12.01 INDEPENDENT AUDITOR'S REPORT - UNQUALIFIED OPINION

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders
Gafisa S.A.

1 We have audited the accompanying consolidated balance sheets of Gafisa S.A. and its subsidiaries as of December 31, 2008 and 2007, and the related statements of income, of changes in shareholders' equity and of cash flows of Gafisa S.A., and the consolidated statements of income, of cash flows and of added value for each of the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements. The audit of the financial statements of the subsidiary Construtora Tenda S.A. for the year ended December 31, 2008 was conducted on the responsibility of other auditors. In the financial statements of Gafisa S.A., the investment in Construtora Tenda S.A. is stated under equity method and represents R\$ 467,934 thousand as of December 31, 2008, and equity in earnings of R\$ 15,589 thousand during the period from October 22 to December 31, 2008. The consolidated financial statements of Construtora Tenda S.A., with total assets amounting to R\$ 1,544,030 thousand as of December 31, 2008, are included in the consolidated statements of Gafisa S.A. and its subsidiaries. Our opinion, in which it refers to the amounts arising from Construtora Tenda S.A., is solely based on the report of these other auditors.

2 We conducted our audits in accordance with auditing standards generally accepted in Brazil. These standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. Accordingly, our work included, among other procedures: (a) planning our audit taking into consideration the significance of balances, the volume of transactions and the accounting and internal control systems of the Company, (b) examining, on a test basis, evidence and records supporting the amounts and disclosures in the financial statements, and (c) assessing the accounting practices used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

3 In our opinion, based on our audits and on the opinion of other auditors' responsibility, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Gafisa S.A. and its subsidiaries as of December 31, 2008 and 2007, and the results of the operations, the changes in shareholders' equity and the cash flows of Gafisa S.A., as well as the consolidated results of operations, the consolidated statements of cash flows and added value of the operations for each of the years then ended in conformity with accounting practices adopted in Brazil.

4 As mentioned in Note 2, in view of the changes in the accounting practices adopted in Brazil in 2008, the financial statements for the previous year, presented for comparison purposes, were adjusted and are being represented as provided for Accounting Standards and Procedures (NPC) 12 - "Accounting Practices, Changes in Accounting Estimates and Correction of Errors".

13.01 MANAGEMENT REPORT 2008

2008 was a year of achievements and expansion for Gafisa. We continued to pursue our strategy for long-term growth and to position as leaders in the residential real estate development market of Brazil. Gafisa's long geographical reach, presence in all income segments and large stock of land assure the ideal platform to maintain our sustainable growth in long term. Our professional management, financial discipline and guaranteed delivery of quality products build up the strength of our brands in each market segment. Our strategic positioning reached the apex in 2008 with the purchase of control over Tenda, consolidating Gafisa's leadership in the segment of low-income residential developments.

We saw a great expansion in residential real estate development between 2005 and 2008, period when new finance for the real estate sector in Brazil grew nearly four times, reaching R\$ 41.4 billion in 2008. In this same period, Gafisa launches posted an average increase of 86% per year, reaching approximately R\$ 4.2 billion in 2008, Gafisa and Tenda in the aggregate. Average sales growth stood at 79% per year, reaching R\$ 2.6 billion in 2008. In 2008, Gafisa posted a growth of 88% in launches and 58% in sales over 2007. The stock of land reached R\$ 17.8 billion in potential sales value at the end of 2008. Our net income reached R\$ 110 million, a growth of 16 % in relation to 2007.

In the second half of 2008, we started to feel the effects of the global economy slowdown on the Brazilian real estate sector, which resulted in a lower sales rate. For 2009, we expect that the measures for stimulating the economy, and particularly the government finance and incentives aimed at growing the low-income housing sector, change the current scenario. Several factors determine a continued expansion in medium and long terms.

Despite of the current scenario of growth in Brazil, the macroeconomic fundamentals are still solid and positive. A young and growing population gaining more access to the labor market is enjoying a growing purchasing power, which leads to a higher demand for houses in almost all income groups. As the demand for housing was not met over several years, the country has a housing deficit of approximately 7.2 million houses, even after the recent growth in the sector. Fortunately, a great improvement in finance rates and terms and higher access to housing finance for real estate development companies and individuals suggest that the supply of houses will continue to increase.

Gafisa continues to count on an established financial reputation, in view of its conservative history and commitment to transparency. The implementation of controls to comply with the requirements of the US Sarbanes-Oxley Act and the advance in the implementation of the SAP management system during 2008 are only two examples of it.

In 2009 Gafisa will continue to develop its brands in new and current markets, maximize the sales of our products through additional sales channels and make the most of our experience and position in the low-income segment. Access to highly talented people is the basis of our success, and we will continue to focus on internship and trainee programs to prepare a new generation, including the future leaders of the company.

In 2009, we will pursue a strategy on launching that is more conservative, with focus on return and cash flow, while being ready to develop our stock of land at the extend demand recovers and capitalize on our solid financial position and strong presence in the low-income segment and in the market as a whole.

Relationship with auditors

The policy on contracting services unrelated to external audit from our independent auditors is based on principles that preserve their independence. According to internationally accepted principles, these principles consist of the following: (a) an auditor cannot audit its own work; (b) an auditor cannot serve a management function in its client; and (c) an auditor shall not promote the interests of its clients. (a) The procedures adopted by the Company are in compliance with the provisions of item III, Art. 2, of CVM Instruction No. 381/03:

The Company and its subsidiaries adopt as formal procedure, before contracting professional services other than those related to external audit, consult with the independent auditors, in order to assure that the provision of other services does not affect their independency nor objectivity necessary for providing independent audit services, in addition to obtaining the proper approval from its Audit Committee. Moreover, formal representations from these auditors are required on their independency in the provision of unrelated audit services.

In 2008 we contracted services of review of certain processes that have been implemented by Management throughout the year and accounting diligence. Total fees of these services amounted to R\$ 572 thousand, which corresponded to 13% of annual fees of external audit services.

Main Operating and Financial Highlights

The Company is bound to arbitration in the Market Arbitration Chamber, according to the covenant provided in its bylaws.

São Paulo, March 9, 2009

Board of Executive Officers

14.01 NOTES TO THE FINANCIAL STATEMENTS

1 Operations

Gafisa S.A. ("Gafisa" or the "Company") started its operations in 1997 with the objectives of: (a) promoting and managing all forms of real estate ventures on its own behalf or for third parties; (b) purchasing, selling and negotiating real estate properties in general, including provision of financing to real estate clients; (c) carrying out civil construction and civil engineering services; (d) developing and implementing marketing strategies related to its own or third party real estate ventures; and (e) investing in other Brazilian or foreign companies which have similar objectives as the Company's.

The Company forms jointly-controlled ventures (Special Purpose Entities - SPEs) and participates in consortia and condominiums with third parties as a means of meeting its objectives. The controlled entities share the structure and corporate, managerial and operating costs with the Company.

In January 2007, the Company acquired 60% of the voting capital of Alphaville Urbanismo S.A. (AUSA), a company which develops and sells residential condominiums throughout Brazil. The purchase commitment for the remaining 40% of AUSA's voting capital will be determined by means of an economic and financial evaluation of AUSA to be carried out according to the agreement until 2012 (Note 8).

In March 2007, the Company completed an initial public offer of stock on the New York Stock Exchange - NYSE, resulting in a capital increase of R\$ 487,813 with the issue of 18,761,992 Common shares equivalent to 9,380,996 ADRs. The expenses related to this public offering of the Company's stock, net of their respective tax effects, totaled R\$ 19,915 and were classified under the heading Capital Reserve .

In October 2007 Gafisa completed the acquisition of 70% of the voting capital of Cipesa Engenharia S.A. (Cipesa), a real estate developer in the state of Alagoas (Note 8).

In 2007, the Company started its operations in the lower income real estate market through its subsidiary Fit Residencial Empreendimentos Imobiliários Ltda. (FIT Residencial). On September 1, 2008 the Gafisa S.A. and Construtora Tenda S.A. (Tenda) signed the corporate merger of Tenda and Fit Residencial operations, by means of a Merger Protocol and Justification signed between the parties on that date. On October 3, 2008, this Merger Protocol and Justification was approved, as well as the first Amendment to the Protocol. In view of the exchange of Fit quotas for Tenda shares, the Company received 240,391,470 common shares, representing 60% of total and voting capital of Tenda after the merge of Fit Residencial, in exchange for 76,757,357 quotas of Fit Residencial owned by Tenda. The

Tenda shares of the Company in exchange for Fit Residencial quotas will have the same rights, given on the date of the merger of the shares held by the Company, and will receive all benefits, including dividends and distributions of capital that may be declared by Tenda from the merger approval date. On October 21, 2008, the merger of Fit Residencial into Tenda was approved at the Extraordinary General Meeting by the Company's shareholders (Note 8).

