- * Cash dividend yield is the percentage that is derived by dividing cash dividend by the arithmetic average of the daily closing prices of our common stock during the one-week period ending two trading days prior to the closing of the register of shareholders for the purpose of determining the shareholders entitled to receive annual dividends.

2. Business**A. Business overview**

We were incorporated in February 1985 under the laws of the Republic of Korea. LG Electronics and LG Semicon transferred their respective LCD business to us in 1998, and since then our business has been focused on the research, development, manufacture and sale of display panels applying technologies such as TFT-LCD, LTPS-LCD and OLED.

As of December 31, 2009, we operated fabrication facilities and module facilities in Paju and Gumi, Korea, an OLED facility in Gumi, Korea and a LCD research center in Paju, Korea. We have also established sales subsidiaries in the United States, Europe and Asia.

As of December 31, 2009, our business consisted of (i) the manufacture and sale of LCD panels, (ii) the manufacture and sale of OLED panels and (iii) the manufacture and sale of television sets that utilize our LCD panels. Because our OLED business represents only an extremely small part of our overall business, only our LCD business has been categorized as a reporting business segment. In addition, because our television sales business is operated by our affiliated company, we have not categorized our television sales business as a separate reporting business segment.

B. Industry*(1) Industry characteristics and growth potential*

TFT-LCD technology is one of the widely used technologies in the manufacture of flat panel displays and the demand for flat panel displays is growing. The flat panel display industry is characterized by entry barriers due to rapidly evolving technology, capital-intensive characteristics, and the significant investments required to achieve economies of scale, among other factors. There is intense competition between the players within the industry and production capacity in the industry, including ours, is being continually increased.

Table of Contents

The demand for LCD panels for notebook computers and desktop monitors has grown, to a degree, in tandem with the growth in the information technology industry. The demand for LCD panels for television sets has been growing as digital broadcasting is becoming more common and as LCD television has come to play an important role in the digital display market. In addition, markets for small- to medium-sized LCD panels, such as mobile phones, P-A/V, medical applications, automobile navigation systems and e-books, among others, have shown continued growth.

The average selling prices of LCD panels may continue to decline with time irrespective of general business cycles as a result of, among other factors, technology advancements and cost reductions.

(2) Cyclical

The TFT-LCD business is highly cyclical. In spite of the increase in demand for products, this industry has experienced periodic volatility caused by imbalances between supply and demand due to capacity expansion within the industry.

Intense competition and expectations of demand growth may lead panel manufacturers to invest in manufacturing capacity on similar schedules, resulting in a surge in capacity when production is ramped up at new fabrication facilities.

During such surges in capacity growth, the average selling prices of display panels may decline. Conversely, demand surges and fluctuations in the supply chain may lead to price increases.

(3) Market Condition

The TFT-LCD industry is highly competitive due largely to additional capacity expansion driven by TFT-LCD panel makers.

Most TFT-LCD panel makers are located in Asia.

- a. Korea: LG Display, Samsung Electronics (including a joint venture between Samsung Electronics and Sony Corporation), Hydis Technologies
- b. Taiwan: AU Optronics, Chi Mei Optoelectronics, CPT, Hannstar etc.
- c. Japan: Sharp, IPS-Alpha, etc.
- d. China: SVA-NEC, BOE-OT, etc.

(4) Market shares

Our worldwide market share for large-sized TFT-LCD panels (10-inch or larger) based on revenue is as follows:

| | 2009 | 2008 | 2007 |
|-------------------------------|-------------|-------------|-------------|
| Panels for Notebook Computers | 30.3%** | 29.6%** | 28.5% |
| Panels for Monitors | 23.9% | 17.7% | 15.6% |
| Panels for Televisions | 24.4% | 19.4% | 22.0% |
| Total | 25.2% | 20.6% | 20.4% |

Table of Contents

** Includes panels for netbooks.

(5) Competitiveness

Our ability to compete successfully depends on factors both within and outside our control, including product pricing, our relationship with customers, successful and timely investment and product development, cost competitiveness, success in marketing to our end-brand customers, component and raw material supply costs, foreign exchange rates and general economic and industry conditions.

In order to compete effectively, it is critical to be cost competitive and maintain stable and long-term relationships with customers which will enable us to be profitable even in a buyer's market.

A substantial portion of our sales is attributable to a limited number of end-brand customers and their designated system integrators. The loss of these end-brand customers, as a result of customers entering into strategic supplier arrangements with our competitors or otherwise, would result in reduced sales.

Developing new products and technologies that can be differentiated from those of our competitors is critical to the success of our business. It is important that we take active measures to protect our intellectual property internationally by obtaining patents and undertaking monitoring activities in our major markets. It is also necessary to recruit and retain experienced key managerial personnel and skilled line operators.

We reinforced our position as a leader in LCD technology by developing an ultra slim LCD module for 47-inch LCD televisions that is sturdy and provides high-quality images, a large three-dimensional multi-vision LCD panel which does not require special viewing glasses, one of the world's most energy efficient LCD panels for 32-inch LCD televisions that uses less than 1 watt per inch, a 47-inch digital photo television which can utilize its standby power to display digital pictures and the world's first Trumotion 480Hz LCD panel which refreshes 480 frames per second to substantially decrease afterimage and provide viewers with high-quality images that cause less eye fatigue.

Moreover, we formed strategic alliances or entered into long-term sales contracts with major global firms such as Dell, Hewlett Packard and Kodak of the United States and Japan's Toshiba, among others, to secure customers and expand partnerships for technology development. In January 2009, we entered into a long term supply agreement with Apple Inc. to supply display panels to Apple Inc. for five years.

C. New business

In October 2007, we decided to invest in an 8th generation fabrication facility (P8) to expand our production capacity in line with the growing large-sized LCD television market. The construction of P8 has been completed and mass production at P8 commenced in March 2009. In July 2008, we decided to invest in a 6th generation fabrication facility (P6E) to expand our production capacity. The construction of P6E has been completed and mass production at P6E commenced in April 2009.

Table of Contents

We also plan to strengthen our market position in future display technologies by accelerating the development of flexible display technologies and leading the LED backlight LCD market.

In order to facilitate a cooperative purchasing relationship with HannStar Display Corporation (HannStar), a company that manufactures TFT-LCD panels in Taiwan, in February 2008, we purchased 180 million shares of preferred stock of HannStar at a purchase price of NT\$3,170,250,000. The preferred shares mature in three years and are convertible into shares of common stock of HannStar.

We are making an effort to increase our competitiveness by forming cooperative relationships with suppliers and purchasers of our products. As part of this effort, in June 2008, we purchased 2,037,204 shares of AVACO Co., Ltd., which produces sputters, a core equipment for LCD production, at a purchase price of (Won)6.2 billion and in May 2008, we purchased 1,008,875 shares of TLI Inc., which produces core LCD panel components such as timing controllers and driver integrated circuits, at a purchase price of (Won)14.1 billion. In July 2008, we purchased 6,850,000 shares of common stock of New Optics Ltd. at a purchase price of (Won)9.7 billion. In addition, in February 2009, we purchased 3,000,000 shares of common stock of ADP Engineering Co., Ltd. at a purchase price of (Won)6.3 billion. In May 2009, we purchased 6,800,000 shares of common stock of Wooree LED Co., Ltd. at a purchase price of (Won)11.9 billion. In November 2009, we purchased 34,125,061 shares of common stock of RPO Inc. at a purchase price of US\$12.3 million. In November 2009, we purchased TWD212.5 million in convertible bonds from Everlight Electronics Co., Ltd. In addition, in December 2009, we purchased 420,000 global depository receipts of Prime View International Co., Ltd. at a purchase price of US\$9.9 million. By promoting strategic relationships with equipment and parts suppliers, which enables us to obtain a stable source of supply of equipment and parts at competitive prices, we have strengthened our competitive position in the LCD business.

In July 2008, we and Skyworth-RGB Electronics Co., Ltd. founded a research and development joint venture corporation with a registered capital of CNY 50 million in China.

In October 2008, we established a joint venture company with AmTRAN Technology Co., Ltd., a Taiwan corporation. The joint venture company will supply both parties with TFT-LCD modules and TFT-LCD televisions. Through the establishment of this joint venture, we are able to further expand our customer base by securing a long-term stable panel dealer. It also allows us to produce LCD modules and LCD television sets in a single factory, which enables us to provide our customers with products that are competitive both in terms of technology and price.

We are making an effort to strengthen our competitiveness in the solar cell business, which is emerging as a future growth engine. As part of this effort, in June 2009, we purchased 933,332 shares of common stock of Dynamic Solar Design Co., Ltd. at a purchase price of (Won)6.1 billion. Dynamic Solar Design Co., Ltd. produces equipment for the solar cell business.

As part of our strategy to expand our production capacity overseas, in November 2009, we signed an investment agreement and a joint venture agreement with the City of Guangzhou, China, to build an eighth-generation panel fabrication facility in China.

Table of Contents

In December 2009, certain LG affiliates and we entered into a joint venture investment agreement and established a joint venture company, Global OLED Technology LLC, for purposes of managing the patent assets relating to OLED technology that we acquired from Eastman Kodak Company in December 2009. We invested (Won)72.3 billion in return for a 49% equity interest in the joint venture company.

In December 2009, we invested (Won)1.8 billion and acquired a 30.6% limited partnership interest in LB Gemini New Growth Fund No.16. Under the limited partnership agreement, we have agreed to invest a total amount of (Won)30 billion in the fund. By becoming a limited partner of this fund, our aim is to seek direct investment opportunities as well as to receive benefits from the indirect investment.

In July 2009, in order to expand our back-end module assembly capacity for liquid crystal display production, we entered into a stock purchase agreement with LG Electronics Inc. and LG Electronics (China) Co., Ltd. to purchase all of the shares of LG Electronics (Nanjing) Plasma Co., Ltd. at a purchase price of (Won)3.5 billion. Pursuant to the terms of such transaction, in December 2009, we acquired all of the equity interests of LG Electronics (Nanjing) Plasma Co., Ltd.

* Includes local export.

B. Sales route and sales method*(1) Sales organization*

As of December 31, 2009, each of our IT Business Unit, Television Business Unit and Mobile/OLED Business Unit had individual sales and customer support functions.

Sales subsidiaries in the United States, Germany, Japan, Taiwan, Singapore and China (Shanghai and Shenzhen) perform sales activities and provide local technical support to customers.

(2) Sales route

One of the following:

LG Display HQ g Overseas subsidiaries (USA/Germany/Japan/Taiwan/Singapore/China (Shanghai and Shenzhen)), etc. g System integrators, Branded customers g End users

Table of Contents

LG Display HQ g System integrators, Branded customers g End users

(3) Sales methods and sales terms

Direct sales and sales through overseas subsidiaries, etc. Sales terms are subject to change depending on the fluctuation in the supply and demand of LCD panels

(4) Sales strategy

To secure stable sales to major personal computer makers and the leading consumer electronics makers globally

To increase sales of premium notebook computer products, to strengthen sales of the larger size and high-end monitor segment and to lead the large and wide LCD television market including in the category of full-high definition 120Hz television monitors

To diversify our market in the mobile business segment, including products such as mobile phone, P-A/V, automobile navigation systems, e-book, aircraft instrumentation and medical diagnostic equipment, etc.

(5) Purchase Orders

Customers generally place purchase orders with us one month prior to delivery. Our customary practice for procuring orders from our customers and delivering our products to such customers is as follows:

Receive order from customer (overseas sales subsidiaries, etc.) g Headquarter is notified g Manufacture product g Ship product (overseas sales subsidiaries, etc.) g Sell product (overseas sales subsidiaries, etc.)

6. Market Risks and Risk Management

A. Market Risks

Our industry continues to experience steady declines in the average selling prices of display panels irrespective of cyclical fluctuations in the industry, and our margins would be adversely impacted if prices decrease faster than we are able to reduce our costs.

The TFT-LCD industry is highly competitive. We have experienced pressure on the prices and margins of our major products due largely to additional industry capacity from panel makers in Korea, Taiwan, China and Japan. Our main competitors in the industry include Samsung Electronics, Invision, Hydis Technologies, AU Optronics, Chi Mei Optoelectronics, Chunghwa Picture Tubes, HannStar, Innolux, SVA-NEC, BOE-OT, Sharp, Hitachi, TMDisplay, Mitsubishi, Sony and IPS-Alpha.

Our ability to compete successfully depends on factors both within and outside our control, including product pricing, performance and reliability, successful and timely investment and product development, success or failure of our end-brand customers in marketing their brands and products, component and raw material supply costs, and general economic and industry conditions. We cannot provide assurance that we will be able to compete successfully with our competitors on these fronts and, as a result, we may be unable to sustain our current market position.

