Stock Exchange Announcement

Financial statement 2002

6 February 2003

Novo Nordisk expects net profit to grow towards 10% in 2003

Sales in local currencies increased by 11% compared to 2001. Measured in Danish kroner sales increased by 6% to DKK 25,187 million in 2002. The performance in local currencies per therapy area was as follows:

Diabetes care sales increased by 11%.

Haemostasis management sales increased by 22%.

Growth hormone therapy sales increased by 4%.

Hormone replacement therapy sales decreased by 5%.

Operating profit increased by 7% to DKK 5,979 million in 2002 and net profit increased by 6% to DKK 4,095 million. Fully diluted earnings per share increased by 6% to DKK 11.72 in 2002 from DKK 11.10 in 2001.

Lars Rebien Sørensen, president & CEO, said, 2002 has in all respects been a very challenging year for Novo Nordisk. We have responded to the challenges and are now pleased to say that we have met the revised target set in April, despite a continued negative development in the most important currencies. Over the past year we have sharpened our focus and skills, so the company is now in a better shape to face the challenges ahead.

At the Annual General Meeting on 25 March 2003 the Board of Directors will propose a 7% increase in dividend to DKK 3.60 per share of DKK 2, corresponding to a pay-out ratio of 30.4%.

For 2003 growth in operating profit measured in local currencies is expected to be close to 20%. However, measured in Danish kroner operating profit will grow towards 5%, reflecting a negative currency impact of around 15 percentage points on operating profit if the currency exchange rates remain at the current level throughout the full year of 2003.

Net profit in 2003 is expected to grow towards 10%. Apart from growth in operating profit this reflects the expected significant income from the hedging of the exposure in major currencies for 2003 and expectations for a lower income tax rate compared to 2002.

Table of Contents

Performance 2002

Novo Nordisk's operating profit was DKK 5,979 million in 2002, 7% higher than in 2001, thereby meeting out revised target of growing operating profit by 5-10% set in April 2002. The growth is based on 6% growth in sales, 6% growth in total costs excluding financial costs and tax, and 15% growth in licence fees and other operating income.

Net financials were DKK 321 million compared to DKK 416 million in 2001. The tax rate for the period was 1 percentage point lower than in 2001, hence net profit increased by 6% to DKK 4,095 million.

SALES

Sales in local currencies increased by 11% compared to 2001. Measured in Danish kroner, sales increased by 6% to DKK 25,187 million in 2002.

In 2002 growth was primarily driven by sales within diabetes care and haemostasis management and geographically by sales in International Operations (countries outside Europe, North America and Japan & Oceania), North America and Europe.

Diabetes care

Sales of diabetes care products grew by 11% in local currencies compared to 2001. Measured in Danish kroner sales increased by 6% to DKK 17,665 million in 2002.

Insulin and delivery systems

Sales of insulin and delivery systems increased by 10% in local currencies compared to 2001. Measured in Danish kroner sales increased by 5% in 2002. Growth was realised in International Operations, North America and Europe, whereas sales in Japan & Oceania decreased slightly. Novo Nordisk's sales of the insulin analogue portfolio increased to DKK 1,198 million (+160%) in 2002, and Novo Nordisk's analogue market share continued to increase in 2002.

Europe

Sales development for insulin and delivery systems in 2002 was negatively influenced by some wholesalers in Europe stockpiling insulin products towards the end of 2001, with a subsequent de-stocking occurring in the first quarter of 2002. This stock movement combined with increasing parallel trade and the divesture of a non-core business are the main reasons for the 3% sales growth in Danish kroner compared to 2001. Adjusted for the

Table of Contents

wholesalers de-stocking in the first quarter and the divesture of non-core business, sales of insulin and delivery systems increased by 6%.

Novo Nordisk's market position has been strengthened by the launch of NovoMix® 30 in 13 countries and the launch of FlexPen® in 15 countries. Together with NovoRapid® these products have been key in supporting the market share development in Europe throughout 2002.

North America

In North America sales of insulin and delivery systems increased by 12% in local currencies compared to 2001, whereas measured in Danish kroner sales increased by 6%.

This development was primarily driven by sales of NovoLog® (the US brand name for NovoRapid®), but was also supported by the launches in the second half of 2002 of the dual-release insulin analogue NovoLog® Mix 70/30 and the disposable insulin delivery device InnoLet®.

