 2011, we sold Donna Circle real and incurred related costs of \$2.8 million. There were no such costs incurred during the third quarter of fiscal year 2012.

Other Income/Expense

Other income/expense for the third quarter of fiscal year 2012 was \$0.1 million of income compared to \$0.2 million of expense for the third quarter of fiscal year 2011. The \$0.3 million increase in net other income is primarily due to a decrease in interest expense in the third quarter of fiscal year 2012 as a result of a larger amount of capitalized interest related to our real estate development projects as well as an increase in interest income from derivative instruments in the third quarter of fiscal year 2012.

Income Taxes

We recorded an estimated income tax provision of \$2.7 million in the third quarter of fiscal year 2012 on pre-tax earnings of \$7.8 million compared to an estimated income tax provision of \$2.4 million on pre-tax earnings of \$7.0 million in the third quarter of fiscal year 2011.

Our projected annual effective tax rate for fiscal year 2012 is 33.7% at July 31, 2012, resulting in a 34.9% effective tax rate, after certain discrete items, for the third quarter of fiscal year 2012. In comparison, our projected annual effective tax rate was 34.3% at July 31, 2011, resulting in a 33.7% effective tax rate, after certain discrete items, for the third quarter of fiscal year 2011.

Nine Months Ended July 31, 2012 Compared to the Nine Months Ended July 31, 2011*Revenues*

Total revenue for the nine months ended July 31, 2012 was \$51.0 million compared to \$41.6 million for the nine months ended July 31, 2011. The 23% increase of \$9.4 million was primarily the result of increased agribusiness revenues partially offset by a decrease in real estate development revenues. Agribusiness revenues are detailed below:

	Agribusiness Revenues for the Nine Months Ended July 31,			
	2012	2011	Change	
Lemons	\$ 35,625,000	\$ 23,355,000	\$ 12,270,000	53%
Avocados	6,255,000	6,674,000	(419,000)	(6)%
Navel and Valencia oranges	3,345,000	3,330,000	15,000	-
Specialty citrus and other crops	2,687,000	2,889,000	(202,000)	(7)%
Agribusiness revenues	\$ 47,912,000	\$ 36,248,000	\$ 11,664,000	32%

Lemons: The increase in the nine months ended July 31, 2012 was primarily the result of increased volume of fresh lemons sold at higher prices. During the nine months ended July 31, 2012 and 2011, fresh lemon sales were \$31.6 million and \$21.3 million, respectively, on 1,897,000 and 1,431,000 cartons of lemons sold at average per carton prices of \$16.66 and \$14.88, respectively. The higher average per carton price in fiscal year 2012 compared to fiscal year 2011 was primarily due to more favorable overall market conditions. Additionally, lemon by-product and other lemon sales were \$4.0 million in the nine months ended July 31, 2012 compared to \$2.1 million during the same period in fiscal year 2011.

Avocados: The decrease in the nine months ended July 31, 2012 was primarily the result of lower prices, partially offset by increased volume. The California avocado crop typically experiences alternating years of high and low production due to plant physiology. During the nine months ended July 31, 2012, 7.6 million pounds of avocados were sold at an average per pound price of \$0.82 per pound compared to 4.2 million pounds sold at an average per pound price of \$1.60 during the same period in fiscal year 2011. Lower prices in fiscal year 2012 were due to increased supply in the marketplace.

Specialty citrus and other crops: The decrease in the nine months ended July 31, 2012 was primarily the result of lower average prices per field box compared to the same period in fiscal year 2011.

Real estate development revenues were \$0.2 million during the nine months ended July 31, 2012 compared to \$2.4 million during the same period in fiscal year 2011. The decrease was primarily due to the \$2.3 million sale of Donna Circle in May 2011. There were no sales of real estate development projects during the nine months ended July 31,

2012.

Costs and Expenses

Total costs and expenses in the nine months ended July 31, 2012 were \$46.9 million compared to \$41.4 million in the nine months ended July 31, 2011, for a 13% increase of \$5.5 million. Of this increase, \$9.1 million was attributable to increases in our agribusiness costs and selling, general and administrative expenses, partially offset by \$3.7 million of decreases in real estate development expenses and impairments of real estate development assets. Costs associated with our agribusiness include packing costs, harvest costs, cultural costs, costs related to the lemons we process for third-party growers and depreciation expense. These costs are discussed further below:

	Agribusiness Costs and Expenses for the Nine Months Ended July 31,			
	2012	2011	Change	
Packing costs	\$ 9,896,000	\$ 7,613,000	\$ 2,283,000	30%
Harvest costs	5,298,000	4,913,000	385,000	8%
Cultural costs	8,810,000	8,289,000	521,000	6%
Third-party grower costs	11,526,000	5,926,000	5,600,000	94%
Depreciation and amortization	1,094,000	1,155,000	(61,000)	(5)%
Agribusiness costs and expenses	\$ 36,624,000	\$ 27,896,000	\$ 8,728,000	31%

Packing costs: The increase in the nine months ended July 31, 2012 is primarily attributable to a higher volume of fresh lemons packed and sold compared to the same period in fiscal year 2011.

Harvest costs: The increase in the nine months ended July 31, 2012 is primarily attributable to higher lemon and avocado harvest volumes.

Cultural costs: The increase in the nine months ended July 31, 2012 is primarily due to costs associated with the Sheldon Ranches Leases.

