Adjusted Net income and Profitability

In the third quarter of 2012, Bradesco posted adjusted net income of R\$2,893 million, up 0.9%, or R\$26 million, on the previous quarter, mainly driven by: (i) greater fee and commission income arising from the increase in business volume, (ii) lower allowance for loan losses expenses, (iii) higher operating insurance income, offset by: (iv) higher personnel and administrative expenses, and (v) lower financial margin income, a result of lower income from non-interest portion.

In comparison with the same period a year earlier, adjusted net income increased by R\$178 million, or 2.1% in the first nine months of 2012, for Return on Average Shareholders' Equity (ROAE) of 19.9%.

Shareholders Equity stood at R\$66,047 million in September 2012, up 22.9% on the balance of September 2011. This increase is partially due to the surplus value of some securities reclassified from Held to Maturity to Available for Sale for adoption of CPCs 38 and 40 by the Insurance Group. The Capital Adequacy Ratio stood at 16.0%, 11.3% of which fell under Tier I Reference Shareholders' Equity.

Total Assets came to R\$856,288 million in September 2012, up 18.6% over September 2011, driven by the increase in operations and the expansion of business volume. Return on Average Assets (ROAA) reached 1.4%.

Efficiency Ratio (ER)

The Efficiency Ratio in the last 12 months⁽¹⁾ improved by 0.3 p.p. for the third consecutive quarter, including the raise in salary levels as determined by the collective bargaining agreement, reaching 42.1% in the third quarter of 2012, lowest recorded in the last nine quarters. The improvement in ER was mainly driven by the growth in financial margin and fee and commission income, which was mainly due to an increase in average business volume, resulting from accelerated organic growth, which began in the second half of 2011, combined with the ongoing cost control efforts and the Efficiency Committee actions.

Quarterly ER was up 1.2 p.p. over the same period in the previous year, as a result of the aforementioned factors, combined with the 19.1% increase in income from insurance, pension plans and capitalization bonds.

The “adjusted to risk” ER, which reflects the impact of risk associated with loan operations⁽²⁾, remained stable over the previous quarter at 53.1%, thanks to the stable delinquency ratio in the period.

(1) $ER = (\text{Personnel Expenses} - \text{Employee Profit Sharing} + \text{Administrative Expenses}) / (\text{Financial Margin} + \text{Fee and Commission Income} + \text{Income from Insurance} + \text{Equity in the Earnings (Losses) of Unconsolidated Companies} + \text{Other Operating Income} - \text{Other Operating Expenses})$. Considering the ratio between: (i) total administrative costs (Personnel Expenses + Administrative Expenses + Other Operating Expenses + Tax Expenses not related to revenue generation + Insurance Selling Expenses) and (ii) revenue net of related taxes (not considering Claims and Selling Expenses from the Insurance Group), our ER in the third quarter of 2012 would be 44.9%; and

Financial Margin

The R\$79 million decrease between the third quarter of 2012 and the second quarter of 2012 was mainly due to:

- lower gains from the non-interest margin, in the amount of R\$164 million, as a result of lower treasury/security gains; and

offset by:

- a R\$85 million increase in interest-earning operations, mainly due to higher gains with: (i) “Loans”, due to increased volume of transactions in the period, and (ii) “Securities/Other” margins.

Financial margin posted a R\$3,621 million improvement between the first nine months of 2012 and the same period in 2011, for growth of 12.5%, mainly driven by:

- a R\$3,658 million increase in income from interest-earning operations due to an increase in business volume, mainly from: (i) “Loans”; and (ii) “Securities/Other;” and

offset by:

- lower income from the non-interest margin, in the amount of R\$37 million, due to lower “Treasury/Securities” gains.

Summarized Analysis of Adjusted Income

Below we point out the main non-recurring events in the third quarter of 2012, which, however, had not an impact on Insurance Group's result:

(i) Financial Assets: Aiming at streamlining our Assets Liability Management – ALM, we extended the terms of some available-for-sale securities covering technical reserves. This resulted in a R\$2.1-billion gain in financial revenues; and

(ii) Technical Reserves: Based on economic and actuarial studies, the Insurance Group decided to adapt its long-term technical reserves to the current real interest rates. As a result, we had a R\$2.1 billion expense on additional technical reserves.