Table of Contents

Our results of operations are subject to exchange rate fluctuations. To the extent that we incur costs in one currency and generate sales in a different currency, our profit margins may be affected by changes in the exchange rates between the two currencies. Our sales of display panels are denominated mainly in U.S. dollars, whereas our purchases of raw materials are denominated mainly in U.S. dollars and Japanese Yen. Our risk management policy regarding foreign currency risk is to minimize the impact of foreign currency fluctuations on our foreign currency denominated assets and liabilities.

B. Risk Management

The average selling prices of display panels have declined in general and could continue to decline with time irrespective of industry-wide cyclical fluctuations. Certain contributing factors for this decline will be beyond our ability to control and manage. However, in anticipation of such price decline we have continued to develop new technologies and have implemented various cost reduction measures. In addition, in order to manage our risk against foreign currency fluctuations, we have entered into cross-currency interest rate swap contracts and foreign currency forward contracts.

7. Derivative contracts**A. Derivative Instruments**

Derivative instruments used by us for hedging purposes as of December 31, 2009 are as follows:

| Hedging purpose | Derivative instrument |
|---------------------|---|
| Hedge of fair value | Foreign currency forwards |
| Hedge of cash flows | Cross currency swap Interest rate swap |

B. Hedge of fair value

We enter into foreign currency forward contracts to manage the exposure to changes in the value of foreign currency denominated accounts receivable and accounts payable in accordance with its foreign currency risk management policy. Hedge accounting is not applied to the abovementioned derivatives.

(1) Foreign currency forward contracts

Details of foreign currency forwards outstanding as of December 31, 2009 are as follows:

(In millions of Won and US\$, except forward rate)

| Bank | Maturity date | Selling | Buying | Forward rate |
|------------------|--------------------|----------|---------------|----------------------|
| UBS and 8 others | January 22, 2010 ~ | US\$ 175 | (Won) 207,276 | (Won)1,177.0:US\$1 ~ |
| | February 26, 2010 | | | (Won)1,200.5:US\$1 |

Table of Contents*(2) Unrealized gains and losses*

Unrealized gains and losses related to the above derivatives as of December 31, 2009 are as follows:

(In millions of Won)

| Type | Unrealized gains | Unrealized losses |
|---------------------------|------------------|-------------------|
| Foreign Currency Forwards | (Won) 2,674 | |

The unrealized gains and losses are charged to operations as gains and losses on foreign currency translation for the year ended December 31, 2009.

C. Hedge of cash flows

Details of our derivative instruments related to hedge of cash flows from changes in foreign currency exchange rates and interest rates related to floating rate debt as of December 31, 2009 are as follows:

(1) Cross Currency Swap

In 2009, we early settled our two floating to fixed cross currency swaps in the amount of US\$100 million and US\$50 million, respectively. As a result, as of December 31, 2009, we had no cross currency swaps outstanding. Net unrealized gains and losses, net of the related deferred tax effects, incurred prior to the early settlement of the cross currency swaps were recorded as accumulated other comprehensive income.

In relation to the above-mentioned cross currency swap, unrealized losses with present value of (Won)4,523 million recorded as accumulated other comprehensive income are expected to be charged to operations as losses within twelve months of December 31, 2009.

(2) Interest Rate Swap

(In millions of US\$, except forward rate)

| Bank | Maturity date | Contract amount | Contract rate | |
|-------------------------------------|---------------|-----------------|--|-------------------------|
| Standard Chartered First Bank Korea | May 24, 2010 | US\$ 100 | Receiving floating rate Paying fixed rate | 6-month LIBOR 5.644% |

Table of Contents

Net unrealized gains and losses, net of the related deferred tax effects, were recorded as accumulated other comprehensive income.

In relation to the above-mentioned interest rate swap, unrealized losses with present value of (Won)3,047 million recorded as accumulated other comprehensive income are expected to be charged to operations as losses within twelve months of December 31, 2009.

(3) Unrealized gains and losses

Unrealized gains and losses, before tax, related to hedge of cash flows as of December 31, 2009 are as follows:

| (In millions of Won) | | | |
|-----------------------------|-------------------------|--------------------------|-------------------------------------|
| Type | Unrealized gains | Unrealized losses | Cash flow hedge requirements |
| Cross currency swap | | 8,144 | Fulfilled |
| Interest rate swap | | 3,047 | Fulfilled |

D. Realized gains and losses

Realized gains and losses related to derivative instruments for the year ended December 31, 2009 are as follows:

| (In millions of Won) | | | |
|-----------------------------|---------------------------|--------------------------|---------------------------|
| Hedge purpose | Type | Transaction gains | Transaction losses |
| Cash flow hedge | Cross currency swap | 55 | 13,645 |
| Cash flow hedge | Interest Rate Swap | | 5,422 |
| Cash flow hedge | Foreign currency forwards | | 2,534 |
| Fair value hedge | Foreign currency forwards | 52,350 | 52,991 |

8. Major contracts

January 2009: We entered into a long-term supply agreement with Apple Inc. to supply LCD panels to Apple Inc. for 5 years. In connection with the Agreement, we received long-term advances from Apple Inc. in the amount of US\$500,000,000 in January 2009 which will be offset as the consideration for products supplied to Apple Inc.

B. R&D achievements

[Achievements in 2007]

1) Development of first Poland model

32-inch HD model

2) Development of socket type backlight model

42-inch FHD model

47-inch HD/FHD model

3) Development of new concept backlight model

Development of 32-inch HD model

42/47-inch model under development

4) Development of interlace image sticking free technology and model

Improvement of low picture quality caused by television interlace signals

5) Development of TFT-LCD with ODF (One Drop Filling) for mobile phone application

Our first ODF model for mobile phone application (1.52 inch)

6) Development of GIP (Gate in Panel) application model 15XGA

Removal of gate drive integrated circuits: 3ea g 0ea

Reduction in net material costs and shortening of assembly process

7) 24-inch TN (92%) monitor model development

The world's first large-size panel TN application

Realization of 92% high color gamut on the world's largest TN panel

Table of Contents

8) 15.4-inch LED backlight applied model development

The world's first 15.4-inch wide LED-applied display panel for notebook computers

9) Development of FHD 120Hz display panel

The world's largest LED-applied panel for notebook computers

10) Development of backlight localization model

37- to 47-inch FHD model

11) Development of enhanced Dynamic Contrast Ratio technology

32-inch HD model

12) Development of technology that improves panel transmittance

Enhanced from 5000:1 to 10000:1

13) Development of THM (through-hole mounting) technology and model

Expected to be applied to new models

14) Development of the world's first DRD (Double Rate Driving) technology-applied model

Providing more mounting options to users

15) COG (Chip On Panel) applied model development

Reduction in net material costs and shortening of assembly process

Reduction in source drive integrated circuits: 6ea g 3ea

Edgar Filing: LG Display Co., Ltd. - Form 6-K

Development of thin and light LCD panels made possible by flat type structure

16) 26-inch/30-inch IPS 102% monitor model development

Development of 26-inch/30-inch IPS model that can realize 102% wide color gamut

17) 2.4-inch narrow bezel for Mobile Display

The borders on the left and right sides of this 2.4-inch qVGA-resolution (240RGB×320) LCD panel measure just 1mm each.

Most a-Si TFT LCD panels currently produced generally have borders measuring closer to 2mm

18) Development of 6-inch Electrophoretic Display Product (EDP) to be used in e-books. The first EPD product for LG Display

The first EDP to be developed and launched for e-books, the 6-inch SVGA-resolution (800RGB×600) EDP will be supplied to SONY

[Achievements in 2008]

19) 42FHD Ultra-Slim LCD television development

Development of ultra-slim (19.8mm in thickness) 42-inch television panel

20) 37FHD COF adoption LCD television development

Cost reduction with TCP g COF change: \$2.4 (as of March 2008)

21) CCFL scanning backlight technology development

Table of Contents

Achieve 6ms MPRT from 8ms
22) 24WUXGA monitor model development applying RGB LED backlight

High color gamut (NTSC > 105%), color depth (10 bit)
23) 13.3-inch notebook computer model development applying LED backlight

Thin & Light model development applying LED backlight and COG technology
(3.5mm in thickness, 275g in weight)

24) IPS GIP technology development

Developed LCD industry's first WUXGA GIP technology in wide view mode area (IPS, VA)

Comparative advantage in cost & transmittance over VA
25) Notebook computer model development applying RGB LED backlight

High color gamut (100%) notebook computer model development applied RGB LED backlight
26) Free form LCD development (Elliptical, Circle)

Development of the world's largest 6-inch elliptical and 1.4-inch circular-shaped LCD panels

Developing non-traditional shaped displays by applying (i) error-free, cutting-edge techniques to overcome technical limitations in making curved LCD panels, (ii) accumulated panel design knowledge and (iii) unique screen information processing algorithm

Potential applications of the elliptical-shaped LCD panels include digital photo frame, as well as instrument panels for automobiles and home electronics. The circular LCD panel is expected to make a huge impact in the design of small digital devices like mobile phones, watches and gaming devices.
27) 42HD power consumption saving technology development

Power consumption reduction using lamp mura coverage technology which reduces the number of lamps used for B/L from 18pcs(160W) to 9pcs(80W) in case of 42-inch HD LCD panels
28) New liquid crystal development

CR: Up 5% compared with the MP level

Material cost is similar to the MP material

29) New AG Polarizer development

New Polarizer which has a low CR drop ratio under bright room condition

CR drop ratio under 1,500lux compared with dark room condition : 82% g 67%

30) PSM (Potential Sharing Method) technology development

(Improves the Yogore mura characteristics by applying a different electric circuit driving method)

The time for Yogore mura occurrence delayed by more than 50%

: Black line 1level base, 552Hrs, 720Hrs g 1,392Hrs, 2,064Hrsh

31) LED backlight 47FHD television model in development

Development of next generation light source which enables realization of ultra slim LCD panels

32) 24WUXGA monitor model development applying RGB LED backlight

Our first green & slim monitor model development applying white LED backlight (thickness 18.3mm)

Table of Contents

Our first display port interface type monitor
33) Line up of aspect ratio 16:9 wide models (185W, 23W, 27W)

16:9 models provide for better productivity and larger contents area than existing 16:10 models

Supports HD or FHD that are compatible with television applications

Development of our first 27W size model
34) Power consumption saving monitor model development

Reduces power consumption by 40% by decreasing the number of B/L lamps from 4pcs to 2pcs (17SXGA, 19SXGA, 185WXGA, 19WXGA+, 22WSXGA+)
35) Notebook model development applying VIC (Viewing Image Control) technology

Unlike existing models which use external polarizer attachments to adjust viewing angles, the VIC technology allows for the adjustment to be controlled by the LCD panel itself. (Wide viewing angle « Narrow viewing angle)
36) Notebook model development applying 0.3t glass

Thin & Light model development applying 0.3t glass
37) 8.9-inch small-sized notebook (netbook) model development

Development of minimum size notebook model for improved portability
38) New aspect ratio 16:9 notebook model development

Existing aspect ratios: 16:10, 4:3

New aspect ratio 16:9, 15.6-inch notebook model development
39) Development of highest resolution for mobile application that uses the a-Si method.

