RECOM MANAGED SYSTEMS, INC.
NOTES TO FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company is in the development stage and has a limited operating history since its reorganization. These factors raise substantial doubt about the Company's ability to continue as a going concern. The financial statements do not include any adjustments relating to the classification and recoverability of recorded asset amounts or the amount of liabilities that may be incurred should the Company be unable to continue in existence. Continuation as a going concern is dependent on raising additional capital to fund the Company's planned operations. There is no assurance that the necessary funds will be generated.

The accompanying unaudited financial statements have been prepared in accordance with generally accepted accounting principles for interim financial statements pursuant to Regulation S-B. Accordingly, they do not include all the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (including normal recurring accruals considered necessary for a fair presentation) have been included. Operating results for the nine months ended September 30, 2003 are not necessarily indicative of the results that may be expected for the year ending December 31, 2003. For further information refer to the financial statements and footnotes included in the Form 10-KSB for the year ended December 31, 2002.

NOTE 2 - ACQUISITION OF TECHNOLOGY

On September 19, 2002, the Company acquired from ARC Finance Group LLC ("ARC"), certain know how, trade secrets and other intellectual property described below in exchange for 7,800,000 shares of the Company's common stock. This technology was valued at \$7,800. As a result of this transaction, ARC owned approximately 84.5% of the Company's outstanding shares. This transaction is considered a reverse acquisition and as a capital transaction that results in a capital reorganization. Accordingly, the reorganized Company's assets have been reflected at fair value. In the

Edgar Filing: RECOM MANAGED SYSTEMS INC DE/ - Form 10QSB

reorganization, the Predecessor Company's intangible asset, Reorganization Value in Excess of Amount Allocated to Identifiable Assets (in the amount of \$76,667) and its accumulated deficit (in the amount of \$164,947) were eliminated against Additional Paid-in Capital. There has been no goodwill or intangible assets recognized for this reorganization in the financial statements.

The Company's technology relates to certain proprietary methods, processes and ideas concerning devices and services which, if successfully developed, may be capable of:

- * accurately measuring heart functions
- * automatically and remotely evaluating these functions over the telephone, the Internet, or other wireless transmission systems

6

- * providing the patient and the patient's physician(s) with vital heart and other data on a real time basis to provide early warnings about the patient's heart functions.

No assurance can be given that commercial products or services will ever result or that those products or services will be accepted by regulatory agencies, physicians, patients or insurance providers.

NOTE 5 - AHT SETTLEMENT

During October 2002, the Company entered into a Loanout Agreement with Dr. Budimir Drakulic pursuant to which he agreed to serve as our Chief Technology Officer. In this agreement, we agreed on his behalf, to fulfill certain obligations in connection with a settlement agreement, which Dr. Drakulic entered into with the minority shareholders of AHT. Dr. Drakulic's settlement agreement is complex, but it generally requires that if the Company completes a financing of more than \$2,000,000, up to 4% of the proceeds are to be paid to certain AHT shareholders, up to a total amount of \$480,100.

Edgar Filing: RECOM MANAGED SYSTEMS INC DE/ - Form 10QSB

As discussed in Note 7, the Company completed a financing in October 2003 in excess of \$2,000,000. The Company has recorded a liability of \$480,100 at September 30, 2003, as a result of the financing. However, such payment is subject to compliance with the provisions of the settlement agreement and the Company believes that it has evidence that several of the representations, warranties and covenants have been violated. The Company is currently investigating the violations and does not intend to pay any amounts until the investigation is completed and a final determination is made of amounts due, if any, pursuant to the settlement agreement.

The Convertible Preferred Stock will pay dividends of 8% annually, to be paid quarterly either in cash or in the form of Convertible Preferred Stock at the Company's discretion. The Convertible Preferred Stock will be valued at \$3.00 per share when it is issued as a dividend. Each Holder of the Convertible Preferred Stock will have the option at any time to convert all or any portion of the Convertible Preferred Stock held by such Holder into shares of Common Stock. The Convertible Preferred Stock shall be senior to all other shares of capital stock now existing or hereinafter created of the Company as to dividend and liquidation rights and shall have voting rights as if converted into Common Stock.

ITEM 2. MANAGEMENT'S PLAN OF OPERATION.

FORWARD-LOOKING INFORMATION

This Report on Form 10-QSB contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. The statements regarding the Company contained in this report that are not historical in nature, particularly those that utilize terminology such as "may," "will," "should," "likely," "expects," "anticipates," "estimates," "believes" or "plans," or comparable terminology, are forward-looking statements based on current expectations and assumptions, and entail various risks and uncertainties that could cause actual results to differ materially from those expressed in such forward-looking statements. Details about these risks are set forth in the Company's Report on Form 8-K which was filed with the SEC in September 2002.

Edgar Filing: RECOM MANAGED SYSTEMS INC DE/ - Form 10QSB

PLAN OF OPERATION FOR THE NEXT TWELVE MONTHS

The Company intends to proceed with further development of products and services which employ or otherwise utilize the technology described in Note 2 above. We plan to develop a "belt" that is worn by the patient which will hold both electrodes and the electronics. This development will be accomplished in stages with the first stage housing only the electrodes with the electronics in a separate module. Subsequent development will incorporate the electronics in the belt along with the electrode. We have initiated the study of alternative algorithms for the analysis of ECG's and the Company is also evaluating the advisability of submitting its proof of concept system for hospital institutional review board testing. We are also in discussion with various medical centers regarding beta testing of the low power electronics version of our system. The Company will also work with the inventor of an alternative to standard electrodes (a sensor). The Company plans to develop the sensor technology for possible future incorporation into the "belt." The Company will have an option to acquire the intellectual property rights to the technology if the proof of concept results are as anticipated. The Company estimates it has sufficient cash on hand to fund development and operations for approximately 12 months, because the Company raised approximately \$4,645,000 in net proceeds from the private sale of Series A Convertible Preferred Stock.

The Company plans on using a portion of its funds to develop a sales and marketing infrastructure and a key physician information program. The Company believes it will need to continue to raise funds to finance the full rate production of its ECG System. Additionally, the Company plans to invest in other medical applications of its technology. The first such application being, the monitoring of brain waves to aide in the treatment of neurological diseases.