Third-party grower costs: The increase in the nine months ended July 31, 2012 is primarily attributable to higher sales of fresh lemons and a higher percentage of lemons procured from third-party growers relative to the total volume of fresh cartons sold. Of the 1,897,000 and 1,431,000 cartons sold during the nine months ended July 31, 2012 and 2011, respectively, 910,000 (48%) and 549,000 (38%) were procured from third-party growers at average per carton prices of \$12.67 and \$10.79, respectively.

Selling, general and administrative expenses for the nine months ended July 31, 2012 were \$7.8 million compared to \$7.4 million for the same period in fiscal year 2011. This 6% increase of \$0.4 million was primarily attributable to a \$0.4 million increase in incentive compensation, a \$0.2 million increase in consulting fees and a \$0.1 million increase in selling expenses. These increases were partially offset by a \$0.1 million decrease in costs associated with obligations under the Securities Exchange Act of 1934 (the "Exchange Act"), a \$0.1 million decrease in legal fees and \$0.1 million of net decreases in other selling, general and administrative expenses.

Real estate development expenses in the nine months ended July 31, 2012 were \$0.8 million compared to \$3.3 million in the same period of fiscal year 2011. In the nine months ended July 31, 2011, we sold Donna Circle and incurred related costs of \$2.8 million. There were no such costs incurred during the same period in fiscal year 2012.

Impairments of real estate development assets were zero in the nine months ended July 31, 2012 compared to \$1.2 million for the nine months ended July 31, 2011. In the nine months ended July 31, 2011, we recorded impairment charges on two of our real estate development projects: Donna Circle, which was sold in May 2011, and Templeton Santa Barbara, LLC. There were no such impairment charges incurred during the same period in fiscal year 2012.

Other Income/Expense

Other income (expense) for the nine months ended July 31, 2012 was \$0.4 million of income compared to \$1.4 million of income for the same period in fiscal year 2011. The \$1.2 million decrease in net other income is primarily due to the \$1.4 million gain on the sale of Rancho Refugio/Caldwell Ranch in the nine months ended July 31, 2011,

partially offset by a \$0.6 million decrease in interest expense in the nine months ended July 31, 2012 as a result of a larger amount of capitalized interest related to our real estate development projects.

Income Taxes

We recorded an estimated income tax provision of \$1.5 million in the nine months ended July 31, 2012 on a pre-tax earnings of \$4.5 million compared to an estimated income tax provision of \$0.4 million on a pre-tax earnings of \$1.5 million in the nine months ended July 31, 2011.

Our projected annual effective tax rate for fiscal year 2012 is 33.7% at July 31, 2012, resulting in a 33.2% effective tax rate, after certain discrete items, for the nine months ended July 31, 2012. In comparison, our projected annual effective tax rate was 34.3% at July 31, 2011, resulting in a 35.5% effective tax rate, after certain discrete items, for the nine months ended July 31, 2011.

Segment Results of Operations

We evaluate the performance of our agribusiness, rental operations and real estate development segments separately to monitor the different factors affecting financial results. Each segment is subject to review and evaluations for current market conditions, market opportunities and available resources. The following table shows the segment results of operations for the third quarter and nine months ended July 31, 2012 and 2011:

Third Quarter of Fiscal Year 2012 Compared to the Third Quarter of Fiscal Year 2011

The following analysis should be read in conjunction with the previous section "Results of Operations."

Agribusiness

For the third quarter of fiscal year 2012, our agribusiness segment revenue was \$23.7 million compared to \$19.9 million for the third quarter of fiscal year 2011. The 19% increase of \$3.8 million primarily reflected higher lemon revenue for the fiscal year 2012 third quarter compared to the fiscal year 2011 third quarter. The increase in agribusiness revenue consists of the following:

Lemon revenue for the third quarter of fiscal year 2012 was \$4.0 million higher than the third quarter of fiscal year 2011.

Avocado revenue for the third quarter of fiscal year 2012 was \$0.8 million lower than the third quarter of fiscal year 2011.

Navel and Valencia orange revenues for the third quarter of fiscal year 2012 were \$0.6 million higher than the third quarter of fiscal year 2011.

Specialty citrus and other crop revenues for the third quarter of fiscal year 2012 were essentially flat compared to the third quarter of fiscal year 2011.

Costs associated with our agribusiness segment include packing costs, harvest costs, cultural costs, costs related to the lemons we process and sell for third-party growers and depreciation expense. For the third quarter of fiscal year 2012, our agribusiness costs were \$13.6 million compared to \$10.5 million for the third quarter of fiscal year 2011. The 29% increase of \$3.1 million primarily consists of the following:

Packing costs for the third quarter of fiscal year 2012 were \$0.9 million higher than the third quarter of fiscal year 2011.

Harvest costs for the third quarter of fiscal year 2012 were \$0.9 million higher than the third quarter of fiscal year 2011.

Cultural costs for the third quarter of fiscal year 2012 were \$0.3 million higher than the third quarter of fiscal year 2011.

Third-party grower costs for the third quarter of fiscal year 2012 were \$1.0 million higher than the third quarter of fiscal year 2011.

Depreciation expense was similar quarter to quarter at approximately \$0.4 million.

Rental Operations

Our rental operations segment had revenues of \$1.0 million in the third quarters of fiscal years 2012 and 2011. All three areas of this segment (residential and commercial rental operations, leased land and organic recycling) were similar quarter to quarter.

Costs in our rental operations segment were approximately \$0.5 million in the third quarters of fiscal years 2012 and 2011. Depreciation expense was similar quarter to quarter at approximately \$0.1 million.

Real Estate Development

Our real estate development segment revenues for the third quarter of fiscal year 2012 were \$2.2 million lower than the third quarter of fiscal year 2011.