In March 2007, the Company, together with Odebrecht Empreendimentos Imobiliários Ltda., formed Bairro Novo Empreendimentos Imobiliários S.A. ("Bairro Novo"), a jointly-controlled entity. In November 2007, Bairro Novo launched the first property development called "Bairro Novo Cotia", directed at the lower income real estate market. On February 27, 2009, the joint venture was dissolved (Note 20).

2 Presentation of Financial Statements

These financial statements were approved by the Board of Directors for issuance on March 9, 2009.

(a) Basis of presentation

The financial statements are presented in accordance with accounting practices adopted in Brazil as determined by the Brazilian Corporate Law (Law 6,404, as amended) and the regulations of the Comissão de Valores Mobiliários (the Brazilian Securities Commission - ("CVM")). The Companies and its subsidiaries decided to adopt and fully comply with the Law No. 11,638/07 ("Law") and the CVM rules, as well as the Provisional Measure No. 449/08 ("MP No. 449/08"), establishing the transition date January 1, 2006; thus considering as the starting point the financial statements ended December 31, 2005, not presented as a part of these financial statements.

The effects of changes in accounting practices on the Company's individual and consolidated income for the year and shareholders' equity are as follows:

	Parent company		Consolidated	
	2008	2007	2008	2007
Originally reported shareholders equity at December 31	1,653,938	1,530,763	1,653,938	1,530,763
Adjustment to present value of assets and liabilities	(13,980)	(36,688)	(24,966)	(40,971)
Barter transactions	4,370	4,370	4,596	4,617
Warranty provision	(5,400)	(2,400)	(6,855)	(2,400)
Depreciation of sales stands, mock-up apartments and furniture	(25,887)	(9,822)	(28,133)	(11,408)
Other	(622)	12,505	6,723	14,072
Minority interest			7,116	4,055
Adjusted shareholders equity at December 31	1,612,419	1,498,728	1,612,419	1,498,728

	Parent company		Consolidated	
	2008	2007	2008	2007
Originally reported net income at December 31	141,608	113,603	141,608	113,603
Adjustment to present value of assets and liabilities	22,708	(17,830)	16,005	(22,113)
Barter transactions		4,370	(20)	4,617
Stock option plans	(22,203)	(16,498)	(24,520)	(17,291)
Warranty provision	(3,000)	(1,200)	(4,455)	(1,200)
Depreciation of sales stands, mock-up apartments and furniture	(16,065)	(7,969)	(16,725)	(9,555)
Public offering		19,915		19,915
Other	(3,443)	10,896	(1,554)	12,465
Equity in results	(9,684)	(13,647)		
Minority interest			(418)	(8,801)
Adjusted net income for the year	109,921	91,640	109,921	91,640

(i) Cash equivalents

According to the guidelines from the Accounting Pronouncement Committee (CPC) 03 Statement of Cash Flows, the Company and its subsidiaries classified as Cash Equivalents the short-term investments of high liquidity, readily convertible into a known amount of cash and subject to an insignificant risk of change in value.

(ii) Investments

The Company considered the effects of equity in results and minority interest on adjustments related to the initial adoption of the Law in financial statements.

(iii) Financial instruments and fair value

According to CPC 14 Financial Instruments: Recognition, Measurement and Evidence, financial instruments can be classified into four categories: (i) financial asset or liability measured at fair value through profit or loss, (ii) held to maturity, (iii) loans and receivables, and (iv) available for sale. The classification depends upon the purpose for which the financial assets and liabilities were acquired. Management classifies its financial assets and liabilities when initially recognized.

At December 31, 2008 and 2007, the Company decided to measure certain financial assets (swap contracts) and liabilities (debts in foreign currency) at fair value through profit or loss, with the purpose of removing or significantly reducing inconsistencies in measurement or recognition, which would occur if they were stated on different bases.

For financial assets without active market or public quotation, the Company sets the fair value through valuation techniques. These techniques include the use of recent transactions purchased from third parties, benchmarking against other instruments that are substantially similar, analysis of discounted cash flows, and option pricing models that make as much as possible use of information provided by the market and rely as minimum as possible on information provided by the Company's own management. The Company evaluates if there is objective evidence at the balance sheet date that a financial asset or a group of financial assets is recorded at an amount exceeding its recoverable amount (impairment).

(iv) Debenture and share issuance expenses

According to the guidelines of CPC 08 Transaction Costs and Premiums on Issuance of Securities, the costs of issuance of shares of its own capital are accounted for as an item that reduces the shareholders' equity of the Company. Additionally, transaction costs and premiums on issuance of debt securities are amortized according to the effective terms of transactions, the net balance being classified as a charge to the value of the respective transaction.

(v) Stock option

The Company offers to its executives, properly approved by its Board of Directors, a share-based compensation plan (Stock Options), according to which it receives services as payment for vested stock options.

According to CPC 10 Share-based Compensation, the premium of these options, calculated on the vesting date, is recognized as expense as contra-entry to shareholders' equity, during the grace period at the extent services are rendered.

(vi) Deferred charges

According to CPC 13 Initial Adoption of the Law and MP No. 449/08, the preoperating expenses recorded in assets by the Company and its subsidiaries were written off at the transition date, upon the recording of the amount as contra-entry to retained earnings. Additionally, the amortizations recorded as expenses in income for the year were reversed at the year of recognition of deferred charges and the additions prior to the initial adoption of the Law were recognized as contra-entry to retained earnings.

(vii) Adjustment to present value of assets and liabilities

According to the guideline CPC 12 Adjustment to Present Value, the asset and liability items arising from long-term transactions are adjusted to present value.

According to CPC (O) 01 Real Estate Development Entities, in the installment sales of unfinished units, the receivables with monetary adjustments, including the portion related to the delivery of keys, without interests, shall be discounted at present value, once the agreed-upon monetary adjustment indices do not include the interest component. The reversal of the adjustment to present value, considering that an important part of the Company's activities is to finance its customers, was made as a contra-entry to the real estate revenue group itself, consistently with the interest accrued on the portion of accounts receivable related to the after the keys period. The total reversal value of the adjustment to present value recognized in the real estate development revenue for the years ended December 31, 2008 and 2007 is a revenue amounting to R\$ (12,541) revenue and R\$ 18,318 (parent company) and R\$ (3,147) revenue and R\$ 39.553 (consolidated), respectively.

The interest on funds for the acquisition of land already in construction phase and those related to the financing of real estate venture construction shall be capitalized. Therefore, the reversal of adjustment to present value of an obligation linked to these items is understood to be included in the cost of real estate sold or stock of properties for sale, as the case may be, until the construction phase of the venture is completed. The total value of reversal of adjustment to present value recognized in the operating costs of real estate development for the years ended December 31, 2008 and 2007 amounts to R\$ (1,969) - revenue and R\$ 488 (parent company) and R\$ (1,838) revenue and R\$ 517 (consolidated), respectively.

(viii) Warranty provision

According to the guideline CPC (O) 01 Real Estate Development Entities, the Company and its subsidiaries recognized a provision to cover expenses for repairing ventures within the warranty period, except for subsidiaries that operate with third parties, which provide warranty to the services rendered during construction. The warranty period is five years from the delivery of the venture.

(ix) Barter transactions

According to the guideline CPC (O) 01 Real Estate Development Entities, in case of barter of lands with the purpose of delivering apartment unit(s) to be built, the value of land acquired by the Company and its subsidiaries, calculated based on the fair value of real estate units to be delivered, was recorded at fair value, as a component of the stock of lands of properties for sale, as a contra-entry to advance from customers in liabilities, at the time the private instrument or contract related to such transaction is signed. The recording criteria adopted for the result of real estate development prevail for these transactions.

(x) Sales stands, facilities, model apartments and related furnishings

In line with the guideline CPC (O) 01 Real Estate Development Entities, the expenditures incurred with the construction of sales stands, mock-up apartments and corresponding furniture are included in the property and equipment of the Company and its subsidiaries. Such assets start to be depreciated after the launch of the venture over the average term of one year and subject to periodical analysis of asset impairment.

