PALL CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(In thousands, except per share data)

(Unaudited)

NOTE 1 – BASIS OF PRESENTATION

The condensed consolidated financial information of Pall Corporation and its subsidiaries (hereinafter collectively called the “Company”) included herein is unaudited. Such information reflects all adjustments of a normal recurring nature, which are, in the opinion of Company management, necessary to present fairly the Company’s consolidated financial position, results of operations and cash flows as of the dates and for the periods presented herein. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes set forth in the Company’s Annual Report on Form 10-K for the fiscal year ended July 31, 2012 (“2012 Form 10-K”). Certain prior year amounts have been reclassified to conform to the current year presentation.

As discussed in Note 17, Discontinued Operations, on August 1, 2012, the Company sold certain assets of its blood collection, filtration and processing product line, which was a component of the Company’s Life Sciences segment, and met the criteria for discontinued operations and held for sale presentation during the third quarter of fiscal year 2012. As such, it has been reported as a discontinued operation in the Company’s condensed consolidated financial statements for all periods presented.

NOTE 2 – BALANCE SHEET DETAILS

The following tables provide details of selected balance sheet items:

	Apr 30, 2013	Jul 31, 2012
Accounts receivable:		
Billed	\$494,887	\$584,449
Unbilled	74,765	82,720
Total	569,652	667,169
Less: Allowances for doubtful accounts	(15,527)	(11,733)
	\$554,125	\$655,436

Unbilled receivables principally relate to revenues accrued for long-term contracts recorded under the percentage-of-completion method of accounting.

	Apr 30, 2013	Jul 31, 2012
Inventory:		
Raw materials and components	\$97,400	\$86,659
Work-in-process	107,157	92,427
Finished goods	201,566	185,680
	\$406,123	\$364,766
Property, plant and equipment:		
Property, plant and equipment	\$1,643,581	\$1,608,718
Less: Accumulated depreciation and amortization	(886,242)	(857,725)
	\$757,339	\$750,993

PALL CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(In thousands, except per share data)

(Unaudited)

NOTE 3 – GOODWILL AND INTANGIBLE ASSETS

The following table presents goodwill, allocated by reportable segment.

	Apr 30, 2013	Jul 31, 2012
Life Sciences	\$180,531	\$178,359
Industrial	161,646	160,582
	\$342,177	\$338,941

Intangible assets, net, consist of the following:

	Apr 30, 2013		
	Gross	Accumulated Amortization	Net
Patents and unpatented technology	\$126,219	\$70,712	\$55,507
Customer-related intangibles	97,107	20,614	76,493
Trademarks	13,275	5,982	7,293
Other	4,457	2,592	1,865
	\$241,058	\$99,900	\$141,158

	Jul 31, 2012		
	Gross	Accumulated Amortization	Net
Patents and unpatented technology	\$125,938	\$65,262	\$60,676
Customer-related intangibles	93,901	13,323	80,578
Trademarks	13,104	5,269	7,835
Other	5,179	3,124	2,055
	\$238,122	\$86,978	\$151,144

Goodwill and intangible assets were primarily impacted by changes in the foreign exchange rates used to translate goodwill and intangible assets of foreign subsidiaries. Intangible assets were additionally impacted by the acquisition of a distributor in the third quarter of fiscal year 2013.

Amortization expense from continuing operations for intangible assets for the three and nine months ended April 30, 2013 was \$4,765 and \$14,900, respectively. Amortization expense from continuing operations for intangible assets for the three and nine months ended April 30, 2012 was \$5,911 and \$14,610, respectively (excluded is amortization expense included in discontinued operations for the three and nine months ended April 30, 2012 of \$45 and \$136, respectively). Amortization expense is estimated to be approximately \$4,655 for the remainder of fiscal year 2013, \$17,987 in fiscal year 2014, \$16,114 in fiscal year 2015, \$14,866 in fiscal year 2016, \$14,787 in fiscal year 2017 and \$14,639 in fiscal year 2018.

PALL CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(In thousands, except per share data)

(Unaudited)

NOTE 4 – TREASURY STOCK

The following table highlights the share repurchase authorizations in effect during fiscal year 2013:

	Date of Authorization			Total
	Oct 16, 2008	Sep 26, 2011	Jan 17, 2013	
Amount available for repurchases as of July 31, 2012	\$81,873	\$250,000	\$—	\$331,873
New authorizations	—	—	250,000	250,000
Utilized	(81,873)	(168,127)	—	(250,000)
Amount available for repurchases as of April 30, 2013	\$—	\$81,873	\$250,000	\$331,873

The Company's shares may be purchased over time, as market and business conditions warrant. There is no time restriction on these authorizations. Total repurchases during the nine months ended April 30, 2013 were 3,971 shares at an aggregate cost of \$250,000, with an average price per share of \$62.95. Repurchased shares are held in treasury for use in connection with the Company's stock plans and for general corporate purposes.

During the nine months ended April 30, 2013, 1,214 shares were issued under the Company's stock-based compensation plans. At April 30, 2013, the Company held 16,527 treasury shares.

NOTE 5 – CONTINGENCIES AND COMMITMENTS

With respect to the matters described in Note 14, Contingencies and Commitments, to the Company's consolidated financial statements included in the Company's 2012 Form 10-K and as updated in Note 5, Contingencies and Commitments, to the Company's condensed financial statements included on Form 10-Q for the second quarter of fiscal year 2013 and below, the Company has assessed the ultimate resolution of these matters and has reflected appropriate contingent liabilities and any related insurance recoveries of an equal amount in the condensed consolidated financial statements as of April 30, 2013 and July 31, 2012.

With respect to the matters previously disclosed in Note 14, Contingencies and Commitments, to the Company's consolidated financial statements included in the Company's 2012 Form 10-K under the heading Shareholder Derivative Lawsuits, the Company and the plaintiffs in each of the lawsuits have finalized a stipulation of settlement. The Court has scheduled a hearing in June to decide whether to approve the settlement. The settlement will not have a material impact on the Company's consolidated financial statements.

The Company and its subsidiaries are subject to certain other legal actions that arise in the normal course of business. Other than those legal proceedings and claims discussed in the 2012 Form 10-K and this Note, the Company did not have any other current legal proceedings and claims that would individually or in the aggregate have a reasonably possible material adverse effect on its financial condition or operating results. As such, any reasonably possible loss or range of loss, other than those legal proceedings discussed in the 2012 Form 10-K and this Note, is immaterial. However, the results of legal proceedings cannot be predicted with certainty. If the Company failed to prevail in several of these legal matters in the same reporting period, the operating results of a particular reporting period could be materially adversely affected.

Environmental Matters:

With respect to the environmental matters at the Company's Glen Cove, New York site, previously disclosed in Note 14, Contingencies and Commitments to the Company's consolidated financial statements included in the Company's 2012 Form 10-K and updated in Note 5, Contingencies and Commitments, to the Company's condensed financial statements included on Form 10-Q for the second quarter of fiscal year 2013, the Company, on March 14, 2013, submitted comments to the New York State Department of Environmental Conservation ("NYSDEC") on the proposed remedial action plan provided by the NYSDEC for the contamination in the deep groundwater zone ("OU-2") at the site. Thereafter, the NYSDEC issued a Record of Decision ("ROD") outlining their proposed cleanup remedy for OU-2. As a

result of this, the Company added approximately \$2,500 to its environmental reserves in the quarter. The Company is currently reviewing the ROD in order to decide its plan of action.

PALL CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(In thousands, except per share data)

(Unaudited)

The Company's condensed consolidated balance sheet at April 30, 2013 includes liabilities for environmental matters of approximately \$13,060, which relate primarily to the environmental proceedings discussed in the 2012 Form 10-K and as updated in Note 5, Contingencies and Commitments, in the Company's condensed financial statements included on Form 10-Q for the second quarter of fiscal year 2013 and this Note. In the opinion of management, the Company is in substantial compliance with applicable environmental laws and its current accruals for environmental remediation are adequate. However, as regulatory standards under environmental laws are becoming increasingly stringent, there can be no assurance that future developments, additional information and experience gained will not cause the Company to incur material environmental liabilities or costs beyond those accrued in its condensed consolidated financial statements.

NOTE 6 – RESTRUCTURING AND OTHER CHARGES, NET

The following tables summarize the restructuring and other charges (“ROTC”) recorded in the three and nine months ended April 30, 2013 and April 30, 2012:

	Three Months Ended Apr 30, 2013			Nine Months Ended Apr 30, 2013

(1) Restructuring:

Restructuring charges recorded in the three and nine months ended April 30, 2013 reflect the expenses incurred in connection with the Company's structural cost improvement initiatives impacting both segments as well as the Corporate Services Group.

Restructuring charges recorded in the three and nine months ended April 30, 2012 reflect the expenses incurred in connection with the Company's cost reduction initiatives, primarily in the Industrial segment. Restructuring charges in the nine months ended April 30, 2012 also includes a gain on the divestiture of a non-strategic asset group.

(2) Other (Gains) / Charges:

Severance benefits and other employment contract obligations:

In the three and nine months ended April 30, 2013 and April 30, 2012, the Company recorded charges related to certain employment contract obligations.

Gain/loss on sale and impairment of assets, net:

In the three months ended April 30, 2013 the Company recorded an impairment related to a software project.

