NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1. Principles of Consolidation and Summary of Significant Accounting Policies

Business Description

VeriFone Holdings, Inc. (VeriFone) was incorporated in the state of Delaware on June 13, 2002 in order to acquire VeriFone, Inc. on July 1, 2002. VeriFone, Inc. was incorporated in 1981 and became our principal operating subsidiary on July 1, 2002. Prior to our initial public offering on May 4, 2005, we were majority-owned by GTCR Fund VII, L.P., an equity fund managed by GTCR Golder Rauner, LLC (GTCR), a private equity firm. We design, market, and service electronic payment solutions that enable secure electronic payments among consumers, merchants, and financial institutions.

We acquired Lipman Electronic Engineering Ltd (Lipman) on November 1, 2006. Prior to that acquisition, Lipman was a provider of electronic payment systems headquartered in Israel that developed, manufactured and marketed a variety of handheld, wireless and landline point-of-sale (POS) terminals, electronic cash registers, retail ATM units, PIN pads and smart card readers, as well as integrated PIN and smart card solutions.

Principles of Consolidation

The accompanying condensed consolidated financial statements include the accounts of VeriFone and our wholly owned and majority-owned subsidiaries. Amounts pertaining to the noncontrolling ownership interests held by third parties in the operating results and financial position of our majority-owned subsidiaries are reported as noncontrolling interests. All significant intercompany accounts and transactions have been eliminated.

Unaudited Interim Financial Statements

The accompanying condensed consolidated financial statements as of January 31, 2010 and for the three months ended January 31, 2010 and 2009 are unaudited. These unaudited condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and the rules and regulations of the Securities and Exchange Commission (SEC), applicable to quarterly reports on Form 10-Q and, therefore, do not include all information and notes normally provided in audited financial statements prepared under GAAP. In our opinion, the unaudited condensed consolidated financial statements have been prepared on the same basis as the annual consolidated financial statements and include all adjustments of a normal and recurring nature necessary for the fair presentation of our financial position as of January 31, 2010, our results of operations for the three months ended January 31, 2010 and 2009 and cash flows for the three months ended January 31, 2010 and 2009. The Condensed Consolidated Balance Sheets as of October 31, 2009 has been derived from audited consolidated financial statements. These unaudited interim condensed consolidated financial statements should be read in conjunction with the Consolidated Financial Statements and Notes thereto included in our Annual Report on Form 10-K for the fiscal year ended October 31, 2009 filed with the SEC. The results of operations for the three months ended January 31, 2010 are not necessarily indicative of the results to be expected for the entire fiscal year.

Use of Estimates

The preparation of the condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of

Table of Contents

revenues and expenses during the reporting period. We base our estimates on historical experience and various other assumptions that we believe to be reasonable under the circumstances. Actual results could differ from those estimates, and such differences may be material to the condensed consolidated financial statements.

Summary of Significant Accounting Policies

Other than the following recently adopted accounting standards, there have been no other changes to our significant accounting policies during the three months ended January 31, 2010 as compared to the significant accounting policies described in our audited consolidated financial statements included in our Annual Report on Form 10-K for the fiscal year ended October 31, 2009.

Effective November 1, 2009, we adopted ASC 805 (formerly SFAS No. 141(R), *Business Combinations*). ASC 805 generally requires an entity to recognize the assets acquired, liabilities assumed, contingencies, and contingent consideration at their fair value on the acquisition date. It further requires that acquisition-related costs are recognized separately from the acquisition and expensed as incurred, restructuring costs generally are expensed in periods subsequent to the acquisition date, and changes in accounting for deferred tax asset valuation allowances and acquired income tax uncertainties after the measurement period impact income tax expense. In addition, acquired in-process research and development is capitalized as an intangible asset and amortized over its estimated useful life. ASC 805 is applicable to business combinations on a prospective basis beginning in the first quarter of 2010. We applied ASC 805 to account for our acquisition of Clear Channel Taxi Media LLC (CCTM) in December 2009.

Effective November 1, 2009, we adopted ASC 810 (formerly SFAS No. 160 *Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51*). This accounting standard changes the accounting and reporting for minority interests, which will be re-characterized as noncontrolling interests and classified as a component of equity. In conjunction with ASC 805, this standard significantly changes the accounting for partial and/or step acquisitions. In accordance with the adoption of this accounting standard, we reclassified for all periods presented the noncontrolling interests, formerly called minority interest, to a component of equity in the Condensed Consolidated Balance Sheets. The noncontrolling interests included in our net income (loss) were not significant to our consolidated results for the periods presented and therefore have been included as a component of other income (expense), net in our Condensed Consolidated Statements of Operations. ASC 810 applies prospectively, except for presentation and disclosure requirements, which are applied retroactively.

In May 2008, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP) APB 14-1, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)* (ASC 470-20), which requires the issuer of a convertible debt instrument with cash settlement features to account separately for the liability and equity components of the instrument. The debt is recognized at the present value of its cash flows discounted using an entity-specific nonconvertible debt borrowing rate at the time of issuance. The equity component is recognized as the difference between the proceeds from the issuance of the note and the fair value of the liability. In the first quarter of 2010, we adopted this accounting standard and modified our accounting for our 1.375% Senior Convertible Notes (the Notes). To retroactively apply this standard, the proceeds from the issuance of the Notes were allocated between a liability (issued at a discount) and equity in a manner that reflects interest expense at the market interest rate for similar nonconvertible debt as of the original issuance date. The debt discount is being accreted from issuance through June 2012, the period the Notes are expected to be outstanding, and is recorded as additional non-cash interest expense. The equity component is included in the paid-in capital portion of stockholders' equity on our Condensed Consolidated Balance Sheets. The initial value of the equity component, which reflects the equity conversion feature of the Notes, is equal to the initial debt discount. See Note 4. *Accounting changes - Convertible Debt Instruments* for additional information on the adoption of ASC 470-20.

Table of Contents

In February 2008, the FASB issued FSP FAS 157-2, *Effective Date of FASB Statement No. 157* (or ASC 820-10), which delayed the effective date of SFAS No. 157, *Fair Value Measurements* (ASC 820) for all non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually), until the beginning of the first quarter of 2010. We adopted ASC 820-10 for non-financial assets and non-financial liabilities that are not measured and recorded at fair value on a recurring basis in the first quarter of fiscal year 2010. The adoption of this accounting standard did not have a significant impact on our condensed consolidated financial statements.

Concentrations of Credit Risk

At January 31, 2010 one customer accounted for 10.2% of our net accounts receivable. At October 31, 2009, no customer accounted for more than 10% of our accounts receivable. For the three months ended January 31, 2010, no customer accounted for more than 10% of our total net revenues. For the three months ended January 31, 2009, one customer accounted for 10.0% of our net revenues.

Reclassifications

Certain amounts reported in previous periods have been reclassified to conform to the current period presentation. The reclassifications did not affect previously reported revenues, total operating expense, operating income, net income, or total equity.

Recent Accounting Pronouncements

There have been no significant changes in accounting pronouncements as compared to the recent accounting pronouncements described in our audited consolidated financial statements included in our Annual Report on Form 10-K for the fiscal year ended October 31, 2009.

Note 2. Goodwill and Purchased Intangible Assets

Goodwill

Activity related to goodwill consisted of the following (in thousands):

	Three Months Ended January 31, 2010	Year Ended October 31, 2009
Balance at beginning of period	\$ 150,845	\$ 321,903
Additions related to acquisition	6,790	
Resolution of tax contingencies and adjustments to tax reserves and valuation allowance established in purchase accounting and tax benefits for exercise of vested stock options assumed		(5,366)
Goodwill impairment		(175,512)
Currency translation adjustments	(3,375)	9,820
Balance at end of period	\$ 154,260	\$ 150,845

Our review for potential indicators of impairment performed in the first quarter of fiscal year 2010 did not result in any impairment of goodwill in the three months ended January 31, 2010. As a result of the December 1, 2008 goodwill impairment test, we concluded that the carrying amount of our North America and Asia reporting units exceeded their implied fair values and recorded an estimated impairment charge of \$178.3 million in the Corporate segment during the first quarter of fiscal year 2009 for these reporting units. We finalized the goodwill evaluation process and recorded a \$2.7 million reduction to the estimated impairment charge during the second quarter of fiscal year 2009. The final impairment charge for the North America and Asia reporting units was \$175.5 million for the fiscal year ended October 31, 2009.

Table of Contents

Purchased Intangible Assets

Purchased intangible assets subject to amortization consisted of the following (in thousands):

	January 31, 2010			October 31, 2009		
	Gross		Net	Gross		Net
	Carrying Amount	Accumulated Amortization	Carrying Amount	Carrying Amount	Accumulated Amortization	Carrying Amount
Developed and core technology	\$ 115,827	\$ (90,314)	\$ 25,513	\$ 159,903	\$ (130,736)	\$ 29,167

Total other current liabilities	\$ 96,692	\$ 64,478

Table of Contents**4. Accounting Changes Convertible Debt Instruments**

In the first quarter of 2010, we adopted ASC 470-20 (formerly APB 14-1, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)*), and modified our accounting for the 1.375% Senior Convertible Notes. To retroactively apply this accounting standard, the principal amount of our 1.375% Senior Convertible Notes was allocated between a liability (issued at a discount) and equity in a manner that reflects interest expense at the market interest rate for similar nonconvertible debt as of the original issuance date of the Notes. The debt discount is accreted from issuance through June 2012, the period during which the Notes are expected to be outstanding, and recorded as additional non-cash interest expense. The equity component is included in the paid-in capital portion of stockholders' equity on our Condensed Consolidated Balance Sheets. The initial value of the equity component, which reflects the equity conversion feature of the Notes, is equal to the initial debt discount.

As a result of the adoption of ASC 470-20, we allocated \$236.0 million to the liability component and \$80.2 million to the equity component as of the date of issuance. The amount allocated to the liability component was recognized at the present value of its cash flows using a discount rate of 7.6%, our approximate borrowing rate at the date of the issuance for a similar debt instrument without the conversion feature. There has not been any change to the effective interest rate of 7.6% since the date of issuance.

In April 2009, we repurchased and extinguished \$33.5 million principal amount of our outstanding Notes for \$19.8 million, excluding accrued interest paid. We realized a \$13.1 million gain under accounting guidance prevailing at that time, net of a \$0.6 million write-off of related deferred debt issuance costs. In accordance with the provisions of ASC 470-20, we recorded a revised gain of approximately \$7.5 million.

The effect of retroactive application of ASC 470-20 on accumulated deficit as of October 31, 2009 was an increase of \$8.3 million. In the first quarter of 2010, the effect of applying the provisions of ASC 470-20 was an increase in non-cash interest expense of approximately \$3.6 million, which represents accretion of the unamortized debt discount associated with the Notes.

The following tables represent other information related to the Notes in accordance with the disclosure requirements of ASC 470-20. Information related to equity and debt components is as follows (in thousands):

	January 31, 2010	October 31, 2009
Carrying amount of the equity component	\$ 48,054	\$ 48,427
Principal amount of the Notes	\$ 277,250	\$ 282,750
Unamortized discount (1)	(36,669)	(41,000)
Net carrying amount	\$ 240,581	\$ 241,750

(1) As of January 31, 2010, the remaining period over which the unamortized discount will be amortized is 29 months. A summary of interest expense of the Notes for the three months ended January 31, 2010 and 2009 is as follows (in thousands):

	Three Months Ended January 31, 2010	2009
Interest expense related to contractual interest coupon	\$ 965	\$ 1,087
Interest expense related to amortization of discount	3,571	3,740
Total interest cost recognized	\$ 4,536	\$ 4,827

Table of Contents

The following tables show the financial statement line items affected by the retroactive application of ASC 470-20 for the periods indicated (in thousands, except per share data):

	Years Ended October 31,					
	2009				2008

Total	466,413	468,864
Less current portion	(5,699)	(5,699)
Long-term portion	\$ 460,714	\$ 463,165

- (1) Amounts as of October 31, 2009 have been adjusted to reflect the retroactive application of ASC 470-20. See Note 4. *Accounting Changes-Convertible Debt Instruments*.

Secured Credit Facility

On October 31, 2006, our principal subsidiary, VeriFone Inc., entered into a credit agreement (the "Credit Facility") consisting of a Term B Loan facility of \$500.0 million and a revolving loan permitting borrowings of up to \$40.0 million. The proceeds from the Term B loan were used to repay all outstanding amounts relating to a previous credit facility, pay certain transaction costs, and partially fund the cash consideration in connection with the acquisition of Lipman on November 1, 2006. Through October 31, 2009, we repaid an aggregate of \$273.7 million, and we repaid an additional \$1.3 million during the first quarter of fiscal year 2010. The outstanding balance at January 31, 2010 was \$225.0 million. There was no outstanding balance on the revolving loan at January 31, 2010. The Credit Facility is guaranteed by us and certain of our subsidiaries and is secured by collateral including substantially all of our assets and stock of our subsidiaries.

Lehman Commercial Paper, Inc. ("Lehman CP"), a lender in the revolving loan, declared bankruptcy in October 2008. Under the terms of the Credit Facility, we declared Lehman CP a defaulting lender and removed Lehman CP as a lender in the revolving loan. Therefore, as of January 31, 2010 and October 31, 2009, \$25.0 million was available to us under the revolving loan. We do not expect to replace Lehman CP as a lender under the revolving loan.

We pay a commitment fee on the unused portion of the revolving loan credit facility at a rate that varies depending upon our consolidated total leverage ratio. We were paying a commitment fee at a rate of 0.425% per annum as of January 31, 2010 and October 31, 2009.

The maturity dates on the components of the Credit Facility are October 31, 2012 for the revolving loan and October 31, 2013 for the Term B Loan. Principal payments on the Term B Loan are due in equal quarterly installments aggregating \$5.0 million per year over the seven-year term on the last business day of each calendar quarter with the balance due on maturity.

Table of Contents

At our option, the Term B loan and the revolving loan can bear interest as Base Rate or Eurodollar Rate loans. Base Rate loans bear interest at a per annum rate equal to a margin over the greater of the Federal Funds rate plus 0.50% or the JP Morgan prime rate. For the Base Rate Term B loan, the margin was 1.75% as of January 31, 2010 and October 31, 2009. For the Base Rate revolving loan, the margin varies depending upon our consolidated leverage ratio and was 1.00% as of January 31, 2010 and October 31, 2009.

At our option, Eurodollar Rate loans bear interest at a margin over the one-, two-, three- or six-month LIBOR rate. The margin for the Eurodollar Rate Term B loan was 2.75% as of January 31, 2010 and October 31, 2009. The margin for the Eurodollar Rate revolving loan varies depending upon our consolidated leverage ratio and was 2.00% as of January 31, 2010 and October 31, 2009.

As of January 31, 2010, the Term B loan bore interest at 2.75% over the one-month LIBOR rate of 0.24% for a total of 2.99%. As of October 31, 2009, the Term B loan bore interest at 2.75% over the one-month LIBOR rate of 0.25% for a total of 3.00%. As of January 31, 2010 and October 31, 2009, the outstanding balance on the Term B loan was \$225.0 million and \$226.3 million, respectively.

As of January 31, 2010, the revolving loan credit facility bore interest at 2.00% over the one-month LIBOR rate of 0.24% for a total of 2.24%. As of October 31, 2009, the revolving loan credit facility bore interest at 2.00% over the one-month LIBOR rate of 0.25% for a total of 2.25%. As of January 31, 2010 and October 31, 2009, no amounts were outstanding under the revolving loan.

The terms of the Credit Facility require us to comply with financial covenants, including maintaining leverage and fixed charge coverage ratios at the end of each fiscal quarter. As of January 31, 2010, we were required to maintain a total leverage ratio of not greater than 3.5 to 1.0 and a fixed charge coverage ratio of at least 2.0 to 1.0. Total leverage ratio is equal to total debt less cash as of the end of a reporting fiscal quarter divided by consolidated EBITDA, as adjusted, for the most recent four consecutive fiscal quarters. Fixed charge coverage ratio is, all for the most recent four consecutive fiscal quarters, the ratio of (a) consolidated EBITDA, as adjusted, less capital expenditures, as adjusted, and cash tax payments, over (b) the sum of cash interest expense and scheduled debt payments. Some of the financial covenants become more restrictive over the term of the Credit Facility. Noncompliance with any of the financial covenants without cure or waiver would constitute an event of default under the Credit Facility. An event of default resulting from a breach of a financial covenant may result, at the option of lenders holding a majority of the loans, in an acceleration of repayment of the principal and interest outstanding and a termination of the loan. The Credit Facility also contains non-financial covenants that restrict some of our activities, including our ability to dispose of assets, incur additional debt, pay dividends, create liens, make investments, make capital expenditures, and engage in specified transactions with affiliates. The terms of the Credit Facility permit us to prepay all or any portion of the principal at any time and require prepayments of principal upon the occurrence and with the net proceeds of certain events including among others, the receipt of proceeds from the sale of assets and the receipt of proceeds of certain debt issues. We may also be required to prepay principal with a portion of the excess cash flow as defined, that we earn in a particular year if our leverage ratio exceeds a certain level set out in our Credit Facility. The Credit Facility also contains customary events of default, including defaults based on events of bankruptcy and insolvency; nonpayment of principal, interest, or fees when due, subject to specified grace periods; breach of specified covenants; change in control; and material inaccuracy of representations and warranties. We were in compliance with our financial and non-financial covenants as of January 31, 2010 and October 31, 2009.

1.375% Senior Convertible Notes

On June 22, 2007, we issued and sold \$316.2 million aggregate principal amount of our 1.375% Senior Convertible Notes due in June 2012 (the Notes). The net proceeds from the offering, after deducting transaction costs, were approximately \$307.9 million. We incurred approximately \$8.3 million of issuance costs. The transaction costs, consisting of the underwriting discounts and offering expenses, were primarily recorded in debt issuance costs, net and are being amortized to interest expense using the effective interest method over five

Table of Contents

years. We pay 1.375% interest per annum on the principal amount of the Notes, payable semi-annually in arrears in cash on June 15 and December 15 of each year, subject to increase in certain circumstances as described below.

As discussed in Note 4 *Accounting Changes-Convertible Debt Instrument*, we separately account for the liability and equity components of the Notes.

In April 2009, we repurchased and extinguished \$33.5 million par value of our outstanding Notes for \$19.8 million, excluding accrued interest paid. In December 2009, we repurchased and extinguished \$5.5 million par value of our outstanding Notes for \$4.8 million, excluding accrued interest. We recorded a \$0.1 million gain in accordance with ASC470-20. As of January 31, 2010, the remaining par value of the Notes was \$277.2 million.

The Notes were issued under an Indenture between VeriFone and U.S. Bank National Association, as trustee. Each \$1,000 of principal of the Notes are initially convertible into 22.719 shares of our common stock, which is equivalent to a conversion price of approximately \$44.02 per share, subject to adjustment upon the occurrence of specified events. Holders of the Notes may convert their Notes prior to maturity during specified periods as follows: (1) on any date during any fiscal quarter beginning after October 31, 2007 (and only during such fiscal quarter) if the closing sale price of our common stock was more than 130% of the then current conversion price for at least 20 trading days in the period of the 30 consecutive trading days ending on the last trading day of the previous fiscal quarter; (2) at any time on or after March 15, 2012; (3) if we distribute, to all holders of our common stock, rights or warrants (other than pursuant to a rights plan) entitling them to purchase, for a period of 45 calendar days or less, shares of our common stock at a price less than the average closing sale price for the ten trading days preceding the declaration date for such distribution; (4) if we distribute, to all holders of our common stock, cash or other assets, debt securities, or rights to purchase our securities (other than pursuant to a rights plan), which distribution has a per share value exceeding 10% of the closing sale price of our common stock on the trading day preceding the declaration date for such distribution; (5) during a specified period if certain types of fundamental changes occur; or (6) during the five business-day period following any five consecutive trading-day period in which the trading price for the Notes was less than 98% of the average of the closing sale price of our common stock for each day during such five trading-day period multiplied by the then current conversion rate. Upon conversion, we would pay the holder the cash value of the applicable number of shares of our common stock, up to the principal amount of the note. Amounts in excess of the principal amount, if any, will be paid in stock.

