UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2018

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 1-37648

OncoCyte Corporation

(Exact name of registrant as specified in its charter)

California

27-1041563

Edgar Filing: OncoCyte Corp - Form 10-Q

(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

1010 Atlantic Avenue, Suite 102

Alameda, California 94501

(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code

(510) 775-0515

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes
No

APPLICABLE ONLY TO CORPORATE ISSUERS:

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date:

As of August 8, 2018, there were outstanding 40,664,496 shares of common stock, no par value.

PART 1—FINANCIAL INFORMATION

Statements made in this Report that are not historical facts may constitute forward-looking statements that are subject to risks and uncertainties that could cause actual results to differ materially from those discussed. Such risks and uncertainties include but are not limited to those discussed in this Report under Item 1 of the Notes to Condensed Financial Statements, and under Risk Factors in this Report. Words such as “expects,” “may,” “will,” “anticipates,” “intends,” “plans,” “believes,” “seeks,” “estimates,” and similar expressions identify forward-looking statements.

References to “OncoCyte,” “our” or “we” means OncoCyte Corporation.

The description or discussion, in this Form 10-Q, of any contract or agreement is a summary only and is qualified in all respects by reference to the full text of the applicable contract or agreement.

ONCOCYTE CORPORATION

NOTES TO CONDENSED INTERIM FINANCIAL STATEMENTS

(UNAUDITED)

1. Organization, Description of the Business and Liquidity

OncoCyte Corporation (“OncoCyte”) is a developer of novel, non-invasive blood-based tests for the early detection of cancer. It is focused on developing molecular cancer diagnostics utilizing a discovery platform that focuses on identifying genetic markers that are differentially expressed in certain types of cancers. OncoCyte efforts have focused on developing diagnostic tests for use in detecting lung, bladder, and breast cancers. OncoCyte is currently devoting substantially all of its efforts on developing its lung cancer diagnostic test DetermaVu™.

OncoCyte was incorporated in 2009 in the state of California and was formerly a majority-owned subsidiary of BioTime, Inc. (“BioTime”), a publicly traded, clinical-stage, biotechnology company targeting degenerative diseases, primarily in the fields of ophthalmology, aesthetics and cell/drug delivery. Beginning on February 17, 2017, OncoCyte ceased to be a subsidiary of BioTime for financial reporting purposes when BioTime’s percentage ownership of outstanding OncoCyte common stock declined below 50% as a result of the issuance of additional OncoCyte common stock to certain investors who exercised OncoCyte stock purchase warrants (see Notes 4 and 6).

Basis of presentation

The unaudited condensed interim financial statements presented herein, and discussed below, have been prepared on a stand-alone basis in accordance with accounting principles generally accepted in the United States (“GAAP”) for interim financial information and in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities Exchange Commission (the “SEC”). In accordance with those rules and regulations certain information and footnote disclosures normally included in comprehensive financial statements have been condensed or omitted. The condensed balance sheet as of December 31, 2017 was derived from the audited financial statements at that date, but does not include all the information and footnotes required by GAAP. These condensed interim financial statements should be read in conjunction with the audited financial statements and notes thereto included in OncoCyte’s Annual Report on Form 10-K, as amended, for the year ended December 31, 2017.

The accompanying condensed interim financial statements, in the opinion of management, include all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of OncoCyte’s financial condition

and results of operations. The condensed results of operations are not necessarily indicative of the results to be expected for any other interim period or for the entire year.

Prior to February 17, 2017, BioTime consolidated the results of OncoCyte into BioTime's consolidated results based on BioTime's ability to control OncoCyte's operating and financial decisions and policies through its majority ownership of OncoCyte common stock. Beginning on February 17, 2017, BioTime's percentage ownership of the outstanding OncoCyte common stock declined below 50%, resulting in a loss of "control" of OncoCyte under GAAP and, as a result, BioTime deconsolidated OncoCyte's financial statements from BioTime's consolidated financial statements. As a result of this deconsolidation, OncoCyte is no longer considered a subsidiary of BioTime under GAAP with effect from February 17, 2017. OncoCyte remains an affiliate of BioTime based on BioTime's retained share ownership in OncoCyte, which is sufficient to allow BioTime to exert significant influence over the operations and management of OncoCyte.