In the three months ended April 30, 2012 the Company recorded a gain on the sale of assets related to a sale of a building in Europe. The nine months ended April 30, 2012 also includes a gain of \$9,196 on the sale of the Company's investment in Satair A/S.

Professional fees and other:

In the three and nine months ended April 30, 2013, the Company recorded legal and other professional fees, as well as adjustments to settlement reserves, related to the Federal Securities Class Actions, Shareholder Derivative Lawsuits and Other Proceedings (see Note 14, Contingencies and Commitments in the 2012 Form 10-K) which pertain to matters that had been under audit committee inquiry as discussed in Note 2, Audit Committee Inquiry and Restatement, to the consolidated financial statements included in the Company's Annual Report on Form 10-K for the fiscal year ended July 31, 2007 ("2007 Form 10-K"). The receipt of insurance claim payments partly offset the costs discussed above in the nine months ended April 30, 2013.

In the three and nine months ended April 30, 2012, the Company recorded legal and other professional fees, related to the matters discussed above. Furthermore, in the nine months ended April 30, 2012, the Company recorded settlement

related costs pertaining to these matters. The receipt of insurance claim payments more than offset these costs in the three months ended April 30, 2012 and offset the majority of such costs in the nine months ended April 30, 2012.

PALL CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(In thousands, except per share data)

(Unaudited)

The three and nine months ended April 30, 2013 also includes a loss related to a fire at a manufacturing facility and costs related to the demolition of a vacant facility.

Environmental Matters:

In the three months ended April 30, 2013, the Company increased its environmental reserves primarily related to a matter at its Glen Cove, New York site, as discussed in Note 5, Contingencies and Commitments above.

The following table summarizes the activity related to restructuring liabilities recorded for the Company's structural cost improvement initiatives and Industrial cost reduction initiatives which began in fiscal year 2012:

	Severance	Other	Total
Original charge	\$61,852	\$3,448	\$65,300
Utilized	(27,365)) (2,798) (30,163)
Translation	(123)) (47) (170)
Balance at Jul 31, 2012	\$34,364	\$603	\$34,967
Additions	10,896	1,149	12,045
Utilized	(24,672)) (1,314) (25,986)
Reversal of excess reserves	(500)) (57) (557)
Translation	234	11	245
Balance at Apr 30, 2013	\$20,322	\$392	\$20,714

Excluded from the table above are restructuring liabilities relating to restructuring plans initiated in fiscal years 2009 and 2010. At April 30, 2013, the balance of these liabilities was \$319.

NOTE 7 – INCOME TAXES

The Company's effective tax rate on continuing operations for the nine months ended April 30, 2013 and April 30, 2012 was 18.9% and 22.8%, respectively. For the nine months ended April 30, 2013, the effective tax rate varied from the U.S. federal statutory rate primarily due to the benefits of foreign operations and a net tax benefit of \$7,757 primarily from the resolution of a U.S. tax audit partly offset by the establishment of deferred tax liabilities for the repatriation of foreign earnings. For the nine months ended April 30, 2012, the effective tax rate varied from the U.S. federal statutory rate primarily due to the benefits of foreign operations.

During the nine months ended April 30, 2013, the Company reached a final agreement with the Internal Revenue Service ("IRS") resolving the outstanding tax positions for fiscal years ended 2006 through 2008. As a result, the Company reversed \$10,193 of previously recorded liabilities related to tax and penalties, as well as \$6,704 related to interest (\$4,268 net of income tax cost) that were accrued but not assessed as part of the IRS agreement.

At April 30, 2013 and July 31, 2012, the Company had gross unrecognized income tax benefits of \$186,152 and \$194,829, respectively. During the nine months ended April 30, 2013, the amount of gross unrecognized tax benefits decreased by \$8,677, primarily due to the settlement of the IRS income tax examinations for fiscal years ended 2006 through 2008, partially offset by tax positions taken during the current period and the impact of foreign currency translation. As of April 30, 2013, the amount of net unrecognized income tax benefits that, if recognized, would impact the effective tax rate was \$136,069.

At April 30, 2013 and July 31, 2012, the Company had liabilities of \$18,194 and \$25,314, respectively, for potential payment of interest and penalties.

Due to the potential resolution of tax examinations and the expiration of various statutes of limitation, the Company believes that it is reasonably possible that the gross amount of unrecognized tax benefits may decrease within the next twelve months by a range of zero to \$74,128.

Loss due to curtailments and settlements	49	—	—	—	49	—
Net periodic benefit cost	\$17,105	\$17,434	\$7,376	\$9,310	\$24,481	\$26,744

NOTE 9 – STOCK-BASED PAYMENT

The Company currently has four stock-based employee and director compensation award types (Restricted Stock Unit, Stock Option Plans, Management Stock Purchase Plan ("MSPP"), and Employee Stock Purchase Plan ("ESPP")), which are more fully described in Note 15, Common Stock, to the consolidated financial statements included in the 2012 Form 10-K.

The detailed components of stock-based compensation expense recorded in the condensed consolidated statements of earnings for the three and nine months ended April 30, 2013 and April 30, 2012 are reflected in the table below (excluded from the table below is stock-based compensation expense included in discontinued operations for the three and nine months ended and April 30, 2012 of \$165 and \$496, respectively):

	Three Months Ended		Nine Months Ended	
	Apr 30, 2013	Apr 30, 2012	Apr 30, 2013	Apr 30, 2012
Restricted stock units	\$3,978	\$4,541	\$11,895	\$13,880

PALL CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(In thousands, except per share data)

(Unaudited)

NOTE 10 – EARNINGS PER SHARE

The condensed consolidated statements of earnings present basic and diluted earnings per share. Basic earnings per share is determined by dividing income available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share considers the potential effect of dilution on basic earnings per share assuming potentially dilutive shares that meet certain criteria, such as those issuable upon exercise of stock options, were outstanding. The treasury stock method reduces the dilutive effect of potentially dilutive securities as it assumes that any cash proceeds (from the issuance of potentially dilutive securities) are used to buy back shares at the average share price during the period. Employee stock options and restricted stock units aggregating 742 and 575 shares were not included in the computation of diluted shares for the three months ended April 30, 2013 and April 30, 2012, respectively, because their effect would have been antidilutive. For the nine months ended April 30, 2013 and April 30, 2012, 586 and 862 antidilutive shares, respectively, were excluded. The following is a reconciliation between basic shares outstanding and diluted shares outstanding:

	Three Months Ended		Nine Months Ended	
	Apr 30, 2013	Apr 30, 2012	Apr 30, 2013	Apr 30, 2012
Basic shares outstanding	111,964	116,567	112,979	116,190
Effect of stock plans	1,347	1,791	1,436	1,627
Diluted shares outstanding	113,311	118,358	114,415	117,817

NOTE 11 – FAIR VALUE MEASUREMENTS

The Company records certain of its financial assets and liabilities at fair value, which is the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date.

The current authoritative guidance discusses valuation techniques, such as the market approach (comparable market prices), the income approach (present value of future income or cash flow), and the cost approach (cost to replace the service capacity of an asset or replacement cost). Authoritative guidance utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The following is a brief description of those three levels:

Level 1: Use of observable inputs such as quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Use of inputs other than quoted prices included in Level 1, which are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data.

Level 3: Use of inputs that are unobservable.

PALL CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(In thousands, except per share data)

(Unaudited)

The following table presents, for each of these hierarchy levels, the Company's financial assets and liabilities that are measured at fair value on a recurring basis as of April 30, 2013:

	Fair Value Measurements			
	As of			
	Apr 30, 2013	Level 1	Level 2	Level 3
Financial assets carried at fair value				
Money market funds	\$3,852	\$3,852	\$—	\$—
Available-for-sale securities:				
Equity securities	177	177	—	—
Debt securities:				
Corporate	32,920	—	32,920	—
U.S. Treasury	9,231	—	9,231	—
Federal Agency	24,181	—	24,181	—
Mortgage-backed	6,129	—	6,129	—
Municipal government	1,000	—	1,000	—
Derivative financial instruments:				
Foreign exchange forward contracts	2,537	—	2,537	—
Financial liabilities carried at fair value				
Derivative financial instruments:				
Foreign exchange forward contracts	2,024	—	2,024	—

The following table presents, for each of these hierarchy levels, the Company's financial assets and liabilities that are measured at fair value on a recurring basis as of July 31, 2012:

	Fair Value Measurements			
	As of			
	Jul 31, 2012	Level 1	Level 2	Level 3
Financial assets carried at fair value				
Money market funds	\$4,684	\$4,684	\$—	\$—
Available-for-sale securities:				
Equity securities	206	206	—	—
Debt securities:				
Corporate	32,378	—	32,378	—
U.S. Treasury	8,610	—	8,610	—
Federal Agency	27,231	—	27,231	—
Mortgage-backed	6,392	—	6,392	—

Foreign exchange forward contracts	3,778	—	3,778	—
Financial liabilities carried at fair value				
Derivative financial instruments:				
Foreign exchange forward contracts	1,457	—	1,457	—

The Company's money market funds and equity securities are valued using quoted market prices and, as such, are classified within Level 1 of the fair value hierarchy.

PALL CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(In thousands, except per share data)

(Unaudited)

The fair value of the Company's investments in debt securities are valued utilizing third party pricing services and verified by management. The pricing services use inputs to determine fair value which are derived from observable market sources including reportable trades, benchmark curves, credit spreads, broker/dealer quotes, bids, offers, and other industry and economic events. These investments are included in Level 2 of the fair value hierarchy.