As of January 31, 2010, none of the conditions allowing holders of the Notes to convert had been met. If a fundamental change, as defined in the Indenture, occurs prior to the maturity date, holders of the Notes may require us to repurchase all or a portion of their Notes for cash at a repurchase price equal to 100% of the principal amount of the Notes to be repurchased, plus any accrued and unpaid interest (including additional interest, if any) up to, but excluding, the repurchase date.

The Notes are senior unsecured obligations and rank equal in right of payment with all of our existing and future senior unsecured indebtedness. The Notes are effectively subordinated to any secured indebtedness to the extent of the value of the related collateral and structurally subordinated to indebtedness and other liabilities of our subsidiaries including any secured indebtedness of such subsidiaries.

In connection with the offering of the Notes, we entered into note hedge transactions with affiliates of the initial purchasers (the counterparties), consisting of Lehman Brothers OTC Derivatives (Lehman Derivatives) and JPMorgan Chase Bank, National Association, London Branch, whereby we have the option to purchase up to 7.2 million shares of our common stock at a price of approximately \$44.02 per share. The note hedge transactions expire the earlier of the last day on which any Notes remain outstanding and June 14, 2012. The cost of the note hedge transactions was approximately \$80.2 million. The note hedge transactions are intended to mitigate the potential dilution upon conversion of the Notes in the event that the volume weighted average price of our common stock on each trading day of the relevant conversion period or other relevant

Table of Contents

valuation period is greater than the applicable strike price of the convertible note hedge transactions, which initially corresponds to the conversion price of the Notes and is subject, with certain exceptions, to the adjustments applicable to the conversion price of the Notes. The note hedge transaction with Lehman Derivatives, which benefited from a guarantee by Lehman Brothers, covers 50% of the shares of our common stock potentially issuable upon conversion of the Notes. The filing by Lehman Brothers of a voluntary Chapter 11 bankruptcy petition in September 2008 constituted an event of default under the note hedge transaction with Lehman Derivatives, giving us the immediate right to terminate the transaction and entitling us to claim reimbursement for the loss incurred in terminating and closing out the transaction. On September 21, 2008, we delivered a notice of termination to Lehman Derivatives and claimed reimbursement for the loss incurred in termination and close-out of the transaction. To date we have not recovered any amounts claimed from Lehman Derivatives.

In addition, we sold warrants to the counterparties whereby they have the option to purchase up to approximately 7.2 million shares of VeriFone common stock at a price of \$62.356 per share. We received approximately \$31.2 million in cash proceeds from the sale of these warrants. The warrants expire progressively from December 19, 2013 to February 3, 2014.

The cost incurred in connection with the note hedge transactions, net of the related tax benefit and the proceeds from the sale of the warrants, is included as a net reduction in additional paid-in capital in the accompanying Condensed Consolidated Balance Sheets as of January 31, 2010 and October 31, 2009, in accordance with the guidance in ASC 815-40 *Derivatives and Hedging-Contracts in Entity's Own Equity*.

Note 6. Fair Value Measurements

ASC 820 *Fair Value Measurement and Disclosures* defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining fair value, we consider the principal or most advantageous market in which we would transact, and we consider assumptions that market participants would use when pricing the asset or liability, such as inherent risk, transfer restrictions, and risk of non-performance.

Our financial assets and liabilities are measured and recorded at fair value on a recurring basis, except for our long-term debt. Our non-financial assets, such as goodwill, purchased intangible assets, and property, plant and equipment are measured at fair value when there is an indicator of impairment and recorded at fair value only when an impairment charge is recognized.

A three-tier fair value hierarchy is established as a basis for considering such assumptions and for inputs used in the valuation methodologies in measuring fair value:

Level 1 Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 Include other inputs that are directly or indirectly observable in the marketplace.

Level 3 Unobservable inputs which are supported by little or no market activity.

The fair value hierarchy also requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. In accordance with ASC 820, we measure our cash equivalents, Israeli severance funds and foreign exchange forward contracts at fair value. The money market funds are classified as Level 1 because the funds are valued using quoted market prices. Israeli severance funds and foreign exchange forward contracts are classified as Level 2 because they are valued using quoted prices and other observable data of similar instruments in active markets.

Table of Contents

The following table presents our assets and liabilities that were measured at fair value on a recurring basis as of January 31, 2010 and October 31, 2009, classified by the level within the fair value hierarchy (in thousands):

	January 31, 2010		October 31, 2009	
	Level 1	Level 2	Level 1	Level 2
Assets				
Money market funds	\$ 123,383	\$	\$ 123,348	\$
Israeli severance funds		2,227		2,420
Foreign exchange forward contracts		29		189
Total assets at fair value	\$ 123,383	\$ 2,256	\$ 123,348	\$ 2,609
Liabilities				
Foreign exchange forward contracts	\$	\$ 48	\$	\$ 16
Total liabilities at fair value	\$	\$ 48	\$	\$ 16

Fair Value of Other Financial Instruments

Financial instruments consist principally of cash and cash equivalents, accounts receivable, accounts payable, long-term debt, foreign exchange forward contracts and severance funds. The estimated fair value of cash, accounts receivable, and accounts payable approximates their carrying value. Cash equivalents, foreign exchange forward contracts, and Israeli severance funds are recorded at fair value based on quoted market prices and other observable date of similar instrument in active markets. The estimated fair value of long-term debt related to the Term B loan approximates the carrying value since the rate of interest on the long-term debt adjusts to market rates on a periodic basis. The fair value of the 1.375% Senior Convertible Notes as of January 31, 2010 was \$248.8 million based on the closing trading price on January 29, 2010.

Note 7. Derivative Financial Instruments

We have used and from time to time in the future may use foreign currency derivatives such as forward contracts and options as hedges against anticipated sales or purchases denominated in foreign currencies. We enter into these contracts to protect us against the risk that the eventual net cash flows will be adversely affected by changes in foreign exchange rates. We do not use derivative financial instruments for speculative or trading purposes, nor do we hold or issue leveraged derivative financial instruments.

Foreign exchange forward contracts, both designated and not designated as hedging instruments pursuant to ASC 815 *Derivatives and Hedging*, are recognized either as assets or liabilities on the balance sheet at fair value at the end of each reporting period.

Cash Flow Hedges

For derivative instruments that are designated and qualify as a cash flow hedge under ASC 815, the effective portion of the gain or loss on the derivative is reported as a component of accumulated other comprehensive income (loss) (AOCI) and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. Gains and losses on the derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in current earnings.

We have no cash flow hedges as of January 31, 2010. No cash flow hedges were discontinued during the three months ended January 31, 2010.

Table of Contents***Derivatives Not Designated as Hedging Instruments***

We primarily utilize foreign exchange forward contracts to offset the risks associated with certain foreign currency balance sheet exposures. Under this program, foreign exchange forward contracts are arranged and maintained so as to yield gains or losses to offset changes in foreign currency denominated assets or liabilities due to movements in foreign exchange rates, thus mitigating the volatility associated with foreign currency transaction gains or losses. Our foreign currency exposures are predominantly intercompany receivables and payables arising from product sales from one VeriFone entity to another. Foreign exchange forward contracts generally settle within 90 days. We do not use these foreign exchange forward contracts for trading purposes.

Gains or losses resulting from changes in the fair value of these foreign exchange forward contracts are recorded as other income (expense), net, in the Condensed Consolidated Statement of Operations.

As of January 31, 2010, the notional amounts of the forward contracts we held to purchase and sell U.S. Dollars in exchange for other major international currencies were \$55.7 million and \$6.5 million, respectively. As of October 31, 2009, the notional amounts of the forward contracts we held to purchase and sell U.S. Dollars in exchange for other major international currencies were \$50.9 million and \$13.9 million, respectively.

The following table presents the fair value of our outstanding derivative instruments as of January 31, 2010 and October 31, 2009 (in thousands):

	<u>Balance Sheet Location</u>	Fair Value of Financial Instruments	
		January 31, 2010	October 31, 2009

Accumulated other comprehensive loss	\$ (8,426)	\$ (6,037)

Note 9. Income Taxes

We recorded an income tax provision of \$19 thousand for the three months ended January 31, 2010 compared to an income tax benefit of \$4.4 million for the three months ended January 31, 2009. The effective tax rate for the three months ended January 31, 2010 is lower than the U.S. statutory tax rate due to earnings in countries where we are taxed at lower rates compared to the U.S. federal and state statutory rates, utilization of previously unbenefitted US tax attributes and reversal of uncertain tax position liabilities as statutes of limitations expired. The income tax benefit for the three months ended January 31, 2009 is primarily related to discrete items, including a decrease in deferred tax liability due to goodwill impairment for GAAP purposes, offset by unfavorable tax provision impacts from an increase in the U.S. valuation allowance, and interest accruals associated with uncertain tax positions as well as benefit from additional interest expense with the adoption of the new accounting guidance relating to ASC 470-20.

As of January 31, 2010, we remain in a net deferred tax liability position. The realization of our deferred tax assets depends primarily on our ability to generate sufficient U.S. and foreign taxable income in future periods. We have determined that it is not more likely than not the deferred tax assets in the U.S. and certain foreign jurisdictions will be realized. Therefore we continue to record a full valuation allowance against these assets as of January 31, 2010. The amount of deferred tax assets considered realizable may increase or decrease in subsequent quarters as we reevaluate the underlying basis for our estimates of future domestic and certain foreign taxable income.

We are currently under audit by the Internal Revenue Service (IRS) for our fiscal years 2003 to 2004. Although we believe we have correctly provided income taxes for the years subject to audit, the IRS may adopt different interpretations. We have not yet received any final determinations with respect to this audit although certain adjustments have been agreed with the IRS, none of which have a material impact to the current period income tax provision. Some of our subsidiaries are also under audit by the Israeli tax authorities for calendar years 2004 to 2006 and the Mexican and Philippine governments. With few exceptions, we are no longer subject to tax examination outside of the U.S. for periods prior to 2000.

We have recorded our uncertain tax position liability as a long-term liability as we do not expect significant payments to occur over the next 12 months. Our existing tax positions will continue to generate an increase in liabilities for uncertain tax benefits. We will continue to recognize interest and penalties related to income tax matters in income tax expense. The amount of unrecognized tax benefits could be reduced upon closure of tax examinations or if the statute of limitations on certain tax filings expires without assessment from the tax authorities. We believe that it is reasonably possible that there could be a reduction in unrecognized tax benefits due to statute of limitation expirations in multiple tax jurisdictions during the next 12 months of zero to \$4.3 million. Interest and penalties accrued on these uncertain tax positions will also be released upon the expiration of statutes of limitations.

Note 10. Stockholders' Equity

We grant stock options and restricted stock units (RSUs) pursuant to stockholder approved stock option plans. We maintain certain equity incentive plans, as described in detail in Note 9. *Stockholders' Equity of Notes*

Table of Contents

to Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended October 31, 2009. All stock options and RSUs granted during the three months ended January 31, 2010 were granted under the 2006 Equity Incentive Plan as amended.

Valuation Assumptions

We estimate the grant-date fair value of stock options using a Black-Scholes valuation model, consistent with the provisions of ASC 718 *Compensation-Stock Compensation*, using the weighted-average assumptions noted in the following table:

	Three Months Ended January 31,	
	2010	2009
Expected term of the options (in years)	4.0	4.0
Risk-free interest rate	2.2%	2.2%
Expected stock price volatility	70.4%	59.4%
Expected dividend rate	0.0%	0.0%

Stock-based Compensation

The following table presents the stock-based compensation expense recognized in accordance with ASC 718 during the three months ended January 31, 2010 and 2009 (in thousands):

	Three Months Ended January 31,	
	2010	2009
Cost of net revenues	\$ 394	\$ 504
Research and development	937	1,366
Sales and marketing	1,828	1,859
General and administrative	1,526	4,828
Total stock-based compensation	\$ 4,685	\$ 8,557

In the first quarter of fiscal year 2009, as a result of the cancellation of certain stock option grants voluntarily surrendered by an executive, we expensed in general and administrative expenses all previously unrecognized compensation cost of such stock option grants amounting to \$3.6 million as of the cancellation date.

As of January 31, 2010, total unrecognized compensation expense adjusted for estimated forfeitures related to unvested stock options and RSUs was \$35.4 million and \$10.3 million, respectively, which is expected to be recognized over the remaining weighted-average vesting periods of 3.0 years for stock options and 2.4 years for RSUs.

Table of Contents**Equity Award Activity**

Stock option activity for the three months ended January 31, 2010, was as follows:

	Number of Shares (in thousands)	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in thousands)
Balance at October 31, 2009	12,049	\$ 18.06		
Granted	69	17.19		
Options exchange-granted (1)	1,475	14.29		
Exercised	(329)	8.26		
Options exchange-cancelled (1)	(3,322)	31.96		
Cancelled	(31)	12.65		
Expired	(267)	28.52		
Balance at January 31, 2010	9,644	\$ 12.75	5.6	\$ 66,415
Vested or expected to vest at January 31, 2010	8,718	\$ 12.98	5.5	\$ 59,469
Exercisable at January 31, 2010	2,505	\$ 18.29	4.0	\$ 11,775

(1) Represents options granted and canceled in connection with the Offer to Exchange as described below.

The weighted average fair value of options granted, excluding options exchanged, during the three months ended January 31, 2010 and 2009 was \$9.26 and \$3.09, respectively. The total intrinsic value of options exercised was \$2.7 million and \$12 thousands during the three months ended January 31, 2010 and 2009, respectively.

In November 2009, we completed an offer to exchange certain options to purchase shares of our common stock, par value \$0.01 per share, for a lesser number of replacement options to purchase shares of common stock (the Offer to Exchange). The Offer to Exchange expired on November 6, 2009. Pursuant to the terms and conditions of the Offer to Exchange, we accepted for cancellation eligible options covering 3,322,075 shares of our common stock, representing approximately 74.5% of the total shares of common stock underlying options eligible for exchange. All surrendered options were cancelled as of November 6, 2009. We issued replacement options covering 1,474,970 shares of our common stock in exchange for the eligible options tendered and accepted in the Offer to Exchange. The exercise price of the replacement options is \$14.29, which was the closing price of our common stock on November 6, 2009 as reported by the New York Stock Exchange. The Offer to Exchange was structured as a value-for-value exchange.

The following table summarizes RSU activity for the three months ended January 31, 2010:

	Shares (in thousands)	Aggregate Intrinsic Value (in thousands)
Outstanding at October 31, 2009	47	
Granted	666	
Vested	(21)	

Edgar Filing: VeriFone Holdings, Inc. - Form 10-Q

Outstanding at January 31, 2010	692	\$	12,297
Expected to vest at January 31, 2010	602	\$	10,702

The weighted-average grant date fair value per share of RSUs granted during the three months ended January 31, 2010 and 2009 was \$17.19 and \$5.30, respectively. The total fair value of RSUs that vested in the three months ended January 31, 2010 and 2009 was \$0.3 million and \$50 thousand, respectively.

Table of Contents

Note 11. Net Income (Loss) Per Common Share

Basic net income (loss) per share of common stock is computed by dividing net income (loss) by the weighted average number of shares of common stock outstanding for the period. Diluted net income (loss) per share of common stock is computed using the weighted average number of shares of common stock outstanding plus the effect of common stock equivalents, unless the common stock equivalents are anti-dilutive. The potential dilutive shares of our common stock resulting from the assumed exercise of outstanding stock options and equivalents and the assumed exercise of the warrants relating to the convertible senior notes are determined using the treasury stock method. Under the treasury stock method, an increase in the fair market value of our common stock can result in a greater number of dilutive securities.

The following details the computation of the net income (loss) per common share (in thousands, except per share data):

	Three Months Ended January 31,	
	2010	2009
Basic and diluted net income (loss) per share:		
Numerator:		
Net income (loss).	\$ 10,621	\$ (182,558)
Denominator:		
Weighted average common stock outstanding	84,690	84,487
Weighted average effect of dilutive securities:		
Stock options and RSUs	1,920	
Weighted average shares used in computing diluted per share calculation	86,610	84,487
Net income (loss) per share:		
Basic	\$ 0.13	\$ (2.16)
Diluted	\$ 0.12	\$ (2.16)

For the three months ended January 31, 2010 and 2009, options and RSUs to purchase 3.3 million and 10.9 million shares of common stock, respectively, were excluded from the calculation of weighted average shares for diluted net income (loss) per share as they were anti-dilutive.

The Notes are considered to be Instrument C securities as defined by ASC 815-15-55-18 (formerly EITF No. 90-19, *Convertible Bonds with Issuer Option to Settle for Cash upon Conversion*), therefore, only the conversion spread relating to the Notes is included in our diluted earnings per share calculation, if dilutive. Under such method, the settlement of the conversion spread of the Notes has a dilutive effect when the average share price of our common stock during the period exceeds \$44.02. The average share price of our common stock during the three months ended January 31, 2010 and 2009 did not exceed \$44.02, therefore the effect of the Notes was anti-dilutive for those periods.

Warrants to purchase 7.2 million shares of our common stock were outstanding at January 31, 2010 and October 31, 2009 but were not included in the computation of diluted earnings per share because the warrants' exercise price was greater than the average share price of our common stock during the three months ended January 31, 2010 and 2009; therefore, the effect of the warrants was anti-dilutive for those periods.

Note 12. Commitments and Contingencies

Commitments

We lease certain facilities under non-cancelable operating leases that contain free rent periods and/or rent escalation clauses. Rent expense under these leases has been recorded on a straight-line basis over the lease term.

Table of Contents

We are committed to pay a portion of the related actual operating expenses under certain of these lease agreements. These operating expenses are not included in the table below. The difference between amounts paid and rent expense is recorded as deferred rent and the short-term and long-term portions are included in Other Current Liabilities and Other Long-term Liabilities, respectively, in the Condensed Consolidated Balance Sheets. Additionally, we sublease certain real property to third parties.

In connection with the acquisition of CCTM, we assumed approximately \$52.2 million of non-cancelable operating leases which mainly represent future payments for the rights to place advertising on taxicabs.

Future minimum lease payments and sublease rental income under these leases as of January 31, 2010, were as follows (in thousands):

Fiscal Years Ending October 31:	Minimum Lease Payments	Sublease Rental Income	Net Minimum Lease Payments
2010 (remaining 9 months)	\$ 28,002	\$ (187)	\$ 27,815
2011	31,532	(297)	31,235
2012	14,313	(306)	14,007
2013	5,671	(316)	5,355
2014	3,300	(326)	2,974
Thereafter	3,447	(595)	2,852
Total	\$ 86,265	\$ (2,027)	\$ 84,238

Manufacturing Agreements

We work on a purchase order basis with third-party contract manufacturers with facilities in China, Singapore, Israel and Brazil, and component suppliers located throughout the world to supply a majority of our finished goods inventories, spare parts, and accessories. We provide each supplier with a purchase order to cover the manufacturing requirements, which constitutes a binding commitment by us to purchase materials and finished goods produced by the manufacturer as specified in the purchase order. These purchase orders are generally considered to be non-cancellable and are expected to be paid within one year of the issuance date. As of January 31, 2010, the amount of unfilled purchase orders issued to contract manufacturers and component suppliers totaled approximately \$89.0 million. Of this amount, \$2.9 million has been recorded in Other Current Liabilities in the accompanying Condensed Consolidated Balance Sheets as of January 31, 2010 because these commitments are not expected to have future value to us.