(xi) Share issuance expenses

According to the guideline CPC 08 Transactions Costs and Premiums on Issuance of Securities, the expenses related to Public Offering, originally accounted for as expenses for the year ended December 31, 2007, amounting to R\$ 19,915, were reclassified, net of their net effects, under the heading "Capital Reserve", as a charge to shareholders equity of the Company.

(xii) Tax effects and the transitory tax regime (RTT)

The tax effects arising from the initial adoption of the Law and MP No. 449/08 were recorded according to the existing rules, particularly in the recording of Income Tax and Social Contribution on Net Income, when applicable.

The Company and its subsidiaries shall choose the RTT, as provided for by MP No. 449/08 and will manifest it in the corporate income tax return (DIPJ) for 2009.

(xiii) Retained earnings

At December 31 of each year, the total balance of retained earnings is distributed to the applicable reserve accounts, according to the Company's Bylaws, in conformity with the Brazilian Corporate Law and the CVM Instructions.

(b) Use of estimates

The preparation of financial statements in conformity with Brazilian GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates are used for, but not limited to, the selection of the useful lives of property and equipment, provisions necessary for contingent liabilities, fair values, revenue recognition, taxes, budgeted costs and other similar charges. Actual results may differ from the estimates.

(c) Consolidation principles

The consolidated financial statements include the accounts of the Company and those of all its subsidiaries (Note 8), with separate disclosure of the participation of minority shareholders. The proportional consolidation method is used for investments in jointly-controlled investees, which are all governed by shareholder agreements; as a consequence, the assets, liabilities, revenues and costs are consolidated based on the proportion of the equity interest the Company holds in the capital of the investee.

All significant intercompany accounts and transactions are eliminated upon consolidation, including, investments, current accounts, dividends receivable, income and expenses among consolidated companies and unrealized results.

Transactions and balances with related parties, primarily shareholders and investees, are described in the notes herewith.

The statements of changes in shareholders' equity reflect the changes in Gafisa S.A.'s books.

3 Significant Accounting Practices

The more significant accounting practices adopted in the preparation of the financial statements are as follows:

(a) Recognition of results

(i) Real estate development and sales

Revenues, as well costs related to real estate development units sold are recognized over the construction period of the projects, based on a financial measure of completion, and not at the time of execution of the agreements for the sale of units or the receipt of the amounts corresponding to the sale of units.

For completed units, the result is recognized when the sale is made, regardless of the receipt of the contractual amount; profit is recognized in full when real estate is sold, provided: (a) the profit is determinable, that is, the collectability of the sales price is reasonably assured or the amount that will not be collectible can be estimated, and (b) the earnings process is virtually complete, that is, the Company is not obliged to perform significant activities after the sale to earn the profit. The collectability of the sales price is demonstrated by the client's commitment to pay, which in turn is supported by substantial initial and continuing investment.

The general rules for recognition of revenue of uncompleted units are:

- .. The cost incurred (including costs related to land) corresponding to the units sold is fully appropriated to income;
- .. The percentage of incurred cost, included costs related to land, projects and construction, is measured in relation to total budgeted cost. In order to determine the amount of revenue to be recognized in any given period, the percentage of incurrent costs is applied to the total sales of units sold, adjusted pursuant to the conditions of the sales agreements, determined in accordance with the terms established in the sales contracts;
- .. any amount of sales revenues recognized that exceeds the amount received from clients is recorded as current or long-term assets. Any amount received in connection with the sale of units that exceeds the amount of revenues recognized is recorded as "Obligations for purchase of land and advances from clients";
- .. interest and inflation-indexation charges on accounts receivable as from the time the customer takes possession of the property, as well as the adjustment to present value of accounts receivable, are appropriated to income from the development and sale of real estate using the accrual basis method.

. the financial charges on accounts payable from the acquisition of land and real estate credit operations incurred during the construction period are appropriated to the cost incurred, and recognized in income upon the sale of the units of the venture to which they are directly related.

The taxes on the difference between the revenues from real estate development and the accumulated revenues subject to tax are calculated and recognized when the difference in revenues is recognized.

The other income and expenses, including advertising and publicity, are appropriated to income as they are incurred using the accrual basis method.

(ii) Construction services

Revenues derived from real estate services are recognized as services are rendered, and consist primarily of amounts received in connection with construction management activities for third parties, technical management and real estate management. Revenue is recognized, net of respective costs incurred, in the amounts of R\$ 63,896 (consolidated) and R\$ 42,298 (parent company) for the year ended December 31, 2008, and R\$ 26,546 (consolidated) and R\$ 26,058 (parent company) at December 31, 2007.

(b) Cash and cash equivalents

Consist primarily of time bank certificate of deposits and investment funds, denominated in reais, having a ready market and an original maturity of 90 days or less, or which at all times throughout their terms can be put to the issuer within three months with insignificant early withdrawal penalty causes, recognized at market value.

At December 31, 2008 and 2007, the amount related to investment funds is recorded at market value.

Investment funds in which the Company is the sole owners are fully consolidated.

(c) Receivables from clients

These are stated at cost plus accrued interest and indexation adjustments. The allowance for doubtful accounts, when necessary, is provided in an amount considered sufficient by management to meet expected losses.

The installments due are indexed based on the National Civil Construction Index (INCC) during the construction phase, and based on the General Market Prices Index (IGP-M) after delivery of the units. The balance of the accounts receivable (after delivery) generally accrues annual interest of 12%. The financial revenues are recorded in results under "Real estate development" (December 31, 2008, 2007 R\$ 26,829 and R\$9,164 (Parent company) and R\$ 45,722 and R\$ 20,061(Consolidated), respectively).

(d) Certificates of real estate receivables (CRIs)

The Company assigns receivables for the securitization and issuance of mortgage-backed securities ("CRI"). When this assignment does not involve right of recourse, it is recorded as a reduction of accounts receivable. When the transaction involves recourse against the Company, the accounts receivable sold is maintained on the balance sheet. The financial guarantees, when a participation is acquired (subordinated CRI) and maintained to secure the receivables that were assigned, are recorded in the balance sheet in Long-term receivables at fair value.

(e) Properties for sale

Land is stated at cost of purchase. The recording of land is made only after the property deed is drawn up, not being recognized in financial statements during the negotiation period, regardless of how likely the acquisition is or the negotiation progress. The Company at times and its subsidiaries at times acquire land through barter transactions, in which it grants the seller (a) a certain number of units to be built on the land or (b) a percentage of the proceeds from the sales of the units in such development. The land acquired through barter transaction is stated at fair value.

Properties are stated at cost of construction, which does not exceed net realizable value. In the case of real estate in progress, the portion in inventories corresponds to the cost incurred in units that have not yet been sold. The cost comprises construction (materials, own or outsourced labor and other related costs) and land, including financial charges appropriated as incurred during the construction phase.

When the cost of construction of properties for sale exceeds the expected cash flow of sales, completed or under construction, a loss of charge to recoverable value is recognized for the period when the book value is considered not recoverable. This analysis is consistently applied for residential ventures targeted at the low, medium and high income markets, regardless of their geographic region or construction phase.

Properties for sale are reviewed to evaluate the recovery of book value of each real estate venture, when events or changes in macroeconomic scenarios indicate that the book value will not be recoverable. If the book value of a real estate venture is not recoverable, compared to its realizable value through expected cash flows, a provision is recorded.

In the year ended December 31, 2008, the Company cancelled certain real estate developments, consequently, the amount of R\$ 15,700 of gross profit (consolidated) was reversed from the income of the Company and its subsidiaries at the same date.

The Company capitalizes interest as part of properties for sale when a property is under development, due on the National Housing System and other credit lines that are used for financing the construction of developments (limited to interest expense). Interest capitalized in Properties for sale totaled R\$ 29,002 (parent company) and R\$ 33,669 (consolidated) in the year ended December 31, 2008 (2007 - R\$ 36,543 (parent company) and R\$ 36,686 (consolidated)).

(f) Deferred selling expenses

This account includes costs related to brokerage, recorded in income or expenses for the year following the same criteria adopted for the recognition of revenues from and costs of units sold, based on the cost incurred in relation to the cost estimated. Sale commissions due by the real estate buyer are not recorded as income or expenses of the Company.

(g) Warranty provision

At December 31, 2008 and 2007, the Company and its subsidiaries set up a provision to cover expenditures for repairing covered ventures over the warranty period, amounting to R\$ 11,900 and R\$ 8,671 (consolidated), respectively, except for the subsidiaries that operate with third parties, which are the warrantors of the construction services provided. The warranty period is five years from the delivery of the venture.

(h) Prepaid expenses

These refer to prepaid expenses that will be amortized in income for the year when incurred on accrual basis.