The fair values of the Company's foreign currency forward contracts are valued using pricing models, with all significant inputs derived from or corroborated by observable market data such as yield curves, currency spot and forward rates, and currency volatilities. These investments are included in Level 2 of the fair value hierarchy.

The Company completed its annual goodwill impairment test for all reporting units in the third quarter of fiscal year 2013 and determined that no impairment existed. In addition, the Company had no impairment of goodwill in the prior year. In connection with the annual goodwill impairment test, the Company estimates the fair value of its reporting units using a market approach employing level 3 inputs as defined in the fair value hierarchy.

NOTE 12 – INVESTMENT SECURITIES

The following is a summary of the Company's available-for-sale investment securities by category which are classified within other non-current assets in the Company's condensed consolidated balance sheets. Contractual maturity dates of debt securities held by the trust at April 30, 2013 range from 2013 to 2044.

	Cost/ Amortized Cost Basis	Fair Value	Gross Unrealized Holding Gains	Gross Unrealized Holding Losses	Net Unrealized Holding Gains/(Losses)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(In thousands, except per share data)

(Unaudited)

NOTE 13 – REVOLVING CREDIT FACILITY

On April 11, 2013, the Company entered into a five-year \$1,200,000 unsecured senior revolving credit facility (the “New Facility”) with a syndicate of banks, which expires on April 11, 2018. The Company terminated its existing \$500,000 senior revolving credit facility, which would have expired in fiscal year 2015 (the “Prior Facility”). In connection with the New Facility, the Company incurred deferred financing costs of \$3,043, which will be amortized to interest expense over the term of the New Facility. There were no amounts outstanding against the Prior Facility or the New Facility for any of the periods presented. Letters of credit outstanding against the New Facility as of April 30, 2013 were approximately \$7,242.

Borrowings under the New Facility bear interest at either a variable rate based upon the London InterBank Offered Rate (U.S. dollar, British Pound, Euro, Swiss Franc and Japanese Yen borrowings) or the European Union Banking Federation Rate (Euro borrowings) or at the prime rate of the Facility Agent (U.S. dollar borrowing only). The New Facility requires the Company to maintain a consolidated leverage ratio (Consolidated Funded Debt to Earnings Before Net Interest, Taxes, Depreciation, Amortization and the Non-Cash Portion of Non-Recurring Charges and Income (“EBITDA”)) not to exceed 3.50 to 1.00, based upon the trailing four quarters' results.

In addition, the New Facility includes other covenants that under certain circumstances may restrict the Company's ability to incur additional indebtedness, make investments and other restricted payments, enter into sale and leaseback transactions, create liens and sell assets. As of April 30, 2013, the Company was in compliance with all related financial and other restrictive covenants, including limitations on indebtedness.

NOTE 14 – DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company manages certain financial exposures through a risk management program that includes the use of foreign exchange and interest rate derivative financial instruments. Derivatives are executed with counterparties with a minimum credit rating of “A” by Standard & Poors and Moody's Investor Services, in accordance with the Company's policies. The Company does not utilize derivative instruments for trading or speculative purposes.

Foreign Exchange Related:

a. Derivatives Not Designated as Hedging Instruments

The risk management objective of holding foreign exchange derivatives is to mitigate volatility to earnings and cash flows due to changes in foreign exchange rates. The Company and its subsidiaries conduct transactions in currencies other than their functional currencies. These transactions include non-functional intercompany and external sales as well as intercompany and external purchases. The Company uses foreign exchange forward contracts, matching the notional amounts and durations of the receivables and payables resulting from the aforementioned underlying foreign currency transactions, to mitigate the exposure to earnings and cash flows caused by the changes in fair value of these receivables and payables from fluctuating foreign exchange rates. The notional amount of foreign currency forward contracts entered into during the three and nine months ended April 30, 2013 was \$643,813 and \$1,867,299. The notional amount of foreign currency forward contracts outstanding as of April 30, 2013, including the cash flow hedges discussed below, was \$353,589.

b. Cash Flow Hedges

The Company uses foreign exchange forward contracts for cash flow hedging on its future transactional exposure to the Euro due to changes in market rates to exchange Euros for British Pounds. The hedges cover a British subsidiary (British Pound functional) with Euro revenues and a Swiss subsidiary (Euro functional) with British Pound expenses. The probability of the occurrence of these transactions is high and the Company's assessment is based on observable facts including the frequency and amounts of similar past transactions. The objective of the cash flow hedges is to lock the British Pound equivalent amount of Euro sales for the British subsidiary and the Euro equivalent amount of British Pound expenses for the Swiss subsidiary at the agreed upon exchange rates in the foreign exchange forward contracts. The notional amount of foreign currency forward contracts outstanding as of April 30, 2013 was \$63,968 and covers certain monthly transactional exposures through February 2014.

PALL CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(In thousands, except per share data)

(Unaudited)

c. Net Investment Hedges

The risk management objective of designating the Company's foreign currency loan as a hedge of a portion of its net investment in a wholly owned Japanese subsidiary is to mitigate the change in the fair value of the Company's net investment due to changes in foreign exchange rates. The Company uses a JPY loan outstanding to hedge its equity of the same amount in the Japanese wholly owned subsidiary. The hedge of net investment consists of a JPY 9 billion loan.

Interest Rate Related:

As of April 30, 2013, there are no existing interest rate related derivatives.

The fair values of the Company's derivative financial instruments included in the condensed consolidated balance sheets are presented as follows:

April 30, 2013	Asset Derivatives Balance Sheet Location	Fair Value	Liability Derivatives Balance Sheet Location	Fair Value

NOTE 16 – SEGMENT INFORMATION

The Company's reportable segments, which are also its operating segments, consist of the Company's Life Sciences and Industrial businesses.

The following table presents sales and segment profit from continuing operations by business segment reconciled to earnings from continuing operations before income taxes, for the three and nine months ended April 30, 2013 and April 30, 2012.

	Three Months Ended		Nine Months Ended	
	Apr 30, 2013	Apr 30, 2012	Apr 30, 2013	Apr 30, 2012

NOTE 17 – DISCONTINUED OPERATIONS

On April 28, 2012, the Company entered into an asset purchase agreement (“APA”) to sell certain assets of its blood collection, filtration and processing product line (the “Product Line”) to Haemonetics Corporation (“Haemonetics”) for approximately \$550,000. The transaction involved the transfer of manufacturing facilities and equipment in Covina, California; Tijuana, Mexico; Ascoli, Italy and a portion of the Company's operations in Fajardo, Puerto Rico. In addition to the manufacturing facilities and related equipment, the Company transferred Product Line related inventory and intangible assets. Haemonetics also assumed certain employee-related liabilities. The sale closed on August 1, 2012, and approximately 1,400 employees transitioned to Haemonetics at that time.

PALL CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(In thousands, except per share data)

(Unaudited)

Separate from these manufacturing facilities, the Company also agreed to transfer related blood media manufacturing capabilities and assets to Haemonetics. The transfer of the related media lines is expected to be completed by calendar year 2016. Until that time, the Company is providing these media products to Haemonetics under a supply agreement. Under the terms of the APA, approximately \$535,000 was paid upon closing, with the balance of the purchase price payable upon the Company's delivery of the aforementioned blood media manufacturing capability and related assets. Final determination of cash proceeds, gain on sale and tax impact are subject to working capital and certain other adjustments and final allocation of proceeds by jurisdiction.

The Product Line, which was a component of the Company's Life Sciences segment, met the criteria for discontinued operations and held for sale presentation during the third quarter of fiscal year 2012 and has been reported as a discontinued operation in the Company's condensed consolidated financial statements. The Company did not allocate any portion of the Company's interest expense to discontinued operations.

The key components of discontinued operations for the three and nine months ended April 30, 2013 and April 30, 2012 were as follows:

	Three Months Ended		Nine Months Ended	
	Apr 30, 2013	Apr 30, 2012	Apr 30, 2013	Apr 30, 2012
Net sales	\$344	\$57,180	\$8,867	\$169,493
Earnings/(loss) from discontinued operations before income taxes	\$(1,896) \$11,782	\$392,425	\$39,865
Provision/(benefit) for income taxes	(690) 3,802	146,873	11,999
Earnings/(loss) from discontinued operations, net of income taxes	\$(1,206) \$7,980	\$245,552	\$27,866

Included in earnings from discontinued operations before income taxes above are a (loss)/gain on the sale of the Product Line of \$(545) and \$396,793, respectively, for the three and nine months ended April 30, 2013.

As of July 31, 2012, the aggregate components of assets and liabilities classified as held for sale in the condensed consolidated balance sheet consisted of the following:

	Jul 31, 2012
Inventory	\$40,090
Prepaid expenses and other current assets	1,883
Total current assets	\$41,973
Property, plant and equipment	\$75,506
Goodwill	18,514
Intangible assets	524
Other non-current assets	—
Total non-current assets	\$94,544
Total assets	\$136,517
Total liabilities	\$2,643

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Forward-Looking Statements and Risk Factors

The following discussion should be read together with the accompanying condensed consolidated financial statements and notes thereto and other financial information in this Form 10-Q and in the Pall Corporation and its subsidiaries (hereinafter collectively called the "Company") Annual Report on Form 10-K for the fiscal year ended July 31, 2012 ("2012 Form 10-K"). The discussion under the subheading "Review of Operating Segments from Continuing Operations" below is in local currency (i.e., had exchange rates not changed year over year) unless otherwise indicated. Company management considers local currency change to be an important measure because by excluding the impact of volatility of exchange rates, underlying volume change is clearer. Dollar amounts discussed below are in thousands, unless otherwise indicated, except per share dollar amounts. In addition, per share dollar amounts are discussed on a diluted basis. The Company utilizes certain estimates and assumptions affecting the reported financial information as well as to quantify the impact of various significant factors that contribute to the changes in the Company's periodic results included in the discussion below.