We utilize a limited number of third parties to manufacture our products and rely upon these contract manufacturers to produce and deliver products to our customers on a timely basis and at an acceptable cost. Furthermore, a majority of our manufacturing activities is concentrated in China. As a result, disruptions to the business or operations of the contract manufacturers or to their ability to produce the required products in a timely manner, and particularly disruptions to these manufacturing facilities located in China, could significantly impact our business and operations. In addition, a number of components that are necessary to manufacture and assemble our systems are specifically customized for use in our products and are obtained from sole source suppliers on a purchase order basis. Because of the customized nature of these components and the limited number of available suppliers, it would be difficult and costly to find alternative sources in a timely manner.

Accrued Warranty

We provide reserves for the estimated costs of product warranty obligations based on a number of factors including the size of the installed base of products subject to warranty protection, historical and projected warranty claim rates, historical and projected costs associated with claims, and knowledge of specific product failures that are outside of our typical experience. We assess the adequacy of our recorded warranty liabilities

Table of Contents

and adjust the amounts as necessary based on actual experience and changes in future estimates. As of January 31, 2010 our warranty accrual included product specific warranty accruals of approximately \$5.0 million related to specific issues with our products. The amount accrued represents our best estimate of the costs expected to be incurred based on currently available information. There is a reasonable possibility that we may incur additional warranty expense related to these products in future periods.

Brazilian State Tax Assessments

State Value Added Tax

One of our Brazilian subsidiaries has been notified of a tax assessment regarding Brazilian state value added tax (VAT), for the periods from 2000 to 2002 that relates to products supplied to us by a contract manufacturer. The assessment relates to an asserted deficiency of 4.7 million Brazilian reais (approximately \$2.6 million). The tax assessment was based on a clerical error in which our Brazilian subsidiary omitted the required tax exemption number on our invoices. On August 27, 2003, the tax authorities rendered a first level decision that maintained the tax assessment. We have appealed the first level decision. On March 30, 2009, the proceeding was remitted to the State Court of Appeals. This proceeding is currently pending second administrative level decision. We do not expect that we will ultimately incur a material liability in respect of this assessment and have not recorded a reserve for this assessment, because we believe, based in part on advice of our Brazilian tax counsel, that we are likely to prevail in the proceedings relating to this assessment. In the event we receive an adverse ruling from the administrative body, we will decide whether or not to appeal and would reexamine the determination as to whether an accrual is necessary. It is currently uncertain what impact this state tax examination may have with respect to our use of a corresponding exemption to reduce the Brazilian federal VAT.

Importation of Goods Assessments

Two of our Brazilian subsidiaries that were acquired as a part of the Lipman acquisition have been notified of assessments regarding Brazilian customs penalties that relate to alleged infractions in the importation of goods. The assessments were issued by the Federal Revenue Department in the City of Vitória, the City of São Paulo, and the City of Itajai. The assessments relate to asserted deficiencies initially totaling 26.9 million Brazilian reais (approximately \$14.5 million) excluding interest. The tax authorities allege that the structure used for the importation of goods was simulated with the objective of evading taxes levied on the importation by under-invoicing the imported goods. The tax authorities allege that the simulation was created through a fraudulent interposition of parties, where the real sellers and buyers of the imported goods were hidden.

In the Vitória tax assessment, the fines were reduced from 4.7 million Brazilian reais (approximately \$2.5 million) to 1.5 million Brazilian reais (approximately \$0.8 million) on a first level administrative decision on January 26, 2007. The proceeding has been remitted to the Taxpayers Council to adjudicate the appeal of the first level administrative decision filed by the tax authorities. We also appealed the first level administrative decision on February 26, 2007. In this appeal, we argued that the tax authorities did not have enough evidence to determine that the import transactions were indeed fraudulent and that, even if there were some irregularities in such importations, they could not be deemed to be our responsibility since all the transactions were performed by the third-party importer of the goods. On February 27, 2008, the Taxpayers Council rendered its decision to investigate the first level administrative decision for further analysis of the matter. This proceeding was initially scheduled for judgment before the decision of the Taxpayers Administrative Council of Tax Appeals in 2009, but has been postponed to the next judgment session. In the event we receive an adverse ruling from the Taxpayers Council, we will decide whether or not to appeal to the judicial level. Based on our current understanding of the underlying facts, we believe that it is probable that our Brazilian subsidiary will be required to pay some amount of fines. At January 31, 2010, we have accrued 4.7 million Brazilian reais (approximately \$2.5 million) for this matter, excluding interest, which we believe is the probable payment.

On July 12, 2007, we were notified of a first administrative level decision rendered in the São Paulo tax assessment, which maintained the total fine of 20.2 million Brazilian reais (approximately \$10.9 million)

Table of Contents

imposed. On August 10, 2007, we appealed the first administrative level decision to the Taxpayers Council. A hearing was held on August 12, 2008 before the Taxpayers Council, and on October 14, 2008, the Taxpayers Council granted our appeal and dismissed the São Paulo assessment based upon the assessment being erroneously calculated on the value of the sale of the products in question to end customers in the local market rather than on the declared importation value of such products. We were subsequently notified of the Taxpayers Council's decision and the case was dismissed on May 19, 2009. In August 2009, the Brazilian tax authorities requested additional materials from us. In October 2009, we received a revised assessment in this matter of 1.9 million Brazilian reais (approximately \$1.0 million). In addition, pursuant to a contingency legal representation agreement entered into between one of our Brazilian subsidiaries (prior to the Lipman acquisition) and Brazilian counsel, our Brazilian subsidiary has agreed to pay to Brazilian counsel legal fees in the amount of 5.0 million Brazilian reais (approximately \$2.7 million) for achieving the successful dismissal of the São Paulo tax assessment. We paid approximately 2.0 million Brazilian reais (approximately \$1.1 million) of this legal fee during the fourth quarter of fiscal 2009 and will pay the remainder over the next 12 months. At January 31, 2010, we have reduced the accrual for this matter to 4.6 million Brazilian reais (approximately \$2.5 million), including the remaining Brazilian counsel legal fees.

On May 22, 2008, we were notified of a first administrative level decision rendered in the Itajai assessment, which maintained the total fine of 2.0 million Brazilian reais (approximately \$1.1 million) imposed, excluding interest. On May 27, 2008, we appealed the first level administrative level decision to the Taxpayers Council. Based on our current understanding of the underlying facts, we believe that it is probable that our Brazilian subsidiary will be required to pay some amount of fines. Accordingly, at January 31, 2010, we have accrued 2.0 million Brazilian reais (approximately \$1.1 million) for this matter, excluding interest.

Municipality Tax on Services Assessment

One of the Brazilian subsidiaries that was acquired as part of the Lipman acquisition has been notified of a tax assessment regarding alleged nonpayment of tax on services rendered for the period from September 2004 to December 2004. This assessment was issued by the tax authority for the Municipality of Sao Paulo, and asserts a services tax deficiency totaling 0.7 Brazilian reais (approximately \$0.4 million) excluding interest. The tax authority claims that the Brazilian subsidiary rendered certain services within the municipality of Sao Paulo but simulated that those services were rendered in another city. In January 2010, we presented our administrative defense and the proceeding is currently pending first administrative level decision. At January 31, 2010, we have accrued for this alleged tax deficiency.

Patent Infringement and Commercial Litigation

Heartland Payment Systems, Inc.

On September 6, 2009, we commenced an action in the United States District Court for the Northern District of California against Heartland Payment Systems, Inc. ("Heartland"), a card payment processor, for infringement of U.S. Patent No. 6,853,093 (the "093 Patent") by certain Heartland payment terminals. We are seeking a judgment of infringement, an injunction against further infringement, damages, interest and attorneys' fees. On September 16, 2009, Heartland sued us in the Superior Court of New Jersey, Mercer County, alleging certain unfair business activities. On October 13, 2009, we amended our original complaint to request declaratory judgment that we did not engage in such unfair business activities. On November 6, 2009, we filed a second lawsuit against Heartland in the United States District Court for the Northern District of California, alleging certain false advertising and unfair competition claims. On that same day, Heartland also filed a second lawsuit against us in the United States District Court, District of New Jersey, alleging trademark infringement, false advertising and violation of the Anti-cybersquatting Protection Act, and an emergency application for a temporary restraining order which was subsequently denied by the New Jersey District Court. A preliminary injunction hearing in the matter was held in December 2009 before the New Jersey District Court, which also denied Heartland's request for a preliminary injunction. Heartland is appealing the decision. In February 2010, we filed our answer to the Heartland New Jersey District Court lawsuit and asserted counterclaims that are the

Table of Contents

same claims as we alleged in our two Northern District of California lawsuits, and concurrently dismissed without prejudice those two California lawsuits. Shortly thereafter, Heartland filed a declaratory judgment lawsuit in the United States District Court for the Northern District of California against VeriFone Israel Ltd. seeking a declaration by the court that Heartland does not infringe the 093 Patent. These actions are in the preliminary stages and at this time we are not able to predict the outcome or quantify any potential liability, if any, for these actions. An unfavorable outcome could have a material adverse effect on our business, financial condition, results of operations, and cash flows.

SPA Syspatronic AG v. VeriFone Holdings, Inc., VeriFone, Inc., et al.

On September 18, 2007, SPA Syspatronic AG (SPA) commenced an action in the United States District Court for the Eastern District of Texas, Marshall Division, against us and others, alleging infringement of U.S. Patent No. 5,093,862 purportedly owned by SPA. SPA is seeking a judgment of infringement, an injunction against further infringement, damages, interest and attorneys' fees. We filed an answer and counterclaims on November 8, 2007, and intend to vigorously defend this litigation. On January 28, 2008, we requested that the U.S. Patent and Trademark Office (the PTO) perform a re-examination of the patent. The PTO granted the request on April 4, 2008. We then filed a motion to stay the proceedings with the court and on April 25, 2008, the court agreed to stay the proceedings pending the re-examination. On December 19, 2008, the PTO rejected all claims of the subject patent on the same basis as was identified in our request for re-examination. Upon appeal by SPA, certain claims were permitted to be granted by the PTO but construed in a way that we do not believe any of our products to infringe. The case is now being allowed to continue in district court and we are in the discovery phase. The case is still in the preliminary stages, and it is not possible to quantify the extent of our potential liability, if any, related to this action. An unfavorable outcome could have a material adverse effect on our business, financial condition, results of operations, and cash flows.

Cardsoft, Inc. et al v. VeriFone Holdings, Inc., VeriFone, Inc., et al.

On March 6, 2008, Cardsoft, Inc. and Cardsoft (Assignment for the Benefit of Creditors), LLC (Cardsoft) commenced an action in the United States District Court for the Eastern District of Texas, Marshall Division, against us and others, alleging infringement of U.S. Patents No. 6,934,945 and No. 7,302,683 purportedly owned by Cardsoft. Cardsoft is seeking a judgment of infringement, an injunction against further infringement, damages, interest and attorneys' fees. We intend to vigorously defend this litigation. The case is still in the preliminary stages, and it is not possible to quantify the extent of our potential liability, if any, related to this action. An unfavorable outcome could have a material adverse effect on our business, financial condition, results of operations, and cash flows.

Avlis Importação e Exportação Ltda. v. Lipman do Brasil Comercio de Eletronicos Ltda.

In February 2010, we were served with notice of an action filed by Avlis Importação e Exportação (Avlis) in the Fourth Civil Central Court of São Paulo, Brazil, against one of our Brazilian subsidiaries that was part of the Lipman acquisition in 2006. Avlis has asserted claims of non-payment by our Brazilian subsidiary of certain invoices for purchase of goods totaling 7.9 million Brazilian reais (approximately \$4.3 million) and loss of profits of 5.9 Brazilian reais (approximately \$3.2 million). We intend to vigorously defend this litigation. However, based on our current understanding of the underlying facts, we believe that it is probable that our Brazilian subsidiary will be required to pay some amount to Avlis for its collection claim. At January 31, 2010, we have accruals totaling 7.9 million Brazilian reais (approximately \$4.3 million) for this matter.

Class Action and Derivative Lawsuits

On or after December 4, 2007, several securities class action claims were filed against us and certain of our officers, former officers, and a former director. These lawsuits were consolidated in the U.S. District Court for the Northern District of California as *In re VeriFone Holdings, Inc. Securities Litigation*, C 07-6140 MHP. The original actions were: *Eichenholtz v. VeriFone Holdings, Inc. et al.*, C 07-6140 MHP; *Lien v. VeriFone Holdings*,

Table of Contents

Inc. et al., C 07-6195 JSW; *Vaughn et al. v. VeriFone Holdings, Inc. et al.*, C 07-6197 VRW (Plaintiffs voluntarily dismissed this complaint on March 7, 2008); *Feldman et al. v. VeriFone Holdings, Inc. et al.*, C 07-6218 MMC; *Cerini v. VeriFone Holdings, Inc. et al.*, C 07-6228 SC; *Westend Capital Management LLC v. VeriFone Holdings, Inc. et al.*, C 07-6237 MMC; *Hill v. VeriFone Holdings, Inc. et al.*, C 07-6238 MHP; *Offutt v. VeriFone Holdings, Inc. et al.*, C 07-6241 JSW; *Feitel v. VeriFone Holdings, Inc., et al.*, C 08-0118 CW. On August 22, 2008, the court appointed plaintiff National Elevator Fund lead plaintiff and its attorneys lead counsel. Plaintiff filed its consolidated amended class action complaint on October 31, 2008, which asserts claims under the Securities Exchange Act Sections 10(b), 20(a), and 20A and Securities and Exchange Commission Rule 10b-5 for securities fraud and control person liability against us and certain of our current and former officers and directors, based on allegations that we and the individual defendants made false or misleading public statements regarding our business and operations during the putative class periods and seeks unspecified monetary damages and other relief. We filed our motion to dismiss on December 31, 2008. The court granted our motion on May 26, 2009 and dismissed the consolidated amended class action complaint with leave to amend within 30 days of the ruling. The proceedings were stayed pending a mediation held in October 2009 at which time the parties failed to reach a mutually agreeable settlement. Plaintiffs' first amended complaint was filed on December 3, 2009 followed by a second amended complaint filed on January 19, 2010. Our motion to dismiss is due on March 5, 2010 and the hearing on our motion is set for May 17, 2010. Although discovery has not yet commenced in this action, on November 20, 2009, plaintiffs filed a motion to partially lift the Private Securities Litigation Reform Act discovery stay in order to obtain documents produced by us to the SEC in connection with the SEC's investigation into the restatement of our fiscal year 2007 interim financial statements. We filed our opposition to this motion in January 2010 and at a hearing in February 2010 the court denied the plaintiffs' motion to lift the discovery stay. At this time, we have not recorded any liabilities related to this action as we are unable to determine the outcome or estimate the potential liability.

Beginning on December 13, 2007, several actions were also filed against certain current and former directors and officers derivatively on our behalf. These derivative lawsuits were filed in: (1) the U.S. District Court for the Northern District of California, as *In re VeriFone Holdings, Inc. Shareholder Derivative Litigation*, Lead Case No. C 07-6347 MHP, which consolidates *King v. Bergeron, et al.* (Case No. 07-CV-6347), *Hilborn v. VeriFone Holdings, Inc., et al.* (Case No. 08-CV-1132), *Patel v. Bergeron, et al.* (Case No. 08-CV-1133), and *Lemmond, et al. v. VeriFone Holdings, Inc., et al.* (Case No. 08-CV-1301); and (2) California Superior Court, Santa Clara County, as *In re VeriFone Holdings, Inc. Derivative Litigation*, Lead Case No. 1-07-CV-100980, which consolidates *Catholic Medical Mission Board v. Bergeron, et al.* (Case No. 1-07-CV-100980), and *Carpel v. Bergeron, et al.* (Case No. 1-07-CV-101449). On May 15, 2008, the court in the federal derivative action appointed Charles R. King as lead plaintiff and his attorneys as lead counsel. On October 31, 2008, plaintiffs in the federal action filed their consolidated amended derivative complaint, which names us as a nominal defendant and brings claims for insider selling, breach of fiduciary duty, unjust enrichment, waste of corporate assets and aiding and abetting breach of fiduciary duty against us and certain of our current and former officers and directors. On December 15, 2008, we and the other defendants filed a motion to dismiss. The parties agreed by stipulation that briefing on this motion would relate only to the issue of plaintiffs' failure to make a pre-suit demand on our Board of Directors. The court granted our motion on May 26, 2009 and dismissed the consolidated amended derivative complaint with leave to amend within 30 days of the ruling. The proceedings were stayed pending a mediation held in October 2009 at which time the parties failed to reach a mutually agreeable settlement. Plaintiffs' second amended complaint was filed on December 10, 2009. We filed our motion to dismiss the second amended complaint on January 25, 2010. A hearing on our motion to dismiss is scheduled for April 19, 2010. While discovery is not yet underway in this action, on June 9, 2009, plaintiffs in the federal derivative action made a demand to inspect certain of our books and records. In response to this demand, we provided certain of our books and records, including minutes and materials for our Board of Directors, Audit Committee and Compensation Committee meetings for the relevant period. We produced documents responsive to each category of plaintiffs' request except that we withheld production, on the basis of privilege, of the Audit Committee's report of the independent investigation into the events leading to the restatement of our fiscal year 2007 interim financial statements. On November 6, 2009, plaintiffs filed a complaint in Delaware Chancery Court seeking to compel production of the independent investigation report. We

Table of Contents

filed a motion to dismiss this complaint on December 3, 2009, and briefs on this motion were submitted during January 2010. A hearing on our motion to dismiss has been scheduled for March 10, 2010. At this time, we have not recorded any liabilities for this action as we are unable to determine the outcome or estimate the potential liability.

On October 31, 2008, the derivative plaintiffs filed their consolidated derivative complaint in California Superior Court for the County of Santa Clara naming us as a nominal defendant and bringing claims for insider selling, breach of fiduciary duty, unjust enrichment, waste of corporate assets and aiding and abetting breach of fiduciary duty against certain of our current and former officers and directors and our largest shareholder as of October 31, 2008, GTCR Golder Rauner. On November 10, 2008, we filed a motion to stay the state court action pending resolution of the parallel federal actions, and the parties have agreed by stipulation to delay briefing on the motion to stay until after the issue of demand futility is resolved in the federal derivative case. The case management conference in the state court action has been continued until April 2010, pending the resolution of our motion to dismiss filed in the federal derivative action. At this time, we have not recorded any liabilities for this action as we are unable to determine the outcome or estimate the potential liability.

On January 27, 2008, a class action complaint was filed against us in the Central District Court in Tel Aviv, Israel on behalf of purchasers of our stock on the Tel Aviv Stock Exchange. The complaint seeks compensation for damages allegedly incurred by the class of plaintiffs due to the publication of erroneous financial reports. We filed a motion to stay the action, in light of the proceedings already filed in the United States, on March 31, 2008. A hearing on the motion was held on May 25, 2008. Further briefing in support of the stay motion, specifically with regard to the threshold issue of applicable law, was submitted on June 24, 2008. On September 11, 2008, the Israeli District Court ruled in our favor, holding that U.S. law would apply in determining our liability. On October 7, 2008, plaintiffs filed a motion for leave to appeal the District Court's ruling to the Israeli Supreme Court. Our response to plaintiffs' appeal motion was filed on January 18, 2009. The District Court has stayed its proceedings until the Supreme Court rules on plaintiffs' motion for leave to appeal. On January 27, 2010, after a hearing before the Israeli Supreme Court, the court dismissed the plaintiff's motion for leave to appeal and addressed the case back to the District Court. The Supreme Court instructed the District Court to rule whether the Israeli class action should be stayed, under the assumption that the applicable law is US law. At this time, we have not recorded any liabilities for this action as we are unable to determine the outcome or estimate the potential liability.