Novo Nordisk has now launched all approved insulin analogues and supported by innovative devices Novo Nordisk has continued the increase in market share in the US in 2002.

Japan & Oceania

Sales in local currencies of insulin and delivery systems in the Japan & Oceania region increased by 4%, whereas sales in local currencies in Japan increased by 3%, compared to 2001. Reflecting an 8% depreciation on average of Japanese yen versus Danish kroner for 2002, sales in Japan measured in Danish kroner decreased by 5%, also reflecting the government-mandated reduction in reimbursement prices in April 2002 and increased competition.

NovoRapid® was launched in Japan in the FlexPen® device in April 2002 and this combination has been very well received in the market. NovoMix® 30 is expected to be launched in Japan towards the end of 2003.

International Operations

Sales of insulin and delivery systems within International Operations increased by 31% in local currencies compared to 2001. The acquisition of the Brazilian pharmaceutical company Biobrás at the end of January 2002 contributed to growth. Sales growth was significantly impacted by a negative currency environment, especially for the Argentinean peso (ARS), Brazilian real (BRL) and South African rand (ZAR). Growth measured in Danish kroner was 21%.

NovoRapid® was launched in China in the fourth quarter of 2002, bringing the total number of countries in International Operations, in which NovoRapid® has been launched, to above 15. Novo Nordisk will continue the roll-out of NovoMix® 30 within International Operations in 2003.

Oral antidiabetic products (OAD)

Sales of OAD amounted to DKK 1,631 million, an increase of 16% compared to 2001 or 22% in local currencies.

In Europe sales growth was driven by a continued market penetration of NovoNorm®. Sales growth for North America was positively affected by correction of rebates to a Managed Care organisation recorded in the fourth quarter of 2001. Within International

Table of Contents

Operations sales growth was partly driven by Glucoformin® (metformin), which has been included in Novo Nordisk's portfolio of products in Brazil via the acquisition of Biobrás.

Haemostasis management

Sales within haemostasis management (NovoSeven®) increased by 22% in local currencies compared to 2001. Measured in Danish kroner sales increased by 17% to DKK 3,621 million in 2002.

Sales growth in 2002 for NovoSeven® was primarily realised in North America, followed by Europe, International Operations and Japan & Oceania.

Several factors contributed to the sales growth of NovoSeven® in 2002. The largest segment for NovoSeven® remains the use for congenital bleeding disorders, and this segment continues to deliver the predominant part of growth in sales. In terms of areas of use, NovoSeven® has traditionally been used in connection with acute bleeding episodes, which is still the largest area and driver of growth. However usage of NovoSeven® in connection with elective surgery has been increasing over the past years, and during 2002 this area also contributed to growth.

In addition, the increased awareness of the use of NovoSeven® in connection with acquired haemophilia has led to a greater use for this patient group. Finally, sales are also perceived to have been positively affected by increased investigational use of NovoSeven®.

Growth hormone therapy

In local currencies sales of human growth hormone products increased by 4% compared to 2001. Measured in Danish kroner sales decreased by 2% to DKK 2,131 million in 2002. Sales outside Japan increased by 12% measured in Danish kroner, or by 15% in local currencies, driven by the continued roll-out of the liquid growth hormone, Norditropin® SimpleXx®, in North America and Europe. About 60% of sales are now realised outside Japan.

Sales in Japan measured in Danish kroner decreased by 16% partly due to the 8% depreciation on average of Japanese yen versus Danish kroner. Measured in local currency, sales in Japan decreased by 8%, reflecting the government-mandated reduction in reimbursement prices and general, negative market growth.

Hormone replacement therapy

Sales of hormone replacement therapy products decreased by 5% in local currencies compared to 2001. Measured in Danish kroner sales decreased by 6% to DKK 1,342 million in 2002. This is primarily due to a decrease in sales in Europe, reflecting increased parallel trading and lower overall demand for treatment with hormone replacement products. The overall market demand was negatively influenced by a recently published US study of another company's product. Novo Nordisk's products are low-dose combination preparations containing natural oestrogen and progestin, and the relevance for the Novo Nordisk product portfolio is currently being evaluated. Outside Europe sales increased in all regions.