(i) Property and equipment

Stated at cost. Depreciation is calculated on the straight-line basis, based on the estimated useful life of the assets, as follows: (i) vehicles - 5 years, (ii) furniture, utensils and installations - 10 years, and (iii) sales stands, mock-up apartments and corresponding furniture - 1 year.

(j) Intangible assets

These are basically represented by expenses related to the acquisition and development of computer systems and software licenses, stated at acquisition cost, being amortized over a period of up to five (5) years.

(k) Investments in subsidiaries and jointly-controlled investees

(i) Net equity value

When the Company holds more than half of the voting capital of another company, the latter is considered a subsidiary company. In situations in which there are agreements that ensure the veto power to the Company in decisions that significantly affect their businesses, thus ensuring to the Company a shared control, such investees are considered jointly-controlled companies. Investments in subsidiaries and jointly-controlled companies are recorded using the equity method.

The cumulative movements after acquisitions are adjusted against the cost of investment. Gains or transactions to be made between the Company and its associated and subsidiary companies are eliminated at the extent of the Company's interest; unrealized losses are also eliminated, unless the transaction provides evidences on permanent loss (impairment) of the transferred asset.

When the Company's interest in the losses of subsidiaries is equal to or higher than the amount invested, the Company recognizes the residual portion of net capital deficiency as it assumes obligations, make payments on behalf of these companies or makes advances for future capital increase.

The accounting practices of acquired subsidiaries are changed before the parent company records any equity in their results, in order to ensure consistency with the practices adopted by the Company.

(ii) Goodwill and negative goodwill on the acquisition of investments

Goodwill is determined at the acquisition date and represents the excess purchase price over the proportion of the underlying book value, based on the interest in the shareholders' equity acquired. Negative goodwill is also determined at the acquisition date and represents the excess of the book value of assets acquired over the purchase consideration.

Until December 31, 2008, the goodwill that can be justified economically is amortized based on its evaluation of the acquired companies, considering factors such as land bank, the ability to generate results from developments launched and/or to be launched in the future and other inherent factors. Goodwill that cannot be justified economically is immediately charged to results for the year. At the balance sheet date, the Company evaluates whether there are indications of permanent loss, as well as potential impairment adjustments, and records an impairment provision, if required, to adjust the carrying value of goodwill to recoverable amounts or to realizable values.

Until December 31, 2008, the negative goodwill which can be justified economically is appropriated to income as the assets are realized. Negative goodwill that is not justified economically is recognized in the results only upon the disposal of the investment.

(l) Obligations for purchase of land and advances from clients (barter transactions)

These are contractual obligations established for purchases of land in inventory (Property for sale) which are stated at amortized cost plus interest and charges, when applicable.

The obligations related to barter transactions of land in exchange for real estate units are stated at fair value, against Advances from clients (Note 13).

(m) Selling expenses

This balance includes advertising, publicity, and promotion, allocated to results as incurred.

(n) Taxes on income

Taxes on income in Brazil comprise Federal income tax (25%) and social contribution (9%), as recorded in the statutory accounting records, for entities on the taxable profit regime, for which the composite statutory rate is 34%. Deferred taxes are provided on all temporary tax differences.

As permitted by tax legislation, certain subsidiaries and jointly-controlled companies, the annual billings of which were lower than a specified amount, opted for the presumed profit regime. For these companies, the income tax basis is calculated at the rate of 8% on gross revenues plus financial income and for the social contribution basis at 12% on gross revenues plus financial income, upon which the income tax and social contribution rates, 25% and 9%, respectively, are applied.

The deferred tax assets are recognized to the extent that future taxable income is expected to be available to be used to offset temporary differences based on the budgeted future results prepared based on internal assumptions. New circumstances and economic scenarios may, change the estimates.

Deferred tax assets arising from net operating losses have no expiration dates, though offset is restricted to 30% of annual taxable income. Taxable entities on the presumed profit regime cannot offset prior year losses against tax payable.

In the event realization of deferred tax assets is not considered to be probable, no amount is recorded (Note 15). Reclassifications from results to shareholders' equity, when applicable, are made net of taxes.

(o) Other current and long-term liabilities

These liabilities are stated on the accrual basis at their known or estimated amounts, plus, when applicable, the corresponding indexation charges and foreign exchange gains and losses, which contra-entry is recorded in income for the year.

The workers' compensation liability, particularly related to the vacation charges and payroll, is provided for over the period of acquisition.

Gafisa S.A. and its subsidiaries do not have private pension plans or any retirement plan or benefits for employees after they leave the Company.

(p) Stock option plans

The fair value of services received from employees in plans, in exchange for options, is determined in relation to the fair value of shares, set on the vesting date of each plan. The fair value of services received from employees and executive officers in exchange for options is recognized as expense over the option exercise period.

(q) Profit sharing program for employees and officers

The Company provides for the distribution of profit sharing benefits to employees (included in General and administrative expenses).

Additionally, the bylaws of the Company and its subsidiaries establish the distribution of profits to executive officers (in an amount that does not exceed the lower of their annual compensation or 10% of the Company's net income).

The bonus systems operate with three-tier performance-based structure in which the corporate efficiency targets as approved by our Board of Directors must first be achieved, followed by targets for the business units and finally individual performance targets.

(r) Present value adjustment

Certain asset and liability items were adjusted to present value based on discount rates that reflect the best current market valuations regarding the cash value over time and the specific risks of the asset and the liability.

(s) Cross-currency interest rate swap and derivative transactions

The Company has derivative instruments for the purposes of mitigating the risk of its exposure to the volatility of currencies, indices and interest rates, recognized at fair value directly in income for the year. In accordance with its treasury policies, the Company does not have or issue derivative financial instruments for speculative purposes.

(t) Financial liabilities recorded at fair value

The Company recorded certain debts denominated in foreign currency as financial liabilities at fair value through profit or loss. These transactions, directly linked to the swap derivatives described in the item above, are recognized at market value. Changes in the fair value of any of these financial liabilities are directly recognized in income for the year.

(u) Impairment of financial assets

The Company evaluates if at the balance sheet date there is any objective evidence that any financial asset or group of financial assets has impaired value in relation to the market, and its ability to generate positive financial flows to justify its realization. A financial asset or group of financial assets is considered impaired when there are objective evidences on the reduction to its recoverable value, these evidences being the result of one or more events that occurred after the initial recognition of the asset, and when there is impact on the estimated future cash flows.

(v) Earnings per share

Calculated based on the number of shares outstanding at the end of each year, net of treasury shares.

4 Cash, Cash Equivalents and Financial Investments

	Parent company		Consolidated	
	2008	2007	2008	2007

Total cash and cash equivalents	165,216	383,786	528,574	507,569
Collateralized financial investments	6,911	9,851	76,928	9,851
Total	172,127	393,637	605,502	517,420

Pursuant to CVM Instruction 408/04, investment funds in which the Company has an exclusive interest have been consolidated.

5 Receivables from Clients

	Parent company		Consolidated	
	2008	2007	2008	2007
Current	785,025	275,930	1,254,594	473,734
Long-term	189,890	282,017	863,950	497,910
	974,915	557,947	2,118,544	971,644

The balance of accounts receivable from the units sold and not yet finished is not fully recognized in the financial statements. Its recording is limited to the portion of revenues accounted for net of the amounts already received.

Advances from clients (development and services) in excess of the revenues recognized in the period totaled R\$ 91,603 at December 31, 2008 (2007 - R\$ 47,662) and are included in "Obligations for purchase of land and advances from clients".

An allowance for doubtful accounts is not considered necessary, except for the subsidiary Tenda, considering that the history of percentage of losses is insignificant on the balance of accounts receivable of the Company and its subsidiaries, as well as our evaluation of overdue credits (aging), since these receivables relate mainly to real estate developments in progress for which transfer of property deeds only takes place upon settlement and/or sale of receivables.

The allowance for doubtful accounts set up in Tenda, amounting to R\$ 18,815 (consolidated) at December 31, 2008, is considered sufficient by the Company's management to face future losses with the realization of accounts receivable of this subsidiary.

At December 31, 2008 and 2007, the balance of accounts receivable is net of Adjustment to Present Value in the amounts of R\$ (3,147) revenue and R\$ 39,553 (consolidated).