Certain of the foregoing cases are still in the preliminary stages, and we are not able to quantify the extent of our potential liability, if any. An unfavorable outcome in any of these matters could have a material adverse effect on our business, financial condition, results of operations, and cash flows. In addition, defending these legal proceedings is likely to be costly and may divert management's attention from the day-to-day operations of our business.

Regulatory Actions

During fiscal year 2009 we were the subject of a Wells Notice from the SEC in connection with the investigation by the staff of the SEC's Division of Enforcement (the Staff) notifying us that the Staff intended to recommend that the SEC bring a civil injunctive action against us, alleging violations of the federal securities laws arising from the restatement of our fiscal year 2007 interim financial statements. On September 1, 2009, without admitting or denying the SEC's allegations, we agreed to a permanent injunction against future violations of certain reporting, books and records and internal accounting control provisions of the federal securities laws. No other charge or monetary penalty was assessed against us, and we cooperated fully with the Commission's investigation. This settlement, which was approved by the United States District Court for the Northern District of California in November 2009, concluded the SEC's investigation of this matter with respect to us.

Table of Contents

Other Litigation

We are subject to various other legal proceedings related to commercial, customer, and employment matters that have arisen during the ordinary course of business. Although there can be no assurance as to the ultimate disposition of these matters, our management has determined, based upon the information available at the date of these financial statements, that the expected outcome of these matters, individually or in the aggregate, will not have a material adverse effect on our consolidated financial position, results of operations or cash flows.

Note 13. Restructuring Charges

The following table summarizes restructuring expenses for the three months ended January 31, 2010 and 2009 (in thousands):

	Three Months Ended January 31,	
	2010	2009
Cost of net revenues	\$ 331	\$ 195
Research and development		591
Sales and marketing		874
General and administrative	88	960
	\$ 419	\$ 2,620

In addition to the restructuring expense, we incurred restructuring related expense of \$0.6 million in the first quarter of fiscal year 2010 which represented accelerated depreciation mainly in relation to our decision to outsource our Israeli in-house manufacturing to Sanmina-SCI Corporation. Of the \$0.6 million, \$0.7 million was recorded in general and administrative expenses and a negative \$0.1 million was recorded in cost of net revenues in the Condensed Consolidated Statement of Operations.

Restructuring activity for the period ended January 31, 2010 was as follows (in thousands):

	Employee Severance and Benefit Arrangements	Facilities Related Costs	Total
Balance at November 1, 2009	\$ 957	\$ 3,528	\$ 4,485
Current year charges	403	16	419
Other adjustments	(7)	(14)	(21)
Cash payments	(325)	(474)	(799)
Balance at January 31, 2010	\$ 1,028	\$ 3,056	\$ 4,084

As of January 31, 2010, \$2.5 million of restructuring accruals were included in Other Current Liabilities and \$1.6 million of restructuring accruals were included in Other Long-term Liabilities in the Condensed Consolidated Balance Sheets.

We may incur additional restructuring or restructuring related charges in the future for additional employee severance and benefit arrangements, and facility-related activities.

Note 14. Related-Party Transactions

For the three months ended January 31, 2010 and 2009, we recorded \$2.4 million and \$1.4 million, respectively, of sales to certain companies of which members of our Board of Directors also serve on the boards of each such company. As of January 31, 2010 and October 31, 2009, we have outstanding accounts receivable

Table of Contents

balances of \$1.0 million and \$1.3 million, respectively, related to the above sales. For the three months ended January 31, 2010, we recorded purchases of \$0.1 million from certain companies of which members of our Board of Directors also serve on the boards of each such company.

Note 15. Segment and Geographic Information

Segment Information

We operate in two business segments: North America and International. North America segment is defined as the United States of America and Canada, and International segment is defined as the other countries from which we derive revenues. Total assets and goodwill by segment are based on the location of the assets.

Net revenues and operating income (loss) of each business segment reflect net revenues generated within the segment, supply chain standard inventory cost of System Solutions net revenues, actual cost of Services net revenues, and expenses that directly benefit only that segment, including distribution center costs, royalty and warranty expense. Corporate net revenues and operating income (loss) reflect non-cash acquisition charges, including amortization of purchased core and developed technology assets, step-down in deferred revenue, impairment and other Corporate charges, including inventory obsolescence and scrap at corporate distribution centers, rework, specific warranty provisions, non-standard freight and over-and-under absorption of materials management overhead.

In the fourth quarter of fiscal year 2009, we revised the methodology for business segment operating income (loss) reporting. Local inventory obsolescence and scrap costs previously recorded in the International and North America segments were reclassified to the Corporate segment. The following table sets forth net revenues and operating income (loss), as revised, for our segments (in thousands):

	Three Months Ended January 31,	
	2010	2009
Net revenues:		
International	\$ 133,787	\$ 130,263
North America	89,820	83,900
Corporate	(207)	(140)
Total net revenues	\$ 223,400	\$ 214,023
Operating income (loss):		Revised
International	\$ 33,762	\$ 34,534
North America	27,558	27,924
Corporate	(41,962)	(245,291)
Total operating income (loss)	\$ 19,358	\$ (182,833)

Our goodwill by segment was as follows (in thousands):

	January 31, 2010	October 31, 2009
International	\$ 143,976	\$ 147,363
North America	10,284	3,482
Total	\$ 154,260	\$ 150,845

Table of Contents

Our total assets by segment were as follows (in thousands):

	January 31, 2010	October 31, 2009 (1)
International	\$ 614,623	\$ 611,260
North America	364,724	306,030
Total	\$ 979,347	\$ 917,290

(1) Amounts as of October 31, 2009 have been adjusted to reflect the retroactive application of ASC 470-20. See Note 4. *Accounting Changes-Convertible Debt Instruments*.

Geographic Information

The net revenues by geographic area were as follows (in thousands):

	Three Months Ended January 31,	
	2010	2009
United States	\$ 81,825	\$ 75,051
Canada	7,788	8,709
Europe	69,374	66,141
Latin America	40,623	43,608
Asia	23,790	20,514
Total net revenues	\$ 223,400	\$ 214,023

Revenues are allocated to the geographic areas based on the shipping destination of customer orders. Corporate revenues are included in the United States geographic area revenues.

Note 16. Acquisition of Clear Channel Taxi Media LLC

On December 31, 2009, we acquired the business of CCTM under a membership interest purchase agreement. The agreed upon purchase price was zero, as a result, in applying the accounting guidelines under ASC 805-10-65-1, we substituted the zero purchase price with the acquisition date fair value of the equity interest acquired which was estimated at \$2.4 million.

The significant assets acquired consisted primarily of intangible assets of \$12.4 million, accounts receivable of \$11.5 million and property, plant and equipment of \$4.8 million. The significant liabilities assumed were mainly the fair value of unfavorable lease contracts totaling \$30.1 million and other current liabilities of \$5.0 million. We also recorded \$6.8 million of goodwill as a result of this business acquisition. We have completed our fair value accounting for the acquisition of CCTM except for tax balances; we expect to finalize the measurement of such balances in the coming quarters.

The results of CCTM's operations were included in the condensed consolidated financial statements from the acquisition date.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This section and other parts of this Quarterly Report on Form 10-Q contain forward-looking statements that involve risks and uncertainties. In some cases, forward-looking statements can be identified by words such as anticipates, expects, believes, plans, predicts, and similar terms. Such forward-looking statements are based on current expectations, estimates, and projections about our industry, management's belief, and assumptions. Forward-looking statements are not guarantees of future performance and our actual results may differ significantly from the results discussed in the forward-looking statements. Factors that might cause such differences include, but are not limited to, those discussed in Part II, Item 1A Risk Factors below and in Item 1A of our Annual Report on Form 10-K for the year ended October 31, 2009 filed with the SEC. The following discussion should be read in conjunction with our consolidated financial statements and related notes included in our 2009 Annual Report on Form 10-K and the Condensed Consolidated Financial Statements and Notes thereto included elsewhere in this Quarterly Report on Form 10-Q. Unless required by law, we expressly disclaim any obligation to update publicly any forward-looking statements, whether as result of new information, future events, or otherwise.

When we use the terms VeriFone, we, us, and our in this item, we mean VeriFone Holdings, Inc., a Delaware corporation, and its consolidated subsidiaries.

Overview

We are a global leader in secure electronic payment solutions. We provide expertise, solutions and services that add value to the point of sale with merchant-operated, consumer-facing, and self-service payment systems for the financial, retail, hospitality, petroleum, government, transportation and healthcare vertical markets. We are one of the largest providers of electronic payment systems worldwide. We believe that we benefit from a number of competitive advantages gained through our 28-year history of success in our industry. These advantages include our globally trusted brand name, large installed base, significant involvement in the development of industry standards, global operating scale, customizable platforms, and investment in research and development. We believe that these advantages position us well to capitalize on the continuing global shift toward electronic payment transactions.

Our industry's growth continues to be driven by the long-term shift toward electronic payment transactions and away from cash and checks in addition to changes in security standards that require more advanced electronic payment systems. Internationally, growth rates have generally been higher because of the relatively low penetration rates of electronic payment transactions in many countries as well as governmental efforts to modernize economies and to encourage electronic payments as a means of improving collection of value-added tax (VAT) and sales tax. Recently, additional factors have driven growth, including the shift from dial up to internet protocol (IP), developments in wireless communications, personal identification number (PIN) based debit transactions and advances in computing technology which enable vertical solutions and non-payment applications to reside at the point of sale (POS). Most recently, there have been well publicized breaches of systems that handle consumer card details, spurring widespread interest in more secure payment systems and end-to-end encryption technology.

Timing of our revenue recognition may cause our revenue to vary from quarter to quarter. Specifically, revenues recognized in some of our fiscal quarters have been back-end weighted as we receive sales orders and deliver a higher proportion of our System Solutions toward the end of such fiscal quarter. This back-end weighting of orders may adversely affect our results of operations in a number of ways and could negatively impact revenues and profits. First, the product mix of orders may not align with manufacturing forecasts which could result in a shortage of the components needed for production. Second, existing manufacturing capacity may not be sufficient to deliver a high volume of orders in a concentrated time at quarter-end. Third, back-end weighted demand could negatively impact gross margins through higher labor, delivery and other manufacturing and distribution costs. If, on the other hand, we were to seek to manage the fulfillment of back-end weighted orders through holding increased inventory levels, we would risk higher inventory obsolescence charges.

Table of Contents

Because timing of our revenue recognition depends on timing of product shipments, decisions we make about product shipments, particularly toward the end of a fiscal quarter, may impact our reported revenues. The timing of product shipments may depend on a number of factors, including price discussions with our customers, operating costs, including the costs of air shipments if required, the delivery date requested by customers and our operating capacity to fill orders and ship products, as well as our own long and short-term business planning. These factors may affect timing of shipment as well as revenues recognized for a particular period.

Security has become a driving factor in our business as our customers endeavor to meet ever escalating governmental requirements directed toward the prevention of identity theft as well as operating safeguards imposed by the credit and debit card associations, which includes Visa International (Visa), MasterCard Worldwide (MasterCard), American Express, Discover Financial Services, and JCB Co., Ltd. (JCB). In September 2006, these card associations established the Payment Card Industry Security Standards Council (PCI SSC) to oversee and unify industry standards in the areas of credit card data security. Standards include Payment Card Industry PIN Transaction Security (PCI-PTS) for pin entry devices, PCI-DSS for enterprise data security and PA-DSS for payment application data security. We are a leader in providing systems and software solutions that meet these standards.

We operate in two business segments: North America and International. We define North America as the United States of America and Canada, and International as all other countries from which we derive revenues. Throughout fiscal year 2009 demand for wireless, IP-enabled, PIN-based debit and vertical solutions was adversely affected by the global financial crisis. Specifically, we experienced lower North American demand as retailers closed redundant or underperforming locations and lower International demand due to the adverse foreign currency impact on the purchasing power of certain International customers. With the exception of China, emerging markets declined at a greater rate than developed markets in fiscal year 2009. To the extent the worldwide economic recession continues, we expect demand in certain emerging economies such as China to grow faster relative to our developed markets, but other emerging market economies to perform worse than developed markets due to weak commodity prices and political instability. We continue to devote research and development (R&D) resources to address the market needs of both emerging and developed economies.

Results of Operations**Net Revenues**

We generate net revenues through the sale of our electronic payment systems and solutions that enable electronic transactions, which we identify as System Solutions, and to a lesser extent, warranty and support services, field deployment, advertising, installation and upgrade services, and customer specific application development, which we identify as Services.

Net revenues, which include System Solutions and Services, are summarized in the following table (in thousands, except percentages):

	Three Months Ended January 31,			
	2010	2009	Net Change	% Change
System Solutions	\$ 188,014	\$ 185,841	\$ 2,173	1.2%
Services	35,386	28,182	7,204	25.6%
Total	\$ 223,400	\$ 214,023	\$ 9,377	4.4%

System Solutions Revenues

System Solutions net revenues for the three months ended January 31, 2010 increased \$2.2 million, or 1.2% compared to the three months ended January 31, 2009. System Solutions net revenues comprised 84.2% of total net revenues for the three months ended January 31, 2010 as compared to 86.8% for the three months ended January 31, 2009.

Table of Contents

International System Solutions net revenues for the three months ended January 31, 2010 decreased \$0.9 million, or 0.8%, compared to the three months ended January 31, 2009, due to a \$4.5 million, or 11.6%, decrease in Latin America, partially offset by a \$2.4 million, or 12.5%, increase in Asia and a \$1.2 million, or 2.1%, increase in Europe. In Latin America, the decrease in System Solutions net revenues was primarily the result of a weakened macroeconomic environment in many of the smaller countries of the region. Asia System Solutions net revenues benefited from growth in Australia and New Zealand, where VeriFone replaced systems previously supplied by competitors. Europe System Solutions net revenues increased in the three months ended January 31, 2010 compared to the three months ended January 31, 2009 primarily due to improved sales execution in the United Kingdom, adoption of the Vx810 duet product offering for EuroPay, MasterCard, and Visa (EMV) and growth in certain Nordic countries. These increases were partially offset by an economic slowdown in Turkey and the Balkan countries impacting sales in those countries.

North America System Solutions net revenues for the three months ended January 31, 2010 increased \$3.1 million or 4.4% compared to the three months ended January 31, 2009, primarily due to an increase in our Petroleum System Solutions revenues, partially offset by a decrease in our North America Financial revenues. The revenue increase in the Petroleum business was driven by PCI compliance, as more of our Petroleum customers began addressing the July 2010 PCI-PTS compliance deadlines. Our North America Financial business, which sells payment systems to small and medium sized businesses through ISOs and payment processors, was constrained overall due to persistent adverse economic conditions which have slowed retail store openings. For the same reason, our Multi-lane retail System Solutions net revenues were relatively flat compared to a year ago.

The weakened macroeconomic environment negatively impacted our net revenues in certain regions for the three months ended January 31, 2010. Although more recently there have been some signs of improvement in the functioning of financial markets and economic conditions, we are unable to predict the likely duration or extent of any such improvements in the U.S. and other countries. A further deterioration in economic conditions, particularly if persistent, would adversely impact our business, operating results, and financial condition.

Services Revenues

Services net revenues increased \$7.2 million, or 25.6% for the three months ended January 31, 2010 compared to the three months ended January 31, 2009. International Services revenues increased \$4.4 million, or 30.0%, primarily due to revenue growth in Brazil and Turkey. The increase in Services revenues in Brazil was primarily attributable to a growing installed base which led to increased demand for repair services and the appreciation of the Brazilian real against the U.S. dollar. The revenue increase in Turkey was predominately due to the increased demand for extended warranty services. North America Services revenues increased \$2.9 million or 21.0%, largely attributable to the incremental Services revenues from Clear Channel Taxi Media (CCTM) which we acquired in December 2009.

Gross Profit

The following table shows the gross profit for System Solutions and Services (in thousands, except percentages):

	Three Months Ended January 31,		Gross Profit	
	Amount		Percentage	
	2010	2009	2010	2009
Systems Solutions	\$ 67,929	\$ 57,730	36.1%	31.1%
Services	13,977	11,572	39.5%	41.1%
Total	\$ 81,906	\$ 69,302	36.7%	32.4%

Table of Contents*System Solutions*

Gross profit on System Solutions increased \$10.2 million, or 17.7% for the three months ended January 31, 2010 compared to the three months ended January 31, 2009, primarily due to an increase in gross profit percentage. Gross profit on System Solutions represented 36.1% and 31.1% of System Solutions net revenues for the three months ended January 31, 2010 and 2009, respectively. The increase in gross profit and gross profit percentage was due principally to the non-recurrence of a \$11.8 million charge for excess and obsolete inventory recorded in the three months ended January 31, 2009. Excluding this charge, we experienced a slight decline in our International and North American gross profit percentages for the three months ended January 31, 2010 compared to the three months ended January 31, 2009.

International gross profit percentage decreased modestly during the three months ended January 31, 2010 compared to the three months ended January 31, 2009 primarily as a result of increased pricing competition for wireless solutions. This decrease in gross profit percentage was partially offset by a shift in geographical mix towards developed countries which typically carry higher gross profit percentages compared to emerging market countries, and the introduction of our Vx810 duet product, which carries higher margins compared to products with previous generation solutions.

North America System Solutions gross profit percentage declined slightly during the three months ended January 31, 2010 compared to the three months ended January 31, 2009 primarily due to increased price competition in our wireless and high-end landline financial solutions and a shift in product mix toward lower margin products in our Petroleum business.

Corporate costs are comprised of non-cash acquisition charges, including amortization of purchased intangible assets, and other Corporate charges, including inventory obsolescence and scrap, rework, specific warranty provisions, non-standard freight and over-and-under absorption of materials management and supply chain engineering overhead. Since these costs are generally incurred on a company-wide basis, it is impractical to allocate them to either the North America or International segment. The decrease in Corporate costs for three months ended January 31, 2010 compared to the three months ended January 31, 2009 was primarily a result of a \$12.2 million decrease in our excess and obsolescence provision and scrap. We recorded a \$11.8 million excess and obsolescence provision in the three months ended January 31, 2009 due to changing demand experienced early in fiscal year 2009 as a result of the deteriorating macroeconomic environment.

Services

Gross profit on Services increased \$2.4 million, or 20.8%, for the three months ended January 31, 2010 compared to the three months ended January 31, 2009 largely attributable to the \$7.2 million increase in Services revenues partially offset by a slight decrease in gross margin percentages. Gross profit on Services represented 39.5% and 41.1% of Services net revenues, respectively, for the three months ended January 31, 2010 and 2009.

Research and Development Expenses

Research and development (R&D) expenses are summarized in the following table (in thousands, except percentages):

	Three Months Ended January 31,			
	2010	2009	Net Change	Percentage Change
Research and development	\$ 17,100	\$ 17,872	\$ (772)	-4.3%
Percentage of net revenues	7.7%	8.4%		

R&D expenses for the three months ended January 31, 2010, including the impact of changes in currency exchange rates, decreased \$0.8 million or 4.3%, compared to the three months ended January 31, 2009. This decrease was primarily due to a \$0.6 million reduction in restructuring expenses and a \$0.4 million reduction in

Table of Contents

stock-based compensation partially offset by a \$0.4 million increase in consulting services relating to the introduction of new products. Changes in foreign currency exchange rates had a \$0.4 million unfavorable impact on R&D expenses during the three months ended January 31, 2010.