The matters discussed in this Quarterly Report contain "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995. Forward-looking statements are those that address activities, events or developments that the Company or management intends, expects, projects, believes or anticipates will or may occur in the future. All statements regarding future performance, earnings projections, earnings guidance, management's expectations about its future cash needs, dilution from the disposition or future allocation of capital and effective tax rate, and other future events or developments are forward-looking statements. Forward-looking statements are those that use terms such as "may," "will," "expect," "believe," "intend," "should," "could," "anticipate," "estimate," "forecast," "project," "plan," "predict" similar expressions. Forward-looking statements contained in this and other written and oral reports are based on management's assumptions and assessments in light of past experience and trends, current conditions, expected future developments and other relevant factors.

The Company's forward-looking statements are subject to risks and uncertainties and are not guarantees of future performance, and actual results, developments and business decisions may differ materially from those envisaged by the Company's forward-looking statements. Such risks and uncertainties include, but are not limited to, those discussed in Part I-Item 1A.-Risk Factors in the 2012 Form 10-K, and other reports the Company files with the Securities and Exchange Commission, including: the impact of legislative, regulatory and political developments globally; the impact of the uncertain global economic environment; the extent to which adverse economic conditions may affect the Company's sales volume and results; demand for the Company's products and business relationships with key customers and suppliers, which may be impacted by their cash flow and payment practices; delays or cancellations in shipments; the Company's ability to develop and commercialize new technologies or obtain regulatory approval or market acceptance of new technologies; the Company's ability to enforce patents and protect proprietary products and manufacturing techniques; increase in costs of manufacturing and operating costs; the Company's ability to achieve and sustain the savings anticipated from its structural cost improvement initiatives; volatility in foreign currency exchange rates, interest rates and energy costs and other macroeconomic challenges currently affecting the Company; the Company's ability to meet its regulatory obligations; costs and outcome of pending or future claims or litigation; the Company's ability to comply with environmental, health and safety laws and regulations; changes in product mix, market mix and product pricing, particularly relating to the expansion of the systems business; the effect of a serious disruption in the Company's information systems; fluctuations in the Company's effective tax rate; the Company's ability to successfully complete or integrate any acquisitions; competition, including the impact of pricing and other actions by the Company's competitors; the effect of litigation and regulatory inquiries associated with the restatement of the Company's prior period financial statements; the Company's ability to attract and retain management talent or the loss of members of its senior management team; the effect of the restrictive covenants in the Company's debt facilities; and the effect of product defects and recalls. Factors or events that could cause the Company's actual results to differ may emerge from time to time, and it is not possible for the Company to predict all of them. The Company makes these statements as of the date of this disclosure and undertakes no obligation to update them, whether as a result of new information, future developments or otherwise.

Discontinued Operations

On April 28, 2012, the Company entered into an asset purchase agreement (“APA”) to sell certain assets of its blood collection, filtration and processing product line (the “Product Line”) to Haemonetics Corporation (“Haemonetics”) for approximately \$550,000. The transaction involved the transfer of manufacturing facilities and equipment in Covina, California; Tijuana, Mexico; Ascoli, Italy and a portion of the Company’s operations in Fajardo, Puerto Rico. In addition to the manufacturing facilities and related equipment, the Company transferred Product Line related inventory and intangible assets. Haemonetics also assumed certain employee-related liabilities. The sale closed on August 1, 2012, and approximately 1,400 employees transitioned to Haemonetics at that time.

Separate from these manufacturing facilities, the Company also agreed to transfer related blood media manufacturing capabilities and assets to Haemonetics. The transfer of the related media lines is expected to be completed by calendar year 2016. Until that time, the Company is providing these media products to Haemonetics under a supply agreement. Under the terms of the APA, approximately \$535,000 was paid upon closing, with the balance of the purchase price payable upon the Company's delivery of the aforementioned blood media manufacturing capability and related assets. Final determination of cash proceeds, gain on sale and tax impact are subject to working capital and certain other adjustments and final allocation of proceeds by jurisdiction.

The Product Line, which was a component of the Company's Life Sciences segment, met the criteria for discontinued operations and held for sale presentation during the third quarter of fiscal year 2012 and has been reported as a discontinued operation in the Company's condensed consolidated financial statements. The Company did not allocate any portion of the Company's interest expense to discontinued operations.

Review of Consolidated Results from Continuing Operations

Sales in the third quarter of fiscal year 2013 decreased 2.6% to \$641,190 from \$657,976 in the third quarter of fiscal year 2012. Exchange rates used to translate foreign subsidiary results into U.S. Dollars decreased reported sales by \$14,059, primarily due to the strengthening of the U.S. Dollar against the Japanese Yen ("JPY") and to a lesser extent, the Euro, British Pound and Brazilian Real. In local currency, sales were flat compared to the third quarter of fiscal year 2012. Sales in the nine months of fiscal year 2013 were \$1.9 billion, a decrease of 0.9% compared to the nine months of fiscal year 2012. Exchange rates used to translate foreign subsidiary results into U.S. Dollars decreased reported sales by \$39,659 in the nine months, primarily due to the strengthening of the U.S. Dollar against the Euro, JPY and Brazilian Real. In local currency, sales increased 1.1% compared to the nine months of fiscal year 2012. Life Sciences segment sales increased 4.7% (in local currency) in the third quarter of fiscal year 2013 and 6.3% in the nine months. Industrial segment sales decreased 5.2% (in local currency) in the third quarter and 3.5% in the nine months. For a detailed discussion of sales by segment, refer to the section "Review of Operating Segments" below. Consumable filtration products sales (including appurtenant hardware) increased 5.7% (in local currency) in the third quarter of fiscal year 2013, as an increase in Life Sciences of 12.1% was partly offset by a decline in Industrial of 0.8%. In looking at the year over year growth rate, it is important to note that consumables sales in the third quarter of fiscal year 2012 were negatively impacted by the disruption of the Company's internal supply chain related to the implementation of an Enterprise Resource Planning System ("ERP") in the Americas. In the nine months of fiscal year 2013, consumable filtration products sales increased 2.8% (in local currency), as an increase in Life Sciences of 9.2% was partly offset by a decline in Industrial of 3.4%. Increased pricing contributed \$7,896, or 1.4% and \$16,225, or 1.0% to consumables sales growth in the quarter and nine months, respectively, reflecting increases in both segments. Systems sales decreased 32.6% (in local currency) in the third quarter of fiscal year 2013 and 9.7% in the nine months reflecting decreases in both Life Sciences and Industrial due to a weak capital spending environment of the Company's customer base. Systems sales represented 10.9% of total sales in the third quarter compared to 16.0% in the third quarter of fiscal year 2012. Systems sales represented 12.2% of total sales in the nine months compared to 13.6% in the nine months of fiscal year 2012.

The Company defines its emerging markets as high growth and/or developing areas of the world in which the Company has focused growth resources. In the Americas, emerging markets include Latin America, primarily the countries of Brazil, Argentina and Mexico. In Europe, emerging markets include Eastern European countries, primarily Russia, Turkey and Poland, as well as various countries in the Middle East and Africa. In Asia, emerging markets primarily include the countries of China, India, Philippines, Indonesia and Vietnam. Sales in emerging markets, which represented close to 20% of total sales, were down about 14% in the third quarter of fiscal year 2013 compared to the third quarter of fiscal year 2012. This decline in sales primarily reflects weakness in the European and Asian emerging markets, primarily driven by weak capital spending, project delays and a few large projects in the third quarter of fiscal year 2012, offset by strong growth in Latin America. In the nine months of fiscal year 2013, sales in emerging markets declined almost 7%, reflecting the same factors.

Gross margin in the third quarter of fiscal year 2013 was 52.1%, compared to 50.8% in the third quarter of fiscal year 2012. Gross margin in the Life Sciences and Industrial segments increased 80 basis points and 110 basis points, respectively. Life Sciences gross margins were higher than Industrial in both periods, and Life Sciences gross profit dollars in the third quarter represented a larger share of total gross profit dollars than in the same period last year. These factors together resulted in the increase in overall gross margin of 130 basis points in the period. In the nine months of fiscal year 2013, gross margin was 51.9%, compared to 51.7% in the nine months of fiscal year 2012. Gross margin in the Life Sciences segment declined 10 basis points, while gross margin in the Industrial segment was on par with the same period of last year. Life Sciences gross margins were higher than Industrial in both periods, and Life Sciences profit dollars in the nine months represented a larger share of total gross profit dollars than in the same period last year. These factors together resulted in the increase in overall gross margin of 20 basis points in the period. For a detailed discussion of the factors impacting gross margin by segment, refer to the section "Review of Operating Segments" below.