Note that, despite the R\$2.1 billion expense with available-for-sale securities, this portfolio's mark-to-market balance increased R\$189 million in the third quarter of 2012, totaling R\$5.8 billion in September 2012 (June 2012 – R\$5.6 billion).

Due to the excellent performance of the Life and Pension Plan segments in the second quarter of 2012 and the known seasonality of the insurance segment, the quarterly revenue stood at R\$10.1 billion, lower in a quarter-on-quarter comparison, but up 12.0% when compared to the previous year.

Net income for the third quarter of 2012 was down 5.0% over the previous quarter, mainly due to: (i) the 12.7% decrease in revenue; partially offset by: (ii) the 0.9 p.p. reduction in claims ratio; and (iii) the improved financial and equity income.

Year on year, quarterly net income was up 7.3%, due to: (i) the 12.0% increase in revenue; (ii) 1.1 p.p. drop in claims ratio; (iii) lower general and administrative expenses; partially offset by: (iv) a decreased financial income.

In the first nine months, total revenue increased by 17.3% over the same period in 2011, which was driven by the performance of all segments, that posted an over two-digit growth in the period.

Net income for the first nine months of 2012 was up 12.0% over the same period in 2011, due to: (i) a 17.3% increase in revenue; (ii) the focus on more profitable products; (iii) the 0.7 p.p. drop in claims ratio; (iv) improved equity income; and (v) lower general and administrative expenses, despite the sector's collective bargaining agreement in January 2012; partially offset by: (vi) a decreased financial income.

With regards to solvency, Grupo Bradesco de Seguros e Previdência complies with Susep and ANS rules, also complying with global standards (Solvency II), with a leverage of 2.3 times its Shareholders' Equity in the period.

Fee and Commission Income

In the third quarter of 2012, fee and commission income came to R\$4,438 million, up R\$157 million, or 3.7%, over the previous quarter, due to the increase in business volume. This result was due to: (i) an increase in income from cards; (ii) an increase in income from fund management; (iii) an increase in income from checking accounts; (iv) an increase in income from collections; and partially offset by: (v) lower gains from capital market operations (underwriting / financial advisory).

In comparison with the same period a year earlier, the increase of R\$1,700 million, or 15.3%, in fee and commission income in the first nine months of 2012 was mainly due to: (i) the performance of the credit card segment, driven by the growth in credit card base and revenue; (ii) higher income from checking accounts, which was a result of a better business volume and an increase in the checking account holder base, which posted net growth of 945 thousand accounts in the period; (iii) greater income from fund management; (iv) greater gains from capital market operations (underwriting / financial advisory); and (v) greater income from loan operations, resulting from an increase in volume of contracted operations and surety and guarantee operations.

Personnel Expenses

In the third quarter of 2012, the R\$72 million increase from the previous quarter was due to the following:

- structural expenses – up R\$112 million, mainly due to raise in salary levels, as determined by the collective bargaining agreement, and adjustments to labor obligations; and

- non-structural expenses – R\$40 million decrease, mainly due to lower expenses with: (i) provision for labor claims; and (ii) employee and management profit sharing.

- R\$172 million in non-structural expenses, basically driven by greater expenses with employee and management profit sharing in the period.

In comparison with the same period in 2011, the R\$1,123 million increase in the first nine months of 2012 was mainly the result of:

- R\$951 million in structural expenses, resulting from: (i) increased expenses with salaries, social charges and benefits, due to raise in salary levels (2011 and 2012 collective bargaining agreements); and (ii) the net increase in the number of employees by 2,766 professionals, due to organic growth in the period; and

Administrative Expenses

In the third quarter of 2012, the 3.6% increase in administrative expenses from the previous quarter was mainly the result of higher expenses with: (i) outsourced services, mainly due to Cards variable expenses; (ii) data processing; and (iii) marketing and advertising, mainly due to the actions taken during the 2012 London Olympic and Paralympic Games, regarding the 2016 Rio Olympics sponsorship rights.

In comparison with the nine months of 2012 and the same period a year earlier, the 7.0% increase in the third quarter of 2012 was mainly due to: (i) the increase in business and services volume; (ii) contractual adjustments; and (iii) the opening of 11,393 service points, mainly the increase to 720 branches and 10,341 Bradesco *Expresso* points, for a total of 67,225 service points on September 30, 2012; which was partially offset by lower expenses with: (iv) outsourced services; and (v) marketing and advertising.

