Securities registered pursuant to Section 12(g) of the Act:

Title of each class  
Common Stock, par value \$.0001 per share

---

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes  No

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of the registrant's most recently completed second fiscal quarter.

The aggregate market value based on the average bid and asked price on the over-the-counter market of the Registrant's common stock, ("Common Stock") held by non-affiliates of the Company was US\$1,068,465 as at June 30, 2008.

There were 26,711,630 outstanding shares of Common Stock as of October 10, 2008\*

APPLICABLE ONLY TO REGISTRANTS INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE PRECEDING FIVE YEARS:

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Section 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court.

Yes  No

PART I

Item 1 Business

General

Our name is Golden River Resources Corporation and we sometimes refer to ourselves in this Annual Report as “Golden River Resources”, the “Company” or as “we,” “our,” or “us.” We changed our name from Bay Resources Ltd to Golden River Resources in March 2006. We are an exploration stage mining company. Our objective is to exploit our interest in the mineral claims in Nunavut, Canada which are in the Slave Craton and in the Committee Bay Greenstone Belt. Our principal exploration target is for gold and we are seeking to determine whether adequate gold reserves are present on the property covered by our claims to develop an operating mine. We are in the initial stages of our exploration program and have not yet identified any ore reserves.

We hold the interests in the Slave Craton directly and our wholly owned subsidiary named “Golden Bull Resources Corporation” (formerly 4075251 Canada Inc.) holds the interests in the Committee Bay Greenstone Belt. Our wholly-owned subsidiary is referred to in this Annual Report as “Golden Bull”.

We sometimes refer to our claims collectively in this Annual Report as either the “Slave Properties” or the “Committee Bay Properties”. Our claims are registered in the Mining Recorders Office in the Mining District of Nunavut and give us the right to explore and mine minerals from the property covered by the claims.

We were incorporated in the State of Delaware on February 1, 1973. We commenced our mineral exploration activities in 2002. Prior thereto, we were engaged in a number of other business activities that have been discontinued. Our executive offices are at Level 8, 580 St. Kilda Road, Melbourne, Victoria 3004 Australia and we have an office at 1 Yonge Street, Suite 1801, Toronto, Ontario M5E 1W7, Canada. Our website location is [www.goldenriverresources.com](http://www.goldenriverresources.com). Information included on our website shall not be deemed to be incorporated in this Annual Report. Our wholly owned subsidiary, Golden Bull, was incorporated on May 27, 2002 in the Province of Ontario, Canada and is licensed to do business in the Northwest Territories and Nunavut Canada.

Currency.

We use the Australian dollar as our reporting currency, since we are headquartered in Australia and our administrative expenses are incurred in Australian dollars. References to dollars are to Australian dollars (A\$) unless otherwise indicated as being Canadian dollars (CDN\$) or United States dollars (US\$). For the convenience of the reader, the Australian Dollar figures for the year ended June 30, 2008 have been translated into United States Dollars (“US\$”) using the rate of exchange at June 30, 2008 of A\$1.00=US\$0.9615.

History of the Company

Our predecessor corporation, Bayou Oil, was incorporated under the laws of Minnesota in 1973 and since that time it had a number of activities that have been ceased.

On February 13, 1998, we incorporated a 100% owned subsidiary, Baynex.com Pty Ltd (formerly Bayou Australia Pty Ltd), a corporation incorporated under the laws of Australia.

On June 29, 1999 we undertook a reverse stock split on a 1:20 basis and amended our Articles of Incorporation to amend the par value of our shares from US\$0.15 cents to US\$0.0001 cents per share. On September 27, 1999 we changed our name from Bayou International, Ltd to Baynet, Ltd.

In May 2000, we commenced work on the development of a B2B mining portal however, this was abandoned as it was considered uneconomic.

On August 21, 2000 we incorporated a new wholly owned subsidiary, Bay International Pty Ltd (now known as Bay Resources (Asia) Pty Ltd), a corporation incorporated under the laws of Australia. In October 2000, we changed our name to Bay Resources Ltd, and in March 2006, we changed it to Golden River Resources Corporation.

During fiscal 2001, we conducted a due diligence review of St. Andrew Goldfields Ltd (“St. Andrew”) with a view to taking a substantial investment in St. Andrew. Following the conclusion of the review, we decided not to proceed with the investment.

In May 2002, we incorporated a new wholly owned subsidiary, Golden Bull Resources Corporation (formerly 4075251 Canada Inc.), a corporation incorporated under the laws of Canada. Golden Bull is the vehicle that will be used by the Company to undertake exploration activities for gold on the Committee Bay Properties in Canada.

During the 2002 fiscal year we continued to expand our gold exploration business by:

- (i) entering into an agreement to explore for gold on Tahera’s extensive property interests on the Slave Craton in northern Canada; and
- (ii) making application via a new 100% owned subsidiary, Golden Bull (previously known as 4075251 Canada Inc), for properties in the highly prospective Committee Bay Greenstone Belt in Nunavut, Canada.

In October 2002 we entered into an agreement (via our wholly owned subsidiary Bay Resources (Asia) Pty Ltd) with the Tibet Bureau of Geology and Minerals Exploration Development, China to earn a minimum 51% interest in the Xigaze copper belt running in a 200 kilometre east-west trend either side of Lhasa. However, in February 2003 we decided to withdraw from these arrangements as a result of further hurdles being placed before us by the Chinese authorities that were not known at the time of entering into the agreement.

In April 2008 the Company deregistered 100% owned inactive subsidiaries Baynex.com Pty Ltd and Bay Resources (Asia) Pty Ltd, both companies incorporated under the laws of Australia.

In June 2008 the Company agreed on terms with Tahera Diamond Corporation to obtain full control of properties listed in the 2002 Tahera/GRR agreement through the issuance of 3,000,000 shares of common stock and the payment of CDN\$86,000, but final agreements had not been executed as of October 10, 2008. The agreement is subject to the Supreme Court of Canada’s approval.

It is the policy of our Board of Directors that we will not engage in any activities which would subject us to registration and reporting requirements of the Investment Company Act of 1940.

#### SEC Reports

We file annual, quarterly, current and other reports and information with the SEC. These filings can be viewed and downloaded from the Internet at the SEC’s website at [www.sec.gov](http://www.sec.gov). In addition, these SEC filings are available at no cost as soon as reasonably practicable after the filing thereof on our website at [www.goldenriverresources.com](http://www.goldenriverresources.com). These reports are also available to be read and copied at the SEC’s public reference room located at Judiciary Plaza, 100 F Street, N.E., Washington, D.C. 20549. The public may obtain information on the operation of the public reference room by calling the SEC at 1-800-SEC-0330.

## Description Of Business

### Introduction

We are an exploration stage company engaged in the identification, acquisition, exploration and development of mining prospects believed to have gold mineralization. The main objective is to explore, identify, and develop commercially viable prospects over which we have rights that could produce revenues. These types of prospects may also contain mineralization of metals often found with gold, such as platinum and silver and other 'base metals' (copper, nickel, lead, zinc) which also may be worth processing. Exploration and development for commercially viable mineralization of any metal includes a high degree of risk which careful evaluation, experience and factual knowledge may not eliminate, and therefore, we may never produce any revenues.

We hold properties in Nunavut, Canada. Golden River Resources holds interests in the Slave Craton area within Nunavut and our currently owned 100% subsidiary; Golden Bull Resources holds various prospects in the Committee Bay Greenstone Belt in Nunavut. We are in the initial stages of exploration programs and have not yet identified any ore reserves.

Please note that the Glossary in Appendix A to the Annual Report contains definitions for the geological and other specialized terms used in this section.

### Slave Craton Properties

During 2002, we reached an agreement with the Canadian company, Tahera Diamond Corporation, to explore for gold on Tahera's extensive properties on the Slave Craton in Nunavut, Canada. At that time, Tahera's Slave land package included 177 mineral claims and 11 Inuit Owned Land ("IOL") Concessions covering approximately 471,000 acres. As of September 30, 2008, the holdings have been reduced to 86 mineral claims and 8 Inuit Owned Land ("IOL") Concessions covering approximately 261,000 acres. Tahera is a diamond mining company conducting diamond exploration in the northern Slave Craton and brought its Jericho diamond pipe into production in 2006.

The exploration properties of Tahera that the Company has access to are grouped into two main areas, the High Lake Volcanic Belt and the Contwoyto Formation, both of which are located in the Slave craton, Mackenzie District of Nunavut.

The exploration properties in the High Lake Volcanic Belt, originally consisted of the Hood River mineral claims and Hood Inuit Owned Land ("IOL") concessions, all of which were located in the northwest section of the Slave Structural Province. The mineral claims (Hood 3, 4, 12 and 14) totalled 10,330 acres (two of which; the Hood 3 and 4 mineral claims have subsequently lapsed). The original Hood River IOL concessions were subsequently consolidated and reduced to the current Hood River CO-20-00-03R IOL concession which encompasses an area of 6,254 acres. The high grade Hood River gold showings identified to date occur within a 9 by 5 kilometre area in the west-central portion of the High Lake Greenstone Belt. Four main mineralized areas within the IOL have been identified to date; the North Fold Nose, the Penthouse, the Crown and the Blackridge Prospects.

The exploration properties, within the Contwoyto Formation, consist of the CO-08-00-01, 02, 03 and 05 IOL Concessions which are located on the east side of Contwoyto Lake. The original CO-08-00-01, 02, 03 and 05 Concession Agreement totalled 65,250 acres but has subsequently been reduced to cover 11,061.10 acres. Mineralization specific to the properties includes a number of significant banded iron formation hosted gold prospects including the R44-R47, R43-R45, the 4-2 Grid Area, , and the 5-5 Grid Area Prospects.

The agreement with Tahera dated March 7, 2002 gives us rights of access to exploration data of Tahera covering gold, silver and base metal potential on properties 100% held by Tahera or properties which are adjacent to or in the area of the Tahera properties. Tahera has an extensive database of data to which we have access, including geophysical surveys, overburden and bedrock mapping, overburden sampling and drilling data. We have agreed to pay them a two percent net smelter return royalty on any production from gold and base metals we discover having used Tahera's extensive database. If during our exploration for gold, silver or base metals on the 100% Tahera held mineral properties, we discover diamonds, Tahera retains the rights to the diamonds. Under the agreement, if we wish to conduct exploration on the properties, we need to seek access to the properties and enter into an access agreement with Tahera, suitable to Tahera, which sets out the terms of our access. Our access cannot interfere with Tahera's operations on the properties. Tahera has the sole and unfettered discretion to sell, transfer, assign, encumber, mortgage, pledge, hypothecate, allow to lapse, forfeit, surrender or in any way dispose of its interest in the properties. Should Tahera sell, transfer, assign the properties, we would then need to negotiate access with the new holder of the properties. We undertake exploration at our sole risk. Subject to Tahera's rights, we have the right to exploit opportunities for gold, silver or base metals on the properties. In return, GRR has granted Tahera a 2% net smelter return royalty on any mineral deposit discoveries that GRR may identify.

The Company entered into access agreements with Tahera for the 2004 to 2006 exploration programs. No field exploration was undertaken during 2007 and 2008 and therefore we did not enter into access agreements for 2007 and 2008.

On January 16, 2008, Tahera Diamond Corporation obtained an order from the Ontario Superior Court granting it protection pursuant to the provisions of the Companies' Creditors Arrangement Act ("CCAA") for 30 days, with subsequent extensions to November 30, 2008.

In June 2008, the Company agreed on terms with Tahera Diamond Corporation to obtain full control of the mining properties that are listed in the Tahera/GRR agreement through the issuance of 3,000,000 shares of common stock and the payment of CDN\$86,000, but final agreements have not been executed as at October 10, 2008. The agreement is subject to the Supreme Court of Canada approval.

Each of the properties has minimum annual exploration expenditure commitments required to be met to maintain the rights to the property. The minimum annual commitments can be met either by actual exploration expenditures or by making a cash payment in lieu of exploration expenditure. Expenditures by both Tahera and GRR are counted towards these commitments. In 2004 and 2006, the commitments were met by a mixture of exploration expenditure and cash payments by both Tahera and GRR. For 2007 and 2008, these commitments were met by a cash payment from Golden River Resources offset by application of accrued work commitments previously compiled by Tahera.

Exploration work undertaken by GRR is subject to the Mining Land Use Regulations of the Indian and Northern Affairs Canada Mining Act. This Act requires GRR to obtain permits prior to performing significant exploration programs and sets standards that must be met for development and reclamation.

On April 1, 1999, the Nunavut Land Claims Agreement, dated May 28, 1993, between the Inuit of Canada's eastern arctic region and Her Majesty the Queen in right of Canada, came into force. Under this agreement, the Inuit were granted ownership of approximately 360,000 square kilometres of land in an area referred to as the Nunavut Settlement Area, including ownership of subsurface rights in approximately 37,500 square kilometres of those lands. Third party interests in lands in the Nunavut Settlement Area created on or after April 1, 1999 are granted, in the case of surface rights, by the appropriate regional Inuit association and, in the case of subsurface rights, by Nunavut Tungavik Incorporated ("NTI") which will hold subsurface title to Inuit owned lands and will be additionally responsible, in consultation with the appropriate regional Inuit associations, for the administration and management of those subsurface rights. The Tahera Inuit Owned Lands property CO-20-00-03R is administered by the NTI. All non-IOL properties are administered by the Federal Government of Canada.

A list of the mining properties that are covered under the Tahera/GRR agreement appears as Appendix B to this Annual Report. Exploration interest is currently focused on the CO-20-00-03R IOL and CO-08-01, 02, 03 and 05 IOL concessions.

The claims are maintained in good standing by applying an annual work commitment or a payment in lieu of work. Fees and exploration expenditures associated with the maintenance of Tahera Corporation's ground covered under the Slave Craton Agreement with Golden River Resources are the responsibility of Tahera.

#### Location

All mineral properties that fall under the Tahera-Golden River Resources agreement are located in the Slave Craton of the central arctic area of Nunavut, Canada. The Slave Craton is a relatively small Archean craton, dominated by greenstone belts and turbidite sequences and underlain by older gneisses and granitoid bodies. The Slave Craton or Slave Structural Province encompasses an elliptical area approximately 500 kilometres wide by 750 kilometres long, located between Great Slave Lake to the south and Coronation Gulf to the north (Figure 1).

#### Hood River Ground

The Hood River mineral properties and Inuit Owned Land Concessions are in the High Lake Volcanic Belt located in the northwest section of the Slave Structural Province in the Mackenzie District of Nunavut. The land holdings include 4 mining properties totalling 10,330 acres, two of which have subsequently lapsed. The original Hood River CO-20 IOL concessions were subsequently consolidated and reduced to the current Hood River CO-20-00-03R IOL Concession which encompasses an area of 5,173.64 acres. Only the IOL concession is within the greenstone component of the High Lake Volcanic Belt and therefore of exploration interest to us. The approximate center of the Inuit Concessions is about 45 kilometers north of the Arctic Circle, and 530 kilometers north-northeast of Yellowknife. The IOL Concessions are held 50:50 by Benachee Resources Inc. and Snowpipe Resources Ltd. (both wholly owned by Tahera). There are no known encumbrances on the concessions.

FIGURE 1. Location of the Project Area within Nunavut and the Slave Structural Province.

9

---

FIGURE 2 – Location of the Original Properties Covered By the Tahera / Golden River Resources Agreement. Note that some claims have been allowed to expire. A complete, current listing of existing claims is presented as Appendix B. In Figure 2 lakes and rivers are shown in blue; the Contwoyto IOL concession blocks are indicated by the green-filled polygons. The Hood IOL concession is indicated as yellow-filled polygons and labeled as the “Hood Group” (modified: January 18, 2007)

#### Contwoyto Lake Ground

The original C0-08 Concession Agreement totalled 65,250 acres but was subsequently reduced to 11,061.10 acres (4,476.36 hectares). The approximate centre of the C0-08 Concession is 100 kilometres south of the Arctic Circle, 100 kilometres north-northwest of Lac de Gras, and 380 kilometres north-northeast of Yellowknife. The C0-08 Concession Agreement is held 50:50 by Benachee Resources Inc. and Snowpipe Resources Ltd. (both wholly owned by Tahera)

#### Access, Infrastructure, Local Resources

Access to all the areas within the Slave Craton is by aircraft. In summer months, float equipped aircraft may land on local lakes of appropriate size including Contwoyto Lake, Napatulik Lake, Penthouse Lake, and Carat Lake. In addition, airstrips are available for fixed wing aircraft equipped with tundra tires at the Lupin mine site, the ULU Mine Site and Tahera’s Carat Camp (Jericho). Helicopter support is required to mobilize personnel from camp sites to the property areas. A winter road which links Yellowknife to the Lupin Mine Site on Contwoyto Lake has historically been used for economical transportation of supplies during the winter months. This road has since been extended northward to Tahera’s Carat Camp.