We expect R&D expenses, assuming a stable currency environment, to grow modestly in absolute amounts as we address business opportunities in certain markets where we believe economic growth and demand are relatively less affected by the global recession.

Sales and Marketing Expenses

Sales and marketing expenses are summarized in the following table (in thousands, except percentages):

	Three Months Ended January 31,			
	2010	2009	Net Change	Percentage Change
Sales and marketing	\$ 20,475	\$ 19,407	\$ 1,068	5.5%
Percentage of net revenues	9.2%	9.1%		

Sales and marketing expenses for the three months ended January 31, 2010, including the impact of currency exchange rates, increased \$1.1 million or 5.5%, compared to the three months ended January 31, 2009, primarily due to a \$1.3 million increase in personnel costs and a \$0.4 million increase in sales and marketing expenses (both due to programs to support International financial and worldwide vertical initiatives) and the incremental expenses as a result of the CCTM acquisition. These increases were partially offset by a \$0.9 million decrease in restructuring expenses due to lower level of restructuring activities in the three months ended January 31, 2010. Changes in foreign currency exchange rates had a \$0.6 million unfavorable impact on sales and marketing expenses in the three months ended January 31, 2010.

We expect sales and marketing expenses, assuming a stable currency environment, to grow modestly in absolute amounts as we address business opportunities in certain markets where we believe economic growth and demand are relatively less affected by the global recession.

General and Administrative Expenses

General and administrative expenses are summarized in the following table (in thousands, except percentages):

	Three Months Ended January 31,			
	2010	2009	Net Change	Percentage Change
General and administrative	\$ 20,481	\$ 30,728	\$ (10,247)	-33.3%
Percentage of net revenues	9.2%	14.4%		

General and administrative expenses for the three months of January 31, 2010, including the impact of changes in currency exchange rates, decreased \$10.2 million, or 33.3%, compared to the three months ended January 31, 2009 primarily due to the non recurrence of the following charges incurred in the three months ended January 31, 2009, a \$3.6 million stock-based compensation expense as a result of the voluntary surrender of certain option grants by an executive, \$2.6 million of remediation related expenses following the independent investigation and the restatement of our 2007 interim financial results, and \$1.9 million in litigation and legal settlement fees. The decrease in general and administrative expenses was also attributable to a \$1.5 million reduction in tax accounting professional services due to our efforts to improve internal control over taxes by handling more tax functions through improved internal resources, and a \$0.9 million reduction in bad debt expenses, largely due to improved collections in Brazil and China. Changes in foreign currency exchange rates had a \$0.3 million unfavorable impact on general and administrative expenses in the three months ended January 31, 2010.

Table of Contents

We expect general and administrative expenses, assuming a stable currency environment, to increase in absolute amounts as we expect higher legal expenses for the remainder of fiscal year 2010.

Impairment of Goodwill

Our review for potential indicators of impairment performed in the first quarter of fiscal year 2010 did not result in any impairment of goodwill in the three months ended January 31, 2010. As a result of the December 1, 2008 goodwill impairment test, we concluded that the carrying amount of our North America and Asia reporting units exceeded their implied fair values and recorded an estimated impairment charge of \$178.3 million in the Corporate segment during the first quarter of fiscal year 2009 for these reporting units. The net carrying value of goodwill in the North America and International segments was reduced by \$65.6 million and \$112.7 million, respectively. We finalized the goodwill evaluation process and recorded a \$2.7 million reduction to the estimated impairment charge during the second quarter of fiscal year 2009. The final impairment charge for the North America and Asia reporting units was \$175.5 million for the fiscal year ended October 31, 2009. See *Note 2. Goodwill and Purchased Intangible Assets* for additional information.

Interest Expense

Interest expense decreased \$1.7 million in the three months ended January 31, 2010 compared to the three months ended January 31, 2009 primarily attributable to lower effective interest rates on our Term-B loan as LIBOR rates declined substantially over the periods and a decrease in the outstanding balance of our 1.375% Senior Convertible Notes. We repurchased and extinguished \$39.0 million in aggregate outstanding par value of the Notes in April and December 2009.

Interest Income

Interest income decreased \$0.4 million in the three months ended January 31, 2010 compared to the same period of fiscal year 2009 primarily attributable to the lower effective interest rates during the three months ended January 31, 2010, partially offset by the impact of higher average cash balances.

Other Income (Expense), Net

Other income (expense) net decreased \$6.0 million during the three months ended January 31, 2010 compared to the three months ended January 31, 2009 primarily due to several gains recorded in the first quarter of fiscal year 2009, including a \$3.8 million foreign exchange gain as a result of the changes in the U.S. dollar value of a tax accrual denominated in Israeli shekels and a \$0.9 million reversal of previously accrued non-deductible penalty and interest charges after we received an Israeli tax refund in the first quarter of fiscal year 2009.

Provision for Income Tax

We recorded an income tax provision of \$19 thousand for the three months ended January 31, 2010 compared to an income tax benefit of \$4.4 million for the three months ended January 31, 2009. The effective tax rate for the three months ended January 31, 2010 is lower than the U.S. statutory tax rate due to earnings in countries where we are taxed at lower rates compared to the U.S. federal and state statutory rates, utilization of previously unbenefitted US tax attributes and reversal of uncertain tax position liabilities as statutes of limitations expired. The income tax benefit for the three months ended January 31, 2009 is primarily related to discrete items, including a decrease in deferred tax liability due to goodwill impairment for GAAP purposes, offset by unfavorable tax provision impacts from an increase in the U.S. valuation allowance, and interest accruals associated with uncertain tax positions as well as benefit from additional interest expense with the adoption of the new accounting guidance relating to ASC 470-20.

Table of Contents

As of January 31, 2010, we remain in a net deferred tax liability position. The realization of the deferred tax assets depends primarily on our ability to generate sufficient U.S. and foreign taxable income in future periods. We have determined that it is not more likely than not the deferred tax assets in the U.S. and certain foreign jurisdictions will be realized and as such we continue to record a full valuation allowance against these assets as of January 31, 2010. The amount of deferred tax assets considered realizable may increase or decrease in subsequent quarters as we reevaluate the underlying basis for our estimates of future domestic and certain foreign taxable income.

We are currently under audit by the Internal Revenue Service (IRS) for our fiscal years 2003 to 2004. Although we believe we have correctly provided income taxes for the years subject to audit, the IRS may adopt different interpretations. We have not yet received any final determinations with respect to this audit although certain adjustments have been agreed with the IRS, none of which have a material impact to the current period income tax provision. Some of our subsidiaries are also under audit by the Israeli tax authorities for calendar years 2004 to 2006 and the Mexican and Philippine governments. With few exceptions, we are no longer subject to tax examination outside of the U.S. for periods prior to 2000.

We have recorded our uncertain tax position liability as a long-term liability as we do not expect significant payments to occur over the next 12 months. Our existing tax positions will continue to generate an increase in liabilities for uncertain tax benefits. We will continue to recognize interest and penalties related to income tax matters in income tax expense. The amount of unrecognized tax benefits could be reduced upon closure of tax examinations or if the statute of limitations on certain tax filings expires without assessment from the tax authorities. We believe that it is reasonably possible that there could be a reduction in unrecognized tax benefits due to statute of limitation expirations in multiple tax jurisdictions during the next 12 months of zero to \$4.3 million. Interest and penalties accrued on these uncertain tax positions will also be released upon the expiration of statutes of limitations. We are currently renegotiating the terms and conditions with respect to the tax benefits under the Singapore Pioneer Tax Holiday provision for 2008 and subsequent years, including deferral or revision of certain of these conditions. We currently expect that we will continue to maintain our tax exempt status.

Segment Information

We operate in two business segments: North America and International. We define North America as the United States of America and Canada, and International as the other countries from which we derive revenues.

Net revenues and operating income (loss) of each business segment reflect net revenues generated within the segment, supply chain standard inventory cost of System Solutions net revenues, actual cost of Services net revenues, and expenses that directly benefit only that segment, including distribution center costs, royalty and warranty expense. Corporate net revenues and operating income (loss) reflect non-cash acquisition charges, including amortization of purchased core and developed technology assets, step-down in deferred revenue, impairment and other Corporate charges, including inventory obsolescence and scrap, rework, specific warranty provisions, non-standard freight and over-and-under absorption of materials management overhead.

Table of Contents

In fiscal year 2009, we revised the methodology for business segment operating income (loss) reporting. Local inventory obsolescence and scrap costs previously recorded in International and North America segments were reclassified to the Corporate segment. The following table sets forth net revenues and operating income (loss), as revised, for our segments (in thousands):

	Three Months Ended January 31,			
	2010	2009	Net Change	Percentage Change
Net revenues				
International	\$ 133,787	\$ 130,263	\$ 3,524	2.7%
North America	89,820	83,900	5,920	7.1%
Corporate	(207)	(140)	(67)	nm(1)
Total net revenues	\$ 223,400	\$ 214,023	\$ 9,377	4.4%
Operating income (loss)		(Revised)		
International	\$ 33,762	\$ 34,534	\$ (772)	-2.2%
North America	27,558	27,924	(366)	-1.3%
Corporate	(41,962)	(245,291)	203,329	nm(1)
Total operating income (loss)	\$ 19,358	\$ (182,833)	\$ 202,191	

(1) nm not meaningful
International Segment

International total net revenues increased \$3.5 million, or 2.7%, for the three months ended January 31, 2010 as compared to the three months ended January 31, 2009 primarily due to a \$4.4 million increase in Services net revenues partially offset by a \$0.9 million decrease in System Solutions net revenues. See discussion under *Results of Operations - Net Revenues*.

The \$0.8 million decrease in International operating income for the three months ended January 31, 2010 compared to the three months ended January 31, 2009 was mainly due to an increase in operating expenses partially offset by an increase in gross margin.

North America Segment

North America total net revenues increased \$5.9 million, or 7.1%, for the three months ended January 31, 2010 compared to the three months ended January 31, 2009 primarily due to a \$3.1 million increase in Systems Solutions net revenues and a \$2.9 million increase in Services net revenues. See *Results of Operations - Net Revenues*.

The decrease in North America operating income for the three months ended January 31, 2010 compared to the three months ended January 31, 2009 was mainly due to an increase in operating expenses partially offset by increase in gross margin.

Corporate Segment

Corporate operating loss decreased \$203.3 million for the three months ended January 31, 2010 compared to the three months ended January 31, 2009, primarily due to a \$178.3 million reduction in goodwill impairment charges, a \$12.2 million decrease in excess and obsolescence and scrap charges as a result of the early fiscal year 2009 deteriorating macroeconomic environment, a \$3.9 million decrease in stock-based compensation primarily due to voluntary surrender of certain option grants by an executive in the three months ended January 31, 2009, a

Table of Contents

\$2.6 million decrease in remediation related expenses following the independent investigation and the restatement of our 2007 interim financial results, a \$2.2 million decrease in restructuring charges, a \$1.5 million reduction in tax accounting professional services due to more tax functions handled by in-house personnel, and a \$1.4 million reduction in amortization of purchased intangible assets. These decreases were partially offset by a \$1.3 million increase in product situation warranty reserves.

Liquidity and Capital Resources

	Three Months Ended January 31,	
	2010	2009
Net cash provided by (used in):		
Operating activities	\$ 54,109	\$ 7,099
Investing activities	(1,264)	(5,493)
Financing activities	(2,175)	(1,418)
Effect of exchange rate fluctuations on cash and cash equivalents	(1,049)	(2,273)
Net increase (decrease) in cash and cash equivalents	\$ 49,621	\$ (2,085)

Our primary liquidity and capital resource needs are to service our debt, finance working capital, and to make capital expenditures and investments. At January 31, 2010, our primary sources of liquidity were cash and cash equivalents of \$374.6 million as well as \$25.0 million available to us under our revolving credit facility.

We believe that we have the financial resources to meet our business requirements for the next twelve months, including capital expenditures, working capital requirements, and future strategic investments, and to comply with our financial covenants.

Operating Activities

Net cash flow from operating activities was \$54.1 million for the three months ended January 31, 2010.

Cash provided by operations before changes in working capital amounted to \$34.3 million for the three months ended January 31, 2010 and consisted of \$10.6 million of net income adjusted for \$23.7 million of non-cash items consisting primarily of depreciation and amortization, stock-based compensation expense, and non-cash interest expense.

Changes in working capital resulted in a \$19.8 million increase in cash and cash equivalents during the three months ended January 31, 2010. The main drivers of this increase were as follows:

A \$16.4 million decrease in accounts receivable mainly due to the timing of billings and better cash collections. Relative to the prior quarter, we had a higher proportion of shipments in the early part of the fiscal quarter ended January 31, 2010 which enabled us to collect our accounts receivable within the same quarter.

A \$13.8 million increase in accounts payable and accrued expenses and other liabilities mainly due to a \$7.5 million accrual for advances against purchases and a \$7.6 million increase in customer deposits received. These increases were partially offset by a \$1.9 million reduction in VAT payable.

Partially offset by:

An \$11.4 million increase in prepaid and other assets mainly due to a \$7.5 million increase in advances against purchases and a \$2.6 million increase in prepaid income taxes.

Table of Contents**Investing Activities**

Net cash used in investing activities was \$1.3 million in the three months ended January 31, 2010, and primarily consisted of \$1.9 million of purchases of property, plant and equipment and \$0.7 million of capitalized software development costs, partially offset by \$1.4 million of proceeds from sales of property, plant and equipment.

Financing Activities

Net cash used in financing activities was \$2.2 million in the three months ended January 31, 2010 primarily consisting of a \$6.1 million repayment of debt partially offset by \$2.7 million of proceeds from the exercise of stock options and a \$1.2 million tax benefit from stock-based awards. The \$6.1 million repayment of debt included \$4.8 million used to repurchase a portion of our outstanding 1.375% Senior Convertible Notes and \$1.3 million of Term B loan repayments.

Contractual Obligations

The following table summarizes our contractual obligations as of January 31, 2010 (in thousands):

	2010 (2)	For the Fiscal Years Ending October 31,					Thereafter	Total
	2011	2012	2013	2014				
Term B Loan (including interest) (1)	\$ 8,813	\$ 11,638	\$ 11,504	\$ 217,584	\$			\$ 249,539
Senior convertible notes (including interest)	1,917	3,812	281,062					286,791
Capital lease obligations	105	141	53					299
Operating leases (3)	28,002	31,532	14,313	5,671	3,300	3,447		86,265
Minimum purchase obligations	83,847	5,187						89,034
	\$ 122,684	\$ 52,310	\$ 306,932	\$ 223,255	\$ 3,300	\$ 3,447		\$ 711,928

(1) Interest in the above table has been calculated using the rate in effect at January 31, 2010.

(2) The 2010 balances represent the obligations for the remaining 9 months of fiscal year 2010.

(3) Includes \$52.2 million of operating lease commitments as a result of the acquisition of CCTM.

Off-Balance Sheet Arrangements

Our only off-balance sheet arrangements, as defined in Item 303(a)(4)(ii) of the SEC's Regulation S-K, consist of forward foreign currency agreements described under *Quantitative and Qualitative Disclosures about Market Risk*. See Item 3.

Recent Accounting Pronouncements

Information with respect to our recent accounting pronouncements may be found in Note 1. *Principles of Consolidation and Summary of Significant Accounting Policies* in the Notes to Condensed Consolidated Financial Statements included in this Quarterly Report on Form 10-Q, which section is incorporated herein by reference.

Critical Accounting Policies and Estimates

Management's discussion and analysis of financial condition and results of operations is based upon our condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America.

Table of Contents

On an ongoing basis, we evaluate our critical accounting policies and estimates, including those related to revenue recognition, inventory valuation, product returns reserves, allowance for doubtful accounts, warranty costs, contingencies and litigation, income taxes, accounting for goodwill and long-lived assets, stock-based compensation, business combinations and restructuring. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

There were no significant changes to our critical accounting policies during the three months ended January 31, 2010. For information about critical accounting policies, see *Critical Accounting Policies and Estimates* in our Annual Report on Form 10-K for the fiscal year ended October 31, 2009.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risk related to changes in interest rates and foreign currency exchange rates. To mitigate some of these risks, we utilize derivative financial instruments to hedge these exposures. We do not use derivative financial instruments for speculative or trading purposes nor do we issue or hold leveraged derivative financial instruments.

Interest Rates

We are exposed to interest rate risk related to our borrowings under the credit agreement we entered into on October 31, 2006. These borrowings generally bear interest based upon the one or three-month LIBOR rate. As of January 31, 2010, a 50 basis point increase in interest rates on our borrowings subject to variable interest rate fluctuations would increase our interest expense by approximately \$1.1 million annually. We generally invest most of our cash in overnight and short-term instruments, which would earn more interest income if market interest rates rise and less interest income if market interest rates fall.

Foreign Currency Risk

A majority of our sales are made to customers outside the United States. A substantial portion of the net revenues we generate from such sales is denominated in currencies other than the U.S. dollar. Additionally, portions of our cost of net revenues and other operating expenses are incurred by our international operations and are denominated in local currencies. For consolidated reporting, revenue and expenses denominated in non-US currencies are translated to US dollars at average currency exchange rates for the period (P&L Exposures). Thus, even if foreign currency results were stable, fluctuating currency rates produce volatile reported results. We have made limited efforts to mitigate P&L Exposures by hedging with currency derivatives. As of January 31, 2010, we have no foreign exchange forward contracts designated as a cash flow hedges pursuant to ASC 815.

We may in the future use foreign exchange forward or option contracts to hedge P&L Exposures, depending upon the risks of the exposures, the costs of hedging, and other considerations. However, hedges of P&L Exposures will only mitigate a portion of our risk and only for a short period. We will remain subject to the currency risk of P&L Exposures.

The balance sheets of our U.S. and international businesses have monetary assets and liabilities denominated in currencies other than the primary currency of such business (Balance Sheet Exposures), such as Canadian dollar receivables held by our U.S. business, or U.S. dollar payables of our U.K. business. As exchange rates fluctuate, Balance Sheet Exposures generate foreign currency transaction gains and losses, which are included in other income (expense), net in the Condensed Consolidated Statements of Operations.

We have in the past run a hedging program to mitigate the risk of Balance Sheet Exposures by entering into foreign exchange forward contracts. The objective is to have gains or losses of the foreign exchange forward

Table of Contents

contracts largely offset the losses or gains of the Balance Sheet Exposures. Foreign exchange forward contracts are included in Prepaid Expenses and Other Current Assets and Other Current Liabilities in the Condensed Consolidated Balance Sheets. The contracts are marked-to-market on a monthly basis with gains and losses included in other income (expense), net in the Condensed Consolidated Statements of Operations. In some instances, we seek to hedge transactions that are expected to become Balance Sheet Exposures in the very short-term, generally within one month. We do not use foreign exchange forward contracts for speculative or trading purposes.