6 Properties for sale

	Parent company		Consolidated	
	2008	2007	2008	2007
Land	371,158	431,721	750,555	656,146
Property under construction	560,577	238,625	1,181,930	324,307
Units completed	29,388	14,203	96,491	41,826
	961,122	684,549	2,028,976	1,022,279
Current	778,203	562,051	1,695,130	872,876
Long-term	182,919	122,498	333,846	149,403

The Company has undertaken commitments for construction of units which have been exchanged for land, accounted for based on the fair value of bartered units. At December 31, 2008, the balance of land acquired through barter transactions totaled R\$ 155,751.

Financial interest expense was capitalized for the years ended December 31, 2008 and 2007 in the total amounts of R\$ 30,882 and R\$ 32,572, considering that R\$ 4,861 was recognized as cost of units sold in the year ended 2008.

7 Other Accounts Receivable

	620,596	459,841	182,775	101,920

(*) The Company participates in jointly-controlled ventures and consortia with other partners, either directly or through related parties, to develop real estate properties. The management frameworks of these ventures, including cash management, are centralized in the lead partner, which supervises the construction, financing and budgets. Thus, the lead partner assures that the investments of the necessary funds are made and allocated as planned. The Company's shares of the funds pertaining to these ventures, which are not remunerated have no predetermined maturity dates. On average, the property developments are completed from 24 to 30 months. Other accounts payable to the venture partners are presented separately.

8 Investments in Subsidiaries

In January 2007, with the acquisition of 60% of AUSA, arising from the merger of Catalufa Participações Ltda., a capital increase amounting to R\$ 134,029 was approved upon the issuance for public subscription of 6,358,116 common shares. As a result of this transaction, the Company recorded goodwill in the amount of R\$ 163,589, which was based on expected future profitability, amortized exponentially and progressively until December 31, 2008 according to the estimated projected income before income tax and social contribution on net income of AUSA, calculated on accrual basis. During the year ended December 31, 2008, the Company amortized the amount of R\$ 10,733 of goodwill arising from the acquisition of AUSA. The Company has the commitment to purchase the remaining 40% of AUSA's capital stock, which amount cannot be calculated yet and, consequently, is not recognized, and will be based on the fair value of AUSA, evaluated at the future acquisition dates. The contract for acquisition provides that the Company undertakes to purchase the remaining 40% of AUSA in the next five years (20% in January 2010 and the other 20% in January 2012) in kind or shares, at the Company's sole discretion.

On October 26, 2007, the Company acquired 70% of Cipesa. The Company and Cipesa formed a new company, Cipesa Empreendimentos Imobiliários Ltda. ("Nova Cipesa"), in which Gafisa has 70% of the capital and Cipesa has 30%. Gafisa contributed to Nova Cipesa R\$ 50,000 in cash and acquired shares of Cipesa in Nova Cipesa in the amount of R\$ 15,000, paid on October 26, 2008. Cipesa is entitled to receive from the company a variable portion of 2% of the Total Sales Value (VGV) of the projects launched by Nova Cipesa through 2014, not to exceed R\$ 25,000, accordingly, the acquisition value considered by the Company totaled R\$ 90,000. As a result of this transaction, the Company recorded goodwill of R\$ 40,686, which is based on expected future profitability and will be amortized exponentially and progressively until December 31, 2008, according to the estimated projected income before income tax and social contribution on net income of Nova Cipesa, calculated on accrual basis.

In November 2007, the Company acquired for R\$ 40,000 the remaining interest in some ventures held with Redeveco do Brasil Ltda. As a result of this transaction, the Company recognized negative goodwill amounting to R\$ 31,235, based on expected future profitability, and amortized exponentially and progressively until December 31, 2008, according to the estimated projected income before income tax and social contribution on net income of these SPEs. In the year ended December 31, 2008, the Company amortized negative goodwill amounting to R\$ 12,713 arising from the acquisition of the SPEs.

As mentioned in Note 1, on October 21, 2008, as part of the acquisition of interest in Tenda, Gafisa S.A. merged the shareholders' equity of Fit Residencial amounting to R\$ 411,241, acquiring 60% of the shareholders' equity of Tenda, at the book value of R\$ 1,036,072, with investment of R\$ 621,643. This transaction generated a negative goodwill of R\$ 210,402, based on expected future profitability according to an income arising from the sale of the 40% quotas of Fit Residencial to Tenda shareholders in exchange for Tenda shares. Until December 31, 2008, this negative goodwill was amortized over the average construction period (until delivery of keys) of the real estate ventures of Fit Residencial, existing on the acquisition date, October 21, 2008. During the period from October 22 to December 31, 2008, the Company amortized the amount of R\$ 41,008 of income, as negative goodwill, arising from the partial sale of Fit Residencial.

(i) Loans and financing classified at fair value through income (Note 16(a)(ii)).

(ii) Derivatives classified as financial assets at fair value through income (Note 16(a)(ii)).

Edgar Filing: Gafisa S.A. - Form 6-K

Rates: CDI - Interbank Certificate of Deposit, at December 31, 2008 was 12.2%p. a. (2007 - 11.8% p.a., 2006 - 15% p.a.).

TR - Referential Rate, at December 31, 2008 was 1.62% p.a. (2007 - 1.44% p.a., 2006 - 1.99% p.a.)

Funding for working capital and for developments correspond to credit lines from financial institutions. The Company has contracted cross-currency interest rate swaps to cover the full amount of the working capital loans (Note 16). At December 31, 2008 and 2007, the Company elected to apply the fair value option and record both the loan and respective derivative instruments at fair value through income.

Downstream merger obligations correspond to debt assumed from former shareholders with maturities up to 2013.

The Company has financing agreements with the SFH, the resources from which are released to the Company as construction progresses.

Loans and financing are guaranteed by sureties of the investors, mortgage of the units, assignment of rights, receivables from clients and the proceeds from the sale of our properties. Mortgage receivables given in guarantee total R\$ 2,484,149. The balance of deposits accounts pledged in guarantee totals R\$ 76,928 on December 31, 2008 (Note 4).

Long-term installments as of December 31, 2008 mature as follows: R\$ 345,021 in 2010, R\$ 181,549 in 2011, R\$ 40,548 in 2012 and R\$ 33,555 in 2013.

10 Debentures

In September 2006, the Company issued its Second Debenture Placement Program, which allows it to place up to R\$ 500,000 in non-convertible simple subordinated debentures secured by a general guarantee.

In June 2008, the Company issued its Third Debenture Placement Program, which allow it to place R\$ 1,000,000 in simple debentures with a general guarantee maturing in two years.

Under the Second and Third Programs, the Company placed series of 24,000 and 25,000 series debentures, respectively, corresponding to R\$ 240,000 and R\$ 250,000, with the following features:

Program/issuances	Amount	Annual remuneration	Maturity	2008	2007
Second program/first issuance	240,000	CDI + 1.30%	September 2011	248,679	246,590
Third program/first issuance	250,000	107.20% CDI	June 2018	255,266	
				503,945	246,590
Current				61,945	6,590
Long-term				442,000	240,000

The Company has restrictive covenants on debentures that limit its ability to perform certain actions, such as the issuance of debt and require the acceleration of maturity or refinancing of loans if the company does not fulfill these restrictive covenants. The first issuance of the Second Program and the first issuance of the Third Program of Debenture Distribution have cross restrictive covenants in which an event of default or acceleration of maturity of any debt above R\$ 5 million and R\$ 10 million, respectively, may require the Company to advance the payment of the first issuance of the Second Program of Debenture Distribution. The rates and minimum and maximum amounts required by these restrictive covenants at December 31, 2008 and 2007 are as follows:

	2008	2007
Second program first issuance		
Total debt, less SFH debt, less cash and banks does not exceed 75% of shareholders equity	35%	5%
Total receivables from clients, plus stock of completed units, is over 2.0 times total debt	3.3 times	3.5 times
	R\$	R\$ 175
Total debt, less cash and banks, is under R\$ 1,0 billion	946.6 million	million
Third program first issuance		
Total debt, less SFH debt less cash and banks, does not exceed 75% of shareholders equity	35%	N/A
Total accounts receivable plus stock of completed units is over 2.2 times total debt	5.5 times	N/A

At December 31, 2008, the Company was in compliance with all debenture programs covenants during each period presented.

At December 31, 2008, the non current portions have the following maturities: R\$ 96,000 in 2010, R\$ 96,000 in 2011, R\$ 125,000 in 2012, R\$ 125,000 in 2013.