Real estate development costs and expenses for the third quarter of fiscal year 2012 were \$2.3 million lower than the third quarter of fiscal year 2011.

Corporate and Other

Corporate costs and expenses include selling, general and administrative costs and other costs not allocated to the operating segments. Corporate and other costs for the third quarter of fiscal year 2012 were \$0.3 million higher than the third quarter of fiscal year 2011. Depreciation expense was similar quarter to quarter at approximately \$0.1 million.

Nine Months Ended July 31, 2012 Compared to the Nine Months Ended July 31, 2011

The following analysis should be read in conjunction with the previous section “Results of Operations.”

Agribusiness

For the nine months ended July 31, 2012, our agribusiness segment revenue was \$47.9 million compared to \$36.2 million for the nine months ended July 31, 2011. The 32% increase of \$11.7 million primarily reflected higher lemon revenue for the fiscal year 2012 period compared to the fiscal year 2011 period. The increase in agribusiness revenue primarily consists of the following:

Lemon revenue for the nine months ended July 31, 2012 was \$12.3 million higher than the nine months ended July 31, 2011.

Avocado revenue for the nine months ended July 31, 2012 was \$0.4 million lower than the nine months ended July 31, 2011.

Navel and Valencia orange revenues for the nine months ended July 31, 2012 were essentially flat compared to the nine months ended July 31, 2011.

Specialty citrus and other crop revenues for the nine months ended July 31, 2012 were \$0.2 million lower than the nine months ended July 31, 2011.

Costs associated with our agribusiness segment include packing costs, harvest costs, cultural costs, costs related to the lemons we process and sell for third-party growers and depreciation expense. For the nine months ended July 31, 2012, our agribusiness costs and expenses were \$36.6 million compared to \$27.9 million for the nine months ended July 31, 2011. The 31% increase of \$8.7 million primarily consists of the following:

Packing costs for the nine months ended July 31, 2012 were \$2.3 million higher than the nine months ended July 31, 2011.

Harvest costs for the nine months ended July 31, 2012 were \$0.4 million higher than the nine months ended July 31, 2011.

Cultural costs for the nine months ended July 31, 2012 were \$0.5 million higher than the nine months ended July 31, 2011.

Third-party grower costs for the nine months ended July 31, 2012 were \$5.6 million higher than the nine months ended July 31, 2011.

Depreciation expense was similar period to period at approximately \$1.1 million.

Rental Operations

Our rental operations segment had revenues of approximately \$2.9 million in the nine months ended July 31, 2012 and 2011. All three areas of this segment (residential and commercial rental operations, leased land and organic recycling) were similar period to period.

Costs in our rental operations segment were similar period to period at approximately \$1.4 million. Depreciation expense was similar period to period at approximately \$0.3 million.

Real Estate Development

Our real estate development segment revenues for the nine months ended July 31, 2012 were \$2.3 million lower than the nine month periods ended July 31, 2011.

Real estate development costs and expenses for the nine months ended July 31, 2012 were \$2.5 million lower than the nine months ended July 31, 2011.

Corporate and Other

Corporate costs and expenses include selling, general and administrative costs and other costs not allocated to the operating segments. Corporate and other costs for the nine months ended July 31, 2012 were \$0.4 million higher than the nine months ended July 31, 2011. Depreciation expense was similar period to period at approximately \$0.2 million.

Seasonal Operations

Historically, our agricultural operations have been seasonal in nature with the least amount of our annual revenue being generated in our first quarter, increasing in the second quarter, peaking in the third quarter and declining in the fourth quarter. Cultural costs in our agribusiness tend to be higher in the first and second quarters and lower in the third and fourth quarters because of the timing of expensing cultural costs in the current year that were inventoried in the prior year. Our harvest costs generally increase in the second quarter and peak in the third quarter coinciding with increasing production and revenue. Due to this seasonality and to avoid the inference that interim results are indicative of the estimated results for a full fiscal year, we present supplemental information for 12-month periods ended at the interim date for the current and preceding years.

The following table shows the unaudited results of operations for the trailing twelve months:

	Twelve months ended July 31,	
	2012	2011

Liquidity and Capital Resources

Overview

Our liquidity and capital position fluctuates during the year depending on seasonal production cycles, weather events and demand for our products. Typically, our first and last fiscal quarters coincide with the fall and winter months during which we are growing crops that are harvested and sold in the spring and summer, our second and third quarters. To meet working capital demand and investment requirements of our agribusiness and real estate development segments and to supplement operating cash flows, we utilize our revolving credit facility to fund agricultural inputs and farm management practices until sufficient returns from crops allow us to repay amounts borrowed. Raw materials needed to propagate the various crops grown by us consist primarily of fertilizer, herbicides, insecticides, fuel and water and are readily available from local sources.

Cash Flows from Operating Activities

For the nine months ended July 31, 2012 and 2011, net cash provided by operating activities was \$4.5 million and \$1.2 million, respectively. The significant components of our Company's cash flows provided by operating activities as included in the unaudited consolidated statements of cash flows are as follows:

Net income for the nine months ended July 31, 2012 was \$3.0 million compared to \$1.0 million for the nine months ended July 31, 2011. The increase of \$2.0 million in the nine months ended July 31, 2012 compared to the same period in fiscal year 2011 was primarily attributable to an increase in operating income of \$3.9 million partially offset by a decrease in other income of \$1.0 million.

Depreciation and amortization remained consistent period to period at approximately \$1.6 million primarily because the balance of depreciable assets did not change significantly.

During the nine months ended July 31, 2011, we sold the Rancho Refugio/Caldwell Ranch which resulted in a gain of \$1.4 million. No such transaction occurred during the same period of fiscal year 2012.