The Tahera Properties are located in the treeless Arctic within the zone of permafrost. The weather in the property areas is typical of the continental barren lands which experience cool summers and extremely cold winters. Winter temperatures can reach -45 degrees. Summer temperatures are generally in the 5 to 10 degree Celsius range but can reach the high 20 degrees Celsius range. Average annual snowfall rarely exceeds 1 metre, most of which falls during autumn and spring storms. Small lakes are clear of ice usually by the third week in June and start freezing over again in mid to late September.

The topography of the area consists of low rolling hills with areas of low-lying swampy muskeg. Local relief is low, rarely exceeding 150 metres.

The closest community with regularly scheduled air service is Kugluktuk (formerly Coppermine) which is located 145 kilometres northwest of the Tahera Anuri / Rockinghorse Concessions and 200 kilometres northwest of the Hood River Concessions. First Air has scheduled flights everyday from Yellowknife to Kugluktuk. The main centre for transportation to the properties is through Yellowknife, 530 kilometres southwest of the Hood River Concessions, and 410 kilometres southwest of the Contwoyto Concessions. Fixed wing and helicopter charter services are available in Yellowknife, as are all supplies (groceries, lumber, fuel, etc.) and expediting services. Additional existing infrastructure to assist servicing the company's land holdings includes the Tahera Jericho Mine Site and the Lupin and ULU Mine Sites which belong to Oz Minerals (formerly Wolfden/Zinifex); however, all are currently on care and maintenance. There is no infrastructure on the Hood or Contwoyto IOL Concessions.

#### Exploration History

There are currently no known gold, silver or base metal mineral reserves identified on the Hood or Contwoyto IOL concessions. All work undertaken in the past has been strictly exploratory in nature.

All previous work reported by companies is quoted from open file government assessment reports. For the Slave Craton land holdings non diamond-related exploration activities are emphasized as these relate to our interest and exploration agreement with Tahera. Specifically, previous exploration work on the Hood River/High Lake and Contwoyto Lake land holdings are detailed as these are deemed to be most prospective for gold.

#### Hood River/ High Lake Belt

Exploration around and directly within the Hood River properties began in 1965 and over the years has included sampling, mapping, trenching, and drilling, as well as ground and airborne geophysical surveys.

In 1989 the ULU Gold Deposit was discovered. It is immediately adjacent, and abuts onto, the western border of Company's Hood River CO-20-00-03R IOL. Previous exploration efforts undertaken within the Hood River CO-20-00-03R IOL have outlined several key areas of anomalous gold mineralization which include the Penthouse North and South Zones, the Blackridge Zone, the Crown Zone and the North Fold Nose Zone.

In 1999 when the Nunavut Land Claims Agreement came into effect the Inuit were granted surface ownership of approximately 360,000 square kilometres of land, of which they have the subsurface rights for approximately 37,500 square kilometres. Nunavut Tunngavik Incorporated (NTI) is the entity through which these subsurface rights are administered. The Hood River Area around the ULU Deposit (CROWN, DEN, FIDO and ULU) in which Golden River Resources has an exploration interest was ultimately incorporated into NTI lands, with the exception of the original ULU Claim currently being evaluated by Oz Minerals (formerly Wolfden/Zinifex).

In March, 2003, Strongbow Resources Inc. and Nunavut Tunngavik Incorporated announced an agreement whereby Strongbow could explore a large parcel of land which covers all the south half of the High Lake Greenstone Belt and borders Tahera's IOL concession on the east, south, and west.

#### Contwoyto Formation

Following the discovery of the Lupin Mine on the western shore of Contwoyto Lake in 1960, exploration for additional Lupin-style banded iron formation hosted gold deposits commenced throughout the Contwoyto Formation. This resulted in the discovery of a number of prospects many of which occur on Tahera's Contwoyto properties.

Significant results that substantiate the gold prospectivity of the region have been reported on several key areas which include the R43-R45, the R44-R47 and the 5-5 prospects.

Diamond exploration began in the area in 1993. Discovery of several kimberlite bodies prompted a helicopter-borne EM and magnetic survey over 110 square kilometers in the Contwoyto Lake area. A part of the Tahera data set this survey has delineated a number of prospective iron formations.

#### Geological Setting

The Slave Structural Province encompasses an elliptical area approximately 500 kilometres wide by 750 kilometres long, located between Great Slave Lake to the south and Coronation Gulf to the north (Figure 1).

The Yellowknife Supergroup, an important host for ore deposits, occurs as twenty-six linear volcanic belts surrounded by granitic batholiths. These belts are typically isoclinally folded and largely range in age from 2715-2671 million years. The belts have been divided in the literature into either mafic volcanic-dominated (Yellowknife-Type) or felsic volcanic-dominated (Hackett River-Type). Yellowknife-Type volcanic belts are dominated by massive to pillowed basalt flows with lesser amounts of felsic volcanic, volcanoclastic rocks, clastic sedimentary rocks and occasionally synvolcanic conglomerate and carbonate units. The Hackett River-Type belts are defined by the abundance of calc-alkaline felsic and intermediate volcanic rocks generally intercalated with turbidite sedimentary sequences.

At least five episodes of Proterozoic diabase dyke "swarms" (2400 million years – 600 million years) have been recorded in the Slave Structural Province. These dyke sets form local positive relief where they intrude easily eroded lithologies such as the metaturbidites and negative relief in areas where they are juxtaposed with granites and gneisses.

No known gold, silver or base metal mineral reserves are known on our land. All previous programs have been exploratory in nature.

#### Prospects

The Slave Craton is a well mineralized area with huge potential for discovering mineral deposits. Diamond, gold, copper, lead and zinc deposits have been identified.

#### Hood River Ground

High grade gold showings have been identified within a 9 by 7 kilometre block in the west-central portion of the High Lake Greenstone Belt within the CO-20-00-03R IOL. To date, four main mineralized areas are known to occur; the North Fold Nose Zone, Penthouse Zones, Crown Zone and Blackridge Zone. The mineral prospects on the property occur in rocks of the same age and nature as mineralization at the adjacent ULU Gold Deposit where gold occurs in brecciated basaltic wall rock clasts which are replaced by acicular arsenopyrite + quartz + K-feldspar.

There is a spatial relationship between the gold-bearing zones of the ULU Deposit and the axial trace of the ULU Anticline. The North Fold Nose Area within the CO-20-00-03R IOL covers the northern most two kilometres of this important fold axis. Several gold-bearing zones have been previously identified in this area. In one area along the axis of the anticline, a one metre wide quartz vein outcrops for over 40 metres. Samples contain arsenopyrite, pyrite, pyrrhotite, chalcopyrite, and native copper mineralization. Highly anomalous silver and bismuth geochemical values were also returned from these samples.

Further mineralized zones were discovered in the central fold of the North Fold Nose. A highly anomalous gold value was produced within the prospect area from narrow quartz-pyrite vein rubble.

Previous exploration by Aber (1985), BHP-Utah (1988, 1989 and 1992) and Golden River (2004) has outlined five zones of gold mineralization on the Crown Prospect (now largely lying within the existing CO-20-00-03R IOL). At the "Main Zone" several highly anomalous gold values were returned from samples taken within an 800 metre long, silicified, basalt/biotite schist contact zone. Seven trenches have been dug into the Main Zone Area. Silicified zones up to 6 metres wide containing disseminated arsenopyrite were noted. The "B Zone" is parallel to, and 80 metres east of, the Main Zone. The structural setting and mineralogy of this zone is similar to that at the Main Zone. Elevated gold values have been identified over a distance of 450 metres and the zone is reported to be open to the north. Elevated gold values were also reported from grab samples, obtained from the "Western Zone" and also from the folded stratigraphy of the "Eastern" and "Fold" Zones, of silicified basalt and sediment which contained disseminated arsenopyrite mineralization.

The Penthouse Prospects are located to the northwest of the Crown Prospects. The original sampling on the South Penthouse Grid returned anomalous gold values. The highest grade sample was from a silicified, north-trending shear zone which can be traced for approximately 200 metres. Another northeast-trending shear, this one traceable for 250 metres on the North Penthouse Area returned significant gold results from samples taken of narrow arsenopyrite-bearing veins. Several additional, highly prospective zones of surface mineralization have been identified in the Penthouse Area.

Geochemical samples of the polymetallic quartz veins in the area contain highly elevated silver values along with anomalous zinc, lead, cadmium, and antimony values. This style of mineralization is very similar to the auriferous polymetallic quartz vein at the Northern Fold Nose on the historic ULU 2 Claim.

Five principal styles of mineralization were identified by BHP on the Penthouse Grid, namely:

- Auriferous, silicified zones which contain arsenopyrite mineralization within sediments;
- Auriferous, arsenopyrite-bearing quartz veins which occur at mafic volcanic-sediment contacts;
- Auriferous, polymetallic, quartz veins transecting the mafic volcanic stratigraphy;
- Stratabound, massive sulphide mineralization at the mafic volcanic-sediment contact; and
- Auriferous, polymetallic, quartz veins hosted by sediments adjacent to the same mafic volcanic-sediment contact.

In the Penthouse area, massive sulphide mineralization is present as discontinuous pods, locally up to 1.5 metres thick, which occur along the western basalt-sediment contact on the south Penthouse grid. Historically, anomalous values of gold, silver, copper lead and zinc have been returned from surface grab sampling. No drilling was carried out on the southern Penthouse Prospect.

The Blackridge Prospect is located south of the Crown Prospects and across the southeastern edge of a granitic intrusion. This area was previously evaluated by Aber Resources Ltd. during the 1985 field season. The mineralization consists of an altered and locally brecciated gabbro-hosted, silicified zone. The principal mineralized zone has been traced intermittently on surface for at least 700 metres northeast and is up to 2.5 - 3.5 metres wide. Anomalous gold values have been identified along this structure.

## Contwoyto Property

More than 100 iron formation-hosted gold occurrences occur in the Point Lake - Contwoyto Lake meta-sedimentary sequence. The most notable gold-bearing iron formation is on the west side of Contwoyto Lake, in the vicinity of the formerly producing, Lupin Gold Mine. Mineralization on the east side of Contwoyto Lake, specific to the Tahera/Golden River Resources Properties includes a number of significant iron formation hosted gold prospects including the R43-R45, the R44-R47, the 4-2 grid, the Ox, and the 5-5 Grid Prospects.

The poorly exposed R43-R45 Prospect is reported to be hosted by a "Z"-shaped, folded iron formation up to 10 metres wide and traceable intermittently for over 1.3 kilometres. Initial, minor, "grab" sampling of the banded iron formation in the area by GRR crews has, so far, failed to reproduce the sampling results reported by previous workers. Significantly more detailed sampling and geologic mapping of this area is required. The geology, mineralization, alteration and structure are reported to be extremely similar to the Lupin Gold Mine (located across the lake, 28 kilometres to the west) where gold mineralization occurred in a "Z" folded iron formation and was associated with pyrrhotite and arsenopyrite mineralization. The reported R43-R45 "Z" fold would be of the same magnitude as that at the Lupin Mine. No previous drilling has ever been reported to have been undertaken from the R43-R45 Area.

The R44-R47 Prospect is hosted by an iron formation up to 5 metres wide and traceable on surface for 1.9 kilometres. Again, significant historical gold values have been returned from surface sampling but have yet to be reproduced by initial Company sampling. Significantly more detailed sampling and geologic mapping of this area is required. No drilling in this area has been reported.

On the 4-2 Prospect, previous explorers have traced a sulphide-rich iron formation, in boulders up to 2 metres in size, on surface for 200 metres. Significant gold assays have been returned; however, no follow-up drilling appears to have been done.

On the Grid 5-5 Prospect, several east-west trending, 300 to 2,700 metres long EM conductors have been outlined. A total of six iron formations have been identified, four of which are coincident with the EM conductors. Sulphide-rich boulders of iron formation located at the southwest section of Grid 5-5 yielded gold values. The "Fox A" Prospect is also within the 5-5 Grid Area. Here the iron formation is 33 metres wide and 220 metres long and has returned gold values. Drilling undertaken in 1987 on the 5-5 Prospect included 8 holes totalling 942 metres. All eight holes intersected iron formation and returned gold from a section containing pyrite, arsenopyrite and pyrrhotite mineralization. Four short drill holes on the 5-5 Grid in 1988 tested a folded iron formation as outlined by an IP survey. DDH 88-4, drilled 225 metres west of an earlier high grade intercept, intercepted a further significant gold intersection in pyrite-rich, siliceous iron formation. A further high grade surface prospect containing arsenopyrite and quartz-rich iron formation boulders was apparently not drilled. The other drill holes intersected siliceous +/- sulphidic iron formation ranging from 5.7 to 15.0 metres thick.

## Work Programs

The first phase of the Company's planned exploration programs over the Hood River and Contwoyto IOL claim groups was carried out in August 2004 and consisted of exploration mapping, sampling and prospecting. This initial program was designed to follow up and assess geophysical and geological anomalies reported by previous workers with a focus on targeting and expanding areas for phase two work.

## Hood River Ground

Golden River Resources spent CDN\$104,446 on exploration on the Hood River IOL Concessions. Four key areas warrant further investigation.

Northern Fold Nose - This zone is located approximately 3 kilometres north of the ULU Deposit and is thought to be part of the major fold structure which hosts the ULU Deposit. Additional mineralized zones were discovered within the Northern Fold Nose Area than previously described. Acicular arsenopyrite was noted in narrow shears within silicified basalt just south of the Northern Fold Nose. Chip sampling of the exposed veins during the 2004/2006 field seasons yielded several samples carrying anomalous gold values.

The Penthouse Prospects are underlain by a geologically and structurally complex package of mafic volcanic and metasediments. The metasediments are thought to form the conduit for mineralizing fluids. Gabbroic sills occur within the mafic volcanics and sediments and form marker horizons outlining the structural complexity of the area.

Penthouse North Zone - During the 2004 program, a total of 65 samples were taken in the North Penthouse Area; 30 of these or 46 per cent of these samples yielded gold values of >500ppb Au and 20 of these samples or 31 percent of all the samples taken on this prospect during 2004 yielded gold values of >1000ppb Au. During 2006, a total of 91 samples were taken in the North Penthouse Area; 44 of these or 48 percent of the samples taken from this area yielded gold values of >500ppb Au and 27 of these samples or 30 percent of all the samples taken on this prospect during 2006 yielded gold values of >1000ppb Au.

Penthouse South Zone - During 2004, a total of 53 samples were taken in the South Penthouse Area; 12 of these or 23 percent of the samples taken from this area yielded gold values of >500ppb Au and 6 of these samples or 11 percent of all the samples taken on this prospect during 2004 yielded gold values of >1000ppb Au. During 2006, a total of 147 samples were taken in the South Penthouse Area; 28 of these or 19 percent of the samples taken from this area yielded gold values of >500ppb Au and 25 of these samples or 17 percent of all the samples taken on this prospect during 2006 yielded gold values of >1000ppb Au. In both of the Penthouse Areas, the samples exhibited a strong, positive arsenic-gold relationship.

Cursory analysis of airborne geophysical data suggests that the South and North Penthouse Areas may actually one zone that is over 2 kilometres in strike length.

Crown - The 2004 field work consisted largely of examining and sampling of the trenches in this area. A total of 60, 1.0 metre to 1.5 metre chip samples were taken from these trenches and 32 per cent of these samples returned with anomalous gold values. Due to time constraints and significant sampling undertaken during 2004 which indicates this area to be a significant drill target, this Crown Area was not evaluated during the 2006 program.

Blackridge Area - The main mineralization occurs along a gabbro-sediment contact. The previously described linear mineralized contact zone was extended to slightly over 750 metres.