The Company has risks to gross margin from the fluctuation of the costs of products that are sourced in a currency different than the currency they are sold in (transactional impact). In the fourth quarter of fiscal year 2012, the Company began to use foreign exchange contracts for cash flow hedging of its forecasted transactional exposure. With the Company's current manufacturing footprint, a significant portion of products purchased by the Company in the Eurozone are sourced outside of the Eurozone. Sales in the Eurozone are approximately 25% of total Company sales. About 70% of the cost of goods on those sales are denominated in British pounds or U.S. Dollars. Assuming that sales and cost of goods are in a similar proportion to the above, the Company estimates that the transactional impact of a 5% fluctuation in the U.S. Dollar and the Pound Sterling relative to the Euro would impact the Company's consolidated gross margin by a range of approximately 40-60 basis points on an annualized basis, before the impact of the Company's cash flow hedging program.

Looking at these currency pairs weighted to Pall's sales, for the three months ended April 30, 2013 the Euro had depreciated approximately 1% against the U.S. Dollar and strengthened 3% against the Pound Sterling compared to the average exchange rates for the three months ended April 30, 2012. For the nine months ended April 30, 2013, the Euro had depreciated approximately 3% against both the U.S. Dollar and the Pound Sterling compared to the average exchange rates for the nine months ended April 30, 2012.

Selling, general and administrative ("SG&A") expenses in the third quarter of fiscal year 2013 decreased by \$15,631 or 7.3% (approximately \$12,100, or 6%, in local currency). In the nine months of fiscal year 2013, SG&A expenses decreased by \$31,413 or 5.0% (approximately \$19,300, or 3%, in local currency). The decline in both periods reflects a decrease in the Industrial segment and the Corporate Services Group partly offset by an increase in the Life Sciences segment.

Selling expenses were flat in the third quarter of fiscal year 2013, while general and administrative ("G&A") expenses decreased about 15%. In the nine months of fiscal year 2013, selling expenses decreased approximately 4%, while general and administrative ("G&A") expenses decreased 7%.

The decline in overall SG&A (in local currency) in the quarter and nine months reflects the savings generated by the Company's structural cost improvement initiatives net of:

- incremental depreciation expense resulting from the go-live of the last significant phase of the Company's global ERP system implementation, and

- expenses to structure the Company for future growth.

Furthermore, the nine months reflects incremental costs related to ForteBio (which was acquired in the third quarter of fiscal year 2012), impacting Life Sciences.

As a percentage of sales, SG&A expenses in the third quarter of fiscal year 2013 declined to 31.1% from 32.7% in the third quarter of fiscal year 2012. In the nine months of fiscal year 2013, SG&A expenses declined to 31.1% from 32.5% in the prior year period. The selling and G&A expense components of SG&A as a percentage of sales in the third quarter were as follows:

- selling expenses were 17.9% compared to 17.5% in the third quarter of fiscal year 2012

- G&A expenses were 13.2% compared to 15.2% in the third quarter of fiscal year 2012

The selling and G&A expense components of SG&A as a percentage of sales in the nine months were as follows:

- selling expenses were 17.3% compared to 17.8% in the nine months of fiscal year 2012, and
- G&A expenses were 13.8% compared to 14.7% in the nine months of fiscal year 2012.

For a discussion of SG&A by business, refer to the section “Review of Operating Segments” below.

Research and development (“R&D”) expenses were \$22,608 in the third quarter of fiscal year 2013 compared to \$20,780 in the third quarter of fiscal year 2012, an increase of \$1,828, or 8.8% (approximately \$2,100, or 10% in local currency). The increase in R&D expenses in local currency in the quarter reflects increased spending in both the Life Sciences and Industrial segments, representing the Company’s focus on new product development and innovation. As a percentage of sales, R&D expenses were 3.5% in the quarter compared to 3.2% in the third quarter of fiscal year 2012. In the nine months of fiscal year 2013, R&D expenses were \$68,582 compared to \$60,351 last year, an increase of \$8,231, or 13.6% (approximately \$8,800, or 15% in local currency). The increase in R&D expenses in local currency in the nine months reflects increased spending in both segments. As a percentage of sales, R&D expenses were 3.6% in the nine months compared to 3.1% in the nine months of fiscal year 2012. For a discussion of R&D expenses by business, refer to the section “Review of Operating Segments” below.

In the third quarter and nine months of fiscal year 2013, the Company recorded restructuring and other charges (“ROTC”) of \$12,824 and \$21,497, respectively, primarily comprised of severance costs related to the Company’s structural cost improvement initiatives, charges related to certain employment contract obligations and an increase to environmental reserves.

In the third quarter and nine months of fiscal year 2012, the Company recorded ROTC of \$2,861 and \$31,001, respectively. ROTC in the third quarter and nine months was primarily comprised of severance, professional fees and other costs related to the Company’s cost reduction initiatives, primarily in the Industrial segment, as well as charges related to certain employment contract obligations. Such charges in the nine months were partly offset by a gain on the sale of assets.

The details of ROTC for the three and nine months ended April 30, 2013 and April 30, 2012 as well as the activity related to restructuring liabilities that were recorded related to the Company’s structural cost improvement initiatives and Industrial cost reduction initiatives, can be found in Note 6, Restructuring and Other Charges, Net, to the accompanying condensed consolidated financial statements.

Net interest expense in the third quarter of fiscal year 2013 was \$5,298 compared to \$6,351 in the third quarter of fiscal year 2012, a decrease of \$1,053. The decline in net interest expense reflects a reduction in income tax related interest expense as well as an increase in interest income. Net interest expense in the nine months of fiscal year 2013 was \$10,747 compared to \$17,682 in the nine months of fiscal year 2012. Net interest expense in the nine months of fiscal year 2013 reflects the reversal of \$6,704 of accrued interest related to the resolution of a U.S. tax audit.

Excluding this benefit, net interest expense decreased \$231 compared to the nine months of fiscal year 2012.

The Company’s effective tax rate for the third quarter of fiscal years 2013 and 2012 was 20.8% and 20.5%, respectively. The Company’s effective tax rate for the nine months ended April 30, 2013 and 2012 was 18.9% and 22.8%, respectively. The effective tax rate for the nine months ended April 30, 2013 reflects a net tax benefit of \$7,757 primarily from the resolution of a U.S. tax audit partly offset by the establishment of deferred tax liabilities for the repatriation of foreign earnings. Excluding these impacts, as well as the impact of ROTC discussed above, the effective tax rate for the nine months ended April 30, 2013 and 2012 would have been 22.2% and 23.0%, respectively. The Company expects its effective tax rate for the full fiscal year 2013 to be approximately 22.5%, exclusive of the impact of ROTC and discrete items. The actual effective tax rate for the full fiscal year 2013 may differ materially based on several factors, including the geographical mix of earnings in tax jurisdictions, enacted tax laws, the resolution of tax audits, the timing and amount of foreign dividends, state and local taxes, the ratio of permanent items to pretax book income, and the implementation of various global tax strategies as well as other factors.

Net earnings in the third quarter of fiscal year 2013 were \$74,271, or 65 cents per share, compared with net earnings of \$70,938, or 60 cents in the third quarter of fiscal year 2012. Net earnings in the nine months of fiscal year 2013 were \$243,755, or \$2.13 per share, compared with net earnings of \$205,236, or \$1.74 in the nine months of fiscal year 2012. Company management estimates that foreign currency translation decreased earnings per share by 3 cents in the third quarter and 7 cents in the nine months of fiscal year 2013.

Review of Operating Segments from Continuing Operations

The following table presents sales and segment profit by business segment, reconciled to earnings before income taxes, for the three and nine months ended April 30, 2013 and April 30, 2012.

Three Months Ended	Apr 30, 2013	% Margin	Apr 30, 2012	% Margin	% Change
SALES:					
Life Sciences	\$326,097		\$317,969		2.6

Life Sciences:

Presented below are Summary Statements of Segment Profit for the Life Sciences segment for the three and nine months ended April 30, 2013 and April 30, 2012:

Three Months Ended	Apr 30, 2013	% of Sales	Apr 30, 2012	% of Sales	% Change
Sales	\$326,097		\$317,969		2.6
Cost of sales	138,473	42.5	137,782	43.3	0.5
Gross margin	187,624	57.5	180,187	56.7	4.1
SG&A	91,897	28.2	91,289	28.7	0.7
R&D	14,532	4.5	13,512	4.2	7.5
Segment profit	\$81,195	24.9	\$75,386	23.7	7.7

Asia	186,111	188,279	(1.2)) (6,381)) 2.2
Total Life Sciences	\$955,230	\$918,954	3.9	\$(21,809)) 6.3

Life Sciences segment sales increased 4.7% in the third quarter of fiscal year 2013 compared to the third quarter of fiscal year 2012, reflecting growth in consumables sales of 12.1%, while systems sales were down 47.2%. In the nine months of fiscal year 2013, Life Sciences segment sales increased 6.3%, reflecting growth in consumables sales of 9.2%, partly offset by a decline in systems sales of 19.8%. Sales in consumables in both periods represent growth across all markets, while the decline in systems sales reflects weakness in Food & Beverage capital spending as well as timing of Biopharmaceuticals capital spending. Increased pricing contributed \$3,652, or 1.3% to consumables sales growth in the third quarter and the volume related increase to consumables sales was 10.8%. In the nine months, increased pricing contributed \$9,207, or 1.1% to consumables sales growth and the volume related increase to consumables sales was 8.1%.