Non-cash impairments of real estate development assets resulting from continued weakness in the real estate market were \$1.2 million for the nine months ended July 31, 2011. There were no impairments of real estate development assets during the same period in fiscal year 2012.

Loss on disposals/sales of fixed assets of \$0.2 million in the nine months ended July 31, 2012 was primarily the result of expenses incurred from an orchard removal as part of our fiscal year 2012 orchard redevelopment plan. There were \$0.1 million of expenses incurred from orchard removals in the nine months ended July 31, 2011.

Non-cash stock compensation expense was \$0.8 million in the nine month period ended July 31, 2012 compared to \$0.6 million in the nine months ended July 31, 2011.

Non-cash interest income on derivative instruments was \$0.5 million for the nine months July 31, 2012 and consisted of \$0.9 million of mark to market adjustments to the underlying fair value net liability, partially offset by \$0.4 million of amortization of the accumulated other comprehensive loss balance. The income of \$0.4 million for the same period in fiscal year 2011 consisted of \$0.8 million of mark to market adjustments to the underlying fair value net liability partially offset by \$0.4 million of amortization of the accumulated other comprehensive loss balance.

Accounts and notes receivable used \$5.6 million in operating cash flows during the nine months ended July 31, 2012 compared to using \$4.5 million in operating cash flows during the same period in fiscal year 2011. This increase was primarily the result of a \$5.6 million increase in accounts receivable during the nine months ended July 31, 2012 compared to an increase of \$3.8 million in accounts receivable during the same period in fiscal year 2011, which was due to higher agribusiness revenue in the nine months ended July 31, 2012 compared to the same period in fiscal year 2011.

Cultural costs used \$0.7 million in operating cash flows during the nine months ended July 31, 2012 compared to providing \$0.4 million in operating cash flows during the same period in fiscal year 2011, primarily due to the Sheldon Ranches Leases. We will not share in the related citrus crop revenue in our fiscal year ending October 31, 2012; therefore, the cultural costs incurred in fiscal year 2012 are capitalized until the citrus crops are harvested in fiscal year 2013. We have capitalized \$0.9 million of cultural costs related to these leases in the nine months ended July 31, 2012.

Income taxes receivable provided \$1.3 million in operating cash flows in the nine months ended July 31, 2012, consisting primarily of a \$1.5 million income tax provision and a \$0.4 million income tax refund. In comparison, income taxes receivable provided \$1.2 million in operating cash flows for the same period in fiscal year 2011, consisting primarily of a \$0.4 million income tax provision and a \$0.8 million income tax refund.

Accounts payable and growers payable provided \$3.4 million in operating cash flows in the nine months ended July 31, 2012 compared to providing \$1.6 million of operating cash flows during the same period in fiscal year 2011. This increase was primarily due to an increase in accounts payable as a result of higher expenses and higher sales prices and volumes of the lemons we processed and sold for third-party growers during the nine months ended July 31, 2012 compared to the same period in fiscal year 2011.

Accrued liabilities provided \$1.3 million in operating cash flows in the nine months ended July 31, 2012 compared to using \$0.3 million of operating cash flows during the same period in fiscal year 2011. There were no accrued bonuses at October 31, 2011 for fiscal year 2011 compared to \$0.4 million of accrued bonuses for fiscal year 2010 that were included in accrued liabilities at October 31, 2010 and paid in the nine months ended July 31, 2011. Additionally, we recorded \$0.6 million of accrued liabilities for incentive compensation and \$0.3 million of accrued liabilities related to the Sheldon Ranches Leases during the first nine months of fiscal year 2012.

Other long-term liabilities provided \$0.2 million of operating cash flows in the nine months ended July 31, 2012 and represented \$0.6 million of non-cash pension expense offset by \$0.4 million of pension contributions for the period. The \$0.4 million of operating cash flows provided during the nine months ended July 31, 2011 represents \$0.6 million of non-cash pension expense partially offset by a pension contribution of \$0.2 million for the period.

Cash Flows from Investing Activities

For the nine months ended July 31, 2012, investing activities used \$7.6 million of net cash compared to providing \$30,000 of net cash during the same period in fiscal year 2011.

Net cash used in investing activities is primarily comprised of capital expenditures, acquisitions and the sale of assets. Capital expenditures and acquisitions were \$7.2 million in the first nine months of fiscal year 2012, comprised of \$0.8 million for the acquisition of an agriculture business, \$3.1 million for property, plant and equipment and \$3.3 million for real estate development projects. Capital expenditures and acquisitions were \$11.3 million in the nine months ended July 31, 2011, comprised of \$6.5 million for the acquisition of Rancho Refugio/Caldwell Ranch, \$1.5 million for property, plant and equipment and \$3.3 million for real estate development projects. These capital expenditures were partially offset by \$9.3 million of net proceeds from the sale of Rancho Refugio/Caldwell Ranch and \$2.1 million of net proceeds from the sale of Donna Circle.

Cash Flows from Financing Activities

For the nine months ended July 31, 2012, financing activities provided net cash of \$3.0 million compared to using \$1.5 million of net cash during the same period in fiscal year 2011.

The \$4.5 million increase in cash flows from financing activities for the nine months ended July 31, 2012 compared to the same period in fiscal year 2011 is primarily due to net borrowings of long-term debt in the amount of \$4.4 million during the nine months ended July 31, 2012 compared to net borrowings of \$0.1 million during the same period in fiscal year 2011. The increase in net borrowings during the nine months ended July 31, 2012 compared to the same period in fiscal year 2011 is primarily due to net cash generated in fiscal year 2011 by the purchase and sale of Rancho Refugio/ Caldwell Ranch in the amount of \$2.8 million, net proceeds from the sale of Donna Circle in the amount of \$2.1 million and \$1.2 million for the acquisition of two agriculture properties combined with increased capital expenditures in fiscal year 2012 offset by improved fiscal year 2012 operating cash flows.