Anomalous results were returned from siliceous metavolcanics and metasediments with the highest gold values being returned from trenches cut into the gabbro - metavolcanic/metasediment contact zone. The company has obtained a total of 68 samples from this prospect. Elevated gold and copper values were noted. During the 2004 program, a total of 39 samples were taken in the Blackridge Area; 14 of these or 36 percent of the samples taken from this area yielded gold values of >500ppb Au and 13 of these samples or 33 percent of all the samples taken on this prospect during 2004 yielded gold values of >1000ppb Au. During 2006, a total of 29 samples were taken in the Blackridge Area; 12 of these or 41 percent of the samples taken from this area yielded gold values of >500ppb Au and 9 of these samples or 31 percent of all the samples taken on this prospect during 2006 yielded gold values of >1000ppb Au. Generally, the 2004 and 2006 results were an improvement over the reported historical results.

## Contwoyto IOL Concessions

We spent CDN\$109,057 on exploration on the Contwoyto IOL Concessions. Some key areas that warrant further investigation include:

Grid 5-5 Area - Field work revealed the area to be underlain by a package of amphibole-rich, silicate facies iron formation. This area produced the best gold results in the Contwoyto concessions. Previous geophysical surveys over the area indicated the zone trends west, off shore, into the East Arm of Contwoyto Lake, proximal to the Grid 5-5 Zone. Initial rock chip sampling from this and the contained "Fox A" area by the company returned significant results. Significantly more detailed geologic mapping, ground geophysical surveys, trenching and sampling of this area is required before final testing by a drill program.

R43-R45 Prospect - The poorly exposed R43-R45 Prospect is reported to be hosted by a Z-shaped folded iron formation up to 10 metres wide and traceable intermittently for over 1.3 kilometres. Significantly more detailed geologic mapping, geophysical surveys, trenching and sampling of this area is required to define the exact shape and size of the reported "Z" fold and define drill targets.

R44-R47 Prospect - The R44-R47 Prospect is hosted by an iron formation up to 5 metres wide and traceable on surface for 1.9 kilometres. Significantly more detailed geologic mapping, geophysical surveys, trenching and sampling of this area is required to define the exact shape and size of any folding subsequent to defining any drill targets.

An airborne geophysical survey has outlined a number of strong magnetic anomalies that have no surface expression. These areas require further investigation.

#### Geophysical Surveys

The company has not undertaken any surface or airborne geophysical surveys over the property. It does, however, have access to Tahera's airborne (helicopter) geophysical magnetic data collected over specific areas of both the Contwoyto and Hood IOLs generated during Tahera's search for kimberlite bodies. Specific ground magnetic (Mag), electromagnetic (EM) and induced polarization (IP) surveys are being planned over areas of identified surface mineralization in both the Contwoyto and Hood IOL.

#### Further Exploration – Slave Craton

After the initial Tahera (and subsequent Golden River) evaluation of the Contwoyto IOL concessions of the Contwoyto Lake Area, the original size of the concession was dramatically reduced from 65,250.8 acres to the current 11,061.10 acres. The Company believes that all prospective ground was retained. The area reduction was done in conjunction with Tahera Diamond Corp. and it served to greatly reduce the amount of exploration assessment requirements for this area. A small portion of the original Hood River IOL Concession Area was also reduced with all prospective ground retained for further exploration.

To maintain the Contwoyto IOL into 2009 a work commitment or a cash payment in lieu of assessment work in the amount of CDN\$145,000.00 will be required. To maintain the Hood IOL into 2009 a work commitment or a cash payment in lieu of assessment work in the amount of CDN\$213,000.00 will be required.

As a result of the compilation of the historical exploration results previously undertaken in the area and the results of the company's 2004 field season, several areas quickly emerged as having a strong potential to host gold mineralization, based on geological, mineralogical and structural criteria and as such would require further examination.

In late July 2006, Golden River Resources mobilized equipment and personnel to further prospect, assess and evaluate the Contwoyto Lake and Hood River Areas. The work program was to follow up Golden River Resources' highly successful 2004 examination with a focus on highlighting key areas on which to develop a future (2009) drilling program.

During the 2006 summer field program, 901 samples were taken throughout the Contwoyto and Hood IOL concessions and several areas were soon targeted as key regions for future work based on current geological modeling, the re-assessment of historical work and sample results from the 2004 program. All 2006 rock samples were sent for preparation and analysis by Acme Analytical Laboratories Ltd. Samples were analyzed with a 36 element geochemical procedure and gold Fire Assays were conducted where warranted.

The 2006 field program and sampling was under the direct supervision of Bruce Goad, P. Geo., a Qualified Person under the applicable Canadian disclosure regulations for mineral exploration companies. No exploration programs were undertaken during either 2007 or 2008. A follow-up exploration program is currently being planned for both concession areas, to be undertaken during 2009.

Significant results are presented in table format below.

Sample No.	Zone	Mineralized		
		(CO-20-00-03R IOL)	Gold (ppb)	Gold (g/t)
167468	Penthouse South	>100,000	62.18	12.9
167470	Penthouse South	20,926	39.79	4.4
150361	Penthouse South	28,317.7	38.68	5.3
150205	Penthouse South	5,275.3	9.41	0.9
147250	Penthouse North	5,940	8.88	2.4
BR040	Penthouse North	2,831.9	8.73	3.3
150226	Penthouse South	8,501.7	7.8	6.4
150238	Penthouse North	8,283.7	7.49	3.5
150216	Penthouse South	5,703.7	5.81	76
150218	Penthouse South	5,595.5	5.68	57.3
167474	Penthouse South	3,623	5.33	19.2

The Penthouse Prospect covers a large, structurally controlled, 3 kilometre long zone of sheared and brecciated siliceous basalts and sediments that may be directly analogous to the nearby ULU Deposit. Arsenopyrite mineralization has been identified within a 500 metre wide by 2,700 metre long area proximal to volcanic-sediment contacts.

The results to date strongly suggest the need for follow up drill investigation. These surface results will be combined with proposed geophysical survey data to form the basis for new drill targets to be explored during 2009.

Significant results are presented in table format below.

Sample No	Zone	Mineralized		
		(CO-20-00-03R IOL)	Gold (ppb)	Gold (g/t)
150241	North Fold Nose	57793.2	70.46	29.3
150245	North Fold Nose	40704.4	46.06	85.1
185863	North Fold Nose	17578.2	19.79	6.8
185851	North Fold Nose	16562	16.75	4.8
150242	North Fold Nose	14444	18.44	10.9
150246	North Fold Nose	5526.9	6.48	10.8
150248	North Fold Nose	4537.3	5.7	2.2
150249	North Fold Nose	4257.2	4.91	1.9
185852	North Fold Nose	3098.2	5.01	1.5

These samples were collected over an area measuring 400 metres by 800 metres. The North Fold Nose zone is located approximately 3 km north of the ULU deposit and is thought to be part of the same major fold structure which hosts the ULU deposit.

With the use of recent airborne geophysical surveys and new structural data, Golden River Resources has outlined numerous zones of banded iron formations with strike lengths of over several kilometres on the Contwoyto concessions. A total of 381 samples were collected from the six Contwoyto concession subsections. To date the scope of work has been limited to a more regional nature in this area. The majority of the best values (between 600 and 14,000 ppb gold) come from folded and faulted deformation zones within several of the iron formation horizons. The size and nature of at least these areas appear similar to the nearby Lupin Mine. Several new claims were staked over some of the most promising areas. Further detailed work is required over the principle areas of the Contwoyto

concession.

19

---

The Contwoyto IOL Concessions:

Numerous new zones of banded iron formations were identified and sampled during past GRR exploration programs. Principle areas within the property include thick sequences of banded iron formation with strike lengths of over several kilometres. With the use of recent airborne geophysical surveys and structural data, Golden River has outlined favourable gold-bearing deformation zones within the iron formation units that appear to have similarities to those identified at the nearby Lupin Mine.

During 2006, a total of 381 samples were collected from the six Contwoyto Concession subsections. To date, the scope of work has been limited to a more regional nature in this area. The majority of the best values (between 600 and 14,000 ppb gold) come from folded and faulted deformation zones within several of the iron formation horizons. The size and nature of at least these areas appear similar to the nearby Lupin Mine. Further detailed work is required over the principle areas of the Contwoyto concession including proposed ground geophysical surveys and geological mapping.

Golden River remains very encouraged by the 2004 and 2006 exploration programs which were successful in finding new locations of strong mineralization. Following these initial field investigation programs, the characteristics and gold-bearing potential of the Hood and Contwoyto IOL's are better understood. Subsequent to the acquisition of the results of a proposed geophysical program to be undertaken within both areas, it is expected that additional quality drill targets will be identified.

Committee Bay Greenstone Belt Properties

In June 2002, highly prospective ground within the Committee Bay Greenstone Belt ("CBGB") was selected and staked on behalf of the Company. Golden River Resources owns 100 percent interest of its Committee Bay Area Properties. All claims are on federally owned ground and mineral title is administered by the federal government.

The Committee Bay Greenstone Belt is located approximately 240 kilometres northeast of Baker Lake in Nunavut, Canada and is believed to represent the largest under-explored greenstone belt in North America, with potential to host world-class gold deposits.

The geology is highly prospective for banded iron formation hosted gold mineralization (as in the 3 million ounce Meadowbank and the 4.6 million ounce Meliadine gold deposits located to the south of the properties, north the hamlets of Baker Lake and Rankin Inlet, respectively). The Golden River Resources (through Golden Bull Resources, a 100 percent subsidiary of Golden River Resources) Properties protect several auriferous iron formations. In addition to the banded iron formation ("BIF") hosted gold targets, this belt has potential for shear-hosted lode gold, Witswaterstrand-style gold, komatiite-hosted stratiform-nickel-copper (Kambalda analogy), and platinum group elements ("PGE's") occurring in layered igneous complexes (Laughland Lake Anorthosite Suite).

Originally 29 properties were staked comprising a land area of 71,694 acres in the Committee Bay Greenstone Belt in central Nunavut, Canada. These properties were recorded on October 16, 2002. From the original area the company retained a total of 49,815.9 acres on 22 claims which comprise 10 individual properties. To maintain the properties in good standing, the company was required to spend a total of CDN\$197,798 of assessment work by October 16, 2004. A total of CDN\$98,879 (CDN\$2 per acre) is required in each subsequent year up to 2012 (at which point a decision to bring the properties to lease must be made). During the 2004 field season, the company spent CDN\$1.567 million on exploration and all amounts in excess of the 2004 commitment were applied to offset against future assessment commitments. As a result of the amount the company spent during 2004, it has already met the expenditure commitments until 2010 for some properties and to 2012 for most others. A list of the mining properties in the Committee Bay Greenstone Belt is included as Appendix B to this Annual Report.

## Location

The Committee Bay Claims are located 245 to 365 kilometres northeast of the hamlet of Baker Lake (Qamani'tuaq), Nunavut, Canada, or 210 to 320 kilometres west to southwest of the hamlet of Repulse Bay (Naujat). The remote community of Kugaaruk (formerly Pelly Bay) is 190 to 305 kilometres northeast of the claim groups. The company's land holdings in the Committee Bay Greenstone Belt include 22 properties in 10 claim blocks. These properties total approximately 49,815.9 acres and all were recorded on October 16, 2002. The sole exception to this is the GB 1 Claim which was recorded on September 13, 2004. There are no known encumbrances on any of the Company's properties.

## Figure 5. – Location of Committee Bay Area Properties

### Access, Infrastructure, Local Resources

Access to the properties is by fixed wing aircraft. Alternatively, float equipped planes have the option of landing at some of the larger lakes (Laughland Lake, Walker Lake, etc.) or on sections of the Hayes River. Helicopter support is required to mobilize personnel from camp to the property areas.

The Committee Bay Greenstone Belt lies within the zone of permafrost. The mean annual temperature of -20oC reflects its Arctic location (the Arctic Circle transects the property area). The climate is typical of the Eastern Arctic with average temperatures in the winter months of -30oC to -35oC, and +10oC to +12oC in the summer. The ground remains snow covered for more than 250 days a year (generally September to June). Rivers break up in June and lakes are generally ice bound until mid July.

The project area is on the northern section of the Wager Plateau, a shield area that has been significantly modified by glacial processes. Elevations range from 122 metres above sea level in the southwest to 560 metres above sea level in the northeast.

The closest community with regularly scheduled air service is Baker Lake, about 350 kilometres to the southwest. Canadian North and First Air flights arrive from Yellowknife and Iqaluit. Calm Air flies from Winnipeg to Rankin Inlet (Kangiqliniq) and then on to Baker Lake daily except Sundays. Kivalliq Air flies from Cambridge Bay (Qaluktuuttiaq) to Baker Lake enroute to Rankin Inlet. Fuel and expediting services are available in Baker Lake or Rankin Inlet. There is no infrastructure in the claim area. Committee Bay Resources maintains the Hayes River field camp which seasonally services their Three Bluffs Deposit. A winter airstrip and fairly regular supply flights generally service this site.

#### Property History

All previous work reported by companies is quoted from open file government assessment reports.

Following the release of Heywood's original geology map of the area in 1961, several exploration companies performed work within the Committee Bay Greenstone Belt. The nickel-copper potential of ultramafic rocks was the primary target of this first exploration wave. Between 1969 and 1970, explorers mapped, sampled and conducted limited geophysical surveys on areas now covered by the company's current "AA" and "EE" Properties. This historical program outlined several electromagnetic conductors to be coincident with surface mineralization. The best trenched nickel value occurred on the "EE" Property within a 1.46 kilometre long conductor.

Further exploration was undertaken during the general nickel-copper reconnaissance between 1970 and 1974 and more detailed work followed in 1975 and again in 1976. Geologic mapping, ground magnetic and EM surveys were conducted in the Hayes River Area. Although prospective rock units carrying nickel and copper values were identified, no further follow up work was recommended.

In 1986, reconnaissance rock samples were taken from within the area currently held by the company's Pickle Property.

Southwest of the central tonalite, in the area of the company's Pickle Property, several permits were granted to the Committee Bay Joint Venture (CBJV) in 1993. Sampling by CBJV returned gold values in sheared, banded iron formation which hosted pyrite +/- arsenopyrite mineralization. Although CBJV's Pickle 1 Claim was staked in 1995, no follow-up work was reported. The airborne magnetic expression of the iron formation at this site is 70-100 metres thick and traceable intermittently on surface for 1.35 kilometres.

In 1992, reconnaissance sampling in the Committee Bay Area was undertaken on behalf of the CBJV. Several highly anomalous gold values were returned from rock samples taken by field crews. Follow-up work was performed in 1993. High gold values corresponded to samples of banded iron formation containing quartz veining and/or silicification and pyrite, pyrrhotite, ( $\pm$ ) arsenopyrite mineralization. In 1995, additional rock samples were obtained, and eight drill holes totaling 811.41 metres were completed. This work exclusively focused on the Bluff Claims in Hayes River Area and the Inuk Area located further to the northeast. In 1996, the CBJV flew a 13,262 line-kilometre detailed geophysical survey (magnetics and VLF), collected additional rock samples and drilled 6 diamond drill holes at Three Bluffs. Approximately CDN\$5.4 million was collectively spent on the Committee Bay Greenstone Belt between 1992 and 2001 by explorers. This exploration focused on three areas: Laughland Lake, Hayes River and Curtis River.

Numerous gold occurrences were discovered by the CBJV between 1992 and 2001. Of particular note are the Pickle, Four Hills, Cop, Ghost Coyote, Ridge, Bluff Group and West Plains Prospects.

The company's five Wrench Claims which comprise the Wrench Property were previously within prospecting permits granted to the CBJV in 1994. Reconnaissance sampling by the CBJV returned a series of gold anomalies over a distance of approximately three kilometres and all located within sheared, oxide banded, iron formation in their northern part of their adjacent BLUFF Claim Block.

The Committee Bay Greenstone Belt was the subject of two separate 3 year (2000-2003) government Targeted Geoscience Initiatives ("TGI"). These TGIs consisted of a collaboration among the Geological Survey of Canada, Canada-Nunavut Geoscience Office and university partners. The stated objective of the TGI was to increase the level and cost-effectiveness of private sector exploration for mineral resources within the Committee Bay Greenstone Belt. Government work in the Committee Bay Greenstone Belt included 1:100,000 scale geologic mapping, prospecting, surficial mapping, drift prospecting, and airborne geophysical surveys. Airborne magnetic surveys (400 metre flight line spacing) were carried out and released as total field maps in 2002. Quaternary research involved multimedia sampling for gold and base metals and this drift prospecting/sampling was carried out between 2001 and 2003.