Long-term	310,182	11,956	389,759	12,943

(i) In January 2008 the Company formed a special partnership (SCP) which main objective is the holding of interests in other companies, which, in turn, should have as its main objective the development and undertaking of real estate ventures. At December 31, 2008, the SCP's subscribed and paid-in capital amounted to R\$ 304,040 (made up of 13,084,000 Class A quotas held by the Company and 300,000,000 Class B quotas held by other quotaholders). The capital will be preferably used in the acquisition of equity investments and in the increase in the capital of its investees. As a result of this transaction, due to prudence and considering that the decision whether to invest or not shall be jointly taken by all quotaholders and, therefore, it is made regardless of the Company's management individual decision, at December 31, 2008 it recorded an Investors' account amounting to R\$ 300,000, with final maturity on January 31, 2014. The SCP quotaholders are remunerated by minimum dividends substantially equivalent to the variation in the Interbank Deposit Certificate (CDI). The SCP's articles of association provides for the compliance with certain covenants by the Company, in its capacity of ostensible partner, which include the maintenance of minimum rates of net debt and receivables. At December 31, 2008, the Company was in compliance with the aforesaid clauses.

(ii) Loans with real estate partners relate to amounts due under current accounts agreement, which accrue financial charges of IGP-M plus 12% p.a.

12 Commitments and Provision for Contingencies

The Company and its subsidiaries are parties in lawsuits and administrative proceedings at several courts and government agencies that arise from the normal course of business, involving tax, labor, civil and other matters. Management, based on information provided by its legal counsel and analysis of the pending claims and, with respect to the labor claims, based on past experience regarding the amounts claimed, recognized a provision in an amount considered sufficient to cover the losses estimated for the lawsuits in progress.

The changes in the provision for contingencies are summarized below:

	Parent company	Consolidated
Balance at December 31, 2007	3,668	21,262
Payments	10,152	11,440
Reversals	(2,178)	(2,178)
New provision from Tenda acquisition		26,840
Judicial deposits	(2,518)	(3,834)
Balance at December 31, 2008	9,124	53,530
Long-term	9,124	35,963
Current		17,567

(a) Tax, labor and civil lawsuits

	Parent company		Consolidated	
	2008	2007	2008	2007
Labor claims	2,317	1,672	9,977	2,171
Civil lawsuits	9,325	1,996	27,779	2,323
Tax lawsuits			19,609	16,768
Judicial deposits	(2,518)		(3,834)	
	9,124	3,668	53,530	21,262

Our subsidiary AUSA is party in judicial lawsuits and administrative proceedings related to Excise Tax (IPI) and Value-added Tax on Sales and Services (ICMS) on two imports of aircraft in 2001 and 2005, respectively, under leasing agreements without purchase option. The chances of loss in the ICMS case are estimated by its legal counsel that is handling it as: (i) probable in regard to the principal and interest, and (ii) remote in regard to the fine for noncompliance with ancillary obligation. The amount of the contingency estimated by the legal counsel as a probable loss amounts to R\$ 16,705, which was recorded in Provisions for contingencies as of December 31, 2008.

Furthermore, at December 31, 2008, the Company and its subsidiaries are aware of other lawsuits and risks, the outcome of which, based on the opinion of its legal counsel is a possible, but not probable loss, amounting to approximately R\$ 67,736, and for which the Company's management believes that the recognition of a provision for losses is not necessary.

In September 2008, the bank accounts of Gafisa were frozen in the amount of R\$ 10,583. Such decision was made in view of the inclusion of Gafisa in the defendant side of a foreclosure as it was considered the successor of Cimob Companhia Imobiliária S/A (Cimob) and the understanding that Cimob s net assets were reduced with the incorporation of Gafisa. The Company is appealing against such decision on the grounds that the claim lacks merit, in order to obtain the release of its funds and not to be held responsible for Cimob s debt. No provision has been recorded.

An amount of R\$ 27,979 of the proceeds of the Company's initial public offering was withheld in an escrow deposit attached by court order to guarantee a writ of execution. The Company is appealing the decision and considers that the claim has no merit. No provision has been recorded based on the position of the Company's legal counsel.

(b) Commitments to complete developments

The Company is committed to deliver units to owners of land who exchange land for real estate units developed by the Company.

The Company is also committed to complete units sold and to comply with the requirements of the building regulations and licenses approved by the proper authorities. At December 31, 2008, the amount of budgeted cost to be incurred in ventures under construction totals R\$ 2,465.

13 Obligations for purchase of land and advances from clients

	Parent company		Consolidated	
	2008	2007	2008	2007
Obligations for purchase of land	174,628	91,381	392,762	151,594
Advances from clients				
Development and services	27,739	18,662	90,363	72,125

Barter	158,133	158,133	169,658	169,658
	360,500	268,176	652,783	393,377
Current	250,942	211,447	421,584	290,193
Long-term	109,558	56,729	231,199	103,184

Acquisitions of new land were made for launching new developments by the Company, taking on commitments, represented by credits and barter for future real estate venture units.

14 Shareholders equity

(a) Capital

At December 31, 2008, the Company's capital was R\$ 1,229,517 (2007 R\$ 1,221,846), represented by 133,087,518 nominative Common shares without par value (2007 132,577,093 nominative Common shares without par value), 3,124,972 of which were treasury shares (2007 3,124,972 treasury shares).

In January 2007, upon the acquisition of 60% of AUSA arising from the merger of Catalufa, a capital increase of R\$ 134,029 was approved through the issuance, for public subscription, of 6,358,116 new Common shares.

Additionally, the cancellation of 5,016,674 Common shares which had been held in treasury, amounting to R\$ 28,976, was approved, without reduction to capital.

In March 2007, a capital increase of R\$ 487,813 was approved through the issuance, for public subscription, of 18,761,992 new Common shares, without par value, at the issue price of R\$ 26.00 per share, in compliance with the provisions of Article 170, paragraph 1 of Law No. 6,404/76.

In 2007, the capital increase of R\$ 8,262, related to the stock option plan and the exercise of 961,563 Common shares, was approved.

Under the bylaws, as amended on January 8, 2007, the Board of Directors (Conselho de Administração) may increase share capital up to the limit of the authorized capital of 200,000,000 Common shares.

On April 4, 2008, the distribution of dividends for 2007 was approved in the total amount of R\$ 26,981, paid to shareholders on April 29, 2008.

In 2008, the capital increase of R\$ 7,671, related to the stock option plan and the exercise of 510,425 Common shares, was approved.

The changes in the number of thousand shares are as follows:

	Common shares in thousands
December 31, 2006	103,370
Share issuance (AUSA acquisition)	6,359
Exercise of stock options	961
Public offering	18,762
December 31, 2007	129,452
Exercise of stock options	511
December 31, 2008	129,963

(b) Appropriation of net income for the year

Pursuant to the Company's bylaws, the net income for the year, after absorbing any accumulated losses, is appropriated as follows: (i) 5% to the legal reserve, up to 20% of paid-up capital, and (ii) 25% of the remaining balance for the payment of mandatory dividends to all shareholders.

For the year ended December 31, management's proposal of distribution (subject to approval by the Annual General Meeting) is as follows:

	2008	2007
Net income for the year, after accounting adjustments of Law No. 11,638/07		91,640
Effects of change of Law No. 11,638/07		21,963
Net income for the year	109,921	113,603
Legal reserve	(5,496)	(5,680)
	104,425	107,923

	2008	2007
Compulsory minimum dividends - 25%	(26,104)	(26,981)

Pursuant to Article 36 of the Company's bylaws, amended on March 21, 2007, the recognition of a statutory reserve became mandatory. In accordance with said article, the amount of such reserve may not exceed 71.25% of net income for the purpose of financing the expansion of the activities of the Company and its subsidiaries, including the subscription of capital increases or creation of new ventures, participation in consortiums or other forms of association for the achievement of the Company's purpose.

(c) Stock option plan

(i) Gafisa

Six stock option plans are offered by the Company. The first plan was launched in 2000 and is managed by a committee that periodically creates new stock option plans, determining their terms, which, among other things, (i) define the length of service that is required for employees to be eligible to the benefits of the plans (vesting requirements), (ii) select the employees that will be entitled to participate, and (iii) establish the purchase prices of the preferred shares to be exercised under the plans.

In order to be eligible for the grants (plans from 2000 to 2002), participant employees are required to contribute 10% of the value of total benefited options on the date the option is granted and, additionally, for each of the following five years, 18% of the price of the grant per year. The price of the grant is adjusted according to the variation in the IGP-M, plus annual interest from 3% to 6%. The stock option may be exercised in one to five years subsequent to the vesting period established in each plan. The shares are generally available to employees over a period of ten years after their contribution.