Development of the world's first 3-inch WVGA LCD panels (300ppi)
40) 42FHD super narrow bezel LCD television development

Development of narrow bezel (10.0mm in metal bezel) 42-inch television panel

Edgar Filing: LG Display Co., Ltd. - Form 6-K

41) 47FHD slim depth & narrow bezel LCD television development

Development of slim (20.8mm in thickness) & narrow bezel (14.0mm in metal bezel) 47-inch television panel

42) Display port development

Securing the next generation Interface technology that will replace the current LVDS interface: Decreases the number of connector pins from 91pin (51+41) to 30pin and improves EMI characteristics

43) LCM rotation circuit development

Increases the design flexibility of television sets by using a 180° screen rotation function

44) Small- to medium-sized television model development

To meet increased demand for secondary television sets

19/22/26 inch model development

45) 55FHD television model development

Development of 55-inch (a new category) television panel applying scanning B/L technology

Table of Contents

46) Development of television model applying GIP+TRD technology

Development of 32-inch and 26-inch HD television applying GIP+TRD technology

47) One PCB structure development

Achieving cost reduction by combining Source PCB with Control PCB: \$1.94@ \$1.1

48) 42FHD Gate Single Bank technology development

Reduction in gate driver integrated circuits by applying 42FHD Gate Single Bank technology: 8ea @ 4ea

49) 22-inch WSXGA+ model development for Economy IPS Monitor

Development of the world's first Economy IPS 22-inch WSXGA+ model

Achieving cost competitiveness by applying various cost reduction technologies, including DBEF-D sheet deletion

50) 21.5-inch TN FHD model development applying 960ch source driver integrated circuits chip

Development of LG Display's first 21.5-inch wide-format TN FHD model

Increased cost competitiveness by applying 960ch source driver integrated circuits chip, which reduces the number of integrated circuits: 8ea @ 6ea

51) 27-inch TN FHD model development applying BDI (Black Data Insertion) technology

Development of LG Display's first 27-inch wide-format TN FHD model that applies BDI technology, which removes motion picture afterimages

Applying CCA (Color Compensation Algorithm) technology that enables the display of superior color tone

Achieving 16:9 spect ratio, more than 2.07 million pixel and FHD Resolution

52) a-Si TFT based 3-inch DOD AMOLED technology development

Development of the world's first 3-inch AMOLED applying a-Si TFT and DOD Structure

Edgar Filing: LG Display Co., Ltd. - Form 6-K

Possible to use prior LCD infrastructure (a-SI TFT) to develop AMOLED

53) Development of AMOLED applying new crystallization (A-SPC) technology

Development of the world's first AMOLED applying non-laser crystallization method (A-SPC)

Development of the world's largest AMOLED television (15-inch HD)

[Achievements in 2009]

54) Developments of 15.6-inch, 18.5-inch HD monitors for emerging market

Achieving cost reduction by focusing on basic functions and by applying GIP and DRD

55) Development of 22-inch WSXGA+ monitor applying White LED backlight

Development of our first environmentally friendly slim model (14.5mm in thickness)

Reduces power consumption by 47% compared to conventional CCFL model by applying White LED backlight

56) Development of 24-inch WUXGA+ monitor applying GIP

Development of the world's first monitor applying IPS GIP technology

Increased cost competitiveness by applying 960ch source driver integrated circuits chip, which reduces the number of integrated circuits: 8ea @ 6ea

Table of Contents

57) Development of 55/47/42-inch FHD LED models

Development of Direct thicker LED model MP

Realization of TM240Hz
58) 240Hz driving technology development

Development of the world's first 1 Gate 1 Drain 240Hz driving technology
59) Development of low voltage liquid crystal development

Improving contrast ratio by 2.7%

Decreases voltage used in liquid crystals reducing circuit heat; decreases voltage by 6.9%
60) Development of Ez (Easy) Gamma technology

Minimize Gamma difference by using new measuring algorithm: 2.2 ± 0.6 @ 2.2 ± 0.25
61) Development of 22-inch White+ technology

Increases transmissivity by 66% by using White+ Quad type pixel structure
62) Development of 55FHD direct slim LED model

Development of the world's first direct-mounted 16.3mm depth slim LCM

Realization of 240 block local dimming and Trumotion 240Hz
63) Development of 42HD GIP +TRD technology

The world's first application of the 42HD GIP + TRD structure

Removal of gate drive integrated circuits: 3ea @ 0ea

Reduction in source drive integrated circuits: 6ea @ 2ea
64) Development of TV3 CR5 Color PR

Realization of 100% BT709 reiteration rate by applying RGB Color Locus

Achieving a 5% increase in CR by decreasing size of Color PR pigment

65) Development of the world's first slim 27W FHD TN monitors

Reduces thickness by applying edge-mounted backlight: 37.2t @ 21.6t

Reduces power consumption by 60% compared to conventional models by applying 4Lamp

Realization of MPRT 8ms by applying BDI technology

66) Development of the world's first 25W FHD TN new size monitors

Development of new aspect ratio model: 16:9 wide-format

Reduction in the number of driver integrated circuits by applying 960ch Source Driver: 8ea @ 6ea

Removal of gate driver integrated circuits by applying GIP (Gate in Panel) technology

67) Development of 16:9 wide-format power consumption saving monitors (200W HD+, 215W FHD, 230W FHD)

Reduces power consumption by 40% compared to conventional models by applying 2Lamp

Slim design which reduces thickness: 17.0t @ 14.5t

To meet Energy Star 5.0 standards

68) Development of the world's first 22-inch WSXGA+ DRD (Double Rate Driving) monitors

A 50% reduction in source driver integrated circuits by applying Double Rate Driving technology: 8ea @ 4ea

Table of Contents

Removal of gate driver integrated circuits by applying GIP technology

Application of optimum thin-film transistor structure for Double Rate Driving monitors
69) Development of the world's first 23W e-IPS monitors

Slim design: Reduces thickness by applying edge-mounted backlight: 35.7t @ 17t

Reduces power consumption by 50% compared to conventional model by applying 4Lamp

Realization of high aperture ratio by applying UH-IPS technology

Reduction in the number of integrated circuits by applying 960ch source driver: 8ea @ 6ea

Removal of gate driver integrated circuits by applying GIP technology

To meet Energy Star 5.0 standards
70) Development of high efficiency backlight technology

Removal of DBDEF-D Sheet by increasing backlight luminance level by more than 30% @ development of high efficiency lamp and improvement of optics sheet optical efficiency
71) Development of GIP and high aperture ratio technology for QHD IPS model

Stable GIP output in QHD IPS models

Maximizing transmissivity by applying UH-IPS technology and asymmetric pixel design
72) Development of three-dimensional display technology using the shutter glasses method.

Realization of stable rate of 172Hz

Realization of 4port low voltage differential signaling frequencies at a rate of 400MHz

Realization of ODC (Over Driver Circuit) tuning of GTG 3.5ms which is optimum for three-dimensional display
73) Development of 17.1-inch wide-format slim (flat type) panel applying COG (Chip On Panel) chip, our largest slim (flat type) panel

Development of our largest size slim (flat type) model (previously, our largest model was the 15.4-inch wide-format)

Reduction in thickness : 6.5mm @ 4.3mm

74) Development of new high resolution 101W model (1024x600, 1366x768)

Achieving higher resolution : 1024x576 @ 1024x600, 1366x768

75) Development of world's first 17.3-inch HD+ LED panel for notebook computers

New size and resolution for 16:9 wide-format

Existing model: 17.1-inch WXGA+ 1400x900 / New model: 17.3-inch HD+ 1600x900

76) Development of 13.3-inch HD LED panel for notebook computers

New size and resolution for 16:9 wide-format

77) Development of world's first 14.0-inch HD+ LED panel for notebook computers

New size and HD+ resolution (1600x900) for 16:9 wide-format

Table of Contents

78) Development of world's first 15.6-inch HD+ LED panel for notebook computers

First HD+ resolution (1600x900) for 16:9 wide-format

79) Development of world's first 15.6-inch FHD LED panel for notebook computers

First FHD resolution (1920x1080) for 16:9 wide-format

80) Development of the first Green PC models (13.3-inch, 14.0-inch, 15.6-inch)

First models applying Green product concept (halogen free, low power consumption)

81) Development of DRD (Double Rate Driving) technology applying COG (Chip on Glass)

Development of the first COG that applies DRD technology (a 50% reduction in the number of COG drive integrated circuits)

82) Development of 10.1-inch SD (1024 x 600) model for netbooks

Improved resolution: 1024 x 576@1024 x 600

Reduction in cost by applying COG instead of COF

83) Development of 10.1-inch HD (1366 x 768) model for netbooks

Highest resolution among 10.1-inch models

Reduction in cost by applying GIP technology

84) Development of 17.1-inch WUXGA flat type model

Development of largest flat type model (previously, largest model was 15.4-inch)

The thinnest among 17.1-inch models

Reduction in thickness: 6.5t @ 4.3t

85) Developments of 11.6-inch HD monitor for netbooks

Edgar Filing: LG Display Co., Ltd. - Form 6-K

Development of largest/ highest resolution monitor for netbooks

Reduction in cost by applying GIP technology

86) Development of low-cost 26-inch and 32-inch HD model for televisions

World's first monitor without a cover shield

Application of sheet type support side

Reduction in cost by applying low-cost single bottom covers for mold frames

87) Development of large-sized (42-inch/47-inch) edge type LED LCD model for televisions

Development of our first model for televisions applying edge type LED backlight (mass production commenced in September 2009)

Slim depth (11.9mm in thickness) & narrow bezel (18mm in thickness)

88) Development of world's first S/D-IC + Tcon merging technology applicable to television monitors

Minimizing size of printed circuit board by applying 1380ch S/D-IC + ASIC technology and removing ASIC chip

A 49% cost reduction in manufacturing circuits

89) Achieving a full product line-up for netbook monitors

A full product line-up that covers the full spectrum of netbook monitor sizes from 8.9-inch to 11.6-inch models

Table of Contents

90) Development of our first flat type monitor for netbooks

Development of 11.6-inch flat type HD monitor

91) Development of new LED-applied model utilizing vertical LED array technology

Development of 15.6-inch HD model applying vertical LED array technology (technology applied in existing models: horizontal LED array)

Reduction in power consumption and raw material costs

92) Development of world's first 21.5W FHD IPS monitor applying white LED backlight technology

Application of environmentally friendly components including white LED backlight and halogen free parts

Achievement of high luminance (more than 330nit) by applying high efficiency white LED backlight

A 100% sRGB coverage

93) Development of world's first 27W QHD IPS monitor applying white LED backlight technology

Application of environmentally friendly components including white LED backlight and halogen free parts

Achievement of high luminance (more than 380nit) by applying high efficiency white LED backlight

A 100% sRGB coverage

Realization of high resolution (2560x1440)

Removal of gate driver integrated circuits by applying GIP (Gate In Panel) technology

94) Development of world's first 19-inch WXGA monitor applying DRD (Double Rate Driver)

A 50% reduction in the number of source driver integrated circuits by applying DRD (Double Rate Driving) technology

Removal of gate driver integrated circuits by applying GIP (Gate In Panel) technology

Edgar Filing: LG Display Co., Ltd. - Form 6-K

Optimization of TFT design structure for DRD (Double Rate Driver) technology

95) Development of world's first 22W e-IPS monitor applying GIP (Gate In Panel) technology

Achievement of high aperture ratio by applying UH-IPS technology

Reduction in the number of source driver integrated circuits by applying 960 channel chip (8ea@6ea)

Removal of gate driver integrated circuits by applying GIP (Gate In Panel) technology

96) Development of world's first QHD new high resolution monitor (27W QHD)

Achievement of high resolution (2560 x 1440)

Maximization of aperture ratio applying UH-IPS technology and elimination of gate driver integrated circuits by applying GIP (Gate In Panel) technology

Achievement of high luminance and sRGB coverage of 100% applying high efficiency white LED

97) Development of world's first monitor applying GIP (Gate In Panel), DRD (Double Rate Driver) and I-VCOM monitor (185W HD)

50% reduction in the number of source driver integrated circuits by applying DRD (Double Rate Driving) technology

Elimination of gate driver integrated circuits by applying GIP (Gate In Panel) technology

Table of Contents

Elimination of DBEF Optical sheet by applying I-VCOM technology and optical efficiency improvement in backlight
98) Development of shutter glass type three-dimensional monitor with full high definition

172Hz operation frame rate

Highest data interface speed of over 400MHz in 4port LVDS interface and achievement of GTG 3.5ms by optimal tuning of ODC (Over Driving Circuit)

99) One layer vertical LED monitor development and reinforcement of monitor product line up (200W HD+, 215W FHD, 230W FHD)

Minimization of the number of LED PKG applying vertical array structure

Elimination of DBEF Sheet applying two-in-one LED PKG

Slim design: optimization of mechanical structure

100) Development of world's first notebook monitor applying 2ea Sheet Backlight

Achieving cost competitiveness by switching from conventional 3~4ea sheet to 2ea complex sheet backlight (with the Diffuser Sheet eliminated)

10. Customer Service

In order to highlight the importance of creating customer value, we have formulated a roadmap toward creating customer value and have shared this information with all of our employees. Through our "Voice of Customer" campaign, we have responded to customer feedback including complaints, suggestions, praises, enquiries and requests as soon as they were made and we have made efforts to change any negative feedback made by a customer into a positive feedback through such prompt response. In addition, in order to support our customers, we have established IPS camps and have cooperated with our customers to promote IPS technology. Furthermore, we have hosted "Why LGD" campaigns in order to provide superior products and services to our customers including in the areas of technology, quality, responsiveness, delivery and cost. We also monitor customer opinion through annual customer satisfaction surveys and customer interviews, and the results of such surveys and interviews are reflected in the performance evaluation of our executive officers.

11. Intellectual Property

As of December 31, 2009, we currently hold a total of 12,151 patents, including 5,630 in Korea, and 6,521 in other countries.