The government aeromagnetic survey shows a northeast continuation of the Three Bluffs iron formation for at least three kilometres onto the Golden River (through a 100 percent ownership of its subsidiary Golden Bull Resources) Wrench properties. Government sampling in 2001 on this trend, eastward from the Three Bluffs Deposit, returned gold intersections from sulphide-bearing (pyrite + pyrrhotite), quartz-veined intervals of oxide banded iron formation within the area currently covered by the boundaries of the company's Wrench Property.

Numerous other prospective gold targets within the greenstone belt (West Plains, Four Hills, Coyote, etc) are the subject of ongoing investigation by Committee Bay Resources Limited ("CBR"). For the most part, the mineral properties of Golden River Resources either border on, or are along strike of, an adjacent CBR Prospect.

Figure 6 - Location of the Company's Committee Bay Greenstone Belt Claims.

### Geologic Setting

The Prince Albert Group ("PAG") incorporates a series of Archean-aged greenstone belts that stretch approximately 600 kilometres northeast from the Aylmer Shear Zone in the south to the eastern tip of Melville Peninsula in the north. A 300 kilometres long section southwest of Committee Bay is referred to as the Committee Bay Greenstone Belt.

The stratigraphy of the Committee Bay Greenstone Belt includes banded iron formation up to 50 metres thick, komatiite volcanic flows, basalts, intermediate to felsic tuffs, and quartz-cobble conglomerates. Deformation is recorded by major shear zones, second order faults, complex folding, and felsic intrusions. Numerous gold prospects are spread out over a 260 x 40 kilometre area including CBR's Inuk Zone in northeast Committee Bay and their Three Bluffs Zone in the Hayes River Area.

The approximate age of the Committee Bay Greenstone Belt ranges from 2.718 billion years to 2.732 billion year old. Younger plutonic intrusions include the 1830 Million year old Hudson monzo-granites. Laterally continuous, northeast-trending, quartz-feldspar porphyry dykes, 0.5 metre to 10 metre wide, are traceable for hundreds of metres in the Three Bluffs Area. Age dates for these porphyry dykes are not currently available.

## Prospects

The Committee Bay Greenstone Belt appears to have the potential to host a number of mineral deposit types including banded iron formation hosted gold, shear-hosted lode gold, komatiite hosted, stratiform, nickel-copper (Kambalda analogy) mineralization, and platinum group elements in layered igneous complexes.

Examples of iron formation-hosted gold mineralization include the company's Wrench Property where government sampling in 2001 returned gold intersections from sulphide-bearing (pyrite + pyrrhotite), quartz-veined intervals of oxide banded iron formation. This section of anomalous, gold-bearing iron formation is over 6.5 kilometres long and includes not only the CBR Three Bluff occurrence but also the company's adjacent Wrench Claim Block.

Other iron formation-hosted gold examples include mineralization on the company's Pickle Property. The gold values are found in sulphide-rich sections (arsenopyrite and pyrite) of the sheared, oxide + silicate facies banded iron formation. The airborne magnetic expression of the iron formation at this site is 70–100 metres thick and traceable intermittently on surface for 1.35 kilometres.

In addition, gold values in iron formation are also found on the Company's NN1 and NN2 Properties.

An example of shear-hosted, gold mineralization in the Committee Bay Greenstone Belt is CBR's Coyote Prospect where high-grade gold values were returned from an intensely sheared gabbro with quartz veins, pyrite + pyrrhotite + chalcopyrite + visible gold. The hosting structure is a splay off the east-west Walker Lake Shear Zone and is a classic setting for shear-hosted gold. Through Golden Bull Resources, Golden River Resources holds title to a claim immediately adjacent to either side of the Coyote Claim Prospect. Rock exposure on these claims is extremely limited.

Komatiite-hosted (Kambalda-style) nickel potential exists on the company's EE Property (EE 1-3 Claims). These properties cover anomalous nickel values spread over 930 metres along a contact between a thick ultramafic body and sediments. Elevated copper values were also reported in samples. A second ultramafic/sediment contact on the western edge of the western EE Claim also has anomalous nickel over a similar strike length. The folded stratigraphy in the centre of the EE Property is also appears to have the potential to host gold mineralization but exposure is somewhat limited in this area.

The Laughland Lake Anorthosite Suite ("LLAS") also has good PGE-hosting potential. Although the company has no claims in the area, rusty zones defined by sulphide gossans of up to 100 metres wide and 500 metres long have been reported in this area. Moderately anomalous platinum, palladium nickel and copper values have been reported from sampling of these zones.

## Work Program

A total of CDN\$1.567 million was spent on the company's Committee Bay Greenstone Belt 2004 program. A large portion of the expense went to establishing a re-usable base-camp into this extremely remote location. All field, office, and camp supplies, as well as fuel, were flown in to a tiny island at the north end of Walker Lake upon which the base camp had been established. All subsequent field activities were helicopter supported.

The 2004 exploration program began in late May with a geophysical program on the Wrench Property. This is covered in the "Geophysical Surveys" section. Subsequently, between June 2004 and early September 2004, a regional, grassroots-type prospecting/mapping program was undertaken to explore all of the company's mineral properties in the Committee Bay Greenstone Belt. Each of the 22 claim blocks which comprise the company's 10 properties holds significant mineralization. In some localities outcrop was not abundant or even observed; however, many of the claim sites were selected to cover key magnetic anomalies identified from the government regional airborne survey.

A total of 1,476 rock samples were removed and analyzed from the company's 22 existing mineral claims. In addition, a small soil grid was established on the Wrench Property and 658 soil samples were collected. Anomalous gold values were returned from sampling on several of the claim areas. Of particular note were the results from the company's Wrench Property which cover an area adjacent to the CBR's Three Bluffs Deposit. This property was found to exhibit identical structures and lithologies as to those CBR has identified on their adjacent Three Bluffs Property. Sampling along exposed banded iron formation produced high gold values within the 1.5 kilometre strike length of the targeted iron formation horizon.

### Geophysical Surveys

The entire Committee Bay Greenstone Belt Area has been covered by governments 400 metre flight-line spacing airborne magnetic surveys to produce map coverage at a scale of 1:100,000. These surveys identify areas where linear magnetic anomalies exist: generally linear magnetic anomalies reflect underlying magnetic banded iron formation. This was undertaken as part of the government TGI initiative. To date the company's Wrench Property is the only area that has been subjected to ground geophysical surveys.

### Wrench Property

An eighty six-line grid was established over the Wrench Claims by Aurora Geosciences Ltd. of Yellowknife, NWT. Grid point control was accomplished using GPS technology. Lines were spaced every one hundred metres and in total the grid was comprised of 176.46 line kilometres. Subsequently, two geophysical surveys were undertaken. Total field magnetic surveying was carried out with readings obtained at 6.25 metre stations. Horizontal loop electromagnetic (HLEM) surveying was also undertaken. Readings for this survey were spaced at twenty five metre intervals.

The Wrench Claim Group comprises five contiguous properties covering approximately 4,900 hectares. A government aeromagnetic survey confirms that the Wrench iron formation is directly connected with, and along strike from, CBR's Three Bluffs iron formation-hosted gold deposit.

The geophysical program served a number of purposes. The magnetic survey accurately traced the iron formation and delineated important structural information such as faulting and folding. The HLEM component highlighted where the conductive pyrrhotite-rich sections of the iron formation are located and, in conjunction with the magnetic surveys, define potential trenching and drill targets.

The magnetic survey outlined a strong, six kilometre long, northeast-trending, magnetic anomaly along that exists along the western half of the grid. In the southeastern portion of the grid, two additional strong, parallel, magnetic anomalies were also recorded. The HLEM survey outlined 17 distinct conductive trends/anomalies, most of which are coincident with, or flank, very strong magnetic features.

Field verification of the magnetic anomalies indicated that the magnetic anomalies are a result of the presence of continuous banded iron formation units that underlie the grid area.

### Proposed Work

We did not conduct any exploration activities on our Committee Bay prospects during fiscal 2008 as we concentrated our efforts on our Slave craton prospects.

The large assessment credit excess accrued as a result of the 2004 program that was applied toward the claims allowed the company to meet its expenditure commitments until 2012 for most properties (see Appendix B). However, as a result of the high gold potential of the claims and exploration interest in the Committee Bay Greenstone Belt, further work is being planned.

Future exploration programs will involve additional ground geophysical surveys, geologic mapping, prospecting, sampling, and drilling. Identification and definition of drill targets will be the primary objective.

Four areas already present themselves as obvious drill targets:

- i) the Wrench Prospect which is along strike of CBR's Three Bluffs Deposit;
- ii) the Pickle Property iron formation which has the thickest intervals of sheared banded iron formation
- iii) the West Claim/Property which is adjacent to, and on strike with, the geophysical anomalies currently identified CBR on their West Plains Property and
- iv) the folded magnetic anomaly underlying the KK Property will have to be drill tested as there is no outcrop exposed in the area of the anomaly or more specifically, the fold hinges

The company has not scheduled the timing of these future exploration activities, which will depend on the availability of funds and ongoing developments on its Slave Craton Prospects.

## Regulation

### Mining in Canada

The mining industry in Canada operates under both federal and provincial or territorial legislation governing the exploration, development, production and decommissioning of mines. Such legislation relates to the method of acquisition and ownership of mining rights, labour, health and safety standards, royalties, mining and income taxes, exports, reclamation and rehabilitation of mines, and other matters. The mining industry in Canada is also subject to legislation at both the federal and provincial or territorial levels concerning the protection of the environment. Legislation imposes high standards on the mining industry to reduce or eliminate the effects of waste generated by extraction and processing operations and subsequently deposited on the ground or emitted into the air or water. The design of mines and mills, and the conduct of extraction and processing operations, are subject to the regulatory restrictions. The exploration, construction, development and operation of a mine, mill or refinery require compliance with environmental legislation and regulatory reviews, and the obtaining of land use and other permits, water licenses and similar authorizations from various governmental agencies. Legislation is in place for lands under federal jurisdiction or located in certain provinces and territories that provide for the preparation of costly environmental impact assessment reports prior to the commencement of any mining operations. These reports require a detailed technical and scientific assessment as well as a prediction of the impact on the environment of proposed mine exploration and development.

Failure to comply with the requirements of environmental legislation may result in regulatory or court orders being issued that could result in the cessation, curtailment or modification of operations or that could require the installation of additional facilities or equipment to protect the environment. Violators may be required to compensate those suffering loss or damage by reason of mining activities and the violators, including our officers and directors, may be fined or, in some cases, imprisoned if convicted of an offence under such legislation. Provincial and territorial mining legislation establishes requirements for the decommissioning, reclamation and rehabilitation of mining properties that are closed. Closure requirements relate to the protection and restoration of the environment and the protection of public safety. Some former mining properties must be managed for a long time following closure in order to fulfill regulatory closure requirements. The cost of closure of existing and former mining properties and, in particular, the cost of long-term management of open or closed mining properties can be substantial.

## Government Regulations

We are committed to complying and, to our knowledge, are in compliance with all governmental and environmental regulations. Permits from a variety of regulatory authorities are required for many aspects of mine operation and reclamation. Our exploration work is subject to the Mining Land Use Regulations of the Indian and Northern Affairs Canada Mining Act. This Act requires us to obtain permits prior to performing significant exploration programs.

We cannot predict the extent to which future legislation and regulation could cause additional expense, capital expenditures, restrictions, and delays in the development of our Canadian properties, including those with respect to mining properties. Our activities are not only subject to extensive federal, provincial and local regulations controlling the mining of and exploration for mineral properties, but also the possible effects of such activities upon the environment. We will be obligated to take steps to ensure that such streams draining the property do not become contaminated as a result of our activities on the property. We are not aware of any environmental problems on the property as of the date of this filing.

The mining industry in Nunavut, where our exploration properties are situated, operates under Canadian federal and territorial legislation governing prospecting, development, production, environmental protection, exports, income taxes, labour standards, mine safety and other matters. We believe our Canadian operations are operating in substantial compliance with applicable law.

Our exploration works is subject to environmental regulation primarily by the Federal Department of Indian Affairs and Northern Development and the Nunavut Water Board. The Department of Fisheries & Oceans (Canada) and the Department of the Environment (Canada) have an enforcement role in the event of environmental incidents, but presently have no direct regulatory role in relation to exploration activity.

On April 1, 1999, the Nunavut Land Claims Agreement, dated May 28, 1993, between the Inuit of Canada's eastern arctic region and Her Majesty the Queen in right of Canada, came into force. Under this agreement, the Inuit were granted ownership of approximately 360,000 square kilometers of land in an area referred to as the Nunavut Settlement Area, including ownership of subsurface rights in approximately 37,500 square kilometers of those lands. Third party interests in lands in the Nunavut Settlement Area created prior to April 1, 1999 are protected under the Nunavut Land Claims Agreement. Where a third party was granted a mining lease under the Canada Mining Regulations in lands comprising the Nunavut Settlement Area, that interest continues in accordance with the terms and conditions on which it was granted, including any rights granted under the legislation that give rise to the interest. However, where any successor legislation has the effect of diminishing the rights afforded to the federal government, it will not bind the Inuit without its consent. The Inuit are entitled to receive whatever compensation is payable by the interest holder for the use of exploitation of mineral rights. The federal government continues to administer the third party interest on behalf of the Inuit, unless the third party and the Inuit enter into an agreement under which the third party agrees to the administration of their interest by the Inuit. In the event such an agreement is reached, the applicable legislation will cease to apply to the third party interest. Subsurface interests in such lands continue to be administered in accordance with applicable legislation relating to those interests and are not affected by the Nunavut Land Claims Agreement.

Third party interests in lands in the Nunavut Settlement Area created on or after April 1, 1999 are granted, in the case of surface rights, by the appropriate regional Inuit association and, in the case of subsurface rights, by Nunavut Tungavik Incorporated which will hold subsurface title to Inuit owned lands and will be additionally responsible, in consultation with the appropriate regional Inuit associations, for the administration and management of those subsurface rights.

### Government Requirements for Maintenance of Claims

The regulations governing the requirements for the maintenance of claims is dependant upon whether the claims are within a federal jurisdiction or if they are located on ground that is controlled by the NTI under the Nunavut Land Claims Agreement.

#### Within The Slave Craton:

Tahera controlled mineral properties within the Slave Craton fall under the jurisdiction of both the Federal government and the Nunavut Land Claims Agreement. Fees and exploration expenditures associated with the maintenance of Tahera Corporation's ground covered under the Slave Craton Agreement with Golden River Resources is the responsibility of Tahera Diamond Corporation.

#### Within The Committee Bay Greenstone Belt:

The Nunavut Government has granted the company interest in the 22 mineral claims which comprise 10 distinct mineral properties in the Committee Bay Greenstone Belt described in this report. All claims fall under the jurisdiction of Federal regulations.

To keep the existing 22 claims in good standing, the company was required to spend a total of CDN\$197,798 of qualifying assessment work by October 16, 2004. Assessment work must be filed with the Mining Recorder within 30 days of the claim's anniversary date or within 60 days of the lapsing notice date.

A total of CDN\$98,879 (CDN\$2 per acre) is required in each subsequent year up to 2012 (at which point a decision to bring the properties to lease must be made).

In 2004 the company spent a total of CDN\$1,566,962 of on its Committee Bay Area Properties. All assessment work was filed and the excess of CDN\$1,369,164 was used to offset the expenditure (assessment) requirement due in following years. As a result the company has already met its assessment expenditure commitments until 2012 for most properties (for a detailed listing, see Appendix B).

### Employees

We use temporary employees in our field exploration programme. The services of our Chief Executive Officer, Joseph Gutnick and Chief Financial Officer and Secretary, Peter Lee, as well as clerical employees are provided to us on a part-time as needed basis pursuant to a Service Agreement dated November 25, 1988 (the "Service Agreement") between us and AXIS Consultants Pty Limited ("AXIS"). AXIS also provides us with office facilities, equipment, administration and clerical in Melbourne Australia pursuant to the Service Agreement. The Service Agreement may be terminated by written notice by either party.