Our outstanding foreign exchange forward contracts as of January 31, 2010 are presented in the table below. All forward contracts are representative of the expected payments to be made under these instruments. The fair market value of the contracts represents the difference between the spot currency rate at January 31, 2010 and the contracted rate. All of these forward contracts mature within 35 days of January 31, 2010 (in thousands):

	Currency	Local Currency Contract Amount	Currency	Contracted Amount	Fair Market Value at January 31, 2010
Contracts to buy U.S. dollar					
Brazilian real	BRL	(11,500)	USD	6,206	\$ 27
Canadian dollar	CAD	(9,500)	USD	8,906	(7)
Chinese yuan	CNY	(75,000)	USD	10,991	(22)
Euro	EUR	(15,500)	USD	21,781	2
Indian rupee	INR	(200,000)	USD	4,298	(16)
Mexican peso	MXN	(45,000)	USD	3,469	(3)
					\$ (19)
Contracts to sell U.S. dollar					
Australian dollar	AUD	4,000	USD	(3,578)	\$
Israeli shekel	ILS	11,000	USD	(2,948)	
					\$
					\$ (19)

As of January 31, 2010, our Balance Sheet Exposures amounted to \$66.8 million and were partially offset by forward contracts with a notional amount of \$62.2 million. Based on our net exposures as of January 31, 2010, a 10% movement in currency rates would result in a gain or loss of \$0.5 million.

Hedging of our Balance Sheet Exposures may not always be effective to protect us against currency exchange rate fluctuations, particularly in the event of imprecise forecasts of non-U.S. denominated assets and liabilities. In addition, at times we have not fully hedged our Balance Sheet Exposures, leaving us at risk to foreign exchange gains and losses on the un-hedged amounts. Furthermore, historically we have not hedged our P&L Exposures. Accordingly, if there were an adverse movement in exchange rates, we might suffer significant losses. For instance, for the three months ended January 31, 2010 and 2009, we recorded \$0.8 million of net foreign exchange losses and \$3.4 million in net foreign exchange gains, respectively, despite our hedging activities.

Equity Price Risk

In June 2007, we sold \$316.2 million aggregate principal amount of 1.375% Senior Convertible Notes due 2012 (the "Notes") which may be converted prior to maturity into cash and shares of our common stock upon the occurrence of certain events. In April 2009, we repurchased and extinguished \$33.5 million par value of our outstanding Notes. In December 2009, we repurchased and extinguished an additional \$5.5 million par value of our outstanding Notes. As of January 31, 2010, the remaining par value of the Notes was \$277.2 million. The conversion price of the Notes at issuance was approximately \$44.02 per share. Upon conversion, we would pay

Table of Contents

the holder the cash value of the applicable number of shares of our common stock, up to the principal amount of the Notes. Amounts in excess of the principal amount, if any, would be paid in our common stock. Concurrently with the issuance of the Notes, we entered into note hedge transactions to reduce the financial impact from the conversion of the Notes and to mitigate any negative effect such conversion may have on the price of our common stock. We entered into the note hedge transactions with Lehman Brothers OTC Derivatives (Lehman Derivatives) and JP Morgan Chase Bank National Association, London Branch whereby we purchased options to purchase approximately 7.2 million shares of our common stock at a price of \$44.02 per share and sold warrants to the same counterparties whereby they have the option to purchase 7.2 million shares of our common stock at a price of approximately \$62.36.

The filing by Lehman Brothers of a voluntary Chapter 11 bankruptcy petition in September 2008 constituted an event of default under the note hedge transactions with Lehman Derivatives. On September 21, 2008, we delivered a notice of termination to Lehman Derivatives to cancel 3.6 million options we purchased.

Following the termination of the note hedge transaction with Lehman Derivatives as described above, as of January 31, 2010, we held an option to purchase up to 3.6 million shares of our common stock at \$44.02, and have outstanding warrants for 7.2 million shares of our common stock at \$62.36. Therefore, there is no impact if the share price of our common stock is below \$44.02. For every \$1 increase in the share price of our common stock from \$44.02 up to \$62.36, we expect to issue the equivalent of \$3.6 million in shares of our common stock (at the relevant share price). For every \$1 increase in the share price of our common stock above \$62.36, we will be required to issue the equivalent of \$7.2 million in shares of our common stock.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

VeriFone maintains disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)), that are designed to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Our management is responsible for establishing and maintaining our disclosure controls and procedures. Our Chief Executive Officer and Chief Financial Officer participated with our management in evaluating the effectiveness of our disclosure controls and procedures as of January 31, 2010.

Based on our management's evaluation (with the participation of our Chief Executive Officer and our Chief Financial Officer), our Chief Executive Officer and Chief Financial Officer have concluded that, as of January 31, 2010, in light of the material weakness described below, our disclosure controls and procedures were not effective to provide reasonable assurance that the information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Notwithstanding the material weakness described below, we have performed additional analyses and other procedures to enable management to conclude that our condensed consolidated financial statements included in this report were prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). Based in part on these additional efforts, our Chief Executive Officer and Chief Financial Officer have included their certifications as exhibits to this Form 10-Q.

Table of Contents

A material weakness is a control deficiency, or combination of control deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis. Management's assessment identified the following material weakness in our internal control over financial reporting as of January 31, 2010.

A transaction-level material weakness in the design and operating effectiveness of controls related to income taxes. Specifically, our processes and procedures were not designed to provide for adequate and timely identification, documentation and review of various income tax calculations, reconciliations and related supporting documentation required to apply our accounting policy for income taxes in accordance with U.S. GAAP. This material weakness impacted our ability to timely report financial information related to income tax accounts and resulted in adjustments to income tax expense, income taxes payable, deferred tax assets and liabilities, and goodwill accounts during the fiscal year ended October 31, 2009.

As a result of the identified material weaknesses, our management concluded that, as of January 31, 2010, our internal control over financial reporting was not effective.

Changes in Internal Controls and Procedures

There were no changes in our internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. We continue to implement our remediation plan for the material weakness in the design and operating effectiveness of controls related to income taxes as described under Item 9A. *Controls and Procedures* in our Annual Report on Form 10-K for the fiscal year ended October 31, 2009. We believe we will complete the required remedial actions for the material weakness in fiscal year 2010. The material costs associated with the above remedial actions include ongoing compensation expenses for the expanded tax department and engagement fees for third party tax consulting firms to assist with the design and implementation and testing of the new processes and controls.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Information with respect to this Item may be found in Note 12. *Commitments and Contingencies* of Notes to Condensed Consolidated Financial Statements in this Form 10-Q, which is incorporated into this Item 1 by reference.

ITEM 1A. RISK FACTORS

Risks Related to Our Business

Our internal processes and controls and our disclosure controls have been inadequate; if the processes and controls we have implemented and continue to implement are inadequate, we may not be able to comply with our financial statement certification requirements under applicable SEC rules, or prevent future errors in our financial reporting.

As described under Item 4. *Controls and Procedures* in this Form 10-Q and under Item 9A. *Controls and Procedures* in our Annual Report on Form 10-K for the fiscal year ended October 31, 2009, our internal processes and controls continue to be ineffective because of a material weakness in control activities related to income taxes. This material weakness and other material weaknesses in our internal control over financial reporting contributed to our need to restate previously reported interim financial information for each of the first three quarters of our fiscal year ended October 31, 2007, and to the delays in the filing of our Annual Report on Form 10-K for fiscal year 2007. We also were unable to file our quarterly reports on Form 10-Q for our fiscal quarters ended January 31, 2008 and April 30, 2008 on a timely basis. We have implemented and intend to continue to implement a number of additional and enhanced processes and controls to improve our internal control over financial reporting.

Table of Contents

As of January 31, 2010, we have not yet remediated our material weakness in control activities related to income taxes. If we are unsuccessful in adequately implementing improved controls, we may be unable to comply with Exchange Act Rules 13a-15 and 15d-15, which specify the processes and controls that public companies are required to have in place, and we may be unable to provide the executive certificates required by Exchange Act Rules 13a-15 and 15d-15 in our quarterly and annual reports. Even if we implement improved controls, these controls may not be sufficient to detect or prevent future errors in financial reporting. We have devoted additional resources to our financial control and reporting requirements, including hiring additional qualified employees in these areas. We expect to hire additional employees and may also engage additional consultants in these areas. Competition for qualified financial control and accounting professionals in the geographic areas in which we operate is keen and there can be no assurance that we will be able to hire and retain these individuals.

If current weakened macroeconomic conditions persist or worsen, our business and results of operations could be further adversely affected.

Since the latter half of 2008, the U.S. and international economy and financial markets have experienced significant slowdown and volatility due to uncertainties related to availability of credit, difficulties in the banking and financial services sectors, softness in the housing, retail and consumer markets, energy prices, severely diminished market liquidity, geopolitical conflicts, falling consumer confidence and rising unemployment rates. This slowdown could lead to reduced demand for our products if customers delay or reduce deployment of electronic payment systems, which in turn would reduce our revenues and adversely affect our business, financial condition and results of operations. In particular, the slowdown and volatility in the global markets have resulted in softer demand in the financial and retail sectors, pricing pressures and more conservative purchasing decisions by customers, including a tendency toward lower-priced products and lower volume of purchases, which could negatively impact our revenues, gross margins and results of operations. In some countries where we do business, the weakened economy has led to economic instability which has negatively affected sales, an example of which is decreased purchasing power due to currency devaluations. In addition to a reduction in sales, our profitability may decrease during downturns because we may not be able to reduce costs at the same rate as our sales decline. Given the current unfavorable economic environment, our customers may have difficulties obtaining capital at adequate or historical levels to finance their ongoing business and operations, which could reduce their purchases of our system solutions and impair their ability to make timely payments to us.

We are unable to predict the likely duration and severity of the current weakened economic conditions in the U.S. and other countries and such conditions, if they persist or worsen, will further adversely impact our business, operating results, and financial condition. While some markets have shown signs of improvement and we have experienced modest sequential growth in revenues and earnings in recent quarters, we cannot predict whether such improvements or growth will continue and any future decline in global conditions could negatively impact our business, operating results and financial condition. Continued volatility in market conditions make it difficult to forecast earnings and if we fail to meet our financial guidance or the expectations of investment analysts or investors in any period, the market price of our common stock could decline.

We depend on a limited number of customers, including distributors and resellers, for a large percentage of our System Solutions sales. If we do not effectively manage our relationships with them, our net revenues and operating results will suffer.

A significant percentage of our net revenues are attributable to a limited number of customers, including distributors and ISOs. For the fiscal quarter ended January 31, 2010, our ten largest customers accounted for approximately 30.4% of our net revenues. Although no individual customer accounted for more than 10% of net revenues in the fiscal quarter ended January 31, 2010, three customers accounted for approximately 19.0% of our net revenues in that period. If any of our large customers significantly reduces or delays purchases from us or if we are required to sell products to them at reduced prices or on other terms less favorable to us, our revenues and income could be materially adversely affected.

Table of Contents

We sell a significant portion of our solutions through third parties such as independent distributors, independent sales organizations, or ISOs, value-added resellers, and payment processors. We depend on their active marketing and sales efforts. These third parties also provide after-sales support and related services to end user customers. When we introduce new applications and solutions, they also provide critical support for developing and supporting the custom software applications to run on our various electronic payment systems and, internationally, in obtaining requisite certifications in the markets in which they are active. Accordingly, the pace at which we are able to introduce new solutions in markets in which these parties are active depends on the resources they dedicate to these tasks. Moreover, our arrangements with these third parties typically do not prevent them from selling products of other companies, including our competitors, and they may elect to market our competitors products and services in preference to our system solutions. If one or more of our major resellers terminates or otherwise adversely changes its relationship with us, we may be unsuccessful in replacing it. The loss of one of our major resellers could impair our ability to sell our solutions and result in lower revenues and income. It could also be time consuming and expensive to replicate, either directly or through other resellers, the certifications and the custom applications owned by these third parties.

In addition, orders from our distributors and resellers are dependent upon their sales volumes and inventory management decisions. In response to the global economic downturn a number of distributors and resellers have experienced weakened demand and slower sales. In particular, in recent months some of these distributors and resellers have reported increased channel inventory of our products, which may lead such distributors and resellers to decrease or defer orders of our products. Declines or deferral of orders could materially adversely affect our revenues, operating results and cash flows.

A majority of our net revenues is generated outside of the United States and we intend to continue to expand our operations internationally. Our results of operations could suffer if we are unable to manage our international expansion and operations effectively.

During the fiscal quarters ended January 31, 2010 and 2009, approximately 63.4% and 64.9%, respectively, of our net revenues were generated outside of the United States. We expect our percentage of net revenues generated outside of the United States to increase over time, although volatility in individual markets may result in slower international growth in certain periods. Part of our strategy is to expand our penetration in existing foreign markets and to enter new foreign markets and in particular to enter new emerging markets. Our ability to penetrate some international markets may be limited due to different technical standards, protocols or product requirements. Expansion of our international business will require significant management attention and financial resources. Our international net revenues will depend on our continued success in the following areas:

securing commercial relationships to help establish our presence in new international markets;

hiring and training personnel capable of marketing, installing and integrating our solutions, supporting customers, and managing operations in foreign countries;

localizing our solutions to target the specific needs and preferences of foreign customers, which may differ from our traditional customer base in the markets we currently serve;

building our brand name and awareness of our services among foreign customers in new international markets; and

implementing new systems, procedures, and controls to monitor our operations in new international markets.

In addition, we are subject to risks associated with operating in foreign countries, including:

multiple, changing, and often inconsistent enforcement of laws and regulations;

satisfying local regulatory or industry imposed security or other certification requirements;

competition from existing market participants that may have a longer history in and greater familiarity with the international markets we enter;

Table of Contents

tariffs and trade barriers;

laws and business practices that may favor local competitors;

fluctuations in currency exchange rates;

extended payment terms and the ability to collect accounts receivable;

economic and political instability in certain foreign countries;

imposition of limitations on conversion of foreign currencies into U.S. dollars or remittance of dividends and other payments by foreign subsidiaries;

changes in a specific country's or region's political or economic conditions; and

greater difficulty in safeguarding intellectual property in areas such as China, Russia, and Latin America.

Many of these factors typically become more prevalent during periods of economic stress; therefore, current global economic differences may exacerbate certain of these risks. For example, we are subject to foreign currency risk and economic and political instability which can lead to significant and unpredictable volatility in currency rates, including significant currency devaluations, which may negatively impact our revenues, gross margins, results of operations and financial position. Although we engage in some hedging of our foreign currency exposures, we do not hedge all such exposures and our hedging arrangements may not always be effective. See *Foreign Currency Risk* under Item 3. *Quantitative and Qualitative Disclosures About Market Risk* in this Form 10-Q. In addition, compliance with foreign and U.S. laws and regulations that are applicable to our international operations is complex and may increase our cost of doing business in international jurisdictions and our international operations could expose us to fines and penalties if we fail to comply with these regulations. These laws and regulations include import and export requirements, exchange control regulations, U.S. laws such as the Foreign Corrupt Practices Act, and local laws prohibiting corrupt payments to governmental officials. Although we have implemented policies and procedures designed to ensure compliance with these laws, there can be no assurance that our employees, contractors, and agents will not take actions in violation of our policies, particularly as we expand our operations through organic growth and acquisitions. For example, two of our Brazilian subsidiaries that were acquired as a part of the Lipman acquisition have been notified of assessments regarding Brazilian customs penalties that relate to alleged infractions in the importation of goods. See Part II Item 1. *Legal Proceedings* of this Form 10-Q. Defending such assessments can be costly and divert management time. Any such violations could subject us to civil or criminal penalties, including the imposition of substantial fines and interest or prohibitions on our ability to offer our products and services to one or more countries, and could also materially damage our reputation, our brand, our international expansion efforts, our business, and negatively impact our operating results. In addition, if we fail to address the challenges and risks associated with international expansion and acquisition strategy, we may encounter difficulties implementing our strategy, which could impede our growth or harm our operating results.

Our solutions may have defects that could delay sales and collection of receivables, increase costs and result in claims against us.

We offer complex solutions that are susceptible to undetected hardware and software errors or failures. Solutions may experience failures when first introduced, as new versions are released, or at any time during their lifecycle. Defects may also arise from third party components that we incorporate into our products, such as hardware modules, chipsets or battery cells. Any product recalls as a result of errors or failures could result in the loss of or delays in market acceptance of our solutions, adversely affect our business and reputation and increase our product costs which could negatively impact our margins, profitability and results of operations. Any significant returns or warranty claims for any of our products could result in significant additional costs to us and could adversely affect our results of operations. Our customers may also run third-party software applications on our electronic payment systems. Errors in third-party applications could adversely affect the performance of our solutions.

Table of Contents

The existence of defects and delays in correcting them could result in negative consequences, including the following: harm to our brand; delays in shipping system solutions; loss of market acceptance for our system solutions; additional warranty expenses; diversion of resources from product development; and loss of credibility with distributors and customers. Correcting defects can be time consuming and in some circumstances extremely difficult. Software errors may take several months to correct, and hardware defects may take even longer to correct.

Security is vital to our customers and end users and therefore breaches in the security of our solutions could adversely affect our reputation and results of operations.

Protection against fraud is of key importance to the purchasers and end users of our solutions. We incorporate security features, such as encryption software and secure hardware, into our solutions to protect against fraud in electronic payment transactions and to ensure the privacy and integrity of consumer data. Our solutions may be vulnerable to breaches in security due to defects in the security mechanisms, the operating system and applications, or the hardware platform. Security vulnerabilities could jeopardize the security of information transmitted or stored using our solutions. We also provide our customers with repair, encryption key loading and helpdesk services, and have in the past and may in the future also experience security breaches or fraudulent activities related to unauthorized access to sensitive customer information. If the security of our solutions is compromised, our reputation and marketplace acceptance of our solutions will be adversely affected, which would cause our business to suffer, and we may become subject to damages claims.

During some fiscal quarters, a significant percentage of our business is executed towards the end of the fiscal quarters. This could negatively impact our business and results of operations.

Revenues recognized in our fiscal quarters can be back-end loaded. This means that during a particular fiscal quarter the timing of orders could be such that a substantial portion of sales orders are received, product is shipped, and revenue is recognized towards the end of the fiscal quarter. This back-end loading, particularly if it becomes more pronounced, could adversely affect our business and results of operations due to a number of factors including the following:

the manufacturing processes at our third party contract manufacturers could become concentrated in a shorter time period. This concentration of manufacturing could increase manufacturing costs, such as costs associated with the expediting of orders, and negatively impact gross margins. The risk of higher levels of obsolete or excess inventory write-offs would also increase if we were to hold higher inventory levels to counteract this effect;

the higher concentration of orders may make it difficult to accurately forecast component requirements and, as a result, we could experience a shortage of the components needed for production, possibly delaying shipments and causing lost orders;

if we are unable to fill orders at the end of a quarter, shipments may be delayed. This could cause us to fail to meet our revenue and operating profit expectations for a particular quarter and could increase the fluctuation of quarterly results if shipments are delayed from one fiscal quarter to the next or orders are cancelled by customers; and

in order to fulfill orders at the end of a quarter, we may be forced to deliver our products using air freight which results in increased distribution costs.

We are exposed to credit risk with some of our customers and to credit exposures and currency controls in weakened markets, which could result in material losses.

A significant portion of our sales are on an open credit basis, with typical payment terms of up to 60 days in the United States and, because of local customs or conditions, longer in some international markets. In the past, there have been bankruptcies among our customer base. Although credit losses have not been material to date, future losses, if incurred, could harm our business and have a materially adverse effect on our operating results and financial condition. Also, certain customers who are invoiced in U.S. dollars, such as those based in

Table of Contents

Venezuela, have experienced and may continue to experience difficulties in obtaining U.S. dollar currency due to local currency controls, and therefore may not be able to remit timely payment to us. Additionally, to the degree that the recent turmoil in the credit markets makes it more difficult for some customers to obtain financing or access U.S. dollar currency, our customers' ability to pay could be adversely impacted, which in turn could have a material adverse impact on our business, cash flows, operating results and financial condition.

Fluctuations in currency exchange rates may adversely affect our results of operations.