The Company and its subsidiaries record the cash receipt against a liability account to the extent the employees make advances for purchase of the shares during the vesting period. There was no advance payment for 2008 and 2007.

The Company and its subsidiaries may decide to issue new shares or transfer the treasury shares to the employees in accordance with the clauses established in the plans. The Company and its subsidiaries have the right of first refusal on shares issued under the plans, in the event of dismissals or retirement. In such case, the advances are returned to the employees, in certain circumstances, at an amount that correspond to the greater of the market value of the shares (as established in the rules of the plans) or the amount paid plus monetary correction based on the variation in the IGP-M and annual interest from 3% to 6%.

In 2008, the Company and its subsidiaries issued a new stock option plan. In order to become eligible for the grant, employees are required to use from 25% to 80% of their annual net bonus to exercise the options within thirty days from the program date.

The market value of each stock option granted is estimated at the vesting date using the Black-Scholes model for pricing options. The assumptions for recording stock option plans were as follows: expected volatility at 50.26% in 2008 and at 47.70% in 2007; expected dividend yield on shares at 0.63% in 2008 and at 0.33% in 2007; risk-free interest rate at 11.56% in 2008 and at 12.87 % in 2007; and expected average option term of 2.6 years in 2008 and 2007.

The changes in number of stock options and corresponding weighted average of exercise prices are as follows:

	2008		2007	
	Number of options	Weighted average exercise price	Number of options	Weighted average exercise price
Options outstanding at the beginning of year	5,174,341	22.93	3,977,630	16.04
Options granted	2,145,793	31.81	2,320,599	30.36
Options exercised (i)	(441,123)	16.72	(858,582)	12.50
Options expired	(3,675)	20.55		
Options cancelled(ii)	(945,061)	20.55	(265,306)	18.61
Options outstanding at the end of year	5,930,275	26.14	5,174,341	25.82
Options exercisable at the end of the year	4,376,165	28.00	2,597,183	22.93

(i) In the years ended December 31, 2007 and 2008, the cash received for exercised options amounted to R\$ 7,267 and R\$ 7,150, respectively.

(ii) In the years ended December 31, 2007 and 2008, no option was cancelled due to the expiration of terms of stock option plans.

	Reais	
	2008	2007
Exercise price per share at the end of the year	7.86-39.95	6.75-34.33
Weighted average of exercise price at the option granting date	21.70	18.54
Weighted average of market price of share at the granting date	27.27	27.92
Market price of share at the end of the year	10.49	33.19

The options granted will confer to their holders the right to subscribe capital stock shares, after the periods from one to five years of employment in the Company (essential condition for exercising the option), and expire after ten years of the granting.

The Company recognized the amounts of R\$ 22,203 in 2008 and R\$ 16,498 in 2007 (Company), and the consolidated amounts of R\$ 26,138 in 2008 and R\$ 17,820 in 2007 recorded as operating expenses.

(ii) Tenda

The subsidiary Tenda has a stock option plan, approved at the Extraordinary General Meeting of June 3, 2008, in which the Board of Directors meeting on June 5, 2008, that the Board of Directors of Tenda can establish issuance programs until the maximum aggregate limit of 5% of total capital shares, taking into consideration in this total the dilution effect from the exercise of all granted options. The volume involved in the granting of stock options is limited to 3,000,000 shares. In 2008, 2,640,000 options were granted, of which 570,000 were cancelled. Options outstanding at the end of the year totaled 2,570,000.

The stock option program provides that the granted options may be exercised in three annual lots, each lot being equivalent to 33.33% of total granted option, and the first exercise being in May 2009. Options may be exercised in two periods of each year, from day 1 to 15 of May and November. The base exercise price of granted options was R\$ 7.20 (seven Reais and twenty centavos) per share. When exercising the option in the three annual lots, the base price will be adjusted according to the market value of shares, based on the average price in trading sessions over the last 30 consecutive days before the commencement of each annual exercise period. The exercise price is adjusted according to a fixed table of values, according to the share value in the market, at the time of the two exercise periods for each annual lot.

The market price of Tenda shares at the granting date was R\$ 11.60 and at December 31, 2008 it was R\$ 1.16.

The market value of each option granted in 2008 was estimated at the granting date using the Black-Scholes model for pricing options, taking into consideration the following assumptions: expected volatility at 58%, expected dividend yield on shares at 0%, risk-free interest rate at 14.3% and expected average option term of 1.7 year. Tenda recorded in 2008 stock option plan expenses amounting to R\$ 5,505.

(iii) AUSA

The subsidiary AUSA has three stock option plans, the first launched in 2007. The stock option plan of AUSA was approved at the Annual General Meeting of June 26, 2007 and at the Board of Directors meeting of this same date.

The changes in number of stock option and their corresponding weighted average exercise prices for the year are as follows:

	2008		2007	
	Number of options	Weighted average exercise price - Reais	Number of options	Weighted average exercise price - Reais
Options outstanding at the beginning of the year	1,474	6,522.92		
Options granted	720	7,474.93	1,474	6,522.92
Options cancelled	(56)	6,522.92		
Options outstanding at the end of the year	2,138	6,843.52	1,474	6,522.92

At December 31, 2008, 284 options exercisable (2007 - zero). The exercise prices per option at December 31, 2008 were from R\$ 8,238.27 to R\$ 8,376.26, whereas at December 31, 2007 it was R\$ 7,077.80.

The market value of each option granted in 2008 was estimated at the granting date using the Black-Scholes model for pricing options, taking into consideration the following assumptions: expected volatility, calculated based on the volatility history of the sector's companies, at 38.23% in 2008 and 33.58% in 2007, expected dividend yield on shares at 0% in 2008 and 2007, risk-free interest rate at 11.36% in 2008 and 11.88% in 2007, and expected average option term of 2.3 years in 2008 and 2007.

AUSA recorded stock option plan expenses amounting to R\$ 1,962 in 2008 and R\$ 1,322 in 2007.

15 Deferred Taxes

	Parent company		Consolidated	
	2008	2007	2008	2007
Assets				
Temporary differences - Lalur	44,154	38,818	52,321	46,267
Net operating loss carryforwards	10,684	12,499	76,640	12,499
Tax credits from downstream mergers	6,227	9,341	21,611	9,341
Temporary differences - CPC	39,680	1,298	39,680	10,633
	100,745	61,956	190,252	78,740
Liabilities				
Negative goodwill	18,266		18,266	
Temporary differences - CPC	18,122		18,122	
Differences between income taxed on a cash basis and the amount recorded on the accrual bases	62,732	42,515	202,743	46,070
	99,120	42,515	239,131	46,070

The Company calculates its taxes based on the recognition of results proportionally to the receipt of the contracted sales, in accordance with the rules determined by the Federal Revenue Service (SRF) Instruction 84/79, which differs from the calculation of the accounting revenues based on the costs incurred versus estimated cost. The taxation will occur over an average period of four years, considering the term for the receipt of the sales and the completion of the corresponding construction.

Edgar Filing: Gafisa S.A. - Form 6-K

At December 31, 2008, the Company had tax losses available for offset against future taxable income of R\$ 161,291 (2007 - R\$ 130,991), with corresponding tax benefits of R\$ 54,838 (2007 - R\$ 51,317).

The Company did not record a deferred income tax asset on the tax losses and social contribution tax loss carryforwards of its subsidiaries, which adopt the taxable income regime and do not have a history of taxable income for the past three years, except in subsidiary Tenda.

The projections of future taxable income consider estimates that are related, among other things, with the Company's performance and the behavior of the market in which it operates, as well as certain economic factors. The actual amounts could differ from these estimates.

Based on estimated future taxable income, the expected recovery profile of the income tax and social contribution net operating loss carryforwards is as follows:

	Parent company	Consolidated
2009	2,410	5,289
2010	2,773	33,192
2011	3,056	35,714
2012	2,129	2,129
Other	316	316
Total	10,684	76,640

The reconciliation of the statutory to effective tax rate is as follows:

	Consolidated	
	2008	2007
Income before income taxes on income and statutory profit sharing	210,051	128,058
Tax expense at statutory rates - 34%	(71,417)	(43,540)
Net effect of jointly-controlled subsidiaries on the presumed tax regime	22,122	13,598
Tax losses recorded from prior years	3,946	6,124
Stock option plan	(10,088)	(6,059)
Deferred income tax prior to the acquisition date of subsidiary	12,419	
Other permanent differences	(379)	(497)
Income tax and social contribution (expense)	(43,397)	(30,372)

Additionally, the reconciliation of the effective tax rate in the parent company mainly arises from the equity in results and the use of tax losses recorded from prior years and used over the current year.