Systems sales represented 6.4% of total Life Sciences sales in the third quarter of fiscal year 2013 compared to 12.5% in the third quarter of fiscal year 2012. In the nine months of fiscal year 2013, systems sales represented 7.7% of total Life Sciences sales compared to 10.1% in the nine months of fiscal year 2012.

Life Sciences sales represented approximately 51% of total Company sales in the third quarter of fiscal year 2013 compared to 48%, in the same period of fiscal year 2012. In the nine months of fiscal year 2013, Life Sciences sales represented approximately 49% of total Company sales compared to 47% in the nine months of fiscal year 2012.

Sales in the BioPharmaceuticals market, which is comprised of two submarket groupings (Pharmaceuticals and Laboratory) and represented approximately 67% of total Life Sciences sales, increased 11.1% in the third quarter of fiscal year 2013 and 9.3% in the nine months. The sales results by the submarkets are discussed below:

Sales in the Pharmaceuticals submarket, which represented about 60% of total Life Sciences sales, increased 8.0% in the third quarter of fiscal year 2013 and 9.6% in the nine months, reflecting growth in all three regions. Consumables sales increased 12.3% in the quarter and 11.7% in the nine months. The growth in the quarter and nine months reflects continued strength in the biotech sector. The year over year sales comparative also reflects the negative impact of internal supply chain issues on sales in the third quarter of fiscal year 2012 related to an ERP implementation. The ForteBio acquisition (acquired in the third quarter of fiscal year 2012) added approximately \$16 million, or 3%, in consumables sales growth in the nine months. Systems sales declined 33.4% in the quarter primarily due to a delay in projects in the Americas as well as chromatography hardware sales to certain pharmaceutical customers in the comparative period that did not repeat this fiscal year. In the nine months, systems sales declined 10.6% reflecting the timing of projects in all three regions.

Sales in the Laboratory submarket, which represented close to 10% of Life Sciences sales, increased 36.5% in the third quarter of fiscal year 2013 and 7.5% in the nine months, driven by growth in all three regions. The year over year sales comparative also reflects the negative impact of internal supply chain issues on sales in the third quarter of fiscal year 2012 as discussed previously in this report.

Sales in the Food & Beverage market, which represented about 16% of total Life Sciences sales, decreased 18.8% in the third quarter of fiscal year 2013 and 7.0% in the nine months. This reflects a decline in systems sales of 58.2% in the quarter and 31.7% in the nine months on weak capital spending and project delays in the Americas, China and

Eastern Europe. Consumables sales increased 1.7% and 1.1% in the quarter and nine months, respectively. This reflects growth attributable to geographic expansion in Latin America, partly offset by weakness in the beer and wine sectors in many European countries, as well as overall softness in Eastern Europe. The year over year consumables sales comparative also reflects weakness in the third quarter of fiscal year 2012, due to the internal supply chain disruption discussed previously in this report.

Sales in the Medical market, which is comprised of patient protection products sold to hospitals, original equipment manufacturers (“OEM”) and cell therapy developers, represented about 16% of total Life Sciences sales. Sales increased 10% in both the third quarter and nine months of fiscal year 2013 compared to the same periods in fiscal year 2012.

OEM sales, which represented less than 10% of total Life Sciences sales, increased 1.9% in the third quarter of fiscal year 2013 reflecting growth in the Americas and Asia partly offset by a decline in Europe. In the nine months of fiscal year 2013, OEM sales grew 3.7%, reflecting growth in all three regions.

Sales to hospitals, which represented less than 10% of total Life Sciences sales, were up 8.8% in the third quarter of fiscal year 2013 and 5.1% in the nine months, primarily reflecting increased point of use water filtration sales in Europe.

Blood media sales, under a supply agreement related to the sale of the Company’s blood product line, contributed approximately 7% to Medical sales growth in both the third quarter and nine months of fiscal year 2013.

Life Sciences gross margin in the third quarter of fiscal year 2013 increased 80 basis points to 57.5% from 56.7% in the third quarter of fiscal year 2012. The improvement in gross margin primarily reflects the benefit of favorable pricing and market mix. Life Sciences gross margin in the nine months of fiscal year 2013 decreased 10 basis points to 58.2% from 58.3% in the nine months of fiscal year 2012. The decline in gross margin in the nine months reflects the effect of the weakening Euro on British Pound and U.S. dollar denominated goods sourced in the Eurozone, partly offset by the benefit of favorable pricing.

Life Sciences SG&A expenses in the third quarter of fiscal year 2013 increased by \$608, or 0.7% (approximately \$2,300, or 3% in local currency) compared to the third quarter of fiscal year 2012. Selling expenses increased approximately 4% in the quarter, while G&A expenses decreased approximately 4%. In the nine months of fiscal year 2013, SG&A expenses increased by \$11,520, or 4.3% (approximately \$17,800, or 7% in local currency) compared to the nine months of fiscal year 2012. Selling and G&A expenses in the nine months increased approximately 2% and 8%, respectively. The overall increase in SG&A (in local currency) reflects investments the Company is making for future growth, partly offset by savings from the Company’s structural cost improvement initiatives. Furthermore, the nine months reflects incremental costs related to ForteBio. The selling and G&A expense components of SG&A as a percentage of sales in the quarter were as follows:

- selling expenses were 17.5% compared to 17.2% in the third quarter of fiscal year 2012, and
- G&A expenses were 10.7% compared to 11.5% in the third quarter of fiscal year 2012.

The selling and G&A expense components of SG&A as a percentage of sales in the nine months were as follows:

- selling expenses were 17.4% compared to 17.8% in the nine months of fiscal year 2012, and
- G&A expenses were 11.6% compared to 11.1% in the nine months of fiscal year 2012.

R&D expenses in the third quarter of fiscal year 2013 were \$14,532, an increase of \$1,020, or 7.5% (approximately \$1,200, or 9% in local currency). In the nine months of fiscal year 2013, R&D expenses increased \$7,788, or 20.9% (approximately \$8,100, or 22% in local currency). The increase in R&D expenses in the quarter and nine months reflects increased focus on development of the Company’s media and instrumentation capabilities, including spend related to the Company’s ForteBio product lines.

Segment profit dollars were \$81,195 in the third quarter of fiscal year 2013, an increase of \$5,809, or 7.7% (approximately \$8,400, or 11% in local currency) compared to the third quarter of fiscal year 2012. In the nine months of fiscal year 2013, segment profit dollars were \$233,514, an increase of \$328, or flat on a percentage basis (approximately \$7,000, or 3% in local currency) compared to the nine months of fiscal year 2012.

Industrial:

Presented below are summary Statements of Segment Profit for the Industrial segment for the three and nine months ended April 30, 2013 and April 30, 2012:

Three Months Ended	Apr 30, 2013	% of Sales	Apr 30, 2012	% of Sales	% Change	
Sales	\$315,093		\$340,007		(7.3)

Total Industrial	\$976,015	\$1,030,331	(5.3) \$(17,850) (3.5
By Region					
Americas	\$317,699	\$314,001	1.2	\$(2,562) 2.0
Europe	300,943	309,124	(2.6) (8,502) 0.1
Asia	357,373	407,206	(12.2) (6,786) (10.6
Total Industrial	\$976,015	\$1,030,331	(5.3) \$(17,850) (3.5

Industrial segment sales decreased 5.2% in the third quarter of fiscal year 2013 and 3.5% in the nine months, reflecting declines in the Process Technologies and Microelectronics markets partly offset by growth in the Aerospace market. Consumables (including appurtenant hardware) sales declined 0.8% in the third quarter, while systems sales decreased 23.7%. In the nine months of fiscal year 2013, consumables (including appurtenant hardware) and systems sales declined 3.4% and 4.3%, respectively. The declines in consumables in both periods are largely due to weakness in Asia, particularly China. The declines in systems across both periods reflect delays in the capital spending environment and the impact of large projects in the prior year's results.

Increased pricing contributed \$4,245, or 1.5%, to consumables sales in the third quarter of fiscal year 2013 thus, the volume decline related to consumables sales was about 2.3%. In the nine months of fiscal year 2013, increased pricing contributed \$7,018, or 0.8%, to consumables sales thus, the volume decline related to consumables sales was 4.2%. Systems sales represented 15.7% of total Industrial sales in the third quarter of fiscal year 2013 compared to 19.3% in the third quarter of fiscal year 2012. In the nine months of fiscal year 2013, systems sales represented 16.6% of total Industrial, essentially on par with the nine months of fiscal year 2012.

Industrial sales represented approximately 49% of total Company sales in the third quarter of fiscal year 2013 compared to 52% in the same period of fiscal year 2012. In the nine months of fiscal year 2013, Industrial sales represented approximately 51% of total Company sales compared to 53% in the nine months of fiscal year 2012. Sales in the Process Technologies market, which is comprised of four submarkets, Fuels & Chemicals, Machinery & Equipment, Power Generation and Municipal Water, represented about 60% of total Industrial sales. Sales decreased 10.9% in the third quarter of fiscal year 2013 and 6.7% in the nine months. The sales results by submarket are discussed below:

Sales in the Fuels & Chemicals submarket, which represented approximately 25% of total Industrial sales, were down 5.1% in the third quarter of fiscal year 2013. This primarily reflects reduced capital spending and project delays in the Middle East and Asia, partly offset by strength in the Americas in the oil & gas sector. In the nine months of fiscal year 2013, sales increased 0.9%.