Transactions Affecting Liquidity and Capital Resources

We finance our working capital and other liquidity requirements primarily through cash from operations and our revolving credit facility with Rabobank, NA (“Rabobank Credit Facility”). In addition, we have three term loans with Farm Credit West, FLCA (“Farm Credit West Term Loans”) and a non-revolving line of credit, (“Farm Credit West Line of Credit”) with Farm Credit West, PCA (together with Farm Credit West FLCA, “Farm Credit West”). Additional information regarding the Rabobank Credit Facility, the Farm Credit West Term Loans and the Farm Credit West Line of Credit can be found in Note 10 to the unaudited consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q.

We believe that the cash flows from operations and available borrowing capacity from our existing credit facilities will be sufficient to satisfy our capital expenditures, debt service, working capital needs and other contractual obligations for the remainder of fiscal 2012. In addition, we have the ability to control the timing of our investing cash flows to the extent necessary based on our liquidity demands.

Rabobank Credit Facility

As of July 31, 2012, our outstanding borrowings under the Rabobank Credit Facility were approximately \$58.7 million and we had approximately \$28.3 million of availability. The Rabobank Credit Facility bears interest at a variable rate equal to the one month London Interbank Offer Rate ("LIBOR") plus a spread of 1.50%. The interest rate resets on the first of each month and was 1.75% at July 31, 2012. We have the ability to prepay any amounts outstanding under the Rabobank Credit Facility without penalty. In November 2011, we entered into a Second Amendment to Amended and Restated Line of Credit Agreement in order to (i) increase the revolving line of credit from \$80 million to the lesser of \$100 million or 60% of the appraised value of any real estate pledged as collateral which was \$87 million at January 31, 2012, (ii) amend the interest rate such that the line of credit bears interest at a rate equal to LIBOR plus 1.80% effective July 1, 2013 and (iii) extend the maturity date from June 30, 2013 to June 30, 2018.

The Rabobank Credit Facility is secured by certain of our agricultural properties and a portion of the equity interest in the San Cayetano Mutual Water Company, and subjects us to affirmative and restrictive covenants including, among other customary covenants, financial reporting requirements, requirements to maintain and repair any collateral, restrictions on the sale of assets, restrictions on the use of proceeds, prohibitions on the incurrence of additional debt and restrictions on the purchase or sale of major assets. We are also subject to a covenant that we will maintain a debt service coverage ratio, as defined in the Rabobank Credit Facility, of less than 1.25 to 1.0 measured annually at October 31, with which we were in compliance at October 31, 2011.

Farm Credit West Loans

As of July 31, 2012, we had an aggregate of approximately \$28.6 million outstanding under the Farm Credit West Term Loans and Farm Credit West Line of Credit. The following provides further discussion on the term loans and non-revolving credit facility:

· *Term Loan Maturing November 2022.* As of July 31, 2012, we had \$5.9 million outstanding under the Farm Credit West term loan that matures in November 2022. This term loan bears interest at a variable rate equal to an internally calculated rate based on Farm Credit West's internal monthly operations and their cost of funds and generally follows the changes in the 90-day treasury rates in increments divisible by 0.25% and is payable in quarterly installments

through November 2022. The interest rate resets monthly and was 3.25% at July 31, 2012. This term loan is secured by certain of our agricultural properties.

Term Loan Maturing May 2032. As of July 31, 2012, we had \$0.9 million outstanding under the Farm Credit West term loan that matures in May 2032. This term loan bears interest at a variable rate equal to an internally calculated rate based on Farm Credit West's internal monthly operations and their cost of funds and generally follows the changes in the 90-day treasury rates in increments divisible by 0.25% and is payable in monthly installments through May 2032. The interest rate resets monthly and was 3.25% at July 31, 2012.

Term Loan Maturing October 2035. As of July 31, 2012, our wholly-owned subsidiary, Windfall Investors, LLC, had \$8.8 million outstanding under the Farm Credit West term loan that matures in October 2035. The interest rate on this term loan was fixed at 6.73% until November 2011. Effective November 2011, we entered into an agreement with Farm Credit West fixing the interest rate at 3.65% for three years after which time the rate becomes variable at a rate equal to an internally calculated rate based on Farm Credit West's internal monthly operations and their cost of funds and generally follows the changes in the 90-day treasury rates in increments divisible by 0.25% until the loan matures. This term loan is guaranteed by the Company and secured by the Windfall Farms property.

Non-Revolving Line of Credit Maturing May 2018. As of July 31, 2012, we had \$13.0 million outstanding under the non-revolving line of credit that matures in May 2018. This line of credit bears interest at a variable rate equal to an internally calculated rate based on Farm Credit West's internal monthly operations and their cost of funds and generally follows the changes in the 90-day treasury rates in increments divisible by 0.25% with interest payable on a monthly basis. The terms require the Company to remit to Farm Credit West special principal payments of a minimum of \$175,000 per lot sold on the Windfall Investors, LLC real estate development project. The interest rate resets monthly and was 3.50% at July 31, 2012. This term loan is secured by certain of our agricultural properties and certain of our ownership shares in mutual water companies.