Table of Contents**12. Environmental Matters**

We are subject to strict environmental regulations and we may be subject to fines or restrictions that could cause our operations to be interrupted. Our manufacturing processes generate chemical waste, waste water and other industrial waste at various stages in the manufacturing process, and we are subject to a variety of laws and regulations relating to the use, storage, discharge and disposal of such chemical by-products and waste substances. We have installed various types of anti-pollution equipment, consistent with industry standards, for the treatment of chemical waste and equipment for the recycling of treated waste water at our various facilities. However, we cannot provide assurance that environmental claims will not be brought against us or that the local or national governments will not take steps toward adopting more stringent environmental standards. Any failure on our part to comply with any present or future environmental regulations could result in the assessment of damages or imposition of fines against us, suspension of production or a cessation of operations. In addition, environmental regulations could require us to acquire costly equipment or to incur other significant compliance expenses that may materially and negatively affect our financial condition and results of operations. We have also voluntarily agreed to reduce emission of greenhouse gases, such as per fluoro compounds, or PFCs, and sulfur hexafluoride, or SF₆, gases, by installing PFC abatement systems to meet voluntary emissions targets for the TFT-LCD industry by 2010. We installed PFC abatement systems at all of our production lines when the production facilities were being constructed. We also installed a SF₆ abatement system in P1 in April 2005 and we intend to install similar abatement systems in our other production facilities through implementation of Clean Development Mechanism, or CDM, projects. Our methodology for SF₆ decomposition has been approved by the CDM Executive Board, an entity established by the parties to the United Nations Framework Convention on Climate Change, or UNFCCC, in February 2009, and we are currently conducting a feasibility study on the CDM project design document and working toward receiving the approval of the Korean government for such projects. In addition, as of December 31, 2009, we were party to voluntary agreements, which reflect a coordinated energy conservation initiative between government and industry, with respect to our operation of P1 through P8, the Gumi module production plant and the Paju module production plant. In accordance with such agreements, we have implemented a variety of energy-saving measures in those facilities, including installation of energy saving devices and consulting with energy conservation specialists. We also established an overall greenhouse gas emissions inventory system for our domestic sites, which was verified by Lloyd's Register Quality Assurance, which is certified as the designated operational entity for CDM by the CDM Executive Board. Operations at our manufacturing plants are subject to regulation and periodic monitoring by the Korean Ministry of Environment and local environmental protection authorities. We believe that we have adopted adequate anti-pollution measures for the effective maintenance of environmental protection standards consistent with local industry practice, and that we are in compliance in all material respects with the applicable environmental laws and regulations in Korea. Expenditures related to such compliance may be substantial. Such expenditures are generally included in capital expenditures. As required by Korean law, we employ licensed environmental specialists for each environmental area, including air quality, water quality, toxic materials and radiation. We currently have ISO 14001 certifications with respect to the environmental record for P1 through P8, the Gumi module production plant and the Paju module production plant, as well as our module production plants in Nanjing and Guangzhou, China. We have been certified by the Korean Ministry of Environment as an Environmentally Friendly Company, with respect to our environmental record for P1 and our module production plant in Gumi since 1997, with respect to our operations at P2 and P3 since 2006, and with respect to our operations at P4, P5 and P6 since 2008.

Table of Contents

We also have an internal monitoring system to control the use of hazardous substances in the manufacture of our products as we are committed to compliance with all applicable environmental laws and regulations, including European Union Restriction of Hazardous Substances (RoHS) Directive 2002/95/EC, which took effect on July 1, 2006 and restricts the use of certain hazardous substances in the manufacture of electrical and electronic equipment. In June 2006, we became the first TFT-LCD panel manufacturer to be recognized as an internationally accredited RoHS testing laboratory by the European Union's German accreditation organization, EU TÜV SÜD. In October 2007, we became the first TFT-LCD company to be certified the International Electrotechnical Commission-Hazardous Substance Process Management (IECQ-HSPM) QC 080000, which is an international system requirements document intended to help organizations manage hazardous substances in their components and products through hazardous substance process management, and demonstrates the organization's conformity with RoHS.

Furthermore, we are operating a green purchasing system, which excludes the hazardous materials at the purchasing stage. This system has enabled us to comply with various environmental legislations of hazardous substances, from European Union RoHS to China RoHS.

In 2009, we successfully commenced production at our P8 and P6E fabrication facilities and, according to DisplaySearch, we also increased our worldwide market share based on revenue for LCD panels in notebook computers, desktop monitors and in particular for LCD panels in television. During the same period, we have also achieved substantial growth in the sale of our mobile products and we have further strengthened our infrastructure for the commercialization of OLED technology. Our sales increased by 27% from (Won)15,865 billion in 2008 to (Won)20,119 billion in 2009. Despite the oversupply of LCD panels in the global market during the first half of 2009, due in large part to our efforts to strengthen our relationships with customers, our operating income amounted to (Won)1,001 billion and our net income amounted to (Won)1,068 billion in 2009.

1) Sales and Cost of Sales

Our cost of sales as a percentage of sales revenue increased by 5% from 85.9% in 2008 to 90.9% in 2009. Such increase was primarily attributable to changes in currency exchange rates and a decrease in the average selling prices of LCD panels and not to an increase in the cost of sales per panel. Although we have successfully decreased our cost of sales per panel in 2009 by promoting Max Capa / Min Loss and other activities to increase production capacity and production volume and reduce cost, our cost of sales as a percentage of sales revenue increased in 2009 compared to 2008 because the decrease in the average selling prices of LCD panels from 2008 to 2009 outpaced the decrease in our cost of sales per panel from 2008 to 2009. Consequently, despite an increase in our sales revenue in 2009 compared to 2008, our gross profit decreased in 2009 compared to 2008.

2) Sales by Product Category

Due to the strong growth of the LCD television market, sales of our LCD panels for televisions accounted for over 50% of our sales revenue in 2009. We intend to further increase our market share for LCD panels in televisions by increasing our product competitiveness, including in 240Hz products, and by strengthening our sales promotion activities. The following table shows the sales generated by each of our product categories as a percentage of our sales revenue.

| | 2009 | 2008 | 2007 |

| Panels for Notebook Computers | 17% | 23% | 22% |
| Panels for Application | 5% | 5% | 5% |

3) Production Capacity

Our annual production capacity increased by 39% in 2009 compared to 2008, in large part due to the successful ramp-up of our P8 and P6E fabrication facilities and our Max Capa / Min Loss activities.

2. Financial Condition (Based on Non-consolidated, Korean GAAP)

Our current assets increased by (Won)1,641 billion from (Won)6,256 billion as of December 31, 2008 to (Won)7,897 billion as of December 31, 2009, and our non-current assets increased by (Won)742 billion from (Won)10,246 billion as of December 31, 2008 to (Won)10,988 billion as of December 31, 2009. Our current liabilities increased by (Won)1,493 billion from (Won)4,227 billion as of December 31, 2008 to (Won)5,720 billion as of December 31, 2009, and our non-current liabilities increased by (Won)41 billion from (Won)2,999 billion as of December 31, 2008 to (Won)3,040 billion as of December 31, 2009. Our shareholders' equity increased by (Won)849 billion from (Won)9,276 billion as of December 31, 2008 to (Won)10,125 billion as of December 31, 2009.

In 2009, due in large part to our continuous Max Capa activities, we were able to increase the production capacities of our existing production facilities. In addition, we also commenced production at our P8 and P6E fabrication facilities, which further enabled us to increase our production capacity. Due to such increase, our inventory increased by (Won)356 billion from December 31, 2008 to December 31, 2009. This increase, combined with a reversal of write-down in inventory of (Won)48 billion from December 31, 2008 to December 31, 2009, resulted in the book value of our inventory increasing by (Won)404 billion from (Won)882 billion as of December 31, 2008 to (Won)1,286 billion as of December 31, 2009.

Our accounts receivable balance increased by (Won)1,327 billion from (Won)1,696 billion as of December 31, 2008 to (Won)3,023 billion as of December 31, 2009, primarily due to an increase in our fourth quarter sales in 2009 compared to our fourth quarter sales in 2008. Our fourth quarter sales increased by (Won)2,202 billion from (Won)3,723 billion in 2008 to (Won)5,925 billion in 2009. Meanwhile, the accounts receivables we sold to financial institutions as part of our accounts receivable factoring arrangements decreased by (Won)371 billion from (Won)601 billion in 2008 to (Won)230 billion (US\$187 million / Yen 950 million) in 2009.

Table of Contents**3. Liquidity and Capital Resources**

Due to a general decrease in interest rates in 2009 compared to 2008, we reduced our cash and cash equivalents and increased our short-term financial instruments in 2009. Our cash and cash equivalents decreased by (Won)503 billion from (Won)1,208 billion as of December 31, 2008 to (Won)704 billion as of December 31, 2009 and our short-term financial instruments increased by (Won)445 billion from (Won)2,055 billion as of December 31, 2008 to (Won)2,500 billion as of December 31, 2009. This resulted in a decrease in cash and short-term financial instruments of (Won)59 billion from (Won)3,263 billion as of December 31, 2008 to (Won)3,204 billion as of December 31, 2009.

In 2009, our net cash provided by operating activities amounted to (Won)3.5 trillion, our net cash provided by our financing activities, including the incurrence of short- and long-term borrowings as well as the issuance of corporate bonds, amounted to (Won)267 billion and our net cash used in our investing activities, including the acquisition of tangible assets and investments in equity method investees, amounted to (Won)4.3 trillion.

We currently expect that our total capital expenditures on a cash-out basis to be approximately (Won)4 trillion. However, our overall expenditure levels and our allocation among projects are subject to many uncertainties, including whether to (i) expand our 8th generation fabrication facility to meet customer demand, (ii) invest in new business ventures or (iii) make additional investments in China, among others. We review the amount of our capital expenditures and may make adjustments from time to time based on cash flow from operations, the progress of our expansion plans and market conditions.

Independent Auditors Report

Based on a report originally issued in Korean

To the Shareholders and Board of Directors

LG Display Co., Ltd.:

We have audited the accompanying non-consolidated statements of financial position of LG Display Co., Ltd. (the Company) as of December 31, 2009 and 2008, and the related non-consolidated statements of income, appropriations of retained earnings, changes in stockholders' equity and cash flows for the years then ended. These non-consolidated financial statements are the responsibility of the Company's management. Our responsibility is to issue a report on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the Republic of Korea. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the non-consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company, as of December 31, 2009 and 2008 and the results of its operations, the appropriation of its retained earnings, the changes in its equity and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the Republic of Korea.

Without qualifying our opinion, we draw attention to the following:

As discussed in note 2(b) to the non-consolidated financial statements, accounting principles and auditing standards and their application in practice vary among countries. The accompanying non-consolidated financial statements are not intended to present the financial position, results of operations, changes in shareholders' equity and cash flows in accordance with accounting principles and practices generally accepted in countries other than the Republic of Korea. In addition, the procedures and practices utilized in the Republic of Korea to audit such non-consolidated financial statements may differ from those generally accepted and applied in other countries. Accordingly, this report and the accompanying non-consolidated financial statements are for use by those knowledgeable about Korean accounting procedures and auditing standards and their application in practice.

As discussed in note 18(b) to the non-consolidated financial statements, the Company is under investigations by Korea Fair Trade Commission in Korea, European Commission and antitrust authorities in other countries with respect to possible anti-competitive activities in the LCD industry. In addition, the Company has been named as defendants in a number of federal class actions in the United States and Canada and related individual lawsuits based on alleged antitrust violations concerning the sale of LCD panels, and the Company and certain of its officers and directors have been named as defendants in a federal class action in the United States by shareholders of the Company alleging violations of the U.S. Securities Exchange Act of 1934. The Company estimated and recognized losses related to these legal proceedings. However, actual losses are subject to change in the future based on new developments in each matter, or changes in circumstances, which could be materially different from those estimated and recognized by the Company.

Notes to Non-Consolidated Financial Statements

December 31, 2009 and 2008

1 Organization and Description of Business

LG Display Co., Ltd. (the Company) was incorporated in 1985 under its original name of LG Soft, Ltd. as a wholly owned subsidiary of LG Electronics Inc. In 1998, LG Electronics Inc. and LG Semicon Co., Ltd. transferred their respective Thin Film Transistor Liquid Crystal Display (TFT-LCD) related business to the Company. The main business of the Company is to manufacture and sell TFT-LCD panels. In July 1999, LG Electronics Inc. and Koninklijke Philips Electronics N.V. (Philips) entered into a joint venture agreement. Pursuant to the agreement, the Company changed its name to LG.Philips LCD Co., Ltd. However, on February 29, 2008, the Company changed its name to LG Display Co., Ltd. based upon the approval of shareholders at the general shareholders' meeting on the same date as a result of the decrease in Philips's share interest in the Company and the possibility of its business expansion to Organic Light Emitting Diode (OLED) and Flexible Display products. In March 2009, Philips, which used to be one of the major shareholders of the Company, sold all of its share holdings, 47,225 thousand shares, of the Company. As of December 31, 2009, LG Electronics Inc. owns 37.9% (135,625 thousand shares) of the Company's common shares.

As of December 31, 2009, the Company has LCD Research & Development Center and TFT-LCD manufacturing plants in Paju and TFT-LCD manufacturing plants and OLED manufacturing plant in Gumi. The Company has overseas subsidiaries located in the United States of America, Europe and Asia.

