Interest Reset Date:

Each Interest Payment Date.

Interest Period:	The period commencing on any Interest Payment Date (or, with respect to the initial Interest Period only, commencing on January 29, 2019) to, but excluding, the next succeeding Interest Payment Date, and in the case of the last such period, from and including the Interest Payment Date immediately preceding the Maturity Date to but not including such Maturity Date.

Calculation Agent:	BMO Capital Markets Corp. For each Interest Period, the Calculation Agent will calculate the amount of accrued interest by multiplying the principal amount of the Note by an accrued interest factor for the Interest Period. The interest factor for each day will be expressed as a decimal and will be calculated by dividing the interest rate, also expressed as a decimal, applicable to that day by 360.

The Notes are bail-inable debt securities (as defined in the prospectus) and subject to conversion in whole or in part by means of a transaction or series of transactions and in one or more steps into common shares of the Bank or any of its affiliates under subsection 39.2(2.3) of the Canada Deposit Insurance Corporation Act (Canada) (the CDIC Act) and to variation or extinguishment in consequence, and subject to the application of the laws of the Province of Ontario and the federal laws of Canada applicable therein in respect of the operation of the CDIC Act with respect to the Notes.

Under Rule 15c6-1 of the Securities Exchange Act of 1934, as amended (the Exchange Act), trades in the secondary market generally are required to settle in two business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade their Notes more than two business days prior to the settlement date will be required, by virtue of the fact that some of the Notes initially will settle in three business days (T+3), to specify an alternate settlement cycle at the time of any such trade to prevent a failed settlement.