Other than this, we rely primarily upon consultants to accomplish our exploration activities. We are not subject to a union labour contract or collective bargaining agreement.

### Item 1A Risk Factors

You should carefully consider each of the following risk factors and all of the other information provided in this Annual Report before purchasing our common stock. An investment in our common stock involves a high degree of risk, and should be considered only by persons who can afford the loss of their entire investment. The risks and uncertainties described below are not the only ones we face. There may be additional risks and uncertainties that are not known to us or that we do not consider to be material at this time. If the events described in these risks occur, our business, financial condition and results of operations would likely suffer. Additionally, this Annual Report contains

forward-looking statements that involve risks and uncertainties. Our actual results may differ significantly from the results discussed in the forward-looking statements. This section discusses the risk factors that might cause those differences.

## Risk Factors

### Risks of Our Business

#### We Lack an Operating History And Have Losses Which We Expect To Continue Into the Future.

To date we have no source of revenue. We have no operating history as a mineral exploration or mining company upon which an evaluation of our future success or failure can be made. Our ability to achieve and maintain profitability and positive cash flow is dependent upon:

- exploration and development of the property covered by our mineral claims;
- our ability to locate economically viable mineral reserves in the property covered by our mineral claims;
- our ability to raise the capital necessary to conduct exploration and preserve our interest in the mineral claims, increase our interest in the mineral claims and continue as an exploration and mining company; and
- our ability to generate revenues and profitably operate a mine on the property covered by our mineral claims.

#### We Have No Known Gold Or Other Mineral Reserves And We Cannot Assure You That We Will Find Such Reserves. If We Develop A Gold Or Other Mineral Reserve, There Is No Guarantee That Production Will Be Profitable.

We have not identified any gold or other commercial mineral reserves on the properties covered by our mineral claims and we cannot guarantee we will ever find any. Also, to the extent that commercial mineral reserves have been identified by other companies on properties that are adjacent to or within the same geographic region as our exploration properties, this does not mean that we will be successful in identifying commercial mineral reserves on our properties. Even if we find a gold or other commercial minerals reserve, there is no assurance that we will be able to mine them. Even if we develop a mine, there is no assurance that we will make a profit. If we do not find gold or other commercial minerals you could lose part or all of your investment.

#### We Will Need Additional Financing To Determine If There Is Gold Or Other Commercial Minerals And To Maintain The Mineral Claims.

Our success will depend on our ability to raise additional capital. We have met our legal exploration commitments on the Committee Bay Properties until 2012 and Tahera is required to fulfill the minimum exploration commitments on the Slave Properties. However, at this time, we have not found a gold deposit and further exploration is required. There is no assurance whatsoever that funds will be available from any source or, if available, that they can be obtained on terms acceptable to us to make these investments. If funds are not available in the amounts required to maintain an interest, we will be unable to proceed further on the Committee Bay Properties and Slave Properties and our operations would be severely limited, and we would be unable to reach our objective. This could cause the loss of all or part of your investment.

### There Are Risks Associated With Our Agreement With Tahera

In June 2008 the Company agreed on terms with Tahera to take full control of the properties listed in the 2002 Tahera/GRR agreement. At the date of this filing the agreement transferring control of the properties had not been executed, and until it is finalized the Company will ensure all other Tahera related agreements remain current. The agreement with Tahera dated March 7, 2002 gives us rights of access to exploration data of Tahera covering gold, silver and base metal potential on properties held by Tahera or properties which are adjacent to or in the area of the Tahera properties. If during our exploration for gold, silver or base metals, we discover diamonds, Tahera retains the rights to the diamonds. Under the agreement, if we wish to conduct exploration on the properties, we need to seek access to the properties and enter into an access agreement with Tahera, suitable to Tahera, which sets out the terms of our access. Our access cannot interfere with Tahera's operations on the properties. Tahera has the sole and unfettered discretion to sell, transfer, assign, encumber, mortgage, pledge, hypothecate, allow to lapse, forfeit, surrender or in any way dispose of its interest in the properties. If Tahera were to sell, transfer or assign the properties, we would have to negotiate access with the new owners of the properties and there can be no assurance we would receive access. We undertake exploration at our sole risk. Subject to Tahera's rights, we have the right to exploit opportunities for gold, silver or base metals on the properties. We have granted Tahera a 2% net smelter return royalty.

On January 16, 2008, Tahera Diamond Corporation obtained an order from the Ontario Superior Court granting it protection pursuant to the provisions of the Companies' Creditors Arrangement Act ("CCAA") for 30 days, with subsequent extensions to November 30, 2008.

In June 2008, the Company agreed on terms with Tahera Diamond Corporation to obtain full control of the mining properties that are listed in the Tahera/GRR agreement through the issuance of 3,000,000 shares of common stock, but final agreements have not been executed, as at October 10, 2008.

### The Report Of Our Independent Registered Public Accounting Firm Contains An Explanatory Paragraph Questioning Our Ability To Continue As A Going Concern.

The report of our independent registered public accounting firm on our consolidated financial statements as of June 30, 2008 and for the years ended June 30, 2008 and 2007 and for the period July 1, 2002 (inception of exploration stage) through June 30, 2008 includes an explanatory paragraph questioning our ability to continue as a going concern. This paragraph indicates that we have not yet commenced revenue producing operations and have a retained deficit of A\$37,109,000 which conditions raise substantial doubt about our ability to continue as a going concern. Our consolidated financial statements do not include any adjustment that might result from the outcome of this uncertainty.

### We Are A Small Operation And Do Not Have Significant Capital.

Because we will have limited working capital, we must limit our exploration. If we are unable to raise the capital required to undertake adequate exploration, we may not find gold or other commercial minerals even though our property may contain gold or other commercial minerals. If we do not find gold or other commercial minerals we may be forced to cease operations and you may lose your entire investment.

### We May Not Find Any Ore Reserves That Are Economical

If we are unable to raise the required capital or we do not find gold or other commercial minerals on the properties or we cannot remove the gold or other commercial minerals discovered economically, we may have to look for other mineral rights on other properties in Canada or other parts of the world. Alternatively, we may cease operations altogether and you may lose your entire investment.

Weather Interruptions In Nunavut May Affect And Delay Our Proposed Exploration Operations.

We can only work above ground at our mineral claims in Nunavut, Canada from late May until early October and from mid December to March of each year. Once we are able to work underground, we plan to conduct our exploration year round, however, it is possible that snow or rain could cause roads leading to our claims to be impassible. This could impair our ability to meet our objectives and may increase our costs beyond our ability, if any, to secure financing, which would adversely affect the value of your investment and our ability to carry on business.

If Our Officers And Directors Stopped Working For Us, We Would Be Adversely Impacted.

None of our other officers or directors works for us on a full-time basis. There are no proposals or definitive arrangements to compensate our officers and directors or to engage them on a full-time basis. They each rely on other business activities to support themselves. They each have a conflict of interest in that they are officers and directors of other companies. You must rely on their skills and experience in order for us to reach our objective. We have no employment agreements or key man life insurance policy on any of them. The loss of some or all of these officers and directors could adversely affect our ability to carry on business and could cause you to lose part or all of your investment.

We Could Encounter Delays Due To Regulatory And Permitting Delays.

We could face delays in obtaining mining permits and environmental permits. Such delays, could jeopardize financing, if any, in which case we would have to delay or abandon work on the properties.

Gold Price Fluctuations.

If we are successful in developing a gold ore reserve, our ability to raise the money to put it into production and operate it at a profit will be dependant on the then existing market price of gold. Declines in the market prices of gold may render reserves containing relatively low grades of ore uneconomic to exploit, and we may be required to discontinue exploration, development or mining on the properties, or write down our assets. If the price of gold is too low we will not be able to raise the money or produce any revenue. We cannot predict the future market price of gold. A sustained decline in the market price of gold could cause a reduction in the value of your investment and you may lose all or part of your investment.

There Are Uncertainties Inherent In The Estimation Of Gold Or Other Mineral Reserves.

Based upon our preliminary study of the properties we believe that the potential for discovering gold reserves exists, but we have not identified such gold reserves and we are not able to estimate the probability of finding recoverable gold ore. Such estimates cannot be calculated from the current available information. Reserve estimates, including the economic recovery of gold ore, will require us to make assumptions about recovery costs and gold market prices. Reserve estimation is, by its nature, an imprecise and subjective process and the accuracy of such estimates is a function of the quality of available data and of engineering and geological interpretation, judgment and experience. The economic feasibility of the properties will be based upon our estimates of the size and grade of ore reserves, metallurgical recoveries, production rates, capital and operating costs, and the future price of gold. If such estimates are incorrect or vary substantially it could effect our ability to develop an economical mine and would reduce the value of your investment.

If We Define An Economic Ore Reserve And Achieve Production, It Will Decline In The Future. An Ore Reserve Is A Wasting Asset.

Our future ore reserve and production, if any, will decline as a result of the exhaustion of reserves and possible closure of any mine that might be developed. Eventually, at some unknown time in the future, all of the economically extractable ore will be removed from the properties, and there will be no ore remaining. This is called depletion of reserves. Ultimately, we must acquire or operate other properties in order to continue as an on going business. Our success in continuing to develop reserves, if any, will affect the value of your investment.

There Are Significant Risks Associated With Mining Activities.

The mining business is generally subject to risks and hazards, including quantity of production, quality of the ore, environmental hazards, industrial accidents, the encountering of unusual or unexpected geological formations, cave-ins, flooding, earthquakes and periodic interruptions due to inclement or hazardous weather conditions. These occurrences could result in damage to, or destruction of, our mineral properties or production facilities, personal injury or death, environmental damage, reduced production and delays in mining, asset write-downs, monetary losses and possible legal liability. We could incur significant costs that could adversely affect our results of operation. Insurance fully covering many environmental risks (including potential liability for pollution or other hazards as a result of disposal of waste products occurring from exploration and production) is not generally available to us or to other companies in the industry. What liability insurance we carry may not be adequate to cover any claim.

We Are Subject To Significant Environmental And Other Governmental Regulations That Can Require Substantial Capital Expenditure, And Can Be Time-Consuming.

We are required to comply with various Canadian laws and regulations pertaining to exploration, development and the discharge of materials into the environment or otherwise relating to the protection of the environment, all of which can increase the costs and time required to attain operations. We will have to obtain exploration, development and environmental permits, licenses or approvals that may be required for our operations. There can be no assurance that we will be successful in obtaining, if required, a permit to commence exploration, development and operation, or that such permit can be obtained in a timely basis. If we are unsuccessful in obtaining the required permits it may adversely affect our ability to carry on business and cause you to lose part or all of your investment.

Mining Accidents Or Other Adverse Events At Our Property Could Reduce Our Production Levels.

If and when we reach production it may fall below estimated levels as a result of mining accidents, cave-ins or flooding on the properties. In addition, production may be unexpectedly reduced if, during the course of mining, unfavorable ground conditions or seismic activity are encountered, ore grades are lower than expected, or the physical or metallurgical characteristics of the ore are less amenable to mining or processing than expected. The happening of these types of events would reduce our profitability or could cause us to cease operations which would cause you to lose part or all of your investment.

The acquisition of gold mineral properties is subject to substantial competition. If we must pursue alternative properties, companies with greater financial resources, larger staffs, more experience, and more equipment for exploration and development may be in a better position than us to compete for properties. We may have to undertake greater risks than more established companies in order to compete which could affect the value of your investment.

### We are substantially dependent upon AXIS To Carry Out Our Activities

We are substantially dependent upon AXIS for our senior management, financial and accounting, corporate legal and other corporate headquarters functions. For example, each of our officers is employed by AXIS and, as such, is required by AXIS to devote substantial amounts of time to the business and affairs of the other shareholders of AXIS.

Pursuant to a services agreement, AXIS provides us with office facilities, administrative personnel and services, management and geological staff and services. No fixed fee is set in the agreement and we are required to reimburse AXIS for any direct costs incurred by AXIS for us. In addition, we pay a proportion of AXIS indirect costs based on a measure of our utilization of the facilities and activities of AXIS plus a service fee of not more than 15% of the direct and indirect costs. AXIS has charged us a service fee of 15% for this fiscal year. This service agreement may be terminated by us or AXIS on 60 days' notice. See "Certain Relationships and Related Party Transactions."

### Future Sales of Common Stock Could Depress The Price Of Our Common Stock

Future sales of substantial amounts of common stock pursuant to Rule 144 under the Securities Act of 1933 or otherwise by certain stockholders could have a material adverse impact on the market price for the common stock at the time. There are presently 22,955,659 outstanding shares of our common stock held by stockholders which are deemed "restricted securities" as defined by Rule 144 under the Securities Act. Under certain circumstances, these shares may be sold without registration pursuant to the provisions of Rule 144. In general, under rule 144, a person (or persons whose shares are aggregated) who has satisfied a six-month holding period and who is not an affiliate of the Company may sell restricted securities without limitation as long as the Company is current in its SEC reports. A person who is an affiliate of the Company may sell within any three-month period a number of restricted securities which does not exceed the greater of one (1%) percent of the shares outstanding or the average weekly trading volume during the four calendar weeks preceding the notice of sale required by Rule 144. In addition, Rule 144 permits, under certain circumstances, the sale of restricted securities by a non-affiliate without any limitations after a one-year holding period. Any sales of shares by stockholders pursuant to Rule 144 may have a depressive effect on the price of our Common stock.

### Our Common Stock Is Traded Over the Counter, Which May Deprive Stockholders Of The Full Value Of Their Shares

Our common stock is quoted via the Over The Counter Bulletin Board (OTCBB). As such, our common stock may have fewer market makers, lower trading volumes and larger spreads between bid and asked prices than securities listed on an exchange such as the New York Stock Exchange or the NASDAQ Stock Market. These factors may result in higher price volatility and less market liquidity for the common stock.

### A Low Market Price May Severely Limit The Potential Market For Our Common Stock

Our common stock is currently trading at a price substantially below \$5.00 per share, subjecting trading in the stock to certain SEC rules requiring additional disclosures by broker-dealers. These rules generally apply to any equity security that has a market price of less than \$5.00 per share, subject to certain exceptions (a "penny stock"). Such rules require the delivery, prior to any penny stock transaction, of a disclosure schedule explaining the penny stock market and the risks associated therewith and impose various sales practice requirements on broker-dealers who sell penny stocks to persons other than established customers and institutional or wealthy investors. For these types of transactions, the broker-dealer must make a special suitability determination for the purchaser and have received the purchaser's written consent to the transaction prior to the sale. The broker-dealer also must disclose the commissions payable to the broker-dealer, current bid and offer quotations for the penny stock and, if the broker-dealer is the sole market maker, the broker-dealer must disclose this fact and the broker-dealer's presumed control over the market. Such information must be provided to the customer orally or in writing before or with the written confirmation of trade sent to the customer. Monthly statements must be sent disclosing recent price information for

the penny stock held in the account and information on the limited market in penny stock. The additional burdens imposed upon broker-dealers by such requirements could discourage broker-dealers from effecting transactions in our common stock.

The Market Price Of Your Shares Will Be Volatile.

The stock market price of gold mining exploration companies like us has been volatile. Securities markets may experience price and volume volatility. The market price of our stock may experience wide fluctuations that could be unrelated to our financial and operating results. Such volatility or fluctuations could adversely affect your ability to sell your shares and the value you might receive for those shares.

Item 1B Unresolved Staff Comments

The Company has received a comment letter from the SEC and has complied with all such comments in this 10-K filing.

Item 2 Properties

The Company occupies certain executive and office facilities in Melbourne, Victoria, Australia which are provided to it pursuant to the Service Agreement with AXIS. See “Item 1- Business- Employees” and “Item 12- Certain Relationships and Related Transactions”. The Company believes that its administrative space is adequate for its current needs.

In addition, we have an office in North America at Suite 1801, 1 Yonge Street, Toronto ON Canada. The office receives mail, couriers and facsimiles on our behalf and forwards any documents received to us. The lease is for six months and can be renewed on a month to month basis. We pay a fee of CDN\$30 per month. This is a temporary arrangement whilst we determine whether to open a permanent office.

Item 3 Legal Proceedings

There are no pending legal proceedings to which the Company is a party, or to which any of its property is the subject, which the Company considers material.