The Farm Credit West Term Loans and Farm Credit West Line of Credit contain various conditions, covenants and requirements with which we and Windfall Investors, LLC must comply. In addition, we and Windfall Investors, LLC are subject to limitations on, among other things, selling, abandoning or ceasing business operations; merging or consolidating with a third party; disposing of a substantial portion of assets by sale, transfer, gifts or lease except for inventory sales in the ordinary course of business; obtaining credit or loans from other lenders other than trade credit customary in the business; becoming a guarantor or surety on or otherwise liable for the debts or obligations of a third party; and mortgaging, pledging, leasing for over a year, or otherwise making or allowing the filing of a lien on any collateral.

Interest Rate Swaps

We enter into interest rate swap agreements to manage the risks and costs associated with our financing activities. On April 29, 2010, we cancelled two interest rate swaps with notional amounts of \$10.0 million each and amended the remaining interest rate swap from a notional amount of \$22.0 million to a notional amount of \$42.0 million. At July 31, 2012, we had an interest rate swap agreement which locks in the interest rate on \$42.0 million of our \$87.3 million in debt at approximately 5.13% until June 2013. Of the remaining \$45.3 million in debt, \$36.5 million bears interest at variable rates, which were 3.25 % to 3.50% at July 31, 2012 and \$8.8 million bears interest at a fixed rate of 3.65%, which becomes variable in November 2014.

The interest rate swaps previously qualified as cash flow hedges and the fair value adjustments to the swap agreements were deferred and included in accumulated other comprehensive income (loss). As a result of the re-negotiated terms, the remaining interest rate swap no longer qualifies for hedge accounting and accordingly, fair value adjustments from April 30, 2010 are included in interest income (expense). In November 2011, the Company entered into a forward interest rate swap agreement with Rabobank International, Utrecht to fix the interest rate at 4.30% on \$40,000,000 of its outstanding borrowings under the Rabobank Credit Facility beginning July 2013 until June 2018. This interest rate swap qualifies as a cash flow hedge and is accounted for as a hedge under the short-cut method. Therefore, the fair value adjustments to the underlying debt are deferred and included in accumulated other comprehensive income (loss) and the liability is being recorded in other long-term liabilities in the Company's consolidated balance sheet at July 31, 2012. Additional information, regarding the interest rate swaps can be found in Note 11 to the unaudited consolidated financial statements for the quarter ended July 31, 2012 included elsewhere in this Quarterly Report on Form 10-Q.

Contractual Obligations

The following table presents our contractual obligations at July 31, 2012 for which cash flows are fixed and determinable:

Contractual Obligations:	Payments due by Period				
	Total	<1 year	1-3 years	3-5 years	5+ years
Fixed rate debt (principal)	\$40,765,000	\$246,000	\$519,000	\$-	\$40,000,000
Variable rate debt (principal)	46,495,000	508,000	1,067,000	1,696,000	43,224,000
Operating lease obligations	11,009,000	2,018,000	2,907,000	2,721,000	3,363,000
Total contractual obligations	\$98,269,000	\$2,772,000	\$4,493,000	\$4,417,000	\$86,587,000
Interest payments on fixed and variable rate debt	\$23,408,000	\$3,735,000	\$7,405,000	\$7,269,000	\$4,999,000

We believe that the cash flows from our agribusiness and rental operations business segments as well as available borrowing capacity from our existing credit facilities will be sufficient to satisfy our future capital expenditure, debt service, working capital and other contractual obligations for the remainder of fiscal year 2012. In addition, we have the ability to control the timing of a portion of our investing cash flows to the extent necessary based on our liquidity demands.

Fixed Rate and Variable Rate Debt

Details of amounts included in long-term debt and interest rate swaps can be found above and in Notes 10 and 11 to the unaudited consolidated financial statements for the quarter ended July 31, 2012 included elsewhere in this Quarterly Report on Form 10-Q. The table above assumes that long-term debt is held to maturity.

Interest Payments on Fixed and Variable Debt

The above table assumes that our fixed rate and long-term debt is held to maturity and the interest rates on our variable rate debt remain unchanged for the remaining life of the debt from those in effect at October 31, 2011.

Operating Lease Obligations

We have numerous operating lease commitments with remaining terms ranging from less than one year to ten years. We have installed a one mega-watt photovoltaic array on one of our agricultural properties located in Ventura County that produces a significant portion of the power to operate our lemon packinghouse. The construction of this array was financed by Farm Credit Leasing and we have a ten-year lease with Farm Credit Leasing for this array. Annual payments for this lease are \$0.5 million, and in September 2018 we have an option to purchase the array for \$1.1 million. We entered into a similar transaction with Farm Credit Leasing for a second photovoltaic array at one of our agricultural properties located in the San Joaquin Valley to supply a significant portion of the power to operate four deep-water well pumps located on our property. Annual lease payments for this facility range from \$0.3 million to \$0.8 million, and in November 2018 we have the option to purchase the array for \$1.3 million. Additionally, we have agreements with an electricity utility through the California Solar Initiative which entitle us to receive rebates for energy produced by our solar arrays. These rebates, which reduce our agribusiness costs and expenses, are scheduled to expire in fiscal year 2013, were \$0.7 million and \$0.6 million during the nine month periods ended July 31, 2012 and 2011, respectively, and have averaged approximately \$0.9 million per year since the inception of the leases.

In January 2012, our Company entered into the Sheldon Ranches Leases. Each of the leases is for ten-year terms and provides for four five-year renewal options with an aggregate base rent of approximately \$500,000 per year. Each of the leases also contains profit share arrangements with the landowners as additional rent on each of the properties and a provision for the potential purchase of the properties by our Company in the future. In accordance with the terms of the lease agreements, we will not share in the citrus crop revenue in our fiscal year ending October 31, 2012. During the three and nine months ended July 31, 2012, we incurred \$144,000 and \$303,000, respectively, of net lease expense related to the Sheldon Ranches Leases.