COSTS, LICENCE FEES AND OTHER OPERATING INCOME

Production costs of DKK 6,633 million increased by 11% in 2002, in line with the underlying growth in sales volumes. The gross margin decreased by 1.2 percentage points compared to 2001. The decrease can primarily be related to the negative development in major invoicing currencies versus Danish kroner as Novo Nordisk's production cost base is

Table of Contents

primarily Danish kroner denominated. In addition, the development can be attributed to recently hired employees dedicated to the new manufacturing facilities for insulin and NovoSeven®, which are in the process of validation and subsequent regulatory approval.

Total non-production related costs increased by 4% to DKK 13,569 million or a growth rate which is 2 percentage points lower than reported sales growth. This result has been achieved through the cost-containment programme initiated in April 2002.

Sales and distribution costs increased by 4% to DKK 7,479 million. This partly reflects the full-year effect of the expansion of the sales force in the US as well as the recent launch of NovoLog® Mix 70/30 and InnoLet® in the US. However, the positive sales development in International Operations has also been supported by an expansion of the sales force in markets like China and Latin America.

Research and development costs grew by 4% to DKK 4,139 million. This primarily reflects costs related to the development projects insulin detemir (long-acting insulin analogue), AERx® iDMS (pulmonary insulin) and the new indications for NovoSeven®, but also costs associated with the discontinued clinical development of NN622 (dual-acting insulin sensitiser).

Administration costs for the year amounted to DKK 1,951 million, a 5% increase compared to 2001. The increase is primarily due to restructuring costs in relation to the European organisation.

Included in total costs are depreciation and amortisation of DKK 1,332 million, up from DKK 1,081 million in 2001.

In total, licence fees and other operating income amounted to DKK 994 million in 2002 compared to DKK 867 million in 2001. In the fourth quarter of 2002 licence fees and other operating income was elevated primarily due to the transfer of Gabitril® marketing rights in the US from Abbott Laboratories to Anesta/Cephalon and a minor patent settlement related to the US market.

NET FINANCIALS AND TAX

Net financials showed a net income of DKK 321 million in 2002 compared to DKK 416 million in 2001. Novo Nordisk recorded a net foreign exchange gain of DKK 311 million, primarily relating to the hedging of the US dollar and Japanese yen, compared to a gain of DKK 202 million in 2001. The gain on foreign exchange hedging positions has in 2002 partly been counterbalanced by currency losses on non-hedged positions in various currencies primarily related to International Operations. Net interest income was DKK 68 million in 2002 compared to DKK 192 million in 2001, whereas other financial items were recorded as a net expense of DKK 58 million compared to a net income of DKK 22 million in 2001.

The effective tax rate for 2002 was 35%, down from 36% in 2001, leading to a total tax expense of DKK 2,205 million in 2002.

CAPITAL EXPENDITURE

The total net capital expenditure for property, plant and equipment in 2002 was DKK 4.0 billion, compared with DKK 3.8 billion in 2001. The investment level is slightly lower than anticipated and partly reflects lower than expected prepayments to suppliers on ongoing investment projects. The investment level includes DKK 104 million in tangible fixed assets

Table of Contents

related to the acquisition of the Brazilian pharmaceutical company Biobrás, which as of December 2002 is owned 100% by Novo Nordisk. The acquisition is subject to clearance by the Brazilian anti-trust authority, which is expected in the first half of 2003.

FREE CASH FLOW AND FINANCIAL RESERVES

The free cash flow for 2002 was realised at DKK 497 million up from DKK 186 million in 2001. This is slightly higher than anticipated and is related to the lower than expected investment level and an absolute reduction in trade accounts receivables.

Novo Nordisk's financial reserves at the end of 2002 were DKK 1,234 million compared to DKK 2,287 million in 2001. In addition to the financial reserves, Novo Nordisk has undrawn committed credit facilities of close to DKK 8 billion.

SHAREHOLDERS FUNDS

Total shareholders' funds were DKK 22,928 million at the end of 2002, equalling 72.8% of total assets, compared with 69.7% at 31 December 2001.

	<u>DKK million</u>
Shareholders' funds at 31 December 2001	20,137

	<hr/>
Shareholders' funds at 31 December 2002	<u>22,928</u>

Share repurchase programme and holding of own shares

Novo Nordisk has repurchased own shares worth DKK 386 million during the second half of 2002 and expects to complete the DKK 2 billion share repurchase programme announced in August 2002 before the end of 2003.