To the extent OncoCyte does not have its own office and laboratory facilities, employees, or human resources for its operations, BioTime provides OncoCyte with use of its facilities and employees for administrative or operational services, as necessary, for the benefit of OncoCyte under the terms of a Shared Facilities and Services Agreement (the "Shared Facilities Agreement"). See Note 4. Accordingly, BioTime allocates expenses such as salaries and payroll related expenses incurred and paid on behalf of OncoCyte based on the amount of time that particular employees devote to OncoCyte affairs. Other expenses, such as legal, accounting, human resources, marketing, travel, and entertainment expenses are allocated to OncoCyte to the extent that those expenses are incurred by or on behalf of OncoCyte. BioTime also allocates certain overhead expenses such as facilities rent and utilities, property taxes, insurance, internet and telephone expenses based on a percentage determined by management. Overhead allocations are made based upon allocation drivers such as percentage of square feet of office or laboratory space used, and percentage of personnel devoted to OncoCyte's operations or management. See Note 2. Management evaluates the appropriateness of the percentage allocations on a periodic basis and believes that this basis for allocation is reasonable.

OncoCyte previously granted stock options to employees of BioTime, or employees of other BioTime subsidiaries who performed services for OncoCyte, and OncoCyte recorded stock-based compensation expense in the accompanying condensed statements of operations for the services performed in the periods presented.

Liquidity

Since inception, OncoCyte has financed its operations through the sale of common stock and warrants, warrant exercises, a bank loan, and sales of BioTime common shares that it holds as marketable equity securities. BioTime also provided OncoCyte with the use of BioTime facilities and services under a Shared Facilities Agreement as described in Note 4. OncoCyte has incurred operating losses and negative cash flows since inception and had an accumulated deficit of \$63.8 million as June 30, 2018. OncoCyte expects to continue to incur operating losses and negative cash flows for the near future.

At June 30, 2018, OncoCyte had \$10.3 million of cash and cash equivalents and held BioTime common shares as marketable equity securities valued at \$728,000 and, as further discussed in Note 10, on July 31, 2018, OncoCyte completed a financing in which it received approximately \$3.3 million in net proceeds after deducting placement fees and other estimated expenses. OncoCyte believes that its current cash, cash equivalents and marketable equity securities is sufficient to carry out current operations through at least twelve months from the issuance date of the condensed interim financial statements included in this Report.

OncoCyte will need to raise additional capital to finance its operations, including the development of its cancer diagnostic tests, until such time as it is able to complete development and commercialize one or more diagnostic tests and generate sufficient revenues to cover its operating expenses. OncoCyte continues to devote substantially all of its research and development resources to the completion of the development of DetermaVu™. If OncoCyte determines to build its own integrated marketing and sales force to commercialize DetermaVu™ after development is complete, OncoCyte will need to raise additional capital for that purpose. OncoCyte may also explore a range of other commercialization options in order to reduce capital needs and the risks associated with the timelines and uncertainty for attaining the Medicare and commercial reimbursement approvals that will be essential for the successful commercialization of DetermaVu™ and any other diagnostic tests that OncoCyte may develop. Those alternative arrangements could include marketing arrangements with other diagnostic companies through which OncoCyte might receive a royalty on sales, or through which it might form a joint venture to market DetermaVu™ and share in net revenues.

Delays in the development of DetermaVu™ could prevent OncoCyte from raising sufficient additional capital to finance the completion of development and commercial launch of DetermaVu™ or other cancer diagnostic tests. Even if OncoCyte is successful in completing the development of DetermaVu™, investors may be reluctant to provide OncoCyte with capital until DetermaVu™ is approved for reimbursement by Medicare or private payers. The unavailability or inadequacy of financing or revenues to meet future capital needs could force OncoCyte to modify, curtail, delay, or suspend some or all aspects of planned operations. Sales of additional equity securities could result in the dilution of the interests of its shareholders. OncoCyte cannot assure that adequate financing will be available on favorable terms, if at all.

2. Summary of Significant Accounting Policies

Research and development expenses

Research and development expenses include both direct expenses incurred by OncoCyte and indirect overhead costs allocated by BioTime that benefit or support OncoCyte's research and development functions. Direct research and development expenses consist primarily of personnel costs and related benefits, including stock-based compensation, outside consultants and suppliers. Indirect research and development expenses allocated by BioTime to OncoCyte under the Shared Facilities Agreement (see Note 4), are primarily based on headcount or space occupied, as applicable, and include laboratory supplies, laboratory expenses, rent and utilities, common area maintenance, telecommunications, property taxes and insurance. Research and development costs are expensed as incurred.

