THE ZWEIG TOTAL RETURN FUND, INC.

NOTES TO SCHEDULE OF INVESTMENTS

SEPTEMBER 30, 2010
(UNAUDITED)

NOTE 1 -- SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principals generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates and those differences could be significant.

A. SECURITY VALUATION:

The Fund utilizes a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels.

- . Level 1 -- quoted prices in active markets for identical securities
- . Level 2 -- prices determined using other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- . Level 3 -- prices determined using significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-Q

A description of the valuation techniques applied to the Fund's major categories of assets and liabilities measured at fair value on a recurring basis is as follows:

Equity securities are valued at the official closing price (typically last sale) on the exchange on which the securities are primarily traded, or if no closing price is available, at the last bid price and are categorized as Level 1 in the hierarchy. Restricted equity securities and private placements that are not widely traded, are illiquid or are internally fair valued by the advisor, are generally categorized as Level 3 in the hierarchy.

Certain foreign securities may be fair valued in cases where closing prices are not readily available or are deemed not reflective of readily available market prices. For example, significant events (such as movement in the U.S. securities market, or other regional and local developments) may occur between the time that foreign markets close (where the security is principally traded) and the time that the Fund calculates its net asset value (generally, the close of the NYSE) that may impact the value of securities traded in these foreign markets. In such cases the Fund fair values foreign securities using an independent pricing service which considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American depositary receipts, financial futures, exchange-traded funds, and certain indexes as well as prices for similar securities. Such fair valuations are categorized as Level 2 in the hierarchy. Because the frequency of significant events is not predictable, fair valuation of certain foreign common stocks may occur on a frequent basis.

5

Debt securities, including restricted securities, are valued based on evaluated quotations received from independent pricing services or from dealers who make markets in such securities. For most bond types, the pricing service utilizes matrix pricing which considers yield or price of bonds of comparable quality, coupon, maturity, current cash flows, type, and current day trade information, as well as dealer supplied prices. These valuations are generally categorized as Level 2 in the hierarchy. Structured debt instruments may also incorporate collateral analysis and utilize cash flow models for valuation and are generally categorized as Level 2 in the hierarchy. Pricing services do not provide pricing for all securities and therefore indicative bids from dealers are utilized which are based on pricing models used by market makers in the security and are generally categorized as Level 2 in the hierarchy. Debt securities that are not widely traded, are illiquid, or are internally fair valued by the advisor are generally categorized as Level 3 in the hierarchy.

Listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized as Level 1 in the hierarchy. Over the counter (OTC) derivative contracts, which include forward currency contracts and equity linked instruments, do not require material subjectivity as pricing inputs are observed from actively quoted markets and are categorized as Level 2 in the hierarchy.

Investments in open-end mutual funds are valued at their closing net asset value determined as of the close of business of the New York Stock Exchange (generally 4:00 p.m. Eastern time) each business day and are categorized as Level 1 in the hierarchy.

Short-term Notes having a remaining maturity of 60 days or less are valued

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-Q

at amortized cost, which approximates market.

A summary of the inputs used to value the Fund's net assets by each major security type is disclosed at the end of the Schedule of Investments for the Fund. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

B. SECURITY TRANSACTIONS AND RELATED INCOME:

Security transactions are recorded on the trade date. Dividend income is recorded on the ex-dividend date, or in the case of certain foreign securities, as soon as the Fund is notified. Interest income is recorded on the accrual basis. The Fund amortizes premiums and accretes discounts using the effective interest method. Realized gains and losses are determined on the identified cost basis.

C. SECURITY LENDING (\$ REPORTED IN THOUSANDS):

The Fund may loan securities to qualified brokers through an agreement with The Bank of New York Mellon ("BNY Mellon"). Under the terms of the agreement, the Fund is required to maintain collateral with a market value not less than 100% of the market value of loaned securities. Collateral is adjusted daily in connection with changes in the market value of securities on loan. Collateral may consist of cash, U.S. Government Securities. Cash collateral is invested in a short-term money market fund. Dividends earned on the collateral and premiums paid by the broker are recorded as income by the Fund net of fees and rebates charged by BNY Mellon for its services in connection with this securities lending program. Lending portfolio securities involves a risk of delay in the recovery of the loaned securities or in the foreclosure on collateral.

6

At September 30, 2010, the Fund had securities on loan with a market value of \$49,243 for which the Fund received cash collateral of \$6,618 and U.S. Government Securities Collateral of \$49,967.

NOTE 2 -- INDEMNIFICATIONS

Under the Fund's organizational documents and related agreements, its directors and officers are indemnified against certain liabilities arising out of the performance of their duties to the Fund. In addition, the Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these arrangements.

NOTE 3 -- FEDERAL INCOME TAX INFORMATION

(\$ REPORTED IN THOUSANDS)

At September 30, 2010, federal tax cost and aggregate gross unrealized appreciation (depreciation) of securities held by the Fund were as follows:

FEDERAL TAX COST	UNREALIZED APPRECIATION	UNREALIZED DEPRECIATION	NET UNREALIZED APPRECIATION (DEPRECIATION)
\$434,805	\$34,571	\$(15,845)	\$18,726

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-Q

NOTE 4 -- CREDIT RISK AND ASSET CONCENTRATIONS

In countries with limited or developing markets, investments may present greater risks than in more developed markets and the prices of such investments may be volatile. The consequences of political, social or economic changes in these markets may have disruptive effects on the market prices of these investments and the income they generate, as well as the Fund's ability to repatriate such amounts.

The Fund may invest a high percentage of its assets in specific sectors of the market in its pursuit of a greater investment return. Fluctuations in these sectors of concentration may have a greater impact on the Fund, positive or negative, than if the Fund did not concentrate its investments in such sectors.

NOTE 5 -- RECENT ACCOUNTING PRONOUNCEMENT

In January 2010, the Financial Accounting Standards Board issued Accounting Standards Update ("ASU") No. 2010-06 "Improving Disclosures about Fair Value Measurements". ASU 2010-06 will require reporting entities to make new disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements. The new and revised disclosures are effective for interim and annual reporting periods beginning after December 15, 2010. At this time, management is evaluating the implications of ASU No. 2010-06 and its impact on the financial statements has not been determined.

NOTE 6 -- SUBSEQUENT EVENT EVALUATIONS

Management has evaluated the impact of all subsequent events on the Fund through the date the Schedule of Investments were available for issuance, and has determined that the following subsequent event requires recognition or disclosure in this Schedule of Investments.

On November 18, 2010 the Zweig Total Return Fund announced the record date of November 29, 2010 for the proposed offering of additional shares of common stock pursuant to its rights offering that was previously announced on September 16, 2010. The Fund filed registration statement with respect to the rights offering with the Securities and Exchange Commission on September 21, 2010, which was amended on November 4, 2010.