A substantial portion of our business consists of sales made to customers outside the United States. A portion of the net revenues we receive from such sales is denominated in currencies other than the U.S. dollar. Additionally, portions of our cost of net revenues and our other operating expenses are incurred by our International operations and denominated in local currencies. Fluctuations in the value of these net revenues, costs and expenses as measured in U.S. dollars have affected our results of operations historically, and adverse currency exchange rate fluctuations may have a material impact in the future. Further, changes in exchange rates that strengthen the U.S. dollar could increase the price of our products in the local currencies of the foreign markets we serve. This would result in making our products relatively more expensive than products that are denominated in local currencies, leading to a reduction in sales and profitability in those foreign markets. In addition, our balance sheet reflects non-U.S. dollar denominated assets and liabilities, primarily intercompany balances, which can be adversely affected by fluctuations in currency exchange rates and cause gains and losses that are included in other income (expense), net in our Consolidated Statements of Operations. We have entered into foreign exchange forward contracts and other arrangements intended to hedge our balance sheet exposure to adverse fluctuations in exchange rates. We have also effectively priced our System Solutions in U.S. dollars in certain countries. Nevertheless, these hedging arrangements may not always be effective, particularly in the event of imprecise forecasts of non-U.S. denominated assets and liabilities. Additionally, our efforts to effectively price products in U.S. dollars may have disadvantages since it may affect demand for our products if the local currency strengthens relative to the U.S. dollar. On the other hand, we could be adversely affected where the U.S. dollar strengthens relative to the local currency between the time of a sale and the time we receive payment, which would be collected in the devalued local currency. Accordingly, if there is an adverse movement in exchange rates, we might suffer significant losses and our results of operations may otherwise be adversely affected. Uncertainty in the global market conditions have resulted in and may continue to cause significant volatility in foreign currency exchange rates which could increase these risks. Additionally, hedging programs expose us to risks that could adversely affect our operating results, including the following:

we may be unable to hedge currency risk for some transactions because of a high level of uncertainty or the inability to reasonably estimate our foreign exchange exposures; and

we may be unable to acquire foreign exchange hedging instruments in some of the geographic areas where we do business, or, where these derivatives are available, we may not be able to acquire enough of them to fully offset our exposure.

We depend upon third parties to manufacture our systems and to supply the components necessary to manufacture our products.

We utilize a limited number of third parties to manufacture our hardware products pursuant to our specifications and rely upon these contract manufacturers to produce and deliver products to our customers on a timely basis and at an acceptable cost. Further, a majority of these third party manufacturing activities are concentrated in China. Disruptions to the business or operations of these contract manufacturers, or to their ability to produce the products we require in accordance with our and our customers' requirements, and particularly disruptions to the manufacturing operations in China, could significantly affect our ability to fulfill customer demand on a timely basis which could materially harm our revenues and results of operations. During the fiscal quarter ended January 31, 2010, we shifted additional manufacturing activity to our contract manufacturer's facility in Israel, which increases our dependency on our third party contract manufacturers and could exacerbate these risks, including the risk of disruptions related to our ability and the ability of our contract manufacturers to effectively accommodate the shift in production.

Table of Contents

Components such as application specific integrated circuits, or ASICs, payment processors, wireless modules, modems and printer mechanisms that are necessary to manufacture and assemble our systems are sourced either directly by us or on our behalf by our contract manufacturers from a variety of component suppliers selected by us. Certain of the components are specifically customized for use in our products and are obtained from sole source suppliers on a purchase order basis. In recent periods, we have experienced a tightening in availability of certain semiconductor commodities that are necessary for the manufacture of our products. If our suppliers are unable or unwilling to deliver the quantities that we require, we would be faced with a shortage of critical components. We also experience from time to time an increase in the lead time for delivery of some of our key components. We may not be able to find alternative sources in a timely manner if suppliers of our key components become unwilling or unable to provide us with adequate supplies of these key components when we need them or if they increase their prices. If we are unable to obtain sufficient key required components, or to develop alternative sources if and as required in the future, or to replace our component and factory tooling for our products in a timely manner if they are damaged or destroyed, we could experience delays or reductions in product shipments. This could harm our relationships with our customers and cause our revenues to decline. Even if we are able to secure alternative sources or replace our tooling in a timely manner, our costs could increase.

The government tax benefits that our subsidiaries have previously received or currently receive require them to meet several conditions and may be terminated or reduced in the future, which could require us to pay increased taxes or refund tax benefits received in the past.

Israel

Our principal subsidiary in Israel (formerly Lipman) previously received tax benefits under Israeli law for capital investments that are designated as Approved Enterprises. We received such tax benefits of approximately \$0.4 million in 2009 and \$8.0 million in 2008. Due to our restructuring and contract manufacturing arrangements entered into in fiscal 2010 we will no longer meet the requirements necessary to maintain the tax benefit status in Israel. Effective beginning November 1, 2009, we will be taxed at the full statutory rate in Israel and no future tax benefit will be recorded. Our principal subsidiary in Israel has undistributed earnings of approximately \$179.2 million, the vast majority of which are attributable to Lipman's historic Approved Enterprise programs. As such, these earnings were not subject to Israeli statutory corporate tax at the time they were generated. To the extent that these earnings are distributed to the United States in the future, our Israeli subsidiary would be required to pay corporate tax at the rate ordinarily applicable to such earnings, currently between 12.5% and 36.25% which includes the withholding tax between the U.S. and Israel. We have accrued approximately \$48.7 million for taxes associated with potential future distributions of our Israeli subsidiary's approximately \$179.2 million in earnings.

Singapore

Our principal subsidiary in Singapore has received tax benefits under the Singapore Pioneer Tax Holiday provision. We received such tax benefits of approximately \$4.1 million in 2009 and \$1.2 million in 2008. To maintain our eligibility for these benefits, we must meet certain agreed conditions, including maintaining agreed levels of Singapore employees and incurring and documenting total local business spend levels as agreed with the Singapore Economic Development Board. We are currently renegotiating terms and conditions for 2008 and subsequent years, including deferral or revision of certain of these conditions. Although we expect to maintain our tax exempt status, if we are not able to achieve or maintain employment levels and total local business spend levels acceptable to the Singapore Economic Development Board, then all income in Singapore could be taxed at the statutory rate of 17% instead of the agreed Pioneer Tax Holiday rate of 0%, which would adversely affect our results of operations and cash flows.

Table of Contents

We have significant operations in Israel and therefore our results of operations may be adversely affected by political or economic instability or military operations in or around Israel.

We have offices and personnel in Israel. In addition, a number of our products are manufactured by our contract manufacturer in facilities located in Israel and many of our suppliers are located in Israel. Therefore, political, economic, and military conditions in Israel directly affect our operations. The future of peace efforts between Israel and its Arab neighbors remains uncertain. Any armed conflicts or further political instability in the region is likely to negatively affect business conditions and materially harm our results of operations. Furthermore, several countries continue to restrict or ban business with Israel and Israeli companies. These restrictive laws and policies may seriously limit our ability to make sales in those countries.

In addition, many employees in Israel are obligated to perform at least 30 days and up to 40 days, depending on rank and position, of military reserve duty annually and are subject to being called for active duty under emergency circumstances. If a military conflict or war arises, these individuals could be required to serve in the military for extended periods of time. Our operations in Israel could be disrupted by the absence for a significant period of one or more key employees or a significant number of other employees due to military service. Any disruption in our operations in Israel could materially adversely affect our business.

We depend on our contract manufacturing facility in Israel. If operations at these facilities are interrupted for any reason, there could be a material adverse effect on our results of operations.

We recently transferred the manufacture of NURIT products from an in-house facility to a contract manufacturer with operations in Israel, which manufactures products and warehouses components and finished goods inventories. Disruption of the manufacturing process of our contract manufacturer or damage to their facility, whether as a result of fire, natural disaster, act of war, terrorist attack, or otherwise, could materially affect our ability to deliver products on a timely basis and could materially adversely affect our results of operations. We also assemble some of our products in Brazil. To the extent products are manufactured by third parties in additional countries, we may become more dependent on third-party manufacturers to produce and deliver products sold in these markets on a timely basis and at an acceptable cost.

We may pursue complementary acquisitions and strategic investments, which will involve numerous risks. We may not be able to address these risks without substantial expense, delay or other operational or financial problems.

We may seek to acquire or make investments in related businesses, technologies, or products in the future. Acquisitions or investments involve various risks, such as:

the difficulty of integrating the technologies, operations, and personnel of the acquired business, technology or product;

the potential disruption of our ongoing business, including the diversion of management attention;

the possible inability to obtain the desired financial and strategic benefits from the acquisition or investment;

loss of customers;

the risk that increasing complexity inherent in operating a larger business may impact the effectiveness of our internal controls and adversely affect our financial reporting processes;

assumption of unanticipated liabilities;

the loss of key employees of an acquired business; and

the possibility of our entering markets in which we have limited prior experience. Future acquisitions and investments could also result in substantial cash expenditures, potentially dilutive issuance of our equity securities and incurrence of additional debt, contingent liabilities and amortization

Table of Contents

expenses related to other intangible assets that could adversely affect our business, operating results, and financial condition. We depend on the retention and performance of existing management and employees of acquired businesses for the day-to-day management and future operating results of these businesses.

We have experienced rapid growth in recent years, and if we cannot adequately manage our growth, our results of operations will suffer.

We have experienced rapid growth in recent years in our operations, both internally and from acquisitions. We cannot be sure that we have made adequate allowances for the costs and risks associated with our expansion, or that our systems, procedures, and managerial controls will be adequate to support further expansion in our operations. Any delay in implementing, or transitioning to, new or enhanced systems, procedures, or controls to accommodate the requirements of our business and operations and to effectively integrate acquired operations may adversely affect our ability to manage our product inventory and record and report financial and management information on a timely and accurate basis. If we are unable to successfully manage expansion, our results of operations may be adversely affected.

Our quarterly operating results may fluctuate significantly as a result of factors outside of our control, which could cause the market price of our common stock to decline.

We expect our revenues and operating results to vary from quarter to quarter. As a consequence, our operating results in any single quarter may not meet the expectations of securities analysts and investors, which could cause the price of our common stock to decline. Factors that may affect our operating results include:

the type, timing, and size of orders and shipments;

demand for and acceptance of our new product offerings;

customers' willingness to maintain inventories and/or increased overall channel inventories held by customers in a particular quarter;

delays in the implementation and delivery of our products and services, which may impact the timing of our recognition of revenues;

variations in product mix and cost during any period;

development of new relationships and penetration of new markets and maintenance and enhancement of existing relationships with customers and strategic partners;

component supply, manufacturing, or distribution difficulties;

deferral of customer contracts in anticipation of product or service enhancements;

timing of commencement, implementation, or completion of major implementation projects;

timing of governmental, statutory and industry association requirements;

Edgar Filing: VeriFone Holdings, Inc. - Form 10-Q

the relative mix of North America and International net revenues;

fluctuations in currency exchange rates;

the fixed nature of many of our expenses; and

industry and economic conditions, including competitive pressures and inventory obsolescence.

In particular, differences in relative growth rates between our businesses in North America and internationally may have a significant effect on our operating results, particularly our reported gross profit percentage, in any individual quarter, with International sales carrying lower margins.

Table of Contents

In addition, we have in the past and may continue to experience periodic variations in sales to our key vertical and international markets. These periodic variations occur throughout the year and may lead to fluctuations in our quarterly operating results depending on the impact of any given market during that quarter and could lead to volatility in our stock price.

We are party to a number of lawsuits and we may be named in additional litigation, all of which are likely to require significant management time and attention and expenses and may result in an unfavorable outcome which could have a material adverse effect on our business, financial condition, and results of operations.

We are currently a party in several litigation proceedings. For example, in connection with the restatements of our historical interim financial statements for fiscal year 2007, a number of securities class action complaints were filed against us and certain of our officers, and purported derivative actions have also been filed against certain of our current and former directors and officers. For a description of our material pending litigation, please see Part II Item 1. *Legal Proceedings* of this Form 10-Q.

The amount of time and resources required to resolve these lawsuits is unpredictable, and defending ourselves is likely to divert management's attention from the day-to-day operations of our business, which could adversely affect our business, financial condition, and results of operations. In addition, an unfavorable outcome in such litigation or a decision by us to settle such lawsuits to avoid the distraction and expense of continued litigation even if we deem the claims to be without merit would have a material adverse effect on our business, financial condition, and results of operations.

Our insurance may not be sufficient to cover our costs for defending these actions or paying any damages in the event of an unfavorable outcome. In addition, we may be obligated to indemnify (and advance legal expenses to) both current and former officers, employees and directors in connection with the securities class action and derivative action matters. We currently hold insurance policies for the benefit of our directors and officers, although our insurance coverage may not be sufficient in some or all of these matters. Furthermore, our insurance carriers may seek to deny coverage in some or all of these matters, in which case we may have to fund the indemnification amounts owed to such directors and officers ourselves.

We are subject to the risk of additional litigation and regulatory proceedings or actions in connection with the restatement. We have responded to inquiries and provided information and documents related to the restatement to the SEC, the U.S. Department of Justice, the New York Stock Exchange, and the Chicago Board Options Exchange. We were the subject of a Wells Notice from the SEC stating that the Staff intends to recommend that the SEC bring a civil injunctive action against us, alleging violations of the federal securities laws arising from the restatement. See additional discussion under Part II Item 1. *Legal Proceedings* of this Form 10-Q. Although we recently settled this matter with the SEC, additional regulatory inquiries may also be commenced by other U.S. federal, state or foreign regulatory agencies. In addition, we may in the future be subject to additional litigation or other proceedings or actions arising in relation to the restatement of our historical interim financial statements. Litigation and any potential regulatory proceeding or action may be time consuming, expensive and distracting from the conduct of our business. The adverse resolution of any specific lawsuit or any potential regulatory proceeding or action could have a material adverse effect on our business, financial condition, and results of operations.

These litigation proceedings could result in substantial additional costs and expenses and adversely affect our cash flows, and may adversely affect our business, financial condition, and results of operations. For example, we have incurred substantial expenses for legal, accounting, tax and other professional services in connection with the investigation by the audit committee of our board of directors, our internal review of our historical financial statements, the preparation of the restated financial statements, inquiries from government agencies, the related litigation, the amendments to our credit agreement as a result of our failure to timely file our Exchange Act reports with the SEC and other current litigation matters. We expect to continue to incur significant expenses in connection with these matters. Many members of our senior management team and our

Table of Contents

Board of Directors have been and will be required to devote a significant amount of time to the litigation related to the restatement. In addition, certain of these individuals are named defendants in the litigation related to the restatement. Defending these actions may require significant time and attention from them. If our senior management is unable to devote sufficient time in the future developing and pursuing our strategic business initiatives and running ongoing business operations, there may be a material adverse effect on our business, financial condition and results of operations.

We may be subject to additional impairment charges due to potential declines in the fair value of our assets.

As a result of our acquisitions, particularly that of Lipman in November 2006, we have recorded significant goodwill and intangible assets on our balance sheet. We test goodwill and intangible assets for impairment on a periodic basis as required, and whenever events or changes in circumstances indicate that the carrying value may not be recoverable. The events or changes that could require us to test our goodwill and intangible assets for impairment include a reduction in our stock price and market capitalization and changes in our estimated future cash flows, as well as changes in rates of growth in our industry or in any of our reporting units. In the fourth quarter of 2008, we recorded an impairment charge of \$289.1 million for goodwill and developed technology intangible assets due to lower revenue expectations in light of current operating performance and future operating expectations. During the first fiscal quarter of 2009, we concluded that the carrying amount of the North America and Asia reporting units exceeded their implied fair values and recorded an estimated impairment charge of \$178.3 million. We finalized the goodwill evaluation process and recorded a \$2.7 million reduction of impairment charge during the second quarter of fiscal year 2009. The final goodwill impairment charge was \$175.5 million as of April 30, 2009. We have not recorded any further impairment charges since the quarter ended April 30, 2009.

We will continue to evaluate the carrying value of our remaining goodwill and intangible assets and if we determine in the future that there is a potential further impairment in any of our reporting units, we may be required to record additional charges to earnings which could materially adversely affect our financial results and could also materially adversely affect our business. The process of evaluating the potential impairment of goodwill and intangible assets is subjective and requires significant judgment at many points during the analysis and includes estimates of our future cash flows attributable to a reporting unit or asset over its estimated remaining useful life. Any changes in our estimates, such as our estimates of the future cash flows attributable to a reporting unit or asset, or a longer or more significant decline in our market capitalization or the macroeconomic environment, could require us to record additional impairment charges which could materially adversely affect our financial results. See Item 2. *Management's Discussion and Analysis of Financial Condition and Results of Operations* and Note 2. *Goodwill and Purchased Intangible Assets* in the Notes to the Condensed Consolidated Financial Statements for additional information related to impairment of goodwill and intangible assets.

Our North American and International operations are not equally profitable, which may promote volatility in our earnings and may adversely impact future growth in our earnings.

Our International sales of System Solutions have tended to carry lower average selling prices and therefore have lower gross margins than our sales in North America. As a result, if we successfully execute plans to expand our International sales, any improvement in our results of operations will likely not be as favorable as an expansion of similar magnitude in the United States and Canada. In addition, we are unable to predict for any future period our proportion of revenues that will result from International sales versus sales in North America. Variations in this proportion from period to period may lead to volatility in our results of operations which, in turn, may depress the trading price of our common stock.

Table of Contents

We may accumulate excess or obsolete inventory that could result in unanticipated price reductions and write-downs and adversely affect our financial condition.

In formulating our solutions, we have focused our efforts on providing to our customers solutions with higher levels of functionality, which requires us to develop and incorporate cutting edge and evolving technologies. This approach tends to increase the risk of obsolescence for products and components we hold in inventory and may compound the difficulties posed by other factors that affect our inventory levels, including the following:

the need to maintain significant inventory of components that are in limited supply;

buying components in bulk for the best pricing;

responding to the unpredictable demand for products;

cancellation of customer orders; and

responding to customer requests for quick delivery schedules.

The accumulation of excess or obsolete inventory has in the past resulted in and may in future periods result in price reductions and inventory write-downs and scrap, which could adversely affect our business, results of operations and financial condition. For example, for the fiscal year ended October 31, 2009, we incurred costs for obsolete inventory, scrap, and purchase commitments for excess components at contract manufacturers of \$23.0 million due to changing demand we experienced in fiscal year 2009 as a result of the severe deterioration in the macroeconomic environment. See also Part I, Item 2. *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

If we do not accurately forecast customer demand and effectively manage our product mix and inventory levels, we may lose sales from having too few or the wrong mix of products or incur costs associated with excess inventory.

If we improperly forecast demand for our products we could end up with too many products and be unable to sell the excess inventory in a timely manner, if at all, or, alternatively we could end up with too few products and not be able to satisfy demand. This problem is exacerbated because our attempt to closely match inventory levels with product demand leaving limited margin for error, and we generally receive a significant volume of customer orders towards the end of each fiscal quarter which leaves us little room to adjust inventory mix to match demand. Also, during the transition from an existing product to a new replacement product, we must accurately predict the demand for the existing and the new product. Our inability to properly manage our inventory levels could cause us to incur increased expenses associated with writing off excessive or obsolete inventory or lose sales or have to ship products by air freight to meet immediate demand incurring incremental freight costs above sea freight costs, a preferred method, and suffering a corresponding decline in gross margins. If we do not accurately predict demand, we could also incur increased expenses associated with binding commitments to certain third party contract manufacturers which would negatively impact our gross margins and operating results. See Note 12. *Commitments and Contingencies* in the Notes to the Condensed Consolidated Financial Statements of this Form 10-Q. During times of economic uncertainty, such as that of the current global economic environment, it becomes more difficult to accurately forecast demand and manage our inventory levels. Deteriorating market conditions have in the past and can in future periods cause us to incur additional costs associated with excess and obsolete inventory, scrap and excess inventory held by our contract manufacturers. For example, we incurred approximately \$23.0 million of such costs for the fiscal year ended October 31, 2009.