2 Summary of Significant Accounting Policies and Basis of Presenting Financial Statements

(a) Significant Accounting Policies

The significant accounting policies followed by the Company in the preparation of its non-consolidated financial statements are the same as those followed by the Company in its preparation of annual non-consolidated financial statements for the year ended December 31, 2008.

(b) Basis of Presenting Financial Statements

The Company maintains its accounting records in Korean Won and prepares statutory financial statements in the Korean language in conformity with the accounting principles generally accepted in the Republic of Korea. Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with generally accepted accounting principles (GAAP) in other countries. Accordingly, these non-consolidated financial statements are intended for use only by those who are informed about Korean accounting principles and practices. The accompanying non-consolidated financial statements have been translated into English from the Korean language non-consolidated financial statements.

(c) Revenue Recognition

Revenue is recognized when the significant risks and rewards of ownership have been transferred to the Company's customers, recovery of the consideration is probable, the associated costs and possible return of goods can be estimated reliably, and there is no continuing management involvement with the goods. Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts, volume rebates and other cash incentives paid to customers.

(d) Cash and Cash Equivalents

Cash and cash equivalents include cash on hand and in banks, and financial instruments with maturity of three months or less at the time of purchase. These financial instruments are readily convertible into cash without significant transaction costs and bear low risks from changes in value due to interest rate fluctuations.

(e) Allowance for Doubtful Accounts

Allowance for doubtful accounts is estimated based on an analysis of individual accounts and past experience of collection and presented as a deduction from trade receivables.

(f) Inventories

Inventories are stated at the lower of cost or market value, with cost being determined by a weighted-average method, except for the materials in transit, which is determined by a specific identification method. Valuation loss, which is comprised of the amount of any write-down of inventories to market value and the amount of loss from the difference between the quantity of inventories recorded in the financial statements and the actual quantity incurred in the ordinary course of business, is added to the cost of goods sold. Valuation loss for the holding inventories is presented as a reduction of the inventories. When the circumstances that previously caused inventories to be written down below cost no longer exist or when there is clear evidence of an increase in net realizable value because of changed economic circumstances, the amount of the write-down is reversed and reduces cost of sales to the extent that revised book value does not exceed the book value that would have been recorded without the impairment.

Variable production overheads are allocated based on the actual level of production and fixed production overheads are allocated based on the actual capacity of production facilities. However, the normal capacity may be used for allocation of fixed production overheads if the actual level of production is lower than the normal capacity. The difference between actual fixed production overheads and allocated amount based on the normal level of production is recognized as capacity variances in non-operating expenses.

(g) Investments in Securities

Upon acquisition, the Company classifies debt and equity securities, excluding investments in subsidiaries, associates and joint ventures, into the following categories: held-to-maturity, trading securities or available-for-sale securities. This classification is reassessed at each balance sheet date.

Investments in debt securities where the Company has the positive intent and ability to hold to maturity are classified as held-to-maturity. Securities that are acquired principally for the purpose of selling in the short-term are classified as trading securities. Investments not classified as either held-to-maturity or trading securities are classified as available-for-sale securities.

Investments in securities are initially recognized at the fair value of considerations provided by the Company for the acquisition of securities and related transaction costs.

Held-to-maturity investments are carried at amortized cost. Trading and available-for-sale securities are subsequently carried at fair value. Investments in available-for-sale equity securities that do not have readily determinable fair values are recognized at cost less impairment, if any.

Gains and losses arising from changes in the fair value of trading securities are included in the income statement in the period in which they arise. Unrealized gains and losses arising from changes in the fair value of available-for-sale securities are recognized as accumulated other comprehensive income or loss, net of tax, directly in equity. Gains and losses of available-for-sale securities are recognized in the income statement when the securities are disposed or an impairment loss is recognized. Held-to-maturity investments are carried at amortized cost with interest income and expense recognized in the income statement using the effective interest method.

The Company assesses at the end of each reporting period whether there is any objective evidence that investments in securities are impaired. Impairment losses are recognized when the reasonably estimated recoverable amounts are less than the carrying amount and it is not obviously evidenced that impairment is unnecessary.

Trading securities are presented as current assets. Available-for-sale securities, which mature within one year from the balance sheet date or where the likelihood of disposal within one year from the balance sheet date is probable, are presented as current assets. Held-to-maturity securities, which mature within one year from the balance sheet date, are presented as current assets. All other available-for-sale securities and held-to-maturity securities are presented as long-term investments.

(h) Equity Method Investments

Investments in associates and subsidiaries of which the Company has the ability to significantly influence are accounted for using the equity method of accounting. The Company records changes in its proportionate ownership in the net assets of the associates and subsidiaries in current operations or as adjustments to other comprehensive income (loss) or retained earnings, depending on the nature of the underlying change in the net assets of the associates and subsidiaries. If the carrying amount of an investment in an associate or subsidiary falls below zero as a result of reflecting the investee's losses when the equity method is applied, the Company discontinues recognizing further changes in its share of equity interest in the associate or subsidiary and the related investment is accounted for at nil value. However, if the Company holds interest in the associate or subsidiary, including preferred stocks, long-term loans and receivables issued by the associate or subsidiary, the Company continues to account for the losses of the associate or subsidiary until the carrying amount of the interest is reduced to zero.

Unrealized gains on transactions between the Company and its associates or subsidiaries are eliminated to the extent of the Company's interest in each associate or subsidiary. Unrealized gains are accounted for as a reduction of the carrying amount of the investment in the associate, while unrealized losses are added to the carrying amount of the investment in the associate. However, in the case of unrealized gains or losses arising from sales by the Company to the subsidiaries, they are fully eliminated.

At the date of acquisition of an investment in an associate or subsidiary, the Company's share of the difference between the fair value and book value of the identifiable assets and liabilities of an associate or subsidiary is amortized or reinstated in accordance with the associate or subsidiary's methods of accounting for assets and liabilities. The amount of goodwill or negative goodwill is calculated as the difference between the acquisition cost of an investment in an associate or subsidiary and the Company's share of the fair value of the identifiable net assets of the associate or subsidiary. Goodwill is amortized using the straight-line method over five years. The amount of negative goodwill up to the fair value of depreciable non-monetary assets is recognized using the straight-line method as a gain over the weighted average useful lives and the remainder of negative goodwill up to the fair value of non-depreciable assets is recognized as a gain in the period of disposal of the assets. Any excess of negative goodwill over the fair value of identifiable non-monetary assets is recognized as a gain at the date of acquisition.

Assets and liabilities of a foreign company subject to the equity method of accounting for investments are translated into Korean Won at the rates of exchange prevailing at the end of the reporting period, while its equity is translated at the exchange rate at the time of transactions, and income statement accounts at the average rate over the year. Resulting translation gains and losses are recorded as accumulated other comprehensive income and loss.

(i) Interest in Joint Ventures

Joint ventures are those entities two or more venturers are bound by a contractual arrangement and the contractual arrangement establishes a joint control. The Company accounts for its interest in a jointly controlled entity using the equity method of accounting.

Table of Contents**LG DISPLAY CO., LTD.****Notes to Non-Consolidated Financial Statements (Continued)****December 31, 2009 and 2008****2 Summary of Significant Accounting Policies and Basis of Presenting Financial Statements, Continued*****(j) Property, Plant and Equipment***

Upon acquisition, property, plant and equipment are stated at cost, which includes acquisition cost or production cost and other costs required to prepare the asset for its intended use as well as capitalized financial expense. Assets acquired through investment in kind or donations are recorded at their fair value upon acquisition. For assets acquired in exchange for a similar asset, the carrying amount of the asset given up is used to measure the cost of the asset received, and for assets acquired in exchange for a dissimilar asset, the fair value of the asset given up is used to measure the cost of the asset received unless the fair value of the asset received is more clearly evident.

Depreciation is computed by using the straight-line method over the estimated useful lives for the assets with the depreciable amount is determined after deducting its residual value from the cost. Assets are stated at cost less accumulated amortization and accumulated impairment loss, if any.

Estimated useful lives of the assets are as follows:

| | Estimated useful lives (years) |
|-------------------------------|--------------------------------|
| Buildings | 20, 40 |
| Structures | 20, 40 |
| Machinery and equipment | 4 |
| Vehicles | 4, 12 |
| Tools, furniture and fixtures | 4 |

Significant additions or improvement extending the useful lives or increasing the value of the assets are capitalized. Normal maintenance and repairs are charged to expenses as incurred.

(k) Intangible Assets

Intangible assets are stated at cost, which includes acquisition or production cost and other costs required to prepare the asset for its intended use, less accumulated amortization and accumulated impairment loss, if any. Amortization commences when the asset is available for use, and the residual value of an intangible asset is assumed to be zero.

Costs incurred during the development phase are recognized as assets only if the criteria for capitalization as an intangible asset are met, otherwise costs are recognized as a development cost in cost of sales or selling, general and administrative expenses. Any expenditure incurred in the research phase is recognized as research expense in selling, general and administrative expenses.

Intangible assets are amortized using the straight-line method over the following estimated useful lives:

| | Estimated useful lives (years) |

| Intellectual property rights | 5, 10 |
| Rights to use electricity and gas supply facilities | 10 |

2 Summary of Significant Accounting Policies and Basis of Presenting Financial Statements, Continued

(l) Grants Received

Grants received from government and other third parties, which are to be repaid, are recorded as a liability. While non-refundable grants received are presented as a reduction of the acquisition cost of the acquired assets, grants received for a specific purpose, not related to the acquisition of assets, are offset against the related expense, and other grants received are recorded as other income.

(m) Impairment of Assets

When the book value of an asset is significantly greater than its recoverable value due to obsolescence, physical damage or an abrupt decline in the market value of the asset, the decline in value is deducted from the book value to agree with the recoverable amount and is recognized as an asset impairment loss for the period. When the recoverable value subsequently exceeds the book value, the reversal of impairment amount is recognized as a gain for the period to the extent that the revised book value does not exceed the book value that would have been recorded without the impairment.

(n) Convertible Bonds

When accounting for a convertible bond, the liability component and the equity component of a bond are separated. At the date of issue, the liability component of the bond is calculated at the fair value of a similar debt security without conversion rights, which is the present value of future cash flows from an ordinary bond until maturity and the equity component is calculated as the difference between the gross proceeds of the bond received at the date of issue and the amount of liability component. The equity component of the convertible bond is presented as a part of capital surplus within equity. Subsequent to initial recognition, the liability component is measured at amortized cost using the effective interest rate method; however, the equity component is not remeasured subsequent to initial recognition.

(o) Stock and Bond Issue Costs

Stock issue cost is deducted from the gross proceeds from issuance of those stocks and bond issue cost is adjusted to issuance price of debentures and, in turn, discount or premium on debentures.

(p) Discount (Premium) on Debentures

Discount (premium) on debentures, which represents the difference between the face value and issuance price of debentures, is amortized (accrued) using the effective interest method over the life of the debentures. The amount amortized (accrued) is included in interest expense.

(q) Retirement and Severance Benefits

Employees and directors with at least one year of service are entitled to receive a lump-sum payment upon termination of their employment with the Company. Accrued severance benefits represent the amount which would be payable assuming all eligible employees and directors were to terminate their employment as of the end of the reporting period.

The Company has partially funded the accrued severance benefits through severance insurance deposits with insurance companies. Deposits made by the Company are recorded as a deduction from accrued severance benefits. In the case that the deposits are greater than the balance of accrued severance benefits, the excess portion of deposits over accrued severance benefits is recorded as other investments. The Company deposited a certain portion of severance benefits to the National Pension Service according to the prior National Pension Law. The deposit amount is recorded as a deduction from accrued severance benefits.

(r) Valuation of Receivables and Payables at Present Value

Receivables and payables arising from long-term cash loans or borrowings and other similar transactions are discounted using appropriate discount rates and stated at present value. The difference between the nominal value and present value of these receivables or payables is amortized using the effective interest rate method. The amount amortized is included in interest expense or interest income.

(s) Foreign Currency Translation

Non-monetary assets and liabilities denominated in foreign currencies, which are stated at historical cost, are translated into Korean Won at the foreign exchange rate on the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into Korean Won using the foreign exchange rates prevailing at the end of the reporting period, with the resulting gains or losses recognized in the statement of income.

(t) Derivatives

The Company enters into foreign currency forward contracts to manage the foreign currency risk exposures to the changes in fair value of foreign currency denominated accounts receivable and accounts payable. In addition, the Company entered into cross currency swap and interest rate swap contracts to manage the interest rate and foreign currency risk exposures to the variability of future cash flows of floating rate notes.

Derivatives are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at their fair value at each end of the reporting period. Attributable transaction costs are recognized in profit or loss when incurred.

Where a derivative, which meets certain criteria, is used for hedging the exposure to changes in the fair value of a recognized asset or liability, it is designated as a fair value hedge. Where a derivative, which meets certain criteria, is used for hedging the exposure to the variability of the future cash flows of a forecasted transaction, it is designated as a cash flow hedge.