Item 4 Submission of Matters to a Vote of Security Holders

Not Applicable

## PART II

## Item 5 Market for Common Equity and Related Stockholder Matters

Our common stock is traded in the over-the-counter market and quoted on the OTC-Bulletin Board under the symbol "GORV". The trading for the common stock has been sporadic and the market for the common stock cannot be classified as an established trading market.

The following table sets out the high and low bid information for the common stock as reported by the OTC Bulletin Board for each period/quarter indicated in US\$:

Calendar Period	High Bid(1)	Low Bid(1)
2006		
First Quarter	1.75	0.40
Second Quarter	0.50	0.16
Third Quarter	0.30	0.15
Fourth Quarter	0.30	0.11
2007		
First Quarter	0.14	0.12
Second Quarter	0.12	0.12
Third Quarter	0.12	0.10
Fourth Quarter	0.11	0.06
2008		
First Quarter	0.10	0.06
Second Quarter	0.40	0.05
Third Quarter	0.09	0.04

(1) The quotations set out herein reflect inter-dealer prices without retail mark-up, mark-down or commission and may not necessarily reflect actual transactions.

As of October 10, 2008, there were 26,714,130 shares of common stock issued, of which 26,711,630 were outstanding. We have (i) 10,000,000 special warrants on issue, each of which is exercisable at any time until June 9, 2016, to acquire without the payment of further consideration one share of common stock, at which time all special warrants that have not been exercised will automatically convert into shares of common stock; and (ii) 40,000,000 warrants outstanding which expire on April 30, 2011, each of which is exercisable to purchase one share of common stock for a purchase price of A\$0.20 (US\$0.1542). The warrants contain a cashless exercise provision whereby the holder, at its option, may exercise the warrants by surrender and cancellation of a portion of the shares of our common stock issuable upon the exercise of the warrants based on the then current market price of our common stock. If the holder of the warrants elected to exercise the warrants pursuant to this provision, we would not receive any proceeds from the exercise of the warrants.

For information concerning shares issuable upon exercise of outstanding stock options see Note 10 of the Notes to the Consolidated Financial Statements.

To date we have not paid any dividends on our common stock and we do not expect to declare or pay any dividends on our common stock in the foreseeable future. Payment of any dividends will depend upon our future earnings, if any, our financial condition, and other factors deemed relevant by the Board of Directors.

Shareholders

As of September 30, 2008 the Company had approximately 130 shareholders of record.

## Dividend Policy

It is the present policy of the Board of Directors to retain earnings, when incurred, for use in our business. We have not declared any cash dividends to the holders of its Common Stock and do not intend to declare such dividends in the foreseeable future.

## Transfer Agent

Our United States Transfer Agent and Registrar is BNY Mellon Stockowner Services.

## Item 6

## Selected Financial Data

Our selected consolidated financial data presented below for each of the years in the two-year period ended June 30, 2008, and the balance sheet data at June 30, 2007 (restated) and 2008 have been derived from consolidated financial statements, which have been audited by PKF, Certified Public Accountants, a Professional Corporation. The selected financial data should be read in conjunction with our consolidated financial statements for each of the years in the two-year period ended June 30, 2008, and Notes thereto, which are included elsewhere in this Annual Report.

## Restatement And Adjustments

On October 3, 2008 the Chief Financial Officer of Golden River Resources Corporation (the “Company”), in consultation with its Audit Committee, the Company’s Board of Directors and , its independent registered public accounting firm, determined that the June 30, 2007 financial statements should no longer be relied on because the valuation of 4,650,000 of options granted to the Company’s officers, directors and consultants in October 2006 should be adjusted. In 2006, the Company issued 4,650,000 options and utilized the services of an external valuer to determine the value of the options using the binomial option pricing model. At the time the market price used in the binomial option pricing model was US\$0.166 which was based on the price that the Company had been able to conclude a private placement transaction and accordingly the Company believed this to be the fair value of the shares of common stock at the time. Following discussions with the staff (the “Staff”) of the Securities and Exchange Commission (“SEC”) in connection with the Staff’s review of the Company’s fiscal 2006 and 2007 Form 10-KSB’s, the Company has agreed to use the market price of the shares of common stock at the time of issue of the options (US\$0.30) in the binomial option pricing model.

The effect of the adjustment is to increase the net loss for the year ended June 30, 2007 by A\$313,000 and our net loss per share by A\$(0.01) for the year ended June 30, 2007.

Management has also agreed following discussions with the SEC staff to make an accounting adjustment based on a comment by the Staff in a letter regarding certain stock based compensation expenses based upon an estimate of volatility arising from the 1,400,000 options issued in 2004. This adjustment has been made as a A\$1.1 million reclass between additional paid-in capital and retained earnings (deficit) and has been reflected within opening stockholders’ equity in the June 30, 2007 financial statements. Such adjustment had no effect on total stockholders’ equity or the Company’s cash flows.

Description	Net Loss		Net Loss as Adjusted /Reported	Net Loss	
	as Previously Reported	Adjustment/ Restatement		per share as Previously Reported	Net Loss per share as Adjusted /Reported
	A\$’000	A\$’000	A\$’000	A\$	A\$
Year ended June 30, 2005-Adjusted	(2,600)	(767)	(3,367)	(0.16)	(0.20)
Year ended June 30, 2006-Adjusted	(1,328)	(366)	(1,694)	(0.07)	(0.09)
Year ended June 30, 2007-Restated	(1,784)	(313)	(2,097)	(0.05)	(0.06)

## Item 7. Management’s Discussion and Analysis of Financial Condition or Plan of Operation

## General

The following discussion and analysis of our financial condition and plan of operation should be read in conjunction with the Financial Statements and accompanying notes and the other financial information appearing elsewhere in this report. This report contains numerous forward-looking statements relating to our business. Such forward-looking statements are identified by the use of words such as believes, intends, expects, hopes, may, should, plan, projected, contemplates, anticipates or similar words. Actual operating schedules, results of operations, ore grades and mineral deposit estimates and other projections and estimates could differ materially from those projected in the forward-looking statements.

We are an exploration stage mining company. Our objective is to exploit our interest in the mineral claims in Nunavut, Canada. Our principal exploration target is for gold and we are seeking to determine whether adequate gold reserves are present on the property covered by our claims to develop an operating mine. We are in the initial stages of our exploration program and we have not yet identified any ore reserves. We have not generated any revenues from operations.

#### Foreign Currency Translation

The majority of our administrative operations are in Australia and, as a result, our accounts are reported in Australian dollars. The income and expenses of its foreign operations are translated into Australian dollars at the average exchange rate prevailing during the period. Assets and liabilities of the foreign operations are translated into Australian dollars at the period-end exchange rate. The following table shows the period-end rates of exchange of the Australian and Canadian dollar compared with the US dollar during the periods indicated.

Year ended June 30			
2007	A\$1.00	=	US\$0.8488
	CDN\$1.00	=	US\$0.8991
2008	A\$1.00	=	US\$0.9615
	CDN\$1.00	=	US\$0.9900

The exchange rate between the A\$ and US\$ has moved by 11.27% between June 30, 2007 and 2008. Accordingly, a direct comparison of costs between fiscal 2008 and 2007 is not necessarily a true comparison.

#### Results of Operations

##### Year ended June 30, 2008 versus Year ended June 30, 2007

Total costs and expenses have decreased from A\$1,999,000 for the year ended June 30, 2007 to A\$1,140,000 (US\$1,096,000) for the year ended June 30, 2008. The decrease was a net result of:

- i) A decrease in exploration expenditure written off from A\$502,000 in fiscal 2007 to A\$193,000 (US\$185,000) in fiscal 2008. In fiscal 2008, no field exploration was undertaken. The costs incurred relate to consultants providing exploration advice and maintenance costs of the Slave and Committee Bay Properties. In fiscal 2007, we conducted field and sampling programs on the Company's Slave exploration properties. The expenditure incurred included consulting fees for geologists, field staff, logistic support and laboratory analysis. The Committee Bay and Slave Properties are in Nunavut in an isolated area and exploration can only be undertaken between June and August each year due to ground conditions. Exploration is costly as we were required to hire and construct a temporary camp which also had to be transported by charter flight. All supplies and casual employees also needed to be transported to the temporary camp by charter flights and/or helicopter. The properties are located approximately 100 kilometers from the camp and employees are transported by helicopter daily from camp to the exploration site.
- ii) An increase in interest expense from A\$4,000 in fiscal 2007 to A\$7,000 (US\$7,000) in fiscal 2008. AXIS provides management and geological services to us pursuant to a Service Deed dated November 25, 1988. AXIS charged us A\$7,000 in interest for fiscal 2008. AXIS charged interest at a rate between 11.10% and 11.75% for fiscal 2008. The amount of A\$639,000 (US\$614,000) owing to AXIS at June 30, 2008, and included in accounts payable and accrued expenses, represents an advance of A\$214,000 (US\$206,000) by AXIS to enable us to meet current commitments and A\$425,000 (US\$409,000) in charges for the nine months ended June 30, 2008. During fiscal 2007, AXIS charged us A\$4,000 in interest. AXIS charged interest at a rate between 9.60% and 10.10% for fiscal 2007. The amount of A\$140,000 (US\$119,000) owing to AXIS at June 30, 2007 represents part of the charges for

the three months ended June 30, 2007 and was included in accounts payable and accrued expenses.

- iii) A decrease in legal, accounting and professional costs from A\$135,000 in fiscal 2007 to A\$78,000 (US\$75,000) in fiscal 2008. During fiscal 2008, we incurred legal expenses of A\$8,000 (US\$8,000) for general legal work; audit fees of A\$50,000 (US\$48,000) for professional services in relation to financial statements, the quarterly reports on Form 10-Qs and annual report on Form 10-K; and A\$20,000 (US\$19,000) from our stock transfer agent for management of the share register. During fiscal 2007, we incurred legal expenses of A\$59,000 (US\$50,000) for the preparation of the registration statement (SB-2) to register the warrants issued to RAB and general legal work; audit fees of A\$48,000 (US\$41,000) for professional services in relation to financial statements, the quarterly reports on Form 10-QSBs and annual report on Form 10-KSB and reviewing the Form SB-2; and A\$28,000 (US\$24,000) from our stock transfer agent for management of the share register.
- iv) A decrease in administrative costs from A\$745,000 in fiscal 2007 to A\$474,000 (US\$456,000) in fiscal 2008. During fiscal 2008, AXIS charged us A\$439,000 (US\$422,000) for management and service fees; Director's fees and salaries incurred on behalf of the Company which relate to fees paid to an independent director, President and Chief Executive Officer, Director, Secretary and Chief Financial Officer and other staff of AXIS who provide services to the Company; and we incurred A\$10,000 (US\$9,000) for lodgement of Company filings with the SEC and A\$25,000 (US\$24,000) for printing, stationery and couriers. During fiscal 2007, AXIS charged us A\$677,000 (US\$575,000) for management and service fees and Director's fees and salaries incurred on behalf of the Company which relate to fees paid to an independent director, President and Chief Executive Officer, Director, Secretary and Chief Financial Officer and other staff of AXIS who provide services to the Company; A\$19,000 (US\$16,000) for lodgement of Company filings with the SEC and A\$15,000 (US\$13,000) for overseas travel.
- v) A decrease in stock based compensation from A\$613,000 for fiscal 2007 to A\$388,000 (US\$373,000) for fiscal 2008. Following shareholder approval on January 27, 2005 the Company issued 1,400,000 options at an exercise price of US\$1.00 per option pursuant to the 2004 Stock Option Plan. Of the total 1,400,000 options issued, 350,000 vested immediately following shareholder approval, 50,000 vested on March 31, 2005, 333,331 vested on July 27, 2005, 333,334 vested on January 27, 2006 and the balance vested on July 27, 2006. The exercise price of US\$1.00 was derived from the issue price of common stock from the placement of shares on March 31, 2004 and was considered by the Company's Directors to be the fair value of the common stock. The options expire on October 15, 2014. The Company accounted for all options issued in 2004 based upon their fair market value using the Black Scholes pricing model. There were no employee stock options issued by the Company prior to 2004 or in 2005 or 2007. The Company calculated the fair value of the options at US\$0.9663 per option using the Black Scholes valuation method. The total value of the options equates to A\$1,744,800 (US\$1,352,820) and was amortized over the vesting period. At June 30, 2008 the options were fully vested.

On October 19, 2006, the Directors of the Company issued a further 4,650,000 options under the Stock Option Plan. The options have no issue price, an exercise price of US30.84 cents, and a latest exercise date of October 19, 2016. The options vest 1/3 on October 19, 2007 ("T1"), 1/3 on October 19, 2008 ("T2") and 1/3 on October 19, 2009 ("T3"). The Company obtained an external valuation of the options from an unrelated third party. The Company has calculated the fair value of the 4,650,000 options at US\$0.222 per option for T1, US\$0.228 for T2 and US\$0.234 for T3 using the binomial option pricing model. The total value of the options equates to A\$1,406,287 (US\$1,060,200) and is being amortized over the vesting periods. For 2008, the amortisation amounted to A\$388,084 (US\$373,143) and 600,000 options were forfeited. At June 30, 2008, the remaining value of the unamortized deferred compensation of 4,050,000 outstanding options amounted to A\$243,512 (US\$183,584).

Accordingly, the loss from operations decreased from A\$1,999,000 for the year ended June 30, 2007 to A\$1,140,000 (US\$1,096,000) for the year ended June 30, 2008.

The net loss amounted to A\$1,145,000 (US\$1,100,000) for the year ended June 30, 2008 compared to a net loss of A\$2,097,000 for the year ending June 30, 2007. The net loss per common equivalent share in 2008 was A\$0.03 (US\$0.03) compared with a net loss with a common equivalent share price of A\$0.06 in the prior year.

#### Liquidity and Capital Resources

For the fiscal year 2008, net cash used in operating activities was A\$344,000 (US\$331,000) primarily consisting of amounts spent on exploration of A\$193,000 (US\$185,000), and administration A\$474,000 (US\$456,000), a decrease prepayments and deposits for the exploration programme of A\$48,000 (US\$46,000) offset by increase in receivables of A\$9,000 (US\$8,000) and accounts payable and accrued expense of A\$378,000 (US\$363,000).

Effective as of June 9, 2006, Golden River Resources, entered into a Subscription Agreement with RAB Special Situations Fund (Master) Limited (“RAB”) pursuant to which the Company issued to RAB in a private placement transaction (the “Private Placement”) for an aggregate purchase price of A\$2,000,000 (US\$1,542,000): (i) 10,000,000 special warrants (the “Special Warrants”), each of which is exercisable at any time to acquire, without additional consideration, one (1) share (the “Special Warrant Shares”) of Common Stock, US\$0.001 par value (“Common Stock”), of the Company, and (ii) warrants (the “Warrants”) for the purchase of 20,000,000 shares of Common Stock, US\$0.001 par value (the “Warrant Shares”), at an exercise price of A\$0.20 (US\$0.1542) to be exercisable until April 30, 2011.

The Company agreed to prepare and file with the Securities and Exchange Commission a registration statement covering the resale of the shares of Common Stock issuable upon exercise of the Special Warrants and the Warrants which registration statement was declared effective on October 17, 2006.

The Company is obligated to keep such registration statement effective until the earlier of (i) the date that all of the Registrable Securities have been sold pursuant to such registration statement, (ii) all Registrable Securities have been otherwise transferred to persons who may trade such shares without restriction under the Securities Act, and the Company has delivered a new certificate or other evidence of ownership for such securities not bearing a restrictive legend, or (iii) all Registrable Securities may be sold at any time, without volume or manner of sale limitations pursuant to Rule 144(k) or any similar provision then in effect under the Securities Act; or (iv) 2 years from the effective date.

As of June 30, 2008 we had short-term obligations of A\$711,000 (US\$684,000) consisting mainly of accounts payable and accrued expenses.

We have A\$8,000 (US\$8,000) in cash at June 30, 2008.