Sales in the Machinery & Equipment submarket, which represented approximately 20% of total Industrial sales, decreased 8.8% in the third quarter of fiscal year 2013 and 8.6% in the nine months. This reflects a decrease in in-plant sales due to soft end market demand, weakness in mining, primary metals and mobile OEM, with the largest impacts felt in Europe and Asia. Furthermore, the sales declines year over year reflects the Company's decision to exit certain low margin product lines in Europe.

Sales in the Power Generation submarket, which represented close to 10% of total Industrial sales, declined 13.5% in the third quarter of fiscal year 2013 reflecting weakness in Asia related to a decrease in demand from wind turbine OEMs as well as a decline in capital spending in Europe. In the nine months of fiscal year 2013, Power Generation sales decreased 6.6% reflecting the same trend evident in the quarter.

Municipal Water submarket sales, which represented less than 10% of total Industrial sales, decreased 32.0% in the third quarter of fiscal year 2013 and 25.8% in the nine months. The decline in the quarter and nine months was largely

driven by the Americas (the Company's largest Municipal Water region) as pressure on capital spending continue to impact results. In Asia (the Company's smallest Municipal Water region) sales were down in the quarter and nine months reflecting a large wastewater project in Australia in the comparative periods of fiscal year 2012 that did not repeat this year.

The Aerospace market is comprised of sales of air, water, lubrication, fuel and hydraulic protection products to end-user customers in Military and Commercial Aerospace. Sales in the Aerospace market, which represented about 20% of total Industrial sales, increased 26.1% in the third quarter of fiscal year 2013 and 15.5% in the nine months. The sales results by submarket are discussed below:

Sales to the Military Aerospace submarket, which represented about 10% of total Industrial sales, were up 14.4% in the third quarter of fiscal year 2013 and 5.7% in the nine months, reflecting growth in the Americas and Europe, partly offset by a decline in Asia.

Sales to the Commercial Aerospace submarket, which represented about 10% of total Industrial sales, increased 39.4% in the third quarter of fiscal year 2013 and 26.9% in the nine months, with all three regions contributing. The growth in the quarter and nine months was driven by both increased aftermarket sales as well as to OEMs. The year over year sales comparative also reflects the negative impact of internal supply chain issues on sales in the third quarter of fiscal year 2012 as discussed previously in this report.

Microelectronics sales, which represented about 21% of total Industrial sales, decreased 10.1% in the third quarter of fiscal year 2013 and 8.3% in the nine months. The year over year result reflects continuing weakness in the Company's customer end markets particularly in the semiconductor display and data storage sectors, with the most significant impact seen in Asia. Growth in the Graphic Arts end market in Europe somewhat mitigated the impact.

Industrial gross margin in the third quarter of fiscal year 2013 increased 110 basis points to 46.5% from 45.4% in the third quarter of fiscal year 2012. The major drivers impacting gross margin quarter over quarter are as follows: the favorable impact of reduced warranty and obsolescence expenses that benefited gross margin by approximately 140-160 basis points,

favorable pricing which benefited gross margin by 60-80 basis points, and unfavorable mix which decreased gross margin by approximately 90-110 basis points, primarily driven by unfavorable market mix from lower sales of Microelectronics and Machinery & Equipment, partly offset by favorable product mix in the Aerospace market.

In the nine months of fiscal year 2013, gross margin was 45.8%, on par with the nine months of fiscal year 2012. This reflects favorable systems sales mix and the benefit of improved pricing offset by unfavorable overhead absorption.

Industrial SG&A expenses in the third quarter of fiscal year 2013 decreased by \$15,014, or 14.0% (approximately \$13,200, or 12% in local currency), compared to the third quarter of fiscal year 2012. Selling expenses in the quarter decreased about 5%, while G&A decreased about 25%. This reflects the savings generated by the Company's structural cost improvement initiatives. In the nine months, SG&A expenses declined by \$40,420, or 12.7% (approximately \$34,600, or 11% in local currency). Selling expenses in the nine months decreased about 9%, while G&A decreased about 18%.

The selling and G&A expense components of SG&A as a percentage of sales in the quarter were as follows:

- selling expenses were 18.0% compared to 17.5% in the third quarter of fiscal year 2012, and
- G&A expenses were 11.4% compared to 14.1% in the third quarter of fiscal year 2012.

The selling and G&A expense components of SG&A as a percentage of sales in the nine months were as follows:

- selling expenses were 16.9% compared to 17.6% in the nine months of fiscal year 2012, and
- G&A expenses were 11.5% compared to 13.2% in the nine months of fiscal year 2012.

R&D expenses were \$8,076 in the third quarter of fiscal year 2013, an increase of \$808, or 11.1% (approximately \$900, or 13% in local currency). In the nine months of fiscal year 2013, R&D expenses increased \$443, or 1.9% (approximately \$700, or 3% in local currency).

Segment profit dollars in the third quarter of fiscal year 2013 were \$45,853 compared to \$39,431 in the third quarter of fiscal year 2012 an increase of \$6,422, or 16.3% (approximately \$8,600, or 22% in local currency). In the nine months of fiscal year 2013, segment profit dollars were \$146,723, an increase of \$15,528, or 11.8% (approximately \$18,800, or 14% in local currency).

Corporate Services Group:

Corporate Services Group expenses in the third quarter of fiscal year 2013 were \$15,172 compared to \$16,397 in the third quarter of fiscal year 2012, a decrease of \$1,225 or 7.5% (approximately \$1,200 or 7% in local currency). In the nine months of fiscal year 2013, Corporate Services Group expenses were \$47,263 compared to \$49,776 in the nine months of fiscal year 2012, a decrease of \$2,513 or 5.0% (approximately \$2,450 or 5% in local currency). The decrease in Corporate Services Group expenses in the quarter and nine months primarily reflects a decline in professional fees.

Review of Results from Discontinued Operations

Net earnings from discontinued operations in the third quarter of fiscal year 2013 were a loss of \$1,206, or 1 cent per share, compared with net earnings of \$7,980, or 7 cents per share, in the third quarter of fiscal year 2012. Net earnings from discontinued operations in the nine months of fiscal year 2013 were \$245,552, or \$2.15 per share, compared with net earnings of \$27,866, or 24 cents per share, in the nine months of fiscal year 2012. The increase in net earnings in the nine months reflects the gain on the sale of the Blood product line.

Liquidity and Capital Resources

Non-cash working capital (inclusive of working capital from discontinued operations), which is defined as working capital excluding cash and cash equivalents, notes receivable, notes payable and the current portion of long-term debt, was approximately \$594,900 at April 30, 2013 as compared with \$610,900 at July 31, 2012. This includes working capital related to the Company's discontinued operations, but excludes assets aggregating approximately \$94,500 at July 31, 2012 classified as held for sale that otherwise would have been reported as non-current. Excluding the effect of foreign exchange (discussed below), non-cash working capital decreased approximately \$17,900 compared to July 31, 2012.

The Company's balance sheet is affected by spot exchange rates used to translate local currency amounts into U.S. Dollars. In comparing spot exchange rates at April 30, 2013 to those at July 31, 2012, the Euro has strengthened against the U.S. Dollar and the British Pound and JPY have weakened against the U.S. Dollar. The effect of foreign currency translation increased non-cash working capital by \$1,918, including net inventory, net accounts receivable and other current assets by \$4,016, \$6,375 and \$393, respectively, as compared to July 31, 2012. Additionally, foreign currency translation increased accounts payable and other current liabilities by \$7,259 and current income taxes payable by \$1,607.

Net cash provided by operating activities, inclusive of discontinued operations in the nine months ended April 30, 2013, was \$206,890 as compared to \$326,417 in the nine months ended April 30, 2012. This is a decrease of \$119,527, or about 37%, primarily reflecting income tax payments (including the settlement of several years of U.S. tax audits and the quarterly payments for the gain on the sale of the blood product line) and increased pension contributions. Discontinued operations had an immaterial impact on net cash provided by operating activities in nine months ended April 30, 2013.

The Company's full cash conversion cycle, defined as days in inventory outstanding ("DIO") plus days sales outstanding ("DSO") less days payable outstanding ("DPO"), increased to 137 days in the quarter ended April 30, 2013 from 136 days in the quarter ended April 30, 2012. This primarily reflects an increase in DSO and DIO, partly offset by a decline in DPO.

Free cash flow, inclusive of discontinued operations, which is defined as net cash provided by operating activities less capital expenditures, was \$140,503 in the nine months ended April 30, 2013, as compared with \$199,494 in the nine months ended April 30, 2012. The decrease in free cash flow reflects the decrease in net cash provided by operating activities as discussed above, partly offset by a decline in capital expenditures, as the nine months ended April 30, 2012 included the purchase of a new facility in Europe and investment in a global ERP system.

The Company utilizes free cash flow as one way to measure its current and future financial performance. Company management believes this measure is important because it is a key element of its planning. The following table reconciles net cash provided by operating activities, inclusive of discontinued operations, to free cash flow.