General and administrative expenses

General and administrative expenses include both direct expenses incurred by OncoCyte and indirect overhead costs allocated by BioTime that benefit or support OncoCyte's general and administrative functions. Direct general and administrative expenses consist primarily of compensation and related benefits, including stock-based compensation, for executive and corporate personnel, and professional and consulting fees. Indirect general and administrative expenses allocated by BioTime to OncoCyte under the Shared Facilities Agreement (see Note 4) are primarily based on headcount or space occupied, as applicable, and include costs for financial reporting and compliance, rent and utilities, common area maintenance, telecommunications, property taxes and insurance.

Sales and marketing expenses

Sales and marketing expenses consist primarily of personnel costs and related benefits, including stock-based compensation, trade shows and booths, branding and positioning, and outside consultants. Indirect sales and marketing expenses allocated by BioTime, primarily based on OncoCyte's headcount or space occupied, as applicable, include costs for rent and utilities, common area maintenance, telecommunications, property taxes and insurance, incurred by BioTime and allocated to us under the Shared Facilities Agreement.

Accounting for BioTime shares

OncoCyte accounts for the BioTime shares it holds as marketable equity securities in accordance with ASC 320-10-25, *Investments – Debt and Equity Securities*, as amended by Accounting Standards Update (“ASU”) 2016-01, *Financial Instruments—Overall: Recognition and Measurement of Financial Assets and Financial Liabilities*, as the shares have a readily determinable fair value quoted on the NYSE American and are held principally to meet future working capital purposes, as necessary. The securities are measured at fair value and reported as current assets on the condensed balance sheet based on the closing trading price of the security as of the date being presented.

Beginning on January 1, 2018, with the adoption of ASU 2016-01 discussed below, these securities are now called “marketable equity securities” and unrealized holding gains and losses on these securities are reported in the condensed statements of operations in other income and expenses, net. Prior to January 1, 2018 and the adoption of ASU 2016-01, these securities were called “available-for-sale securities” and unrealized holding gains and losses were reported in other comprehensive income or loss, net of tax, and were a component of the accumulated other comprehensive income or loss on the condensed balance sheet. Realized gains and losses are included in other income and expenses, net, in the condensed statements of operations.

On January 1, 2018, in accordance with the adoption of ASU 2016-01, OncoCyte recorded a cumulative-effect adjustment for these available-for-sale-securities to reclassify the unrealized loss of \$888,000 included in accumulated other comprehensive loss to the accumulated deficit balance. For the three and six months ended June 30, 2018, OncoCyte recorded an unrealized loss of \$223,000 and \$32,000, respectively, included in other income and expenses, net, due to the decrease in fair market value of the marketable equity securities from the respective balance sheet dates.

During the six months ended June 30, 2017, OncoCyte sold 266,442 shares of BioTime stock for net proceeds of \$934,000 and used those proceeds to pay down amounts owed to BioTime and affiliates (see Note 4). OncoCyte recognized a \$155,000 and \$309,000 loss from the sale of the BioTime shares for the three and six months ended June 30, 2017, respectively, included in other income and expenses, net.

OncoCyte did not sell any shares of BioTime stock during the six months ended June 30, 2018. As of June 30, 2018, OncoCyte held 353,264 BioTime common shares as marketable equity securities with a fair market value of \$728,000. Any proceeds from the sale of BioTime shares may be used by OncoCyte to pay amounts owed to BioTime and its affiliates or for working capital purposes (see Note 5).

Net loss per common share

All potentially dilutive common stock equivalents are antidilutive because OncoCyte reported a net loss for all periods presented. The following common stock equivalents were excluded from the computation of diluted net loss per share of common stock for the periods presented because including them would have been antidilutive (in thousands):

	Three Months Ended June 30, (Unaudited)		Six Months Ended June 30, (Unaudited)	
	2018	2017	2018	2017
Stock options	3,477	931	2,894	931
Warrants	2,779	3,049	2,779	3,049

Recently Issued Accounting Pronouncements

Certain recently issued accounting pronouncements applicable to OncoCyte that are not yet effective are disclosed in OncoCyte's Annual Report on Form 10-K, as amended, for the year ended December 31, 2017.