We lease pollination equipment under a lease through fiscal year 2013 with annual payments of \$0.1 million. We also lease machinery and equipment for our packing operations and other land for our agricultural operations under leases with annual lease commitments that are individually immaterial.

Preferred Stock Dividends

In 1997, in connection with the acquisition of Ronald Michaelis Ranches, Inc., our Company issued 30,000 shares of Series B Convertible Preferred Stock at \$100 par value (the “Series B Stock”). The holders of the Series B Stock are entitled to receive cumulative cash dividends at an annual rate of 8.75% of par value. Such dividends are payable quarterly on the first day of January, April, July and October in each year commencing July 1, 1997 and totaled \$0.3 million in each of the fiscal years 2011, 2010 and 2009. We paid preferred stock dividends of approximately \$0.2 million during the nine months ended July 31, 2012.

Defined Benefit Plan Contributions

As more fully described in Note 15 to our unaudited consolidated financial statements for the quarter ended July 31, 2012, our Company’s noncontributory, defined benefit, single employer pension plan (the “Plan”) was frozen as of June 30, 2004. During the nine months ended July 31, 2012, we made contributions of \$0.4 million to the Plan and we expect to contribute approximately \$0.8 million to the Plan in fiscal year 2012.

Real Estate Development Activities and Related Capital Resources

As noted above under “-Transactions Affecting Liquidity and Capital Resources,” we have the ability to control the timing of a portion of our investing cash flows to the extent necessary based upon our liquidity demands. In order for our real estate development operations to reach their maximum potential benefit to us, however, we will need to be successful over time in identifying other third party sources of capital to partner with us to move those development projects forward. While we have been in discussions with several external sources of capital in respect of all of our development projects, current market conditions for California real estate projects, while improving, continue to be challenging and make it difficult to predict the timing and amounts of future capital that will be required to complete the development of our projects.

Recent Accounting Pronouncements

Please see Note 2 to the unaudited consolidated financial statements for the period ended July 31, 2012 elsewhere in this Quarterly Report on Form 10-Q for information concerning our Recent Accounting Pronouncements.

Critical Accounting Policies and Estimates

The preparation of our consolidated financial statements in accordance with GAAP requires us to develop critical accounting policies and make certain estimates and judgments that may affect the reported amounts of assets, liabilities, revenues and expenses. We base our estimates and judgments on historical experience, available relevant data and other information that we believe to be reasonable under the circumstances. Actual results may materially differ from these estimates under different assumptions or conditions as new or additional information becomes available in future periods. We believe the following critical accounting policies reflect our more significant estimates and judgments used in the preparation of our consolidated financial statements.

Revenue Recognition – As a general policy, revenue and related costs are recognized when (i) persuasive evidence of an arrangement exists, (ii) delivery has occurred, (iii) selling price is fixed or determinable and (iv) collectability is reasonably assured. We record a sales allowance in the period revenue is recognized as a provision for estimated customer discounts and concessions.

Agribusiness revenue – Revenue from the sales of certain of our agricultural products is recorded based on estimated proceeds provided by certain of our sales and marketing partners (Calavo and other third-party packinghouses) due to the time between when the product is delivered by us and the closing of the pools for such fruits at the end of each month. Calavo and other third-party packinghouses are agricultural cooperatives or function in a similar manner as an agricultural cooperative. As such, we apply specific authoritative agribusiness revenue recognition guidance related to transactions between patrons and agribusiness marketing cooperatives to record revenue at time of delivery to the packinghouses relating to fruits that are in pools that have not yet closed at month end if (a) the related fruits have been delivered to and accepted by Calavo and other third-party packinghouses (i.e. title has transferred to Calavo and other third-party packinghouses) and (b) sales price information has been provided by Calavo and other third-party packinghouses (based on the marketplace activity for the related fruit) to estimate with reasonable certainty the final selling price for the fruit upon the closing of the pools. Historically, the revenue that is recorded based on the sales price information provided to us by Calavo and other third-party packinghouses at the time of delivery has not materially differed from the actual amounts that are paid after the monthly pools are closed.

Our avocados, oranges, specialty citrus and other specialty crops are packed and sold through by Calavo and other third-party packinghouses. Specifically, we deliver all of our avocado production from our orchards to Calavo. These

avocados are then packed by Calavo at its packinghouse, and sold and distributed under Calavo brands to its customers primarily in the United States and Canada. Our arrangements with other third-party packinghouses related to oranges, specialty citrus and other specialty crops are similar to our arrangement with Calavo.

Our arrangements with our third-party packinghouses are such that we are the producer and supplier of the product and the third-party packinghouses are our customers. The revenues we recognize related to the fruits sold to the third-party packinghouses are based on the volume and quality of the fruits delivered, the market price for such fruit, less the packinghouses' charges to pack and market the fruit. Such packinghouse charges include the grading, sizing, packing, cooling, ripening and marketing of the related fruit. We bear inventory risk until the product is delivered to the third-party packinghouses at which time title and inventory risk to the product is transferred to the third-party packinghouses and revenue is recognized. Such third-party packinghouse charges are recorded as a reduction of revenue based on the application of specific authoritative revenue recognition guidance related to a "Vendor's Income Statement Characterization of Consideration Given to a Customer." The identifiable benefit we receive from the third-party packinghouses for packaging and marketing services cannot be sufficiently separated from the third-party packinghouses' purchase of our products. In addition, we are not able to reasonably estimate the fair value of the benefit received from the third-party packinghouses for such services and as such, these costs are characterized as a reduction of revenue in our consolidated statement of operations.