16 Financial instruments

The Company participates in operations involving financial instruments, all of which are recorded in the balance sheet, for the purposes of meeting its operating needs and reducing its exposure to credit, currency and interest rate risks. These risks are managed by control policies, specific strategies and determination of limits, as follows:

(a) Risk considerations

(i) Credit risk

The Company and its subsidiaries restrict their exposure to credit risks associated with banks and cash and cash equivalents, investing in highly-rated financial institutions in short-term securities.

With regards to accounts receivable, the Company restricts its exposure to credit risks through sales to a broad base of customers and ongoing credit analysis. Additionally, the Company has no history of losses from liens in the cases of default during the construction period.

At December 31, 2008 and 2007, the Company and its subsidiaries management, except for Tenda s, did not deem necessary the recognition of a provision to cover losses on the recovery of receivables related to real estate developments delivered. In the same period, there was no material concentration of credit risk associated with customers.

(ii) Currency risk

The Company participates in operations involving derivative financial instruments for the purposes of mitigating the effects of fluctuations in foreign exchange rates.

In the years ended December 31, 2008 and 2007, the amounts of R\$ 80,895 and R\$ 5,857 related to the net positive result from the cross-currency interest rate swap operations was recognized in Financial income (expenses) , allowing for the correlation between the effect of these operations with the fluctuation in foreign currencies in the Company's balance sheet.

The nominal value of the swap contracts was R\$ 200,000 at December 31, 2008 and 2007. The gains (losses) of these operations at December 31, 2008 and 2007 are recorded in the balance sheet as follows (Note 9):

Rate swap contracts - (US Dollar and Yen for CDI)	Reais	Percentage	"Swap"	Net unrealized gains (losses) from derivative Instruments	
	Nominal value	Original index		2008	2007
Banco ABN Amro Real S.A.	100,000	Yen + 1.4 US Dollar +	105 CDI	53,790	733
Banco Votorantim S.A.	100,000	7	104 CDI	32,962	5,124
	200,000			86,752	5,857

The Company does not make sales denominated in foreign currency.

(iii) Interest rate risk

Interest accrues on loans and financing transactions (Note 9). Interest accrues on financial investments (Note 4). Accounts receivable from clients (Note 5) are subject to an interest rate of 12% per year, applied on a pro rata temporis basis.

Additionally, a significant portion of the balances maintained with related parties and with partners in the ventures are not subject to financial charges (Notes 7 and 11).

(b) Valuation of financial instruments

The main financial instruments receivable and payable and criteria for their valuation are as follows:

(i) Cash and cash equivalents

The market value of these assets does not significantly differ from the amounts presented in the financial statements (Note 4). The contract rates agreed reflect usual market conditions.

(ii) Loans and financing and debentures

Loans and financing are recorded based on the contractual interest rates of each operation, except for loans denominated in foreign currency, which are stated at fair value. Interest rate estimates for contracting operations with similar terms and amounts are used for the determination of market value. The terms and conditions of loans and financing and debentures obtained are presented in Notes 9 and 10. The fair value of the other loans and financing, recorded based on the contractual interest of each operation, does not significantly differ from the amounts presented in the financial statements.

(c) Sensitivity analysis

The sensitivity analysis of financial instruments is shown in the following chart, which describes the risks that could incur material losses for the Company, with the most likely scenario (Scenario I), according to management's evaluation. Additionally, other two scenarios are included, as provided for by CVM, through Instruction No. 475/08, for the purpose of showing stresses at 25% and 50%, respectively, of the risk factor that are taken into consideration (Scenarios II and III).

Votorantim swap risk factors - high of CDI (liability position) and appreciation of the Real x Dollar (asset position).

ABN Amro swap risk factors - high of CDI (liability position) and appreciation of the Real x Yen (asset position).

Projection	maturity on June 9, 2009	R\$/US\$	CDI - %
Scenario I	Likely	2.42	11.67
Scenario II - Possible	Stress at 25%	1.82	14.57
Scenario III - Remote	Stress at 50%	1.21	17.47
Projection	maturity on October 29, 2009	R\$/Yen	CDI - %
Scenario I	Expected	0.02767	12.30
Scenario II - Possible	Stress at 25%	0.02076	15.34
Scenario III - Remote	Stress at 50%	0.01384	18.39

At December 31, 2008, the Company calculated the scenario estimates of R\$/US\$ and R\$/JPY quotations for the maturity dates of swaps. The hypothetical appreciations of Real against other currencies would produce the following impact:

Impact on exchange rate scenarios

Transaction	Risk	Scenario (*)		
		I	II	III
Swap (asset position - US\$)	Drop of Dollar	147,539	110,654	73,769
Debt denominated in US\$	High of Dollar	146,739	(110,054)	(73,370)
Net effect of US\$ devaluation			600	399
Swap (asset position - Yen)	Drop of Yen	168,516	126,387	84,258
Debt denominated in Yen	High of Yen	(166,818)	(125,113)	(83,409)
Net effect of Yen devaluation		1,698	1,274	849

(*) Scenarios I, II and III - Likely, Possible and Remote, respectively.

Impact on interest rate scenarios

Transaction	Risk	Scenario (*)		
		I	II	III
Votorantim swap liability position balance in CDI on maturity date (June 9, 2009)	High of CDI	120,656	122,103	123,528
ABN Amro swap liability position balance in CDI on maturity date (October 29, 2009)	High of CDI	126,187	129,009	131,820

(*) Scenarios I, II and III - Likely, Possible and Remote, respectively.

The source of the data used to determine the exchange rate adopted in the base scenarios was Brazilian Mercantile & Futures Exchange (Bolsa de Mercadorias de Futuro - BMF), because Gafisa believes that this is the most reliable and independent source, and which represents the market consensus on these quotations.

The US Dollar and Yen data were extracted from the BMF website at December 31, 2008 for the maturity dates.

BMF data on December 31, 2008 **Quotation**
- %

R\$/U\$\$ for maturity in June 2009 11.67

R\$/JPY for maturity in October 2009 12.30

For interest rate data, Gafisa adopted the real rate until February 27, 2009 and used the CDI projection of BMF; base date February 27, 2009 for the maturity dates.

BMF data on February 27, 2009 **CDI - %**

Maturity in June 2009 11.67

Maturity in October 2009 12.30

The compensation of the Company's management members is as follows:

	2008	2007
Fees of Board of Directors	916	867
Fees of Board of Executive Officers	3,231	4,649
	4,147	5,516

18 Insurance

Gafisa S.A. and its subsidiaries maintain insurance policies against engineering risk, barter guarantee, guarantee for the completion of the work and civil liability related to unintentional personal damages caused to third parties and material damages to tangible assets, as well as against fire hazards, lightning strikes, electrical damages, natural disasters and gas explosion.

The contracted coverage is considered sufficient by management to cover possible risks involving its assets and/or responsibilities.

19 Segment Information

Starting in 2007, following the acquisition, formation and incorporation of AUSA, Fit Residencial, Bairro Novo and Tenda, respectively, the Company's management assesses segment information primarily on the basis of different business segments rather than geographic regions in Brazil.

The Company's chief executive officer, who is responsible for allocating funds among the businesses and monitoring their progress, uses economic present value data, which is derived from a combination of historical operating results and forecasted operating results. The Company provides below a measure of historical profit or loss, selected segment assets and other related information for each reporting segment.

This information is the basis of the internal data that is used by management to develop economic present value estimates and provided to the chief executive officer for making operating decisions, which include the allocation of resources among segments and segment performance. The information is derived from the statutory accounting records which are maintained in accordance with the Brazilian GAAP. The reporting segments do not separate operating expenses, total assets and depreciation. Revenues from no individual customer represented more than 10% of our net sales and/or services.

20 Subsequent event

On February 27, 2009, Gafisa and Odebrecht Empreendimentos Imobiliários S.A. announced an agreement for the dissolution of the partnership entered into with Odebrecht Empreendimentos Imobiliários S.A. in Bairro Novo Empreendimentos Imobiliários S.A., terminating the Shareholders Agreement then effective between the partners. Therefore Gafisa is no longer a partner in Bairro Novo Empreendimentos Imobiliários S.A. The real estate ventures that were being conducted together by the parties started to be carried out separately, GAFISA in charge of developing the Bairro Novo Cotia real estate venture, whereas Odebrecht Empreendimentos Imobiliários S.A. in charge of the other ventures of the dissolved partnership, in addition to the operation of Bairro Novo Empreendimentos Imobiliários S.A.