Our proprietary technology is difficult to protect and unauthorized use of our proprietary technology by third parties may impair our ability to compete effectively.

We may not be able to protect our proprietary technology, which could enable competitors to develop services that compete with our own. We rely on copyright, trademark, and trade secret laws, as well as

Table of Contents

confidentiality, licensing and other contractual arrangements to establish and protect the proprietary aspects of our solutions. Institution of legal proceedings to enforce our intellectual property rights could be costly and divert the efforts and attention of our management and technical personnel from other business operations. In addition, there can be no assurance that such proceedings would be determined in our favor. We do not have patent protection for certain important aspects of our current solutions. The laws of some countries in which we sell our solutions and services may not protect software and intellectual property rights to the same extent as the laws in the United States. If we are unable to prevent misappropriation of our technology, competitors may be able to use and adapt our technology. Our failure to protect our technology could diminish our competitive advantage and cause us to lose customers to competitors.

Our business may suffer if we are sued for infringing the intellectual property rights of third parties, or if we are unable to obtain rights to third-party intellectual property on which we depend.

Third parties have in the past asserted and may in the future assert claims that our system solutions infringe their proprietary rights. Such infringement claims, even if meritless, may cause us to incur significant costs in defending those claims. We may be required to discontinue using and selling any infringing technology and services, to expend resources to develop non-infringing technology or to purchase licenses or pay royalties for other technology. Similarly, we depend on our ability to license intellectual property from third parties. These or other third parties may become unwilling to license to us on acceptable terms intellectual property that is necessary to our business. In either case, we may be unable to acquire licenses for other technology on reasonable commercial terms or at all. As a result, we may find that we are unable to continue to offer the solutions and services upon which our business depends.

We have received, and have currently pending, third-party claims and may receive additional notices of such claims of infringement in the future. Infringement claims may cause us to incur significant costs in defending those claims or to settle claims to avoid costly or protracted litigation even if we deem those claims to be without merit. For example, in September 2007, SPA Syspatronic AG commenced an infringement action against us and others and in March 2008, Cardsoft, Inc. and Cardsoft (Assignment for the Benefit of Creditors), LLC commenced an infringement action against us and others. Infringement claims are expensive and time consuming to defend, regardless of the merits or ultimate outcome. Similar claims may result in additional protracted and costly litigation. There can be no assurance that we will continue to prevail in any such actions or that any license required under any such patent or other intellectual property would be made available on commercially acceptable terms, if at all. See Note 12. *Commitments and Contingencies* in the Notes to the Condensed Consolidated Financial Statements of this Form 10-Q.

We face litigation and tax assessment risks that could force us to incur substantial defense costs and could result in damages awards against us that would negatively impact our business.

As described in Note 12. *Commitments and Contingencies* in the Notes to the Condensed Consolidated Financial Statements of this Form 10-Q, there are a number of pending litigation and tax assessment matters each of which may be time-consuming to resolve, expensive to defend, and disruptive to normal business operations. The outcome of litigation and tax assessments is inherently difficult to predict. An unfavorable resolution of any specific lawsuit or tax assessment could have a material adverse effect on our business, results of operations and financial condition.

We may not be able to attract, integrate, manage, and retain qualified personnel.

Our success depends to a significant degree upon the continued contributions of our key senior management, engineering, sales and marketing, and manufacturing personnel, many of whom would be difficult to replace. In addition, our future success also depends on our ability to attract, integrate, manage, and retain highly skilled employees throughout our businesses. Competition for some of these personnel is intense, and in the past, we have had difficulty hiring employees in our desired time frame, particularly qualified finance and accounting professionals. We may be unsuccessful in attracting and retaining personnel. The loss of the services

Table of Contents

of any of our key personnel, the inability to attract or retain qualified personnel in the future, or delays in hiring required personnel, particularly engineers and sales personnel, could make it difficult for us to manage our business and meet key objectives, such as timely product introductions.

During the last several fiscal years, we implemented work force reduction plans reducing the number of employees and contractors in certain areas due to redundancies and shifting business needs. These reductions have also required that we reassign certain employee duties. Workforce reductions and job reassignments could negatively affect employee morale, and make it difficult to motivate and retain our remaining employees and contractors, which would affect our ability to deliver our products in a timely fashion and otherwise negatively affect our business.

Shipments of electronic payment systems may be delayed by factors outside of our control, which can harm our reputation and our relationships with our customers.

The shipment of payment systems requires us or our manufacturers, distributors, or other agents to obtain customs or other government certifications and approvals, and, on occasion, to submit to physical inspection of our systems in transit. Failure to satisfy these requirements, and the very process of trying to satisfy them, can lead to lengthy delays in the delivery of our solutions to our direct or indirect customers. Delays and unreliable delivery by us may harm our reputation in the industry and our relationships with our customers.

Force majeure events, such as terrorist attacks, other acts of violence or war, political instability, and health epidemics may adversely affect us.

Terrorist attacks, war and international political instability, along with health epidemics may disrupt our ability to generate revenues. Such events may negatively affect our ability to maintain sales revenues and to develop new business relationships. Because a substantial and growing part of our revenues is derived from sales and services to customers outside of the United States and we have our electronic payment systems manufactured outside the U.S., terrorist attacks, war and international political instability anywhere may decrease international demand for our products and inhibit customer development opportunities abroad, disrupt our supply chain and impair our ability to deliver our electronic payment systems, which could materially adversely affect our net revenues or results of operations. Any of these events may also disrupt global financial markets and precipitate a decline in the price of our common stock.

Natural or manmade disasters, business interruptions and health epidemics could delay our ability to receive or ship our products, or otherwise disrupt our business.

Our worldwide operations could be subject to earthquakes, power shortages, telecommunications failures, water shortages, tsunamis, floods, hurricanes, typhoons, fires, extreme weather conditions, health epidemics and other natural or manmade disasters or business interruptions. The occurrence of any of these business disruptions could seriously harm our revenue and financial condition and increase our costs and expenses. Our corporate headquarters, and a portion of our research and development activities, are located in California, and other critical business operations and some of our suppliers are located in California and Asia, near major earthquake faults. Certain key servers and information systems are located in Florida, which has in the past experienced major hurricanes and similar extreme weather. Although our office facilities have not been impacted by the flooding, power outages or other effects of such storm systems, any disruption of our Florida operations could materially affect our operations and harm our business. If our manufacturers or warehousing facilities are disrupted or destroyed, we would be unable to distribute our products on a timely basis, which could harm our business. Moreover, if our computer information systems or communication systems, or those of our vendors or customers, are subject to hacker attacks or other disruptions, our business could suffer. We have not established a comprehensive disaster recovery plan. Our back-up operations may be inadequate and our business interruption insurance may not be enough to compensate us for any losses that may occur. A significant business interruption could result in losses or damages and harm our business. For example, much of our order fulfillment process is

Table of Contents

automated and the order information is stored on our servers. If our computer systems and servers go down even for a short period at the end of a fiscal quarter, our ability to recognize revenue would be delayed until we were again able to process and ship our orders, which could harm our revenues for that quarter and cause our stock price to decline significantly.

While we believe we comply with environmental laws and regulations, we are still exposed to potential risks associated with environmental laws and regulations.

We are subject to other legal and regulatory requirements, including a European Union directive that places restrictions on the use of hazardous substances (RoHS) in electronic equipment, a European Union directive on Waste Electrical and Electronic Equipment (WEEE), and the environmental regulations promulgated by China's Ministry of Information Industry (China RoHS). RoHS sets a framework for producers obligations in relation to manufacturing (including the amounts of named hazardous substances contained in products sold) and WEEE sets a framework for treatment, labeling, recovery, and recycling of electronic products in the European Union which may require us to alter the manufacturing of the physical devices that include our solutions and/or require active steps to promote recycling of materials and components. In addition, similar legislation could be enacted in other jurisdictions, including in the United States. If we do not comply with the RoHS directives, WEEE directives and China RoHS, we may suffer a loss of revenue, be unable to sell in certain markets or countries, be subject to penalties and enforced fees, and/or suffer a competitive disadvantage. Furthermore, the costs to comply with RoHS, WEEE and China RoHS, or with current and future environmental and worker health and safety laws may have a material adverse effect on our business, results of operations and financial condition.

Risks Related to Our Industry

Our markets are highly competitive and subject to price erosion.

The markets for our system solutions and services are highly competitive, and we have been subject to price pressures. Competition from manufacturers, distributors, or providers of products similar to or competitive with our system solutions or services could result in price reductions, reduced margins, and a loss of market share or could render our solutions obsolete. For example, First Data Corporation, a leading provider of payments processing services, and our largest customer, has developed and continues to develop a series of proprietary electronic payment systems for the U.S. market.

We expect to continue to experience significant and increasing levels of competition in the future. We compete with suppliers of cash registers that provide built-in electronic payment capabilities and producers of software that facilitates electronic payment over the internet, as well as other manufacturers or distributors of electronic payment systems. We must also compete with smaller companies that have been able to develop strong local or regional customer bases. In certain foreign countries, some competitors are more established, benefit from greater name recognition and have greater resources within those countries than we do. Further, in certain international markets, such as Brazil, we may face competition from refurbished units which could result in reduced demand and pricing pressures.

We must adhere to industry and government regulations and standards and therefore sales will suffer if we cannot comply with them.

Our system solutions must meet industry standards imposed by EMVCo LLC, a payment systems standards setting organization, Visa, MasterCard, and other credit card associations and standard setting organizations. New standards are continually being adopted or proposed as a result of worldwide anti-fraud initiatives, the increasing need for system compatibility and technology developments such as wireless and wireline IP communication. Our solutions also must comply with government regulations, including those imposed by telecommunications authorities and independent standards groups worldwide regarding emissions, radiation, and connections with telecommunications and radio networks. We cannot be sure that we will be able to design our solutions to comply with future standards or regulations on a timely basis, if at all. Compliance with these

Table of Contents

standards could increase the cost of developing or producing our solutions. New products designed to meet any new standards need to be introduced to the market and ordinarily need to be certified by the credit card associations and our customers before being purchased. The certification process is costly and time consuming and increases the amount of time it takes to sell our products. Our business and financial condition could be adversely affected if we cannot comply with new or existing industry standards, or obtain or retain necessary regulatory approval or certifications in a timely fashion, or if compliance results in increasing the cost of our products. Selling products that are non-compliant may result in fines against us or our customers, which we may be liable to pay. In addition, even if our products are designed to be compliant, compliance with certain security standards is determined based on the merchant's or service provider's network environment in which our systems are installed and, therefore, is dependent upon a number of additional factors such as proper installation of the components of the environment including our systems, compliance of software and system components provided by other vendors, implementation of compliant security processes and business practices and adherence to such processes and practices. Our business and financial condition could be adversely affected if we do not comply with new or existing industry standards, or obtain or retain necessary regulatory approval or certifications in a timely fashion, or if compliance results in increasing the cost of our products.

If we do not continually enhance our existing solutions and develop and market new solutions and enhancements, our net revenues and income will be adversely affected.

The market for electronic payment systems is characterized by:

rapid technological change;

frequent product introductions and enhancements;

evolving industry and government performance and security standards; and

changes in customer and end-user preferences or requirements.

Because of these factors, we must continually enhance our existing solutions and develop and market new solutions. These efforts require significant investment in research and development as well as increased costs of manufacturing and distributing our system solutions, and we may not necessarily be able to increase or maintain prices to account for these costs.

We cannot be sure that we will successfully complete the development and introduction of new solutions or enhancements or that our new solutions will be accepted in the marketplace. We may also fail to develop and deploy new solutions and enhancements on a timely basis. In either case, we may lose market share to our competitors, and our net revenues and results of operations could suffer.

Risks Related to Our Capital Structure

Our secured credit facility contains restrictive and financial covenants and, if we are unable to comply with these covenants, we will be in default. A default could result in the acceleration of our outstanding indebtedness, which would have an adverse effect on our business and stock price.

On October 31, 2006, our principal subsidiary, VeriFone, Inc., entered into a secured credit agreement consisting of a Term B Loan facility of \$500.0 million and a revolving credit facility permitting borrowings of up to \$40.0 million (the "Credit Facility"). The proceeds from the Term B loan were used to repay all outstanding amounts relating to an existing senior secured credit agreement, pay certain transaction costs, and partially fund the cash consideration in connection with the acquisition of Lipman on November 1, 2006. Through January 31, 2010, we had repaid an aggregate of \$275.0 million, leaving a Term B Loan balance of \$225.0 million at January 31, 2010.

Our Credit Facility contains customary covenants that require our subsidiaries to maintain certain specified financial ratios and restrict their ability to make certain distributions with respect to their capital stock, prepay other debt, encumber their assets, incur additional indebtedness, make capital expenditures above specified

Table of Contents

levels, engage in certain business combinations, or undertake various other corporate activities. Therefore, as a practical matter, these covenants restrict our ability to engage in or benefit from such activities. In addition, we have, in order to secure repayment of our Credit Facility, pledged substantially all of our assets and properties. This pledge may reduce our operating flexibility because it restricts our ability to dispose of these assets or engage in other transactions that may be beneficial to us.

If we are unable to comply with the covenants in our Credit Facility, we will be in default, which could result in the acceleration of our outstanding indebtedness. In addition, if our leverage exceeds a certain level set out in our Credit Facility, a portion of our excess cash flows must be used to pay down our outstanding debt. If acceleration occurs, we may not be able to repay our debt and we may not be able to borrow sufficient additional funds to refinance our debt. The U.S. credit markets have contracted significantly and as a result we may not be able to obtain additional financing on acceptable terms, or at all. If we were to default in performance under the Credit Facility, we may pursue an amendment or waiver of the Credit Facility with our existing lenders, but there can be no assurance that the lenders would grant such an amendment or waiver and, in light of current credit market conditions, any such amendment or waiver requested is likely to be on terms, including additional fees, as well as increased interest rates and other more stringent terms and conditions that would be materially disadvantageous to us. For example, as a result of the delay in our financial reports for the 2007 fiscal year and the first two fiscal quarters of 2008, we were required to obtain amendments to our Credit Facility that resulted in an increase in the interest rate payable on our term loan and revolving commitments, as well as increases in the commitment fee for unused revolving commitments and letter of credit fees. We also paid the consenting lenders amendment fees in connection with the amendments. We expect that in light of current market conditions any lender's fees or other terms and conditions for a covenant waiver or amendment would be substantially more costly to us today than the cost we incurred for credit agreement amendments in 2008.

The conditions of the U.S. and international capital markets may adversely affect our ability to draw on our revolving credit facility as well as have an adverse effect on other financial transactions.

Lehman Commercial Paper, Inc. ("Lehman CP") was a lender under our revolving credit facility with a commitment of \$15 million out of the \$40 million facility. As a result of Lehman CP's filing of a voluntary Chapter 11 bankruptcy petition in October 2008, we reduced the revolving credit facility by its commitment.

In addition, the filing by Lehman Brothers Holdings Inc. ("Lehman Brothers") of a voluntary Chapter 11 bankruptcy petition constituted an event of default under our convertible note hedge transaction with Lehman Brothers OTC Derivatives Inc. ("Lehman Derivatives"), giving us the immediate right to terminate the transaction and entitling us to claim reimbursement for the loss incurred in terminating and closing out the transaction. On September 21, 2008, we delivered a notice of termination to Lehman Derivatives and claimed reimbursement for the loss incurred in termination and close out of the transaction. To date we have not recovered any amounts claimed from Lehman Derivatives. There can be no assurance we will receive any reimbursement of the losses incurred and we could incur significant costs to replace this hedge transaction if we elect to do so. These replacement costs may not be fully offset by any proceeds recoverable from Lehman Brothers and Lehman Derivatives (which has also filed a voluntary Chapter 11 bankruptcy petition) following our termination of the convertible note hedge transaction with Lehman Derivatives.

If other financial institutions that have extended credit commitments to us or have entered into hedge, insurance or similar transactions with us are adversely affected by the conditions of the U.S. and international capital markets, they may become unable to fund borrowings under their credit commitments to us or otherwise fulfill their obligations under the relevant transactions, which could have a material and adverse impact on our financial condition and our ability to borrow additional funds, if needed, for working capital, capital expenditures, acquisitions and other corporate purposes.

Table of Contents

Our indebtedness and debt service obligations under our Credit Facility may adversely affect our cash flow, cash position, and stock price.

We intend to fulfill our debt service obligations under our Credit Facility from existing cash, investments and operations. Principal payments on the Term B Loan are due in equal quarterly instalments over the term with a maturity date of October 31, 2013. In the future, if we are unable to generate or raise additional cash sufficient to meet these obligations and need to use more of our existing cash than planned or to liquidate investments in order to fund these obligations, we may have to delay or curtail the development and/or the sales and marketing of new payment systems.

Our indebtedness could have significant additional negative consequences, including, without limitation:

requiring the dedication of a significant portion of our expected cash flow to service the indebtedness, thereby reducing the amount of expected cash flow available for other purposes, including capital expenditures;

increasing our vulnerability to general adverse economic conditions;

limiting our ability to obtain additional financing; and

placing us at a possible competitive disadvantage to less leveraged competitors and competitors that have better access to capital resources.

Additionally, if we are required to refinance or raise additional cash to settle our existing indebtedness on or prior to its maturity, our ability to successfully achieve such objective is dependent on a number of factors, including but not limited to our business outlook, projected financial performance, general availability of corporate credit, and market demand for our securities offerings.

Some provisions of our certificate of incorporation and bylaws may delay or prevent transactions that many stockholders may favor.

Some provisions of our certificate of incorporation and bylaws may have the effect of delaying, discouraging or preventing a merger or acquisition that our stockholders may consider favorable, including transactions in which stockholders might receive a premium for their shares. These provisions include:

authorization of the issuance of blank check preferred stock without the need for action by stockholders;

the removal of directors or amendment of our organizational documents only by the affirmative vote of the holders of two-thirds of the shares of our capital stock entitled to vote;

provision that any vacancy on the board of directors, however occurring, including a vacancy resulting from an enlargement of the board, may only be filled by vote of the directors then in office;

inability of stockholders to call special meetings of stockholders, although stockholders are permitted to act by written consent; and

advance notice requirements for board nominations and proposing matters to be acted on by stockholders at stockholder meetings.

Our share price has been volatile and we expect that the price of our common stock may continue to fluctuate substantially.

Edgar Filing: VeriFone Holdings, Inc. - Form 10-Q

Our stock price has fluctuated substantially since our initial public offering in 2005 and more recently since the announcement of our anticipated restatement in December 2007 and during the recent turmoil in the worldwide financial markets. In addition to fluctuations related to Company-specific factors, broad market and

Table of Contents

industry factors may adversely affect the market price of our common stock, regardless of our actual operating performance. Factors that could cause fluctuations in our stock price may include, among other things:

actual or anticipated variations in quarterly operating results;

changes in financial estimates by us or by any securities analysts who might cover our stock, or our failure to meet the estimates made by securities analysts;

changes in the market valuations of other companies operating in our industry;

announcements by us or our competitors of significant acquisitions, strategic partnerships or divestitures;

additions or departures of key personnel; and

sales or purchases of our common stock, including sales or purchases of our common stock by our directors and officers or by our principal stockholders.