Revenue from crop insurance proceeds is recorded when the amount of, and the right to receive, the payment can be reasonably determined.

Rental revenue - Minimum rental revenues are generally recognized on a straight-line basis over the respective initial lease term. Contingent rental revenues are contractually defined as to the percentage of rent received by us and are based on fees collected by the lessee. Our rental arrangements generally require payment on a monthly or quarterly basis.

Real estate development revenue – The Company recognizes revenue on real estate development projects in accordance with FASB ASC 360-20, *Real Estate Sales*, which provides for profit to be recognized in full when real estate is sold, provided that a sale has been consummated and profit is determinable, collection of sales proceeds is estimable with the seller's receivable not subject to subordination, risks and rewards of ownership have been transferred to the buyer and the earnings process is substantially complete with no significant seller activities or obligations required after the date of sale. To the extent the above conditions are not met, a portion or all of the profit is deferred.

Incidental operations may occur during the holding or development period of real estate development projects to reduce holding or development costs. Incremental revenue from incidental operations in excess of incremental costs from incidental operations is accounted for as a reduction of development costs. Incremental costs from incidental operations in excess of incremental revenue from incidental operations are charged to operations.

Real estate development costs – We capitalize the planning, entitlement, construction and development costs associated with our various real estate projects. Costs that are not capitalized are expensed as incurred. A real estate development project is considered substantially complete upon the cessation of construction and development activities. Once a project is substantially completed, future costs are expensed as incurred. For the nine months ended July 31, 2012, we capitalized approximately \$1.8 million of costs related to our real estate projects and expensed approximately \$0.5 million of costs.

Income taxes – Deferred income tax assets and liabilities are computed annually for differences between the financial statement and income tax basis of assets and liabilities that will result in taxable or deductible amounts in the future. Such deferred income tax asset and liability computations are based on enacted tax laws and rates applicable to periods in which the differences are expected to affect taxable income. A valuation allowance is established, when necessary, to reduce deferred income tax assets to the amount expected to be realized.

Tax benefits from an uncertain tax position are only recognized if it is more likely than not that the tax position will be sustained upon examination by the taxing authorities based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement.

Derivative financial instruments – We use derivative financial instruments for purposes other than trading to manage our exposure to interest rates as well as to maintain an appropriate mix of fixed and floating-rate debt. Contract terms of our hedge instruments closely mirror those of the hedged item, providing a high degree of risk reduction and correlation. Contracts that are effective at meeting the risk reduction and correlation criteria are recorded using hedge accounting. If a derivative instrument is a hedge, depending on the nature of the hedge, changes in the fair value of the instrument will be either offset against the change in the fair value of the hedged assets, liabilities or firm commitments through earnings or be recognized in other comprehensive income until the hedged item is recognized in earnings. The ineffective portion of an instrument's change in fair value will be immediately

recognized in earnings. Instruments that do not meet the criteria for hedge accounting, or contracts for which we have not elected hedge accounting, are valued at fair value with unrealized gains or losses reported in earnings during the period of change.

Impairment of long-lived assets – We evaluate our long-lived assets, including our real estate development projects, for impairment when events or changes in circumstances indicate the carrying value of these assets may not be recoverable. As a result of the economic downturn in recent years, we recorded impairment charges of \$1.2 million, \$2.4 million and \$6.2 million in fiscal years 2011, 2010 and 2009, respectively. These charges were based on independent appraisals and other factors and were developed using various facts, assumption and estimates. Future changes in these facts, assumptions and estimates could result in additional charges.

Defined benefit retirement plan – As discussed in Note 15 to our unaudited consolidated financial statements, we sponsor a defined benefit retirement plan that was frozen in June, 2004, and no future benefits accrued to participants subsequent to that time. Ongoing accounting for this plan under FASB ASC 715, *Compensation – Retirement Benefits*, provides guidance as to, among other things, future estimated pension expense, minimum pension liability and future minimum funding requirements. This information is provided to us by third-party actuarial consultants. In developing this data, certain estimates and assumptions are used, including among other things, discount rate, long-term rates of return and mortality tables. Changes in any of these estimates could materially affect the amounts recorded that are related to our defined benefit retirement plan.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes in the disclosures discussed in the section entitled “Quantitative and Qualitative Disclosures About Market Risk” in Part II, Item 7A of our Annual Report on Form 10-K for the fiscal year ended October 31, 2011 as filed with the Securities and Exchange Commission on January 17, 2012.

Item 4. Controls and Procedures

Disclosure Controls and Procedures. As of July 31, 2012, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as such term is defined in Rule 13a-15(e) promulgated under the Exchange Act. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this Quarterly Report.

Changes in Internal Control Over Financial Reporting. There have been no changes in our internal controls over financial reporting during the period covered by this Quarterly Report on Form 10-Q or, to our knowledge, in other factors that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Limitations on the Effectiveness of Controls. Control systems, no matter how well conceived and operated, are designed to provide a reasonable, but not an absolute, level of assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

We are from time to time involved in legal proceedings arising in the normal course of business. Other than proceedings incidental to our business, we are not a party to, nor is any of our property the subject of, any material pending legal proceedings and no such proceedings are, to our knowledge, threatened against us.

Item 1A. Risk Factors

Risk factors and uncertainties associated with our business have not changed materially from those disclosed in Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended October 31, 2011 as filed with the Securities and Exchange Commission on January 17, 2012.