At the end of 2002 Novo Nordisk A/S and its wholly-owned affiliates owned 9,396,841 of its own B shares corresponding to 2.65% of the total share capital. The total number of shares repurchased during 2002 was 1,786,762 B shares. As of 6 February 2003, Novo Nordisk A/S' holding of its own shares is 9,621,841 B shares.

Proposed dividend

At the Annual General Meeting on 25 March 2003, the Board of Directors will propose a dividend for 2002 of DKK 3.60 per share of DKK 2, an increase of 7% from DKK 3.35 per share in 2001, corresponding to a pay-out ratio of 30.4%. No dividend will be paid on the company's holding of own shares.

UPDATE ON THE RESEARCH & DEVELOPMENT PORTFOLIO**Development diabetes care**

A glucagon antagonist, NN 2501, has entered clinical phase 1 as an orally active agent for the treatment of type 2 diabetes. Glucagon receptor antagonists have the potential to be used in the treatment of type 2 diabetes due to the ability to inhibit excessive hepatic glucose production.

Edgar Filing: NOVO NORDISK A S - Form 6-K

Investor Relations

2880 Bagsvaerd

+45 4444 8888
Telefax:
+45 4443 6633

www.novonordisk.com

24256790

Table of Contents

Novo Nordisk has decided not to pursue further development of the suspended project NN622. The decision has been taken after having performed a renewed benefit/risk assessment of the compound. The analysis included both data from the terminated clinical phase 3 studies and further animal tumour mechanism studies that turned out not to be conclusive.

The analysis of the clinical phase 2 data for balaglitazone (NN2344) has now been completed and Novo Nordisk has decided to progress the development of the compound.

Development haemostasis management

Novo Nordisk envisions that NovoSeven® has the potential to become a general haemostatic agent. To support this ambition, the company has initiated several clinical studies within the areas of bleeding in emergency situations and for elective surgery referred to as the NovoSeven® expansion programme. In 2003 Novo Nordisk expects to report from three of these studies, namely studies involving cirrhotic patients undergoing liver resection, severely traumatised patients and patients undergoing orthotopic liver transplantation.

A project focused on using Active Site Inhibited Seven (ASIS) for the treatment of Acute Respiratory Distress Syndrome (ARDS) is currently in clinical phase 2 development. ASIS is an inactivated form of recombinant Factor VIIa (NovoSeven®), which has proven to work in animal models of several diseases, including ARDS which is a condition associated with a high mortality rate.

Development growth hormone therapy

A project focused on using growth hormone for treating complicated fractures has entered clinical phase 2 development.

CORPORATE GOVERNANCE

Novo Nordisk is in general in compliance with the codes of good corporate governance designated by the Copenhagen Stock Exchange, the New York Stock Exchange and the London Stock Exchange.

Among several initiatives Novo Nordisk has decided to provide full disclosure of the remuneration and shareholdings of both the Board of Directors and Executive Management. In addition, a self-evaluation process of both the Board of Directors and Executive Management has been implemented. Further initiatives and an extensive review of the Novo Nordisk approach to Corporate Governance are included in the Annual Review, Annual Financial Report and Sustainability Report 2002, which will be available on the Novo Nordisk website www.novonordisk.com on 7 February 2003. Insight into the Novo Nordisk's approach to Corporate Governance will also be published as a separate item (Corporate Governance) on the Novo Nordisk website.

OUTLOOK 2003

The strong demand for insulin products in general and the continued market penetration of the Novo Nordisk insulin analogue portfolio, combined with the expectation of increasing NovoSeven® sales, underpins Novo Nordisk's expectations of a double-digit sales growth in local currencies for 2003. However, given the significant lower present level for Novo Nordisk's major currencies the sales growth measured in Danish kroner will be negatively impacted by approximately 8 percentage points. Measured in Danish kroner sales are expected to increase by more than 5%.

Table of Contents

For 2003 growth in operating profit measured in local currencies is expected to be close to 20%. However, measured in Danish kroner operating profit will grow towards 5%, reflecting a negative currency impact of around 15 percentage points on operating profit if the present currency exchange rates remain at the current level throughout the full year of 2003.