(t) Derivatives, Continued

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the statement of income, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk.

The effective portion of the changes in the fair value of derivatives that are designated and qualify as cash flow hedges are recognized in equity, other comprehensive income or loss. Amounts accumulated in equity are recycled to the income statement in the periods in which the hedged item will affect profit or loss or adjusted to the carrying value of an asset or liability of the related to the hedged transaction. When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at the time remains in equity and is recognized in income when the forecast transaction is ultimately recognized in the statement of income. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the statement of income.

The Company documents, at the inception of the transaction, the relationship between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. The Company also documents its assessment, both at hedge inception and on an ongoing basis at each end of the reporting period, of whether the derivatives that are used in hedging transactions are highly effective in offsetting the changes in fair values or cash flows of hedged items and recognizes the gain or loss related to any ineffective portion immediately in the statement of income.

(u) Provisions and Contingent Liabilities

When it is probable that an outflow of economic benefits will occur due to a present obligation resulting from a past event, and whose amount is reasonably estimable, a corresponding amount of provision is recognized in the financial statements. However, when such outflow is dependent upon a future event, is not probable to occur, or cannot be reliably estimated, a disclosure regarding the contingent liability is made in the notes to the financial statements.

(v) Income Taxes

Income tax expense includes the current income tax under the relevant income tax laws and the changes in deferred tax assets or liabilities. Deferred tax assets and liabilities represent the amount of future income tax payables to be decreased or increased, respectively, by temporary differences, which is the difference between the carrying amounts of assets and liabilities for financial reporting purpose and the tax bases of assets and liabilities, and unused loss carryforwards and tax credits. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the temporary differences, unused losses, and unused tax credits can be utilized. Deferred tax assets and liabilities are computed on temporary differences by applying enacted statutory tax rates applicable to the years when such differences are expected to reverse. Changes in the carrying amount of deferred tax assets or liabilities result from a change in tax rates or tax laws are recognized in the income statement except to the extent that the changes relate to items previously reflected directly in the shareholders' equity.

2 Summary of Significant Accounting Policies and Basis of Presenting Financial Statements, Continued

(w) Sale or Discount of Accounts Receivable

The Company sells or discounts certain accounts or notes receivable to financial institutions, and accounts for the transactions as sale of the receivables if the control over the receivables is substantially transferred to the buyers. The losses from the sale of the receivables are charged to current operations as incurred.

(x) Earnings Per Share

Earnings per share are calculated by dividing net income attributable to stockholders of the Company by the weighted-average number of shares outstanding during the period. Diluted earnings per share are determined by adjusting net income attributable to stockholders and the weighted-average number of shares outstanding for the effects of all dilutive potential shares.

(y) Use of Estimates

The preparation of non-consolidated financial statements in accordance with accounting principles generally accepted in the Republic of Korea requires management to make estimates and assumptions that affect the amounts reported in the non-consolidated financial statements and related notes to non-consolidated financial statements. Items requiring management's estimates and assumptions include, but not limited to, the valuation of property, plant and equipment, accounts receivable, inventories, deferred income tax and derivative contracts. Actual results may differ from those estimates.

Edgar Filing: LG Display Co., Ltd. - Form 6-K

- (*) Principal of the local currency debentures is to be repaid at maturity and interests are paid quarterly. The Company redeemed local currency debentures with their face value amounting to (Won)400,000 million (par value) for the year ended December 31, 2009 and recognized a loss on redemption of debentures amounting to (Won)173 million as non-operating expenses.

Table of Contents**LG DISPLAY CO., LTD.****Notes to Non-Consolidated Financial Statements (Continued)****December 31, 2009 and 2008****13 Debentures, Continued**

(b) Details of the convertible bonds are as follows:

| | Terms and Conditions |
|-------------------------------------|------------------------------|
| Issue date | April 18, 2007 |
| Maturity date | April 18, 2012 |
| Conversion period | April 19, 2008~April 3, 2012 |
| Coupon interest rate | 0% |
| Conversion price (in Won) per share | (Won)48,251 |
| Issued amount | USD550 million |

The bonds will be repaid at 116.77% of the principal amount at maturity unless the put option of bondholders are exercised in which case the bondholders will be repaid at 109.75% of the principal amount on April 18, 2010, and in 2009, they were reclassified to current liabilities. If the convertible bonds, inclusive of redemption premium, were classified as monetary liabilities, the loss on foreign currency translation would be (Won)152,531 million for the period from Issue date, April 18, 2007, to December 31, 2009.

The Company is entitled to exercise a call option after three years from the date of issue at the amount of the principal and interest, calculated at 3.125% of the annual yield to maturity, from the issue date to the repayment date. The call option can be exercised only when the market price of the common shares on each of 20 trading days in 30 consecutive trading days ending on the trading day immediately prior to the date upon which notice of such redemption is published exceeds at least 130% of the conversion price. In addition, in the event that at least 90% of the initial principal amount of the bonds has been redeemed, converted, or purchased and cancelled, the remaining bonds may also be redeemed, at the Company's option, at the amount of the principal and interest (3.125% per annum) from the date of issue to the repayment date prior to their maturity.

Based on the terms and conditions of the bond, the conversion price was decreased from (Won)48,760 to (Won)48,251 per share due to the declaration of cash dividends of (Won)500 per share for the year ended December 31, 2008.

As of December 31, 2009 and 2008, the number of common shares to be issued if the outstanding convertible bonds are fully converted is as follows:

Investigation and litigation filed by authorities in Korea, Japan, Canada, US and European Commission

In December 2006, the Company received notices of investigation by the Korea Fair Trade Commission, the Japan Fair Trade Commission, the U.S. Department of Justice, and the European Commission with respect to possible anti-competitive activities in the TFT-LCD industry. The Company subsequently received similar notices from the Canadian Competition Bureau and the Taiwan Fair Trade Commission.

In November 2008, the Company executed an agreement with the U.S. Department of Justice (DOJ) whereby the Company and its U.S. subsidiary, LG Display America, Inc. (LGDUS), pleaded guilty to a Sherman Antitrust Act violation and agreed to pay a single total fine of USD400 million. In December 2008, the U.S. District Court for the Northern District of California accepted the terms of the plea agreement and entered a judgment against the Company and LGDUS and ordered the payment of USD400 million according to the following schedule: USD20 million plus any accrued interest by June 15, 2009, and USD76 million plus any accrued interest by each of June 15, 2010, June 15, 2011, June 15, 2012, June 15, 2013 and December 15, 2013. The agreement resolved all federal criminal charges against the Company in the United States in connection with this matter.

On May 27, 2009, the European Commission issued a Statement of Objections (SO) regarding alleged anti-competitive activities in the LCD industry. The Company submitted its response to the SO on August 11, 2009, and a hearing before the European Commission was held on September 22 and 23, 2009. Similar investigations into possible anti-competitive practices in the LCD industry were announced by the Federal Competition Commission of Mexico in or about July 2009 and by the Secretariat of Economic Law of Brazil in December 2009.

In November 2009, the Taiwan Fair Trade Commission terminated its investigation without any finding of violations or levying of fines.

Subsequent to the commencement of the DOJ investigation, a number of class action complaints were filed against the Company and other TFT-LCD panel manufacturers in the U.S. and Canada alleging violation of respective antitrust laws and related laws. In a series of decisions in 2007 and 2008, the class action lawsuits in the U.S. were transferred to the Northern District of California for pretrial proceedings (MDL Proceedings). Additionally in 2009, separate claims were filed by ATS Claim LLC, AT&T Corp., Motorola Inc., Electrograph Technologies Corp., Nokia Corp. and their respective related entities, all of which have been transferred to the MDL Proceedings.

In February 2007, the Company and certain of its current and former officers and directors were named as defendants in two purported class action complaints filed in the U.S. District Court for the Southern District of New York by the shareholders of the Company, alleging that the Company and certain of its officers and directors violated the U.S. Securities Exchange Act of 1934.

While the Company continues its vigorous defense of the various pending proceedings described above, there is a possibility that one or more proceedings may result in an unfavorable outcome to the Company. The Company has established reserves with respect to certain of the contingencies. However, actual liability may be materially different from the reserves estimated by the Company.

Independent Auditors Report

Based on a report originally issued in Korean

To the Shareholders and Board of Directors

LG Display Co., Ltd.:

We have audited the accompanying consolidated statements of financial position of LG Display Co., Ltd. and subsidiaries (the Company) as of December 31, 2009 and 2008, and the related consolidated statements of income, changes in shareholders' equity and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to issue a report on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the Republic of Korea. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2009 and 2008 and the results of its operations, the changes in its equity and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the Republic of Korea.

Without qualifying our opinion, we draw attention to the following:

As discussed in note 3(b) to the consolidated financial statements, accounting principles and auditing standards and their application in practice vary among countries. The accompanying consolidated financial statements are not intended to present the financial position, results of operations, changes in shareholders' equity and cash flows in accordance with accounting principles and practices generally accepted in countries other than the Republic of Korea. In addition, the procedures and practices utilized in the Republic of Korea to audit such consolidated financial statements may differ from those generally accepted and applied in other countries. Accordingly, this report and the accompanying consolidated financial statements are for use by those knowledgeable about Korean accounting procedures and auditing standards and their application in practice.

As discussed in note 20(b) to the consolidated financial statements, as of December 31, 2009, the Company is under investigations by Korea Fair Trade Commission in Korea, European Commission and antitrust authorities in other countries with respect to possible anti-competitive activities in the LCD industry. In addition, the Controlling Company, along its subsidiaries, has been named as defendants in a number of federal class actions in the United States and Canada and related individual lawsuits based on alleged antitrust violations concerning the sale of LCD panels, and the Controlling Company and certain of its officers and directors have been named as defendants in a federal class action in the United States by shareholders of the Controlling Company alleging violations of the U.S. Securities Exchange Act of 1934. The Company estimated and recognized losses related to these legal proceedings. However, actual losses are subject to change in the future based on new developments in each matter, or changes in circumstances, which could be materially different from those estimated and recognized by the Company.

Notes to Consolidated Financial Statements

December 31, 2009 and 2008

1 Organization and Description of Business

The accompanying consolidated financial statements include the accounts of LG Display Co., Ltd. and its consolidated subsidiaries (collectively the Company). The general information of LG Display Co., Ltd. (the Controlling Company), its consolidated subsidiaries and its equity method investees is described below.

(a) Description of the Controlling Company

LG Display Co., Ltd. was incorporated in 1985 under its original name of LG Soft, Ltd. as a wholly owned subsidiary of LG Electronics Inc. In 1998, LG Electronics Inc. and LG Semicon Co., Ltd. transferred their respective Thin Film Transistor Liquid Crystal Display (TFT-LCD) related business to the Controlling Company. The main business of the Controlling Company is to manufacture and sell TFT-LCD panels. In July 1999, LG Electronics Inc. and Koninklijke Philips Electronics N.V. (Philips) entered into a joint venture agreement. Pursuant to the agreement, the Controlling Company changed its name to LG.Philips LCD Co., Ltd. However, on February 29, 2008, the Controlling Company changed its name to LG Display Co., Ltd. based upon the approval of shareholders at the general shareholders meeting on the same date as a result of the decrease in Philips' share interest in the Controlling Company and the possibility of its business expansion to Organic Light Emitting Diode (OLED) and Flexible Display products. In March 2009, Philips, which used to be one of the major shareholders of the Controlling Company, sold all of its share holdings, 47,225 thousand shares, of the Controlling Company. As of December 31, 2009, LG Electronics Inc. owns 37.9% (135,625 thousand shares) of the Company's common shares.

As of December 31, 2009, the Controlling Company has LCD Research & Development Center and TFT-LCD manufacturing plants in Paju and TFT-LCD manufacturing plants and OLED manufacturing plant in Gumi. The Controlling Company has overseas subsidiaries located in the United States of America, Europe and Asia.

3 Summary of Significant Accounting Policies and Basis of Presenting Financial Statements

(a) Significant Accounting Policies

The significant accounting policies followed by the Company in the preparation of its consolidated financial statements are the same as those followed by the Company in its preparation of annual consolidated financial statements for the year ended December 31, 2008.

(b) Basis of Presenting Financial Statements

The Company maintains its accounting records in Korean Won and prepares statutory financial statements in the Korean language in conformity with the accounting principles generally accepted in the Republic of Korea. Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with generally accepted accounting principles in other countries. Accordingly, these consolidated financial statements are intended for use only by those who are informed about Korean accounting principles and practices. The accompanying consolidated financial statements have been translated into English from the Korean language consolidated financial statements.