During fiscal 2004 and 2005, we undertook a field exploration program on our Committee Bay and Slave Properties. In relation to the Committee Bay Properties, this was more than the minimum required expenditure and as a result, we do not have a legal obligation to undertake further exploration on those properties during their life. However our properties are prospective for gold and other minerals. We undertook further exploration in August 2006 on the Slave Properties and a summary of the results is set out in Item 1. The cost for the 2007-2008 exploration program was A\$193,000 (US\$186,000) and subject to funding, we may consider a drilling program in early 2009. At this stage, we have not prepared a budget for this drilling program. Our budget for general and administration for fiscal 2009 is A\$0.9 million. We are currently investigating capital raising opportunities which may be in the form of either equity or debt, to provide funding for working capital purposes and future exploration programs. There can be no assurance that such a capital raising will be successful, or that even if an offer of financing is received by the Company, it is on terms acceptable to the Company.

Cautionary “Safe Harbour” Statement under the United States Private Securities Litigation Reform Act of 1995.

Certain information contained in this Form 10-KSB are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (“the Act”), which became law in December 1995. In order to obtain the benefits of the “safe harbor” provisions of the Act for any such forward-looking statements, we wish to caution investors and prospective investors about significant factors which, among others, have in some cases affected our actual results and are in the future likely to affect our actual results and cause them to differ materially from those expressed in any such forward-looking statements. This Form 10-K contains forward-looking statements relating to future financial results. Actual results may differ as a result of factors over which we have no control, including, without limitation, the risks of exploration and development stage projects, political risks of development in foreign countries, risks associated with environmental and other regulatory matters, mining risks and competitors, the volatility of gold and copper prices and movements in foreign exchange rates.

#### Impact of Australian Tax Law

Australian resident corporations are subject to Australian income tax on their non-exempt worldwide assessable income (which includes capital gains), less allowable deductions, at the rate of 30%. Foreign tax credits are allowed where tax has been paid on foreign source income, provided the tax credit does not exceed 30% of the foreign source income.

Under the U.S./Australia tax treaty, a U.S. resident corporation such as us is subject to Australian income tax on net profits attributable to the carrying on of a business in Australia through a “permanent establishment” in Australia. A “permanent establishment” is a fixed place of business through which the business of an enterprise is carried on. The treaty limits the Australian tax on interest and royalties paid by an Australian business to a U.S. resident to 10% of the gross interest or royalty income unless it relates to a permanent establishment. Although we consider that we do not have a permanent establishment in Australia, it may be deemed to have such an establishment due to the location of its administrative offices in Melbourne. In addition we may receive interest or dividends from time to time.

#### Impact of Australian Governmental, Economic, Monetary or Fiscal Policies

Although Australian taxpayers are subject to substantial regulation, we believe that our operations are not materially impacted by such regulations nor is it subject to any broader regulations or governmental policies than most Australian taxpayers.

#### Impact of Recent Accounting Pronouncements

For a discussion of the impact of recent accounting pronouncements on the Company’s financial statements, see Note 3 to the Company’s Consolidated Financial Statements which are attached hereto.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

At June 30, 2008, the Company had no outstanding borrowings under Loan Facilities.

Item 8. Financial Statements

See F Pages

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

There have been no changes in accountants or any disagreements with accountants on any matter of accounting principles or practices or financial statement disclosures during the two years ended June 30, 2008.

Item 9A Controls and Procedures

(a) Evaluation of disclosure controls and procedures.

Our principal executive officer and our principal financial officer evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 as amended) as of the end of the period covered by this report. Based on that evaluation, such principal executive officer and principal financial officer concluded that, the Company's disclosure control and procedures as of the end of the period covered by this report.

(b) Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange act Rules 13a-15(f) under the Securities Exchange Act of 1934, as amended. Under the supervision of management and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation of internal control over financial reporting, our management concluded that our internal control over financial reporting was effective as of June 30, 2008.

This annual report does not include an attestation report of the registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit us to provide only management's report in this annual report.

The current Form 10-K includes an adjustment for accounting for stock based compensation which lead to a restatement of the 2007 reported figures and a catch up relating to the adjustment for previous years as well.

Following discussions with the staff of the Securities and Exchange Commission ("SEC") in connection with the staff's review of the Company's fiscal 2006 and 2007 Form 10-KSB, the Company has agreed that the valuation of 4,650,000 options granted to the Company's officers, directors and consultants in October 2006 should be adjusted. The Company at the time believed the fair value of the shares of common stock was that of a recent private placement transaction, but after the discussions with SEC staff, the Company has agreed to use the market price of the shares of common stock at the time of the issue of the options. The effect of the adjustment is reflected in the restated net loss for the year ended June 30, 2007.

Management has also agreed following discussions with the SEC staff to make an accounting adjustment based on a comment by the SEC in a letter regarding certain stock based compensation expenses based upon an estimate of volatility arising from the 1,400,000 options issued in 2004. This adjustment has been reflected within opening stockholders' equity in the June 30, 2007 consolidated financial statements and had no effect on total stockholders' equity.

The Company reports in its Consolidated Statement of Operations cumulative information since the inception of its exploration activities. The effect of the adjustments is recorded in the cumulative losses. The adjustment had no effect on the Company's cash flow.

In evaluating the controls and procedures, and the circumstance leading to the restatement, management does not believe that this restatement results in a change to their assessment of the effectiveness of their Disclosure Controls and Procedures or Internal Control over Financial Reporting, however management agreed to make the aforementioned accounting adjustment based on a suggestion by the SEC in a comment letter.

(c) Change in Internal Control over Financial Reporting.

No change in our internal control over financial reporting occurred during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect our internal control over financial reporting.

(d) Other.

We believe that a controls system, no matter how well designed and operated, can not provide absolute assurance that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

Item 9B Other Information

None.

## PART III

## Item 10. Directors and Executive Officers and Corporate Governance

The following table sets forth our directors and officers, their ages and all offices and positions with our company. Officers and other employees serve at the will of the Board of Directors.

Name	Age	Position(s) Held
Joseph Gutnick	56	Chairman of the Board, President, Chief Executive Officer and Director
David Tyrwhitt	70	Director
Peter Lee	51	Director, Secretary, Chief Financial Officer and Principal Accounting Officer
Mordechai Gutnick	30	Director

## Joseph Gutnick

Mr Gutnick has been Chairman of the Board, President and Chief Executive Officer since March 1988. He has been a Director of numerous public listed companies in Australia specialising in the mining sector since 1980 and is currently a Director of Quantum Resources Limited and President and CEO of Legend International Holdings Inc, a US corporation listed on the OTC market and President and CEO of Northern Capital Resources Corporation, Yahalom International Resources Corporation and Calvert River Resources, Inc., US corporations. Mr. Gutnick was previously a Director of the World Gold Council. He is a Fellow of the Australasian Institute of Mining & Metallurgy and the Australian Institute of Management and a Member of the Australian Institute of Company Directors.

## David Tyrwhitt

Dr Tyrwhitt was appointed a Director in November 1996. He is a geologist, holding a Bachelor of Science and PhD degrees and has 40 years experience in mineral exploration and management development and operation of gold mines in Australia. Since 1996, Mr. Tyrwhitt has served as a consulting geologist through David S. Tyrwhitt & Associates (June 2002 to present) and Auminex Sdn. Bhd. (1996 to June 2002). Dr Tyrwhitt has been a Director of numerous public listed companies in Australia in the mining industry and is currently a Director of Hawthorn Resources N.L and Quantum Resources Limited listed on the Australian Stock Exchange, Legend International Holdings Inc, a US corporation listed on the OTC market and Northern Capital Resources Corporation.

## Peter Lee

Mr Lee has been Chief Financial Officer and Principal Accounting Officer since August 1989 and was appointed a Director in February 1996. Mr Lee is a Member of the Institute of Chartered Accountants in Australia, a Fellow of Chartered Secretaries Australia Ltd., a Member of the Australian Institute of Company Directors and holds a Bachelor of Business (Accounting) from Royal Melbourne Institute of Technology. He has over 25 years commercial experience and is currently General Manager Corporate and Company Secretary of several listed public companies in Australia and CFO and Secretary of Legend International Holdings Inc, a US corporation listed on the OTC market, Northern Capital Resources Corporation, Yahalom International Resources Corporation and Calvert River Resources, Inc.

#### Mordechai Gutnick

On September 14, 2005, Mr Gutnick was elected a non-executive Director. He is a businessman and long-term investor in the mining industry. From April 2001 to June 2002, Mr. Gutnick served as a project advisor for AXIS, which provides services to the Company; from July 2002 to April 2003, Mr. Gutnick was a private investor; and since May 2003, Mr. Gutnick has served as a non-executive director of Quantum Resources Limited. Mr Gutnick has been appointed to the Audit and Remuneration Committee's, effective September 14, 2005. Mr Mordechai Gutnick is the son of Mr Joseph Gutnick.

All Directors have been appointed for a one-year term which expires in November 2008.

Directors need not be stockholders of the company or residents of the State of Delaware. Directors are elected for an annual term and generally hold office until the next Directors have been duly elected and qualified. Directors may receive compensation for their services as determined by the Board of Directors. A vacancy on the Board may be filled by the remaining Directors even though less than a quorum remains. A Director appointed to fill a vacancy remains a Director until his successor is elected by the Stockholders at the next annual meeting of Shareholder or until a special meeting is called to elect Directors.

#### Board, Audit Committee and Remuneration Committee Meetings

Our Board of Directors consists of four members, of whom two have been, and continue to be, independent under applicable regulations. During fiscal 2008, our Board of Directors met two times. The Board of Directors also uses resolutions in writing to deal with certain matters, and during fiscal 2008, two resolutions in writing were signed by all Directors.

We do not have a nominating committee. Historically our entire Board has selected nominees for election as directors. The Board believes this process has worked well thus far particularly since it has been the Board's practice to require unanimity of Board members with respect to the selection of director nominees. In determining whether to elect a director or to nominate any person for election by our stockholders, the Board assesses the appropriate size of the Board of Directors, consistent with our bylaws, and whether any vacancies on the Board are expected due to retirement or otherwise. If vacancies are anticipated, or otherwise arise, the Board will consider various potential candidates to fill each vacancy. Candidates may come to the attention of the Board through a variety of sources, including from current members of the Board, stockholders, or other persons. The Board of Directors has not yet had the occasion to, but will, consider properly submitted proposed nominations by stockholders who are not directors, officers, or employees of Golden River Resources on the same basis as candidates proposed by any other person.

#### Audit Committee

Dr David Tyrwhitt and Mr. Mordechai Gutnick constitute our Audit Committee. It is the opinion of the Board of Directors that each of them is an independent director as defined in Rule 10A-3 of the Securities Exchange Act of 1934. In addition, the Board believes that Mr Tyrwhitt would meet the director independence requirements of the Nasdaq Stock Market if we were listed on such Market, but that Mr. Mordechai Gutnick would not meet such Nasdaq independence requirements in light of his family relationship with Mr. Joseph Gutnick who is our Chief Executive Officer. Our Audit Committee does not include a "financial expert" as defined in Item 401 (e) of Regulation S-B. The Company only has two independent Directors and neither of these independent Directors has a finance background. The Audit Committee met once during fiscal 2008 and the Chair of the Audit Committee met with the external auditors on three occasions during fiscal 2008 in respect to quarterly reports prior to the reports being filed.

Remuneration Committee

The Board has a Remuneration Committee comprised of two independent directors. During fiscal 2008, the Remuneration Committee did not meet.

Code of Ethics

We have adopted a Code of Conduct and Ethics and it applies to all Directors, Officers and employees. A copy of the Code of Conduct and Ethics is posted on our website at [www.goldenriverresources.com](http://www.goldenriverresources.com) and we will provide a copy to any person without charge. If you require a copy, you can download it from our website or alternatively, contact us by facsimile or email and we will send you a copy.

Stockholder Communications with the Board

Stockholders who wish to communicate with the Board of Directors should send their communications to the Chairman of the Board at the address listed below. The Chairman of the Board is responsible for forwarding communications to the appropriate Board members.

Mr. Joseph Gutnick  
 Golden River Resources Corporation  
 PO Box 6315 St. Kilda Road  
 Central Melbourne, Victoria 8008 Australia

Section 16(a) Beneficial Ownership Reporting Compliance

Pursuant to Section 16(a) of the Securities Exchange Act of 1934, our Directors, executive officers and beneficial owners of more than 10% of the outstanding Common Stock are required to file reports with the Securities and Exchange Commission concerning their ownership of and transactions in our Common Stock and are also required to provide to us copies of such reports. Based solely on such reports and related information furnished to us, we believe that in fiscal 2008 all such filing requirements were complied with in a timely manner by all Directors and executive officers

Item 11. Executive Compensation.

The following table sets forth the annual salary, bonuses and all other compensation awards and pay outs on account of our Chief Executive Officer for services rendered to us during the fiscal years ended June 30, 2008, 2007 and 2006. No other executive officer received more than US\$100,000 per annum during this period.

Summary Compensation Table

Name and Principal Position	Year	Salary	Bonus	Stock Awards	Option Awards	Non-Equity Incentive Plan Compensation	Change in Pension and Nonqualified Deferred Compensation Earnings	All Other Compensation	Total
Joseph	2008		-	-	-	-	-	A\$8,437	

Edgar Filing: GOLDEN RIVER RESOURCES CORP. - Form 10-K

Gutnick, Chairman of the Board, President and CEO (1)(2)(3)(4)	2007	A\$93,748	-	-	A\$226,000	-	-	-	A\$102,185

		A\$114,281							A\$114,281

47

---

1. The amounts listed were paid by us to AXIS, which provides the services of Mr. J I Gutnick and Mr Lee as well as certain other officers and employees to the Company.
2. Excludes options granted to Kerisridge Pty Ltd and Fast Knight Nominees Pty Ltd of which Mr JI Gutnick is a Director and Shareholder (see Item 13 – Certain Relationships and Related Party Transactions)
3. Includes amounts paid by AXIS to an accumulation superannuation plan on behalf of Joseph Gutnick.
4. Includes 1,166,666 options that have vested, 666,667 options that vest on October 19, 2008 and 666,667 options that vest on October 19, 2009.
5. The amounts included in the table for option awards has been calculated in accordance with SFAS 123R.

For additional information about the Service Agreement and the Consulting Agreement see “Item 1 - Business - Employees” and “Item 12 - Certain Relationships and Related Transactions”.

We have a policy that we will not enter into any transaction with an officer, Director or affiliate of the Company or any member of their families unless the transaction is approved by the Audit Committee and the Audit Committee determines that the terms of the transaction are no less favourable to us than the terms available from non-affiliated third parties or are otherwise deemed to be fair to the Company at the time authorised.

#### Outstanding Equity Awards at Fiscal Year-End

Option Awards						Stock Awards			
Name	Number of Securities Underlying Unexercised Options (#) Exercisable	Number of Securities Underlying Unexercised Options (#) Unexercisable	Equity Incentive Plan Awards: Number of Underlying Unexercised Options (#)	Option Exercise Price (\$)	Option Expiration Date	Number of Shares or Units of Stock That Have Not Vested (#)	Market Value of Shares or Units of Stock That Have Not Vested (\$)	Equity Incentive Plan Awards: Number of Unearned Shares, Units or Rights That Have Not Vested (#)	Equity Incentive Plan Awards: Market or Payout Value of Unearned Shares, Units or Rights That Have Not Vested (\$)
Joseph Gutnick, Chairman of the Board, President and CEO	-	-	500,000	US\$1.00	10/15/14	-	-	-	-
	-	-	2,000,000	US\$0.3084	10/19/11	-	-	-	-

#### 2004 Stock Option Plan

The 2004 Plan provides for the granting of options. The maximum number of shares available for awards is 10% of the issued and outstanding shares of common stock on issue at any time (on a fully diluted basis). If an option expires or is cancelled without having been fully exercised or vested, the remaining shares will generally be available for

grants of other awards.

The 2004 Plan is administered by the Remuneration Committee of the Board comprised solely of directors who are not employees or consultants to Golden River Resources or any of its affiliated entities.

Any employee, director, officer, consultant of or to Golden River Resources or an affiliated entity (including a company that becomes an affiliated entity after the adoption of the 2004 Plan) is eligible to participate in the 2004 Plan if the Committee, in its sole discretion, determines that such person has contributed significantly or can be expected to contribute significantly to the success of Golden River Resources or an affiliated entity. During any one year period, no participant is eligible to be granted options to purchase more than 5% shares of our issued and outstanding common stock or if they provide investor relations activities, or are a consultant to the Company, 2% of the issued and outstanding shares of common stock in any 12 month period.