The expectations for growth assume that licence fees and other operating income will be realised at a level similar to the DKK 1 billion realised in 2002. For 2003 this includes a significant income related to the settlement of a patent dispute with Aventis in January 2001. As a major proportion of this non-recurring income is expected to be realised in the final quarter of the year, the operating profit growth for this quarter will be above average.

As Novo Nordisk has hedged expected cash flows for 2003 in relation to USD, JPY and GBP, the negative influence from the depreciation of those main currencies versus DKK on operating profit will be offset by currency hedging gains included in net financials. Net financial income is expected at the level of DKK 600 million for the year.

For 2003 Novo Nordisk expects the tax rate to be 34%, 1 percentage point lower than the tax rate realised in 2002.

Net profit in 2003 is expected to grow towards 10%. Apart from growth in operating profit this reflects the expected significant income from the hedging of the exposure in major currencies for 2003 and expectations for a lower income tax rate compared to 2002.

Novo Nordisk plans to invest DKK 3.5 billion in fixed assets in 2003, and depreciation and amortisation for 2003 are expected to be realised at the level of DKK 1.5 billion.

Given the lower anticipated capacity expenditure level for 2003 free cash flow is expected to exceed the free cash flow realised in 2002.

All of the above expectations are provided that currency exchange rates remain at the current level for the rest of 2003. All other things being equal, a 5% movement in USD, JPY and GBP rates is estimated to have an annual impact on operating profit of DKK 160 million, DKK 130 million and DKK 75 million, respectively.

SUSTAINABLE DEVELOPMENT

Producing more with less is one of the main goals in Novo Nordisk's environmental management system. Eco-productivity indices (EPIs) are indicators for how effectively environmental pressures are decoupled from economic output on two parameters: water and energy. In 2002, the target was an efficiency increase of 5% for water and 4% for energy. Through consistent efforts, these targets were exceeded, with improvements of 16 percentage points and 15 percentage points, respectively, and subsequent cost savings.

Novo Nordisk pursues a number of initiatives to effectively combat the pandemic growth of diabetes. A recent update from the World Health Organization provides the global overview; it assesses that in 2000 there were 177 million people with diabetes, and that the figure will surge to 370 million in 2030. Through its global organisation, Novo Nordisk is implementing diabetes awareness programmes in more than 40 countries, including the United States. Following a roundtable discussion on diabetes in the European Parliament in Brussels, hosted by Novo Nordisk, diabetes has been included as a priority in the EU public health programmes for 2003.

Table of Contents

In a global benchmark survey, dealing with the issue of society's trust in companies' behaviour, co-authored by UNEP and SustainAbility, Novo Nordisk achieved top rating among the 100 best reporters on sustainability and one of the seven most transparent and open companies in the world. Novo Nordisk was particularly commended for getting to the heart of the debate about access to medicine.

CONFERENCE CALL

At 16.30 CET today, corresponding to 10.30 am New York time, a conference call will be held. Investors will be able to listen in via a link on www.novonordisk.com, which can be found under 'Investors' 'Conference call'. Presentation material for the conference call will be made available approximately one hour before on the same page.

FORWARD-LOOKING STATEMENT

The above sections contain forward-looking statements as the term is defined in the US Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations or forecasts of events such as new product introductions, product approvals and financial performance.

Such forward-looking statements are subject to risks, uncertainties and inaccurate assumptions. This may cause actual results to differ materially from expectations. Factors that may affect future results include interest rate and currency exchange rate fluctuations, delay or failure of development projects, production problems, unexpected contract breaches or terminations, government-mandated or market-driven price decreases for Novo Nordisk's products, introduction of competing products, Novo Nordisk's ability to successfully market both new and existing products, exposure to product liability and other lawsuits, changes in reimbursement rules and governmental laws and related interpretation thereof, unexpected growth in costs and expenses.

Risks and uncertainties are further described in reports filed by Novo Nordisk with the US Securities and Exchange Commission (SEC) including the company's Form 20-F, which was filed on 26 April 2002. Please also refer to the section 'Financial Risk Factors' in the Annual Financial Report 2002. Novo Nordisk is under no duty to update any of the forward-looking statements or to confirm such statements to actual results, unless required by law.
