Summary of Consolidated Operations (July 1, 2004 to September 30, 2004)

Regarding sales, during the quarter under review, sales increased 3.3% to 10,010 million yen, compared with 9,691 million yen in the year earlier period.

In the area of Internet provider services the market as a whole increased in size, with the number of broadband users (including ADSL, FTTH(Optical Fiber), and CATV) in Japan at the end of September having passed 17 million. (Data according to the Ministry of Public Management, Home Affairs, Posts and Telecommunications.)

For the SCN Group, in the area of Internet provider services, sales decreased. Although the number of SCN Group broadband subscribers was 90,000 larger than the year earlier period, totaling 580,000, the number of narrowband subscribers decreased.

In the area of Internet-related services, sales increased. This was mainly a result of an increase in viewer fees for CS broadcasting and an increase in sales at subsidiaries. Also, there was an increase in the area of merchandise sales.

Furthermore, the total number of So-net subscribers at the end of the period under review was 2.29 million, roughly flat with the year earlier period.

Regarding operating income, there was an improvement. During the quarter under review, an operating profit of 780 million yen was recorded, compared with an operating loss of 187 million yen in the year earlier period.

The main factor in the improvement was a series of cost reductions. For example, for the item cost of sales, there were cost reductions related to integration of access points, including outsourcing work charge in network operation, for network lines costs, and for leases charge of servers and such. Furthermore, for the item selling, general and administrative expenses, there were reductions in costs for outsourcing work stemming from more efficient use of call centers, and improvements in advertising and marketing expenses as well as other fixed costs. In addition, there were improvements in the profitability of subsidiaries.

Regarding ordinary income, during the quarter under review, ordinary income of

## Edgar Filing: SONY CORP - Form 6-K

720 million yen was recorded, compared with an ordinary loss of 110 million yen in the year earlier period.

Under the item of non-operating income, equity income of 4 million yen was recorded. Under the item of non-operating expenses, there were one-time expenses connected with a public stock offering of a subsidiary, and disposition of fixed assets.

Regarding net income, during the quarter under review, net income of 2,367 million yen was recorded, a significant improvement over a net loss of 155 million yen recorded during the year earlier period.

This was largely the result of the public offering of shares in an SCN Group subsidiary, So-net M3. Inc. Due to this offering, extraordinary gain was recorded, including gains from issuance of subsidiary stock of 1,821 million yen and gains from sale of subsidiary stock of 2,344 million yen. On the other hand, concerning unlisted equity investment, loss on investments in other securities of 878 million yen was recorded as a result of a decline in the fair value of such stock resulting from a worsening of financial conditions of investee companies. Also, an extraordinary loss of 295 million yen was recorded as a result of impairment losses in subsidiaries' fixed assets. As a result of the above, net income before income taxes was 3,604 million yen and taxes including corporate tax totaled 1,226 million yen during the quarter under review.

## Consolidated Results Forecast (revised)

Regarding the forecast of the consolidated results for the fiscal year ending March 31, 2005, the SCN Group has revised towards improved profitability the forecast previously announced on September 8, 2004.

The reasons for the revisions are as follows:

1. Regarding operating income, the main factor is a reduction in fixed costs stemming from both cost reductions, in areas such as network usage related to the integration of access points, outsourcing, and leases, and structural improvements.
2. Regarding ordinary income, the main factor is the above expected improvement in operating income.
3. Regarding net income, in the quarter under review, a loss on revaluation of investments in other securities of 878 million yen and a loss on impairment of long-lived assets, including lease assets at subsidiary, of 295 million yen were recorded. Furthermore, in the third quarter ending December 31, 2004, it is expected that a gain of 533 million yen from the sale of 740 shares in an over-allotment relating to the public offering of So-net M3 Inc. will be recorded. These factors, together with an increase in the tax expenses related to the revision in ordinary income, and the revision in ordinary income itself, are the main reasons for the revision in forecast net income.