48

---

Options granted under the 2004 Plan are to purchase Golden River Resources common stock. The term of each option will be fixed by the Remuneration Committee, but no option will be exercisable more than 10 years after the date of grant. The option exercise price is fixed by the Remuneration Committee at the time the option is granted. The exercise price must be paid in cash. Options granted to participants vest and have a term of 10 years, unless otherwise decided by the Board of Directors at the time of issue.

No award is transferable, or assignable by the participant except upon his or her death.

The Board may amend the 2004 Plan, except that no amendment may adversely affect the rights of a participant without the participant's consent or be made without stockholder approval if such approval is necessary to qualify for or comply with any applicable law, rule or regulation the Board deems necessary or desirable to qualify for or comply with.

Subject to earlier termination by the Board, the 2004 Plan has an indefinite term except that no ISO may be granted following the tenth anniversary of the date the 2004 Plan is approved by stockholders.

None of the proposed recipients have received any stock options or other equity based forms of compensation from us for at least the last three years.

Other than the issue of these Options, there are no other current plans or arrangements to grant any options under the 2004 Plan.

#### Compensation Pursuant to Plans

The Company does not have any pension or profit sharing plans.

#### Compensation to Directors

Name	Fees Earned or Paid in Cash (US\$)	Stock Awards (\$)	Option Awards (\$)	Non-Equity Incentive Plan Compensation (\$)	Change in Pension Value and Nonqualified Deferred Compensation Earnings	All Other Compensation (\$)	Total (US\$)
David Tyrwhitt	20,960	-	-	-	-	-	20,960
Peter Lee	15,534	-	-	-	-	-	15,534
M o r d e c h a i							
Gutnick	20,960	-	-	-	-	-	20,960

It is our policy to reimburse Directors for reasonable travel and lodging expenses incurred in attending Board of Directors meetings. Commencing January 2005, non-management Directors are paid Directors fees of A\$20,000 per annum, plus statutory superannuation of 9% in accordance with Australian law.

## Securities authorized for issuance under equity compensation plans

The following table sets forth, as of June 30, 2008, information regarding options under our 2004 stock option plan, our only active plan. The 2004 stock option plan has been approved by our stockholders. Outstanding options under this plan that are forfeited or cancelled will be available for future grants. All of the options are for the purchase of our common stock.

Plan Category	Number of securities to be issued upon exercise of outstanding options (a)	Weighted average Exercise price of outstanding options (b)	Number of securities remaining available for future issuances under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders	4,850,000	US\$0.4224	2,821,413(1)
Equity compensation plans not approved by security holders	-	-	-
Total	4,850,000(1)	US\$0.4224	2,821,413(1)

(1)The maximum number of shares available for issuance under the 2004 stock option plan is equal to 10% of the issued and outstanding shares (on a fully diluted basis) of common stock, at any time.

## Principal Officers Contracts

The principal officers do not have any employment contracts.

## Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The following table sets forth certain information regarding the beneficial ownership of our common stock by each person or entity known by us to be the beneficial owner of more than 5% of the outstanding shares of common stock, each of our directors and named executive officers, and all of our directors and executive officers as a group as of June 30, 2008.

Title of Class	Name and Address of Beneficial Owner*	Amount and nature of Beneficial Owner	Percentage of class (1)
Shares of common stock	Joseph and Stera Gutnick	42,533,558 (2)(3)(4)	87.62
		(5)(6)(7)(8)	
		31,670,000 (9)(14)	55.84

Shares of common stock	RAB Special Situations (Master) Fund Limited 1 Adam Street London WC2N 6LE United Kingdom		
Shares of common stock	David Stuart Tyrwhitt	50,000 (2)(3)	**
Shares of common stock	Mordechai Zev Gutnick	500,000 (3)(10)(12)	1.84
Shares of common stock	Peter James Lee	916,668 (2)(3)(11)	3.32
	All officers and Directors as a group	44,000,226 (13)	88.07

Edgar Filing: GOLDEN RIVER RESOURCES CORP. - Form 10-K

- \* Unless otherwise indicated, the address of each person is c/o Golden River Resources Corporation, Level 8, 580 St. Kilda Road, Melbourne, Victoria 3004 Australia
- \*\* less than 1%

Notes:

- (1) Based on 26,711,630 shares outstanding as of June 30, 2008.
- (2) Does not include:
- (i) 1,918 shares of Common Stock beneficially owned by Quantum Resources Limited
- or
- (ii) 229,489 shares of Common Stock beneficially owned by AXIS, of which companies Messrs JI Gutnick, Lee, and Dr. Tyrwhitt are officers and/or Directors, as they disclaim beneficial ownership of those shares.
- (3) Does not include 2,500 shares of Common Stock beneficially owned by us.
- (4) Includes 5,394,590 shares of Common Stock owned by Edensor Nominees Pty Ltd., 1,753,984 shares of Common Stock owned by Kerisridge Pty Ltd., 1,500,000 shares of Common Stock owned by Surfer Holdings Pty Ltd, 30,000,000 shares of Common Stock owned by Fast Knight Nominees Pty Ltd (including 20,000,000 shares issuable upon exercise of warrants at an exercise price of US\$0.1542 per share), 2,000,000 shares of Common Stock owned by Kalycorp Pty Ltd and 26,000 shares of Common Stock owned by Pearlway Investments Proprietary Limited, of which Mr Joseph Gutnick, Stera M. Gutnick and members of their family are officers, Directors and principal stockholders.
- (5) Includes 500,000 shares issuable upon exercise of stock options owned by Mr. Gutnick.
- (6) Joseph Gutnick is the beneficial owner of 25,650 shares of Common Stock that are registered in his own name.
- (7) Joseph Gutnick and Stera Gutnick are husband and wife.
- (8) Includes 666,667 shares issuable upon exercise of stock options and 666,667 that vest on October 19, 2008. Does not include 666,666 that vest on October 19, 2009.
- (9) RAB owns 1,670,000 shares of common stock and warrants exercisable to acquire an additional 30,000,000 shares of common stock, including 10,000,000 shares of common stock issuable upon exercise of Special Warrants, without the payment of any additional consideration and 20,000,000 shares of common stock issuable upon exercise of Warrants with an exercise price of US\$0.1542 per share. Notwithstanding anything contained therein to the contrary, the Special Warrants and Warrants are not exercisable by the holder, in whole or in part, and the Company shall not give effect to any such exercise of the Special Warrants and Warrants, if, after giving effect to such exercise, the holder, together with any affiliate of the holder (including any person or company acting jointly or in concert with the holder) would in the aggregate beneficially own, or exercise control or direction over that number of voting securities of the Company which is 9.99% or greater of the total issued and outstanding voting securities of the Company, immediately after giving effect to such exercise; provided, however, that upon a holder of the Special Warrants or Warrants providing the Company with sixty-one (61) days notice that such holder would like to waive this limitation with regard to any or all shares of common stock issuable upon exercise of the Special Warrants or Warrants, this limitation will be of no force or effect with regard to all or a portion of the Special Warrant or Warrants referenced in the waiver notice.

- (10) Does not include 1,918 shares of Common Stock beneficially owned by Quantum Resources Limited, of which company Mr MZ Gutnick is a Director as he disclaims beneficial ownership of these shares.
- (11) Includes 583,334 shares issuable upon exercise of stock options which are exercisable and 333,334 that vest on October 19, 2008. Does not include 333,333 that vest on October 19, 2009.
- (12) Includes 250,000 shares issuable upon exercise of stock options and 250,000 that vest on October 19, 2008. Does not include 250,000 that vest on October 19, 2009.
- (13) Includes 3,300,001 shares that are issuable upon exercise of stock options, of which 2,050,001 are vested and 1,250,000 that vest on October 19, 2008. Does not include 1,249,999 that vest on October 19, 2009.
- (14) RAB is organized under the laws of the Cayman Islands. Phillip Richards has sole investment and voting control over the securities owned by RAB.

Item 13. Certain Relationships and Related Transactions

We are one of five affiliated companies. Each of the companies have some common Directors, officers and shareholders. In addition, each of the companies owns equity in and is substantially dependent upon AXIS for its senior management and certain mining and exploration staff. The Company owns 9.09% of the outstanding shares of AXIS. A number of arrangements and transactions have been entered into from time to time between such companies. It has been the intention of the affiliated companies and respective Boards of Directors that each of such arrangements or transactions should accommodate the respective interest of the relevant affiliated companies in a manner which is fair to all parties and equitable to the shareholders of each. Currently, there are no material arrangements or planned transactions between the Company and any of the other affiliated companies other than AXIS.

AXIS is paid by each company for the costs incurred by it in carrying out the administration function for each such company. Pursuant to the Service Agreement, AXIS performs such functions as payroll, maintaining employee records required by law and by usual accounting procedures, providing insurance, legal, human resources, company secretarial, land management, certain exploration and mining support, financial, accounting advice and services. AXIS procures items of equipment necessary in the conduct of the business of the Company. AXIS also provides for the Company various services, including but not limited to the making available of office supplies, office facilities and any other services as may be required from time to time by the Company as and when requested by the Company.

We are required to reimburse AXIS for any direct costs incurred by AXIS for the Company. In addition, we are required to pay a proportion of AXIS's overhead cost based on AXIS's management estimate of our utilisation of the facilities and activities of AXIS plus a service fee of not more than 15% of the direct and overhead costs. AXIS has charged the 15% service fee to us during fiscal 2008. Amounts invoiced by AXIS are required to be paid by us. We are also not permitted to obtain from sources other than AXIS, and we are not permitted to perform or provide ourselves, the services contemplated by the Service Agreement, unless we first requests AXIS to provide the service and AXIS fails to provide the service within one month.

The Service Agreement may be terminated by AXIS or ourselves upon 60 days prior notice. If the Service Agreement is terminated by AXIS, we would be required to independently provide, or to seek an alternative source of providing, the services currently provided by AXIS. There can be no assurance that we could independently provide or find a third party to provide these services on a cost-effective basis or that any transition from receiving services under the Service Agreement will not have a material adverse effect on us. Our inability to provide such services or to find a third party to provide such services may have a material adverse effect on our operations.

In accordance with the Service Agreement, AXIS provides the Company with the services of our Chief Executive Officer, Chief Financial Officer and clerical employees, as well as office facilities, equipment, administrative and clerical services. We pay AXIS for the actual costs of such facilities plus a maximum service fee of 15%. The Company paid AXIS A\$193,000 (being A\$52,000 in respect to the current year and A\$141,000 being the amount owing at June 30, 2007) in respect of the Service Agreement for the fiscal year ended June 30, 2008 and A\$612,000 (being A\$591,550 in respect to the 2007 fiscal year and A\$20,450 in respect to the 2006 fiscal year) in respect of the Service Agreement for the fiscal year ended June 30, 2007.

During 2008, AXIS loaned the Company A\$214,000 and A\$53,000 during 2007. At June 30, 2008 and 2007, the Company owed AXIS A\$639,000 and A\$140,585 respectively for services provided in accordance with the Service Agreement. During fiscal 2008 and 2007, AXIS Consultants charged interest of A\$7,000 and A\$3,788 respectively on outstanding balances. AXIS charged interest rates between 9.60% and 10.10% for fiscal 2007 and between 11.10% and 11.75% for fiscal 2008. During fiscal 2007, AXIS paid interest net of tax of A\$5,270. The amount owing to AXIS at June 30, 2008 is included within accounts payable and accrued expenses.

During the 2006 fiscal year, Wilzed Pty Ltd, a company associated with the President of the Company, Joseph Gutnick, has provided loan funds to enable the Company to meet its liabilities. Interests associated with Mr Gutnick hold 87.62% interest in the Company on a fully diluted basis and accordingly Wilzed and the Company may be deemed to be under common control. During the 2005 fiscal year, Wilzed loaned A\$644,633 and charged A\$31,235 in interest. We repaid A\$396. At June 30, 2005, the Company owed Wilzed A\$675,472. Wilzed charged interest during fiscal 2005 at rates between 9.10% and 9.35%. During the 2006 fiscal year, Wilzed loaned A\$1,241,836 and charged A\$83,243 in interest and we repaid A\$550. Wilzed charged interest during fiscal 2006 at the rate of 9.35%. In May 2006, we agreed to issue to Fast Knight Nominees up to 10 million shares of common stock at an issue price of A\$0.20 (US\$0.1542) and 20 million options with an exercise price of A\$0.20 per share with a latest expiry date of April 30, 2011, as repayment of A\$2 million in loans from Wilzed to the Company. Wilzed agreed to accept the shares and options as satisfaction of the loan and instructed us to issue the shares and options to Fast Knight Nominees, a company that is also associated with Mr. Gutnick. The options were valued using the Black Scholes mathematical model by an external valuer at A\$1,883,185 (US\$1,438,000). The issuance of the shares and warrants in satisfaction of the debt was treated as a capital transaction and accordingly had no effect on the Company's net loss.

Mr Joseph Gutnick, the President of the Company, advanced us the initial deposit to open a US Dollar bank account. The amount of A\$1,329 (US\$1,000) was repaid in July 2006.

Kerisridge Pty Ltd, a company associated with our President, Mr J I Gutnick, loaned us A\$2,273,186 in March 2004 for the purpose of repaying our long term debt. On March 31, 2004, Kerisridge agreed to convert all of the debt we owed to it into common stock and warrants in us. We issued 1,753,984 shares of common stock and 1,753,984 warrants exercisable at US\$1.30 and at any time up to March 31, 2006 in full repayment of the amount owing to Kerisridge. Kerisridge did not exercise the warrants prior to the expiry date.

#### Transactions with Management.

We have a policy that we will not enter into any transaction with an Officer, Director or affiliate of us or any member of their families unless the transaction is approved by a majority of our disinterested non-employee Directors and the disinterested majority determines that the terms of the transaction are no less favourable to us than the terms available from non-affiliated third parties or are otherwise deemed to be fair to us at the time authorised.

## Item 14. Principal Accounting Fees and Services

The following table shows the audit fees we were billed by PKF for fiscal 2008 and 2007.

	2008	2007
Audit fees	\$ A51,217	\$ A49,351
Audit related fees*	1,731	15,295
Tax fees	-	-
Total	\$ A52,948	\$ A64,646

\* The audit-related services for 2007 primarily relate to work on the Form SB-2 Registration Statement.

Audit fees were for the audit of our annual financial statements, review of financial statements included in our 10-Q quarterly reports, and services that are normally provided by independent auditors in connection with our other filings with the SEC. This category also includes advice on accounting matters that arose during, or as a result of, the audit or review of our interim financial statements.

As part of its duties, our Audit Committee pre-approves audit and non-audit services performed by our independent auditors in order to assure that the provision of such services does not impair the auditors' independence. Our Audit Committee does not delegate to management its responsibilities to pre-approve services performed by our independent auditors.

PART IV

Item 15. Exhibits, Financial Statement Schedules

(a) Consolidated Financial Statements and Notes thereto.

The Consolidated Financial Statements and Notes thereto listed on the Index at page 43 of this Annual Report on Form 10-K are filed as a part of this Annual Report.

(b) Exhibits

The Exhibits to this Annual Report on Form 10-K are listed in the Exhibit Index at page 43 of this Annual Report.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of  
Golden River Resources Corporation

We have audited the accompanying consolidated balance sheet of Golden River Resources Corporation and Subsidiaries (An Exploration Stage Company) as of June 30, 2008 and 2007, and the related consolidated statements of operations, stockholders' equity (deficit) and cash flows for the years ended June 30, 2008 and 2007 and the cumulative period from July 1, 2002 (inception of exploration activities) through June 30, 2008. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Golden River Resources Corporation and Subsidiaries at June 30, 2008 and 2007, and the results of its operations and its cash flows for the years ended June 30, 2008 and 2007 and the cumulative period from July 1, 2002 (inception of exploration activities) through June 30, 2008 in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 2, the 2007 consolidated financial statements have been restated to reflect certain adjustments resulting from the valuation of the Company's stock option grants.

The accompanying consolidated financial statements have been prepared assuming the Company will continue as a going concern. As described in note 1, at June 30, 2008 the Company had not yet commenced revenue producing operations and had a retained deficit of A\$37,109,000 (US\$35,680,000). These conditions raise substantial doubt about the Company's ability to continue as a going concern. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty. Management's plans in regard to these matters are also discussed in note 1.