Other Operating Income and Expenses

Other operating expenses, net of other operating income, totaled R\$1,054 million in the third quarter of 2012, up R\$19 million over the previous quarter, and R\$492 million in comparison with the first nine months of 2012.

Compared with the same quarter last year and the previous quarter, the increase in other operating

expenses, net of other operating income, was mainly the result of greater expenses with: (i) operating provisions, particularly those for tax and civil contingencies; (ii) sundry losses; and (iii) amortization of intangible assets due to acquisition of banking rights.

Income Tax and Social Contribution

In the quarter-on-quarter comparison, income tax and social contribution expenses remained practically steady, mainly due to the fact that the taxable result remained the same in the period.

In the year-on-year comparison, the increase in these expenses is mainly the result of: (i) greater taxable result; and (ii) the termination of tax credits resulting from the increase in the social contribution rate from 9% to 15% in the first quarter of 2011.

Unrealized Gains

Unrealized gains totaled R\$21,096 million in the third quarter of 2012, a R\$448 million decrease from the previous quarter. This was mainly due to: (i) the depreciation of investment in Cielo, whose share value decreased by 14.4% in the quarter; and partially offset by: (ii) the appreciation of fixed-income securities due to mark-to-market accounting.

Economic Outlook

The third quarter was marked by a new shift in the global scenario as the concerns that had increased in the previous three months began to abate. In an atypically proactive and decisive manner, the main central banks renewed or increased their commitment to injecting liquidity into the markets, which reacted positively. The ECB - European Central Bank signaled its intention of intervening in the sovereign debt markets, contingent upon the assumption of certain obligations by the beneficiaries. Even if this initiative does not solve the eurozone's current structural and non-structural problems, it has contributed substantially to reducing the risk of extreme events in the region. At the same time, the Federal Reserve gave the market a pleasant surprise when it inaugurated the third phase of its quantitative easing program (QE3). In addition to announcing a program to purchase mortgage-backed securities, with no definite closing date, it signaled the maintenance of zero interest until mid-2015 and undertook to continue its expansionist measures even after the U.S. economy shows signs of a sustainable recovery. The Japanese central bank also expanded its asset purchase program.

This series of initiatives should help the recovery of the global economy in the coming quarters, albeit moderately, although they have not eliminated all the existing fears. In particular, there is still a good deal of uncertainty regarding the end of the fiscal stimuli in the United States (the so-called "fiscal cliff"), the degree of commitment of the European nations to adjusting their public finances and, more recently, midterm growth in China, which will be undergoing a political transition in the fourth quarter and whose growth rates are approaching 7.5%.

In Brazil, there was also a shift in the third quarter, this time towards economic activity. The various

Looking forward, it would appear that the recovery is sustainable. The capital goods segment, in particular, should benefit from temporary measures, such as more attractive funding rates and accelerated depreciation, as well as the federal government's purchase program aimed at the segment. Looking further ahead, investments in general should also benefit from the recent infrastructure concessions. For the economy as a whole, the sector-specific tax breaks and the measures to trim production costs, such as the reduction in electricity tariffs, should make the country more competitive. It is also worth highlighting the excellent prospects for domestic agriculture and cattle-raising, which is already having a positive impact on growth, following the negative shock in the first quarter.

Bradesco is maintaining its positive long-term outlook for Brazil. The country's ample foreign reserves (US\$379 billion, versus US\$208 billion in September 2008) and the volume of reserve requirements (R\$365 billion, versus R\$272 billion four years ago) constitute lines of defense that can be called upon rapidly if necessary – such as the reduction in reserve requirements in September. Pre-salt oil exploration and the major global sporting events scheduled for the coming years constitute unique opportunities for a select group of nations. In addition, the ongoing and intense upward social mobility process has expanded the domestic consumer market, in turn generating excellent prospects for Brazil's banking system.

The Organization continues to believe that Brazil will achieve a higher potential growth pace more rapidly if fueled by bigger investments in education and infrastructure and by economic reforms that increase the efficiency of the productive sector. Action on these fronts would play a crucial role in

monetary and fiscal stimuli began to generate more positive results, including an upturn in business confidence. The auto sector measures were particularly effective in that they encouraged sales and reduced inventories to near-normal levels. There are also recent indications suggesting that industrial production is recovering in segments that are not directly related to the auto industry.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