(c) Revenue Recognition

Revenue is recognized when the significant risks and rewards of ownership have been transferred to the Company's customers, recovery of the consideration is probable, the associated costs and possible return of goods can be estimated reliably, and there is no continuing management involvement with the goods. Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts, volume rebates and other cash incentives paid to customers.

(d) Cash and Cash Equivalents

Cash and cash equivalents include cash on hand and in banks, and financial instruments with maturity of three months or less at the time of purchase. These financial instruments are readily convertible into cash without significant transaction costs and bear low risks from changes in value due to interest rate fluctuations.

(e) Allowance for Doubtful Accounts

Allowance for doubtful accounts is estimated based on an analysis of individual accounts and past experience of collection and presented as a deduction from trade receivables.

3 Summary of Significant Accounting Policies and Basis of Presenting Financial Statements, Continued

(f) Inventories

Inventories are stated at the lower of cost or market value, with cost being determined by a weighted-average method, except for the materials in transit, which is determined by a specific identification method. Valuation loss, which is comprised of the amount of any write-down of inventories to market value and the amount of loss from the difference between the quantity of inventories recorded in the financial statements and the actual quantity incurred in the ordinary course of business, is added to the cost of goods sold. Valuation loss for the holding inventories is presented as a reduction of the inventories. When the circumstances that previously caused inventories to be written down below cost no longer exist or when there is clear evidence of an increase in net realizable value because of changed economic circumstances, the amount of the write-down is reversed and reduces cost of sales to the extent that revised book value does not exceed the book value that would have been recorded without the impairment.

Variable production overheads are allocated based on the actual level of production and fixed production overheads are allocated based on the actual capacity of production facilities. However, the normal capacity may be used for allocation of fixed production overheads if the actual level of production is lower than the normal capacity. The difference between actual fixed production overheads and allocated amount based on the normal level of production is recognized as capacity variances in non-operating expenses.

(g) Investments in Securities

Upon acquisition, the Company classifies debt and equity securities, excluding investments in subsidiaries, associates and joint ventures, into the following categories: held-to-maturity, trading securities or available-for-sale securities. This classification is reassessed at each balance sheet date.

Investments in debt securities where the Company has the positive intent and ability to hold to maturity are classified as held-to-maturity. Securities that are acquired principally for the purpose of selling in the short-term are classified as trading securities. Investments not classified as either held-to-maturity or trading securities are classified as available-for-sale securities.

Investments in securities are initially recognized at the fair value of considerations provided by the Company for the acquisition of securities and related transaction costs.

Held-to-maturity investments are carried at amortized cost. Trading and available-for-sale securities are subsequently carried at fair value. Investments in available-for-sale equity securities that do not have readily determinable fair values are recognized at cost less impairment, if any.

Gains and losses arising from changes in the fair value of trading securities are included in the income statement in the period in which they arise. Unrealized gains and losses arising from changes in the fair value of available-for-sale securities are recognized as accumulated other comprehensive income or loss, net of tax, directly in equity. Gains and losses of available-for-sale securities are recognized in the income statement when the securities are disposed or an impairment loss is recognized. Held-to-maturity investments are carried at amortized cost with interest income and expense recognized in the income statement using the effective interest method.

(g) Investments in Securities, Continued

The Company assesses at the end of each reporting period whether there is any objective evidence that investments in securities are impaired. Impairment losses are recognized when the reasonably estimated recoverable amounts are less than the carrying amount and it is not obviously evidenced that impairment is unnecessary.

Trading securities are presented as current assets. Available-for-sale securities, which mature within one year from the balance sheet date or where the likelihood of disposal within one year from the balance sheet date is probable, are presented as current assets. Held-to-maturity securities, which mature within one year from the balance sheet date, are presented as current assets. All other available-for-sale securities and held-to-maturity securities are presented as long-term investments.

(h) Equity Method Investment

Investments in entities of which the Company has the ability to significantly influence are accounted for using the equity method of accounting. The Company records changes in its proportionate ownership in the net assets of the equity method investees in current operations or as adjustments to other comprehensive income (loss) or retained earnings, depending on the nature of the underlying change in the net assets of the equity method investees. If the carrying amount of an investment in an equity method investee falls below zero as a result of reflecting the investee's losses when the equity method is applied, the Company discontinues recognizing further changes in its share of equity interest in the equity method investee and the related investment is accounted for at nil value. However, if the Company holds interest in the equity method investee, including preferred stocks, long-term loans and receivables issued by the equity method investee, the Company continues to account for the losses of the equity method investee until the carrying amount of the interest is reduced to zero.

Unrealized gains on transactions between the Company and its equity method investees are eliminated to the extent of the Company's interest in each equity method investee. Unrealized gains are accounted for as a reduction of the carrying amount of the investment in the equity method investee, while unrealized losses are added to the carrying amount of the investment in the equity method investee.

At the date of acquisition of an investment in an equity method investee, the Company's share of the difference between the fair value and book value of the identifiable assets and liabilities of an equity method investee is amortized or reinstated in accordance with the equity method investee's methods of accounting for assets and liabilities. The amount of goodwill or negative goodwill is calculated as the difference between the acquisition cost of an investment in an equity method investee and the Company's share of the fair value of the identifiable net assets of the equity method investee. Goodwill is amortized using the straight-line method over five years. The amount of negative goodwill up to the fair value of depreciable non-monetary assets is recognized using the straight-line method as a gain over the weighted average useful lives and the remainder of negative goodwill up to the fair value of non-depreciable assets is recognized as a gain in the period of disposal of the assets. Any excess of negative goodwill over the fair value of identifiable non-monetary assets is recognized as a gain at the date of acquisition.

Assets and liabilities of a foreign company subject to the equity method of accounting for investments are translated into Korean Won at the rates of exchange prevailing at the end of the reporting period, while its equity is translated at the exchange rate at the time of transactions, and income statement accounts at the average rate over the year. Resulting translation gains and losses are recorded as accumulated other comprehensive income and loss.

(i) Interest in Joint Ventures

Joint ventures are those entities two or more venturers are bound by a contractual arrangement and the contractual arrangement establishes a joint control. The Company accounts for its interest in a jointly controlled entity using the equity method of accounting.

(j) Property, Plant and Equipment

Upon acquisition, property, plant and equipment are stated at cost, which includes acquisition cost or production cost and other costs required to prepare the asset for its intended use as well as capitalized financial expense. Assets acquired through investment in kind or donations are recorded at their fair value upon acquisition. For assets acquired in exchange for a similar asset, the carrying amount of the asset given up is used to measure the cost of the asset received, and for assets acquired in exchange for a dissimilar asset, the fair value of the asset given up is used to measure the cost of the asset received unless the fair value of the asset received is more clearly evident.

Depreciation is computed by using the straight-line method over the estimated useful lives for the assets with the depreciable amount is determined after deducting its residual value from the cost. Assets are stated at cost less accumulated amortization and accumulated impairment loss, if any.

Estimated useful lives of the assets are as follows:

| | Estimated useful lives (years) |
|-------------------------------|---|
| Buildings | 20, 40 |
| Structures | 20, 40 |
| Machinery and equipment | 4 |
| Vehicles | 4, 12 |
| Tools, furniture and fixtures | 3~5 |

Significant additions or improvement extending the useful lives or increasing the value of the assets are capitalized. Normal maintenance and repairs are charged to expenses as incurred.

Intangible assets are stated at cost, which includes acquisition or production cost and other costs required to prepare the asset for its intended use, less accumulated amortization and accumulated impairment loss, if any. Amortization commences when the asset is available for use, and the residual value of an intangible asset is assumed to be zero.

Costs incurred during the development phase are recognized as assets only if the criteria for capitalization as an intangible asset are met, otherwise costs are recognized as a development cost in cost of sales or selling, general and administrative expenses. Any expenditure incurred in the research phase is recognized as research expense in selling, general and administrative expenses.

Intangible assets are amortized using the straight-line method over the following estimated useful lives:

| | Estimated useful lives (years) |
|---|---|
| Intellectual property rights | 5, 10 |
| Rights to use electricity and gas supply facilities | 10 |
| Rights to use industrial water facilities | 10 |
| Software | 4 |

(l) Grants Received

Grants received from government and other third parties, which are to be repaid, are recorded as a liability. While non-refundable grants received are presented as a reduction of the acquisition cost of the acquired assets, grants received for a specific purpose, not related to the acquisition of assets, are offset against the related expense, and other grants received are recorded as other income.

(m) Impairment of Assets

When the book value of an asset is significantly greater than its recoverable value due to obsolescence, physical damage or an abrupt decline in the market value of the asset, the decline in value is deducted from the book value to agree with the recoverable amount and is recognized as an asset impairment loss for the period. When the recoverable value subsequently exceeds the book value, the reversal of impairment amount is recognized as a gain for the period to the extent that the revised book value does not exceed the book value that would have been recorded without the impairment.

(n) Convertible Bonds

When accounting for a convertible bond, the liability component and the equity component of a bond are separated. At the date of issue, the liability component of the bond is calculated at the fair value of a similar debt security without conversion rights, which is the present value of future cash flows from an ordinary bond until maturity and the equity component is calculated as the difference between the gross proceeds of the bond received at the date of issue and the amount of liability component. The equity component of the convertible bond is presented as a part of capital surplus within equity. Subsequent to initial recognition, the liability component is measured at amortized cost using the effective interest rate method; however, the equity component is not remeasured subsequent to initial recognition.

(o) Stock and Bond Issue Costs

Stock issue cost is deducted from the gross proceeds from issuance of those stocks and bond issue cost is adjusted to issuance price of debentures and, in turn, discount or premium on debentures.

(p) Discount (Premium) on Debentures

Discount (premium) on debentures, which represents the difference between the face value and issuance price of debentures, is amortized (accreted) using the effective interest method over the life of the debentures. The amount amortized (accreted) is included in interest expense.

(q) Retirement and Severance Benefits

The Controlling Company's employees and directors with at least one year of service are entitled to receive a lump-sum payment upon termination of their employment with the Company. Accrued severance benefits represent the amount which would be payable assuming all eligible employees and directors were to terminate their employment as of the end of the reporting period.

The Controlling Company has partially funded the accrued severance benefits through severance insurance deposits with insurance companies. Deposits made by the Controlling Company are recorded as a deduction from accrued severance benefits. In the case that the deposits are greater than the balance of accrued severance benefits, the excess portion of deposits over accrued severance benefits is recorded as other investments. The Controlling Company deposited a certain portion of severance benefits to the National Pension Service in the Republic of Korea according to the prior National Pension Law of the Republic of Korea. The deposit amount is recorded as a deduction from accrued severance benefits.

(r) Valuation of Receivables and Payables at Present Value

Receivables and payables arising from long-term cash loans or borrowings and other similar transactions are discounted using appropriate discount rates and stated at present value. The difference between the nominal value and present value of these receivables or payables is amortized using the effective interest rate method. The amount amortized is included in interest expense or interest income.

(s) Foreign Currency Translation

Non-monetary assets and liabilities denominated in foreign currencies, which are stated at historical cost, are translated into respective local currency of the Controlling Company and subsidiaries at the foreign exchange rate on the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into respective local currency of the Controlling Company and subsidiaries using the foreign exchange rates prevailing at the end of the reporting period, with the resulting gains or losses recognized in the statement of income.

Foreign currency assets and liabilities of foreign-based operations or subsidiaries are translated into Korean Won at the rate of exchange at the end of the reporting period. Foreign currency amounts in the statement of income are translated into Korean Won using average rates and foreign currency balances in the capital account are translated using the historical rates. Translation gains and losses arising from collective translation of the foreign currency financial statements of the foreign-based operations or subsidiaries are recorded net as accumulated other comprehensive income (loss). These gains and losses recorded as accumulated other comprehensive income (loss) are subsequently recognized currently in income (loss) in the year the foreign operations or subsidiaries are liquidated or sold.

(t) Derivatives

The Controlling Company enters into foreign currency forward contracts to manage the foreign currency risk exposures to the changes in fair value of foreign currency denominated accounts receivable and accounts payable. In addition, the Controlling Company entered into cross currency swap and interest rate swap contracts to manage the interest rate and foreign currency risk exposures to the variability of future cash flows of floating rate notes.

Derivatives are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at their fair value at each end of the reporting period. Attributable transaction costs are recognized in profit or loss when incurred.

Where a derivative, which meets certain criteria, is used for hedging the exposure to changes in the fair value of a recognized asset or liability, it is designated as a fair value hedge. Where a derivative, which meets certain criteria, is used for hedging the exposure to the variability of the future cash flows of a forecasted transaction, it is designated as a cash flow hedge.

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the statement of income, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk.

The effective portion of the changes in the fair value of derivatives that are designated and qualify as cash flow hedges are recognized in equity, other comprehensive income or loss. Amounts accumulated in equity are recycled to the income statement in the periods in which the hedged item will affect profit or loss or adjusted to the carrying value of an asset or liability of the related to the hedged transaction. When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at the time remains in equity and is recognized in income when the forecast transaction is ultimately recognized in the statement of income. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the statement of income.