	Apr 30, 2013	Apr 30, 2012
Net cash provided by operating activities	\$206,890	\$326,417

Less capital expenditures	66,387	126,923
Free cash flow	\$ 140,503	\$ 199,494

35

The Company's cash position, net of debt, was approximately \$221,000 at April 30, 2013, compared to a net debt position of \$195,800 at July 31, 2012, a change of \$416,800. The impact of foreign exchange rates increased net cash by about \$31,600. Excluding this impact, net cash increased by \$385,200 reflecting an increase in cash and cash equivalents of \$395,200 partly offset by an increase in gross debt of \$10,000.

On April 11, 2013, the Company entered into a five-year \$1,200,000 unsecured senior revolving credit facility (the "New Facility") with a syndicate of banks, which expires on April 11, 2018 and terminated its existing \$500,000 senior revolving credit facility, which would have expired in fiscal year 2015 (the "Prior Facility").

Borrowings under the New Facility bear interest at either a variable rate based upon the London InterBank Offered Rate (U.S. dollar, British Pound, Euro, Swiss Franc and Japanese Yen borrowings) or the European Union Banking Federation Rate (Euro borrowings) or at the prime rate of the Facility Agent (U.S. dollar borrowing only). The New Facility requires the Company to maintain a maximum consolidated leverage ratio of 3.5:1, based upon the trailing four quarters' results. In addition, the New Facility includes other covenants that under certain circumstances may restrict the Company's ability to incur additional indebtedness, make investments and other restricted payments, enter into sale and leaseback transactions, create liens and sell assets. As of April 30, 2013, the Company was in compliance with all related financial and other restrictive covenants, including limitations on indebtedness.

The Company manages certain financial exposures through a risk management program that includes the use of foreign exchange and interest rate derivative financial instruments. Derivatives are executed with counterparties with a minimum credit rating of "A" by Standard and Poor's and Moody's Investor Services, in accordance with the Company's policies. The Company does not utilize derivative instruments for trading or speculative purposes.

The Company conducts transactions in currencies other than their functional currency. These transactions include non-functional currency intercompany and external sales as well as intercompany and external purchases. The Company uses foreign exchange forward contracts, matching the notional amounts and durations of the receivables and payables resulting from the aforementioned underlying foreign currency transactions, to mitigate the exposure to earnings and cash flows caused by changing foreign exchange rates. The risk management objective of holding foreign exchange derivatives is to mitigate volatility to earnings and cash flows due to changes in foreign exchange rates.

The notional amount of foreign currency forward contracts entered into during the three and nine months ended April 30, 2013 was \$643,813 and \$1,867,299. The notional amount of foreign currency forward contracts outstanding as of April 30, 2013 was \$353,589 of which \$63,968 are for cash flow hedges that cover monthly transactional exposures through February 2014. The Company's foreign currency balance sheet exposures resulted in the recognition of a gain within SG&A of approximately \$4,989 in the three months ended April 30, 2013, before the impact of the measures described above. Including the impact of the Company's foreign exchange derivative instruments, the net recognition within SG&A was a loss of approximately \$217 in the three months ended April 30, 2013.

As of April 30, 2013, the Company had \$215,000 of outstanding commercial paper, all of which is recorded as current liabilities under notes payable in the Company's consolidated balance sheet. Commercial paper outstanding at any one time during the quarter had balances ranging from \$215,000 to \$315,000, carried interest rates ranging between 0.36% and 0.43% and original maturities between 26 and 33 days. Commercial paper outstanding at April 30, 2013 carry interest rates ranging between 0.36% and 0.37% and maturities between 29 and 32 days. As of April 30, 2013, the Company does not have any outstanding borrowings under its existing senior revolving credit facility.

The Company utilizes cash flow generated from operations and its commercial paper program to meet its short-term liquidity needs. Company management considers its cash balances, lines of credit and access to the commercial paper and other credit markets, along with the cash typically generated from operations, to be sufficient to meet its anticipated liquidity needs.

As of April 30, 2013, the amount of cash and cash equivalents held by foreign subsidiaries was \$885,163. The Company does not expect any restrictions or taxes on repatriation of cash held outside of the U.S. to have a material effect on the Company's overall liquidity.

Capital expenditures were \$66,387 in the nine months of fiscal year 2013 (\$23,984 expended in the third quarter). Depreciation expense was \$20,264 and \$64,581 in the third quarter and nine months, respectively. Amortization expense was \$4,765 and \$14,900 in the third quarter and nine months, respectively.

On October 16, 2008, the board authorized an expenditure of \$350,000 to repurchase shares. On September 26, 2011, the board authorized an additional \$250,000 to repurchase shares. At July 31, 2012, there was \$331,873 remaining under the current stock repurchase programs. On January 17, 2013, the board authorized an expenditure of \$250,000 to repurchase shares. The Company repurchased stock of \$250,000 in the nine months of fiscal year 2013 leaving \$331,873 remaining at April 30, 2013 under the current stock repurchase programs. Net proceeds from stock plans were \$31,054 in the nine months ended April 30, 2013.

In the nine months of fiscal year 2013, the Company paid dividends of \$80,197 compared to \$64,554 in the nine months of fiscal year 2012, an increase of about 24%. The Company increased its quarterly dividend by 19% from 21 cents to 25 cents per share, effective with the dividend declared on September 26, 2012.

Adoption of New Accounting Pronouncements

In September 2011, the Financial Accounting Standards Board (the “FASB”) issued new accounting guidance intended to simplify goodwill impairment testing. Entities are allowed to perform a qualitative assessment on goodwill impairment to determine whether it is more likely than not (defined as having a likelihood of more than 50 percent) that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. This guidance was effective for goodwill impairment tests performed in interim and annual periods for fiscal years beginning after December 15, 2011, which for the Company was the first quarter of fiscal 2013, with early adoption permitted. The adoption of this accounting guidance did not have an impact on the Company’s results of operations or financial position.

In June 2011, the FASB issued new guidance on the presentation of comprehensive income. Specifically, the new guidance requires an entity to present components of net income and other comprehensive income in one continuous statement, referred to as the statement of comprehensive income, or in two separate, but consecutive statements. The new guidance eliminates the current option to report other comprehensive income and its components in the statement of changes in equity. In December 2011, the FASB issued an amendment to defer indefinitely a requirement in the June 2011 standard that called for reclassification adjustments from accumulated other comprehensive income to be measured and presented by income statement line item in net income and also in other comprehensive income. While the new guidance changes the presentation of comprehensive income, there are no changes to the components that are recognized in net income or other comprehensive income under current accounting guidance. The adoption of this disclosure-only guidance in the first quarter of fiscal year 2013 did not have an impact on the Company’s consolidated financial results.

Recently Issued Accounting Pronouncements

In February 2013, the FASB issued new accounting guidance which amends Accounting Standards Codification (“ASC”) 220, “Comprehensive Income.” The amended guidance requires entities to provide information about the amounts reclassified out of accumulated other comprehensive income by component. Additionally, entities are required to present, either on the face of the financial statements or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income, but only if the amount reclassified is required under US generally accepted accounting principles (“GAAP”) to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required under US GAAP to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures in the financial statements. The amended guidance does not change the current requirements for reporting net income or other comprehensive income. The amendments will become effective for the Company beginning with its first quarter of fiscal year 2014. As this is disclosure-only guidance, it will not have an impact on the Company’s consolidated financial results.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

There is no material change in the market risk information disclosed in Item 7A of the 2012 Form 10-K.

ITEM 4. CONTROLS AND PROCEDURES.

There were no changes in the Company’s internal control over financial reporting during the Company’s third quarter of fiscal year 2013, that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting.

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company’s management, including the Company’s chief executive officer and chief financial officer, of the effectiveness of the Company’s disclosure controls and procedures pursuant to Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended. Based on this evaluation, the chief executive officer and chief financial officer concluded that the Company’s disclosure controls and procedures are effective.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

(In thousands)

As previously disclosed in the 2012 Form 10-K, the Company is subject to various regulatory proceedings and litigation, including with respect to various environmental matters. Reference is also made to Note 5, Contingencies and Commitments, to the accompanying condensed consolidated financial statements.

Environmental Matters:

The Company's condensed consolidated balance sheet at April 30, 2013 includes liabilities for environmental matters of approximately \$13,060, which relate primarily to the environmental proceedings discussed in the 2012 Form 10-K and as updated in Note 5, Contingencies and Commitments, in the Company's condensed financial statements included on Form 10-Q for the second quarter of fiscal year 2013 and Note 5, Contingencies and Commitments, to the accompanying condensed consolidated financial statements of this Form 10-Q. In the opinion of management, the Company is in substantial compliance with applicable environmental laws and its current accruals for environmental remediation are adequate. However, as regulatory standards under environmental laws are becoming increasingly stringent, there can be no assurance that future developments, additional information and experience gained will not cause the Company to incur material environmental liabilities or costs beyond those accrued in its condensed consolidated financial statements.

ITEM 1A. RISK FACTORS.

There is no material change in the risk factors reported in Item 1A of the 2012 Form 10-K. This report contains certain forward-looking statements that reflect management's expectations regarding future events and operating performance and speak only as of the date hereof. These statements are subject to risks and uncertainties, which could cause actual results to differ materially. For a description of these risks see "Management's Discussion and Analysis of Financial Condition and Results of Operations – Forward-Looking Statements and Risk Factors."

ITEM 6. EXHIBITS.

See the Exhibit Index for a list of exhibits filed herewith or incorporated by reference herein.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