(t) Derivatives, Continued

The Controlling Company documents, at the inception of the transaction, the relationship between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. The Controlling Company also documents its assessment, both at hedge inception and on an ongoing basis at each end of the reporting period, of whether the derivatives that are used in hedging transactions are highly effective in offsetting the changes in fair values or cash flows of hedged items and recognizes the gain or loss related to any ineffective portion immediately in the statement of income.

(u) Provisions and Contingent Liabilities

When it is probable that an outflow of economic benefits will occur due to a present obligation resulting from a past event, and whose amount is reasonably estimable, a corresponding amount of provision is recognized in the financial statements. However, when such outflow is dependent upon a future event, is not probable to occur, or cannot be reliably estimated, a disclosure regarding the contingent liability is made in the notes to the financial statements.

(v) Income Taxes

Income tax expense includes the current income tax under the relevant income tax laws of the countries where the Controlling Company and its subsidiaries are located and the changes in deferred tax assets or liabilities. Deferred tax assets and liabilities represent the amount of future income tax payables to be decreased or increased, respectively, by temporary differences, which is the difference between the carrying amounts of assets and liabilities for financial reporting purpose and the tax bases of assets and liabilities, and unused loss carryforwards and tax credits. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the temporary differences, unused losses, and unused tax credits can be utilized. Deferred tax assets and liabilities are computed on temporary differences by applying enacted statutory tax rates applicable to the years when such differences are expected to reverse. Changes in the carrying amount of deferred tax assets or liabilities result from a change in tax rates or tax laws are recognized in the income statement except to the extent that the changes relate to items previously reflected directly in the shareholders' equity.

(w) Sale or Discount of Accounts Receivable

The Company sells or discounts certain accounts or notes receivable to financial institutions, and accounts for the transactions as sale of the receivables if the control over the receivables is substantially transferred to the buyers. The losses from the sale of the receivables are charged to current operations as incurred.

(x) Earnings Per Share

Earnings per share are calculated by dividing net income attributable to shareholders of the Company by the weighted-average number of shares outstanding during the period. Diluted earnings per share are determined by adjusting net income attributable to shareholders and the weighted-average number of shares outstanding for the effects of all dilutive potential shares.

(y) Principles of Consolidation

The carrying amount of the Controlling Company's investment in each subsidiary and the equity of each subsidiary are eliminated as of the time the Controlling Company obtains control over a subsidiary. Minority interests in the net assets of consolidated subsidiaries are presented within equity and identified separately from the parent shareholders' equity in them.

Unrealized gains or losses included in inventories and other assets as a result of intercompany transactions are eliminated based on the average gross profit ratio of the corresponding company. Unrealized gains or losses, arising from sales by the Controlling Company to the consolidated subsidiaries, is fully eliminated and charged to the equity of the Controlling Company. Unrealized gains or losses, arising from sales by the consolidated subsidiaries to the Controlling Company, or sales between consolidated subsidiaries, are fully eliminated, and charged to the equity of the Controlling Company and the minority interest, based on the percentage of ownership.

(z) Use of Estimates

The preparation of consolidated financial statements in accordance with accounting principles generally accepted in the Republic of Korea requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and related notes to consolidated financial statements. Items requiring management's estimates and assumptions include, but not limited to, the valuation of property, plant and equipment, accounts receivable, inventories, deferred income tax and derivative contracts. Actual results may differ from those estimates.

(b) Details of the convertible bonds are as follows:

| | Terms and Conditions |
|-------------------------------------|------------------------------|
| Issue date | April 18, 2007 |
| Maturity date | April 18, 2012 |
| Conversion period | April 19, 2008~April 3, 2012 |
| Coupon interest rate | 0% |
| Conversion price (in Won) per share | (Won)48,251 |
| Issued amount | USD550 million |

The bonds will be repaid at 116.77% of the principal amount at maturity unless the put option of bondholders are exercised in which case the bondholders will be repaid at 109.75% of the principal amount on April 18, 2010, and in 2009, they were reclassified to current liabilities. If the convertible bonds inclusive of redemption premium were classified as monetary liabilities, the loss on foreign currency translation would be (Won)152,531 million for the period from Issue date, April 18, 2007, to December 31, 2009.

The Controlling Company is entitled to exercise a call option after three years from the date of issue at the amount of the principal and interest, calculated at 3.125% of the annual yield to maturity, from the issue date to the repayment date. The call option can be exercised only when the market price of the common shares on each of 20 trading days in 30 consecutive trading days ending on the trading day immediately prior to the date upon which notice of such redemption is published exceeds at least 130% of the conversion price. In addition, in the event that at least 90% of the initial principal amount of the bonds has been redeemed, converted, or purchased and cancelled, the remaining bonds may also be redeemed, at the Controlling Company's option, at the amount of the principal and interest (3.125% per annum) from the date of issue to the repayment date prior to their maturity.

Based on the terms and conditions of the bond, the conversion price was decreased from (Won)48,760 to (Won)48,251 per share due to the Controlling Company's declaration of cash dividends of (Won)500 per share for the year ended December 31, 2008.

As of December 31, 2009 and 2008, the number of common shares to be issued if the outstanding convertible bonds are fully converted is as follows:

December 31, 2009 and 2008

20 Commitments and Contingencies, Continued

In November 2008, the Controlling Company executed an agreement with the U.S. Department of Justice (DOJ) whereby the Controlling Company and its U.S. subsidiary, LG Display America, Inc. (LGDUS), pleaded guilty to a Sherman Antitrust Act violation and agreed to pay a single total fine of USD400 million. In December 2008, the U.S. District Court for the Northern District of California accepted the terms of the plea agreement and entered a judgment against the Controlling Company and LGDUS and ordered the payment of USD400 million according to the following schedule: USD20 million plus any accrued interest by June 15, 2009, and USD76 million plus any accrued interest by each of June 15, 2010, June 15, 2011, June 15, 2012, June 15, 2013 and December 15, 2013. The agreement resolved all federal criminal charges against the Controlling Company and LGDUS in the United States in connection with this matter.

On May 27, 2009, the European Commission issued a Statement of Objections (SO) regarding alleged anti-competitive activities in the LCD industry. The Controlling Company submitted its response to the SO on August 11, 2009, and a hearing before the European Commission was held on September 22 and 23, 2009. Similar investigations into possible anti-competitive practices in the LCD industry were announced by the Federal Competition Commission of Mexico in or about July 2009 and by the Secretariat of Economic Law of Brazil in December 2009.

In November 2009, the Taiwan Fair Trade Commission terminated its investigation without any finding of violations or levying of fines.

Subsequent to the commencement of the DOJ investigation, a number of class action complaints were filed against the Controlling Company and other TFT-LCD panel manufacturers in the U.S. and Canada alleging violation of respective antitrust laws and related laws. In a series of decisions in 2007 and 2008, the class action lawsuits in the U.S. were transferred to the Northern District of California for pretrial proceedings (MDL Proceedings). Additionally in 2009, separate claims were filed by ATS Claim, LLC, AT&T Corp., Motorola, Inc., Electrograph Technologies Corp., Nokia Corp., and their respective related entities, all of which have been transferred to the MDL Proceedings.

In February 2007, the Controlling Company and certain of its current and former officers and directors were named as defendants in two purported class action complaints filed in the U.S. District Court for the Southern District of New York by the shareholders of the Controlling Company, alleging that the Controlling Company and certain of its officers and directors violated the U.S. Securities Exchange Act of 1934.

While the Controlling Company continues its vigorous defense of the various pending proceedings described above, there is a possibility that one or more proceedings may result in an unfavorable outcome to the Controlling Company. The Controlling Company has established reserves with respect to certain of the contingencies. However, actual liability may be materially different from the reserves estimated by the Controlling Company.

(a) The terms and conditions of share-based payment arrangement as of December 31, 2009 are as follows:

| | Descriptions |
|--------------------------------------|--|
| Settlement method | Cash settlement |
| Type of arrangement | Stock appreciation rights (granted to senior executives) |
| Date of grant | April 7, 2005 |
| Weighted-average exercise price (*1) | (Won)44,050 |
| Number of rights granted | 450,000 |
| Number of rights forfeited (*2) | 230,000 |
| Number of rights cancelled (*3) | 110,000 |
| Number of rights outstanding | 110,000 |
| Exercise period | From April 8, 2008 to April 7, 2012 |
| Vesting conditions | Two years of service from the date of grant |

(*1) The exercise price at the grant date was (Won)44,260 per stock appreciation right (SARs). However, the exercise price was subsequently adjusted to (Won)44,050 due to additional issuance of common shares in 2005.

(*2) SARs were forfeited in connection with senior executives who left the Controlling Company before meeting the vesting requirement.

(*3) If the appreciation of the Controlling Company's share price is equal or less than that of the Korea Composite Stock Price Index (KOSPI) over the three-year period following the grant date, only 50% of the outstanding SARs are exercisable. As the actual increase rate of the Controlling Company's share price for the three-year period ending April 7, 2008 was less than that of the KOSPI for the same three-year period, 50% of then outstanding SARs were cancelled in 2008.

(b) The changes in the number of SARs outstanding for the years ended December 31, 2009 and 2008 are as follows:

(Number of shares)

| | Stock appreciation rights | |

38 Status of the Company's Adoption of Korean IFRS

The preparation of financial statements under Korean International Financial Reporting Standards (K-IFRS) is mandatory for all listed companies in the Republic of Korea from 2011; however, the Company has elected to early adopt K-IFRS from the year ended December 31, 2010. Information on the Company's K-IFRS adoption plan and the current status of progress is as follows:

(a) K-IFRS Adoption Plan and current status of progress

The Company has employees in its accounting department who prepare for early adoption and perform related tasks. These employees analyze the effect of K-IFRS adoption to the Company and its financial reporting system and financial statements and report the results and status of the Company's transition to K-IFRS to the management. In 2007, the Company has contracted external consultants and completed generally accepted accounting principles (GAAP) difference analysis. As a result, the Company's accounting policy in accordance with IFRS was established after an analysis of GAAP differences between Korean GAAP (K-GAAP) and K-IFRS and alternative accounting methods allowed in K-IFRS. Currently, the Company is preparing financial statements in accordance with K-IFRS for the transition date and the year ended December 31, 2009.

Report on the operation of internal Control of Financial Reporting

To the Board of Directors and Audit Committee of LG Display Co., Ltd

I, as the Internal Control over Financial Reporting (ICFR) Officer of LG Display (the Company), assessed the effectiveness of the design and operation of the Company s ICFR for the year ending December 31, 2009.

The Company s management, including myself, is responsible for designing and operating an ICFR. I assessed the design and operational effectiveness of the ICFR in the prevention and detection of an error or fraud which may cause a misstatement in the preparation and disclosure of reliable financial statements. I followed the Best Practice Guideline to evaluate the effectiveness of the ICFR design and operation.

Based on the assessment results, I believe that the Company s ICFR, as of December 31, 2009, is effectively designed and operating, in all material respects, in conformity with the Best Practice Guideline.

Independent Accountants' Review Report on Internal Accounting Control System

English translation of a Report Originally Issued in Korean

To the President of

LG Display Co., Ltd.:

We have reviewed the accompanying Report on the Operations of Internal Accounting Control System (IACS) of LG Display Co., Ltd. (the Company) as of December 31, 2009. The Company's management is responsible for designing and maintaining effective IACS and for its assessment of the effectiveness of IACS. Our responsibility is to review management's assessment and issue a report based on our review. In the accompanying report of management's assessment of IACS, the Company's management stated: Based on the assessment on the operations of the IACS, the Company's IACS has been effectively designed and is operating as of December 31, 2009, in all material respects, in accordance with the IACS Framework issued by the Internal Accounting Control System Operation Committee.

We conducted our review in accordance with IACS Review Standards, issued by the Korean Institute of Certified Public Accountants. Those Standards require that we plan and perform the review to obtain assurance of a level less than that of an audit as to whether Report on the Operations of Internal Accounting Control System is free of material misstatement. Our review consists principally of obtaining an understanding of the Company's IACS, inquiries of company personnel about the details of the report, and tracing to related documents we considered necessary in the circumstances. We have not performed an audit and, accordingly, we do not express an audit opinion.

A company's IACS is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, however, IACS may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Based on our review, nothing has come to our attention that Report on the Operations of Internal Accounting Control System as of December 31, 2009 is not prepared in all material respects, in accordance with IACS Framework issued by the Internal Accounting Control System Operation Committee.

This report applies to the Company's IACS in existence as of December 31, 2009. We did not review the Company's IACS subsequent to December 31, 2009. This report has been prepared for Korean regulatory purposes, pursuant to the External Audit Law, and may not be appropriate for other purposes or for other users.