3. Selected Balance Sheet Components

Accrued expenses and other current liabilities

As of June 30, 2018 and December 31, 2017, prepaid expenses and other current assets were comprised of the following (in thousands):

	June 30, 2018	December 31, 2017
	(Unaudited)	
Accrued compensation	\$ 483	\$ 636
Accrued vendors and other expenses	560	406
Accrued expenses and other current liabilities	\$ 1,043	\$ 1,042

Intangible assets, net

As of June 30, 2018 and December 31, 2017, intangible assets, consisting primarily of acquired patents, patent applications, and licenses to use certain patents, were as follows (in thousands):

	June 30, 2018	December
	(Unaudited)⁽¹⁾	31, 2017
Intangible assets	\$ 2,419	\$ 2,419
Accumulated amortization	(2,419)	(1,673)
Intangible assets, net	\$ -	\$ 746

⁽¹⁾As part of OncoCyte's impairment assessment of its intangible assets, OncoCyte determined that these assets were impaired as of June 30, 2018 and, accordingly, OncoCyte recorded a noncash charge of \$625,000 representing the net book value of those assets as of that date, and included that charge in research and development expenses for the three and six months ended June 30, 2018. The impairment was primarily due to OncoCyte's decision to discontinue any further utilization of the underlying patents, patent applications and licenses since those assets are for therapeutic use and not for diagnostic use, as OncoCyte continues to devote all of its research and development resources and commercialization efforts to cancer diagnostic tests. Research and development expenses for the three and six months ended June 30, 2018 also include \$60,000 and \$121,000, respectively, in amortization expenses related to these intangible assets recorded prior to the impairment charge. For the three and six months ended June 30, 2017, research and development expenses include \$60,000 and \$121,000 of amortization of intangible assets, respectively.

Machinery and equipment, net

As of June 30, 2018 and December 31, 2017, machinery and equipment, primarily comprised of assets purchased under capital leases discussed in Note 9, were as follows (in thousands):

	June 30,	December
	2018	31, 2017
	(Unaudited)	
Machinery and equipment	\$ 1,345	\$ 1,479
Accumulated depreciation	(730)	(657)
Machinery and equipment, net	\$ 615	\$ 822

Depreciation expense amounted to \$104,000 and \$77,000 for the three months ended June 30, 2018 and 2017, and \$207,000 and \$144,000 for the six months ended June 30, 2018 and 2017, respectively.

4. Related Party Transactions

Shared Facilities Agreement

On October 8, 2009, OncoCyte and BioTime executed the Shared Facilities Agreement. Under the terms of the Shared Facilities Agreement, BioTime will allow OncoCyte to use its premises and equipment located at Alameda, California for the sole purpose of conducting business. BioTime will also provide accounting, billing, bookkeeping, payroll, treasury, payment of accounts payable, and other similar administrative services to OncoCyte. BioTime may also provide the services of attorneys, accountants, and other professionals who may also provide professional services to BioTime and its other subsidiaries. BioTime will also provide OncoCyte with the services of its laboratory and research personnel, including BioTime employees and contractors, for the performance of research and development work for OncoCyte at the premises.

BioTime charges OncoCyte a Use Fee for services received and usage of facilities, equipment, and supplies. For each billing period, BioTime prorates and allocates costs incurred, as applicable, to OncoCyte, such costs include services of Bio Time employees, equipment, insurance, lease, professional, software, supplies and utilities. Allocation depends on key cost drivers including actual documented use, square footage of facilities used, time spent, costs incurred by or for OncoCyte, or upon proportionate usage by BioTime and OncoCyte, as reasonably estimated by BioTime (collectively "Use Fees"). BioTime, at its discretion, has the right to charge OncoCyte a 5% markup on such allocated costs.

The Use Fee is determined and invoiced to OncoCyte on a quarterly basis for each calendar quarter of each calendar year. If the Shared Facilities Agreement terminates prior to the last day of a billing period, the Use Fee will be determined for the number of days in the billing period elapsed prior to the termination of the Shared Facilities Agreement. Each invoice will be payable in full by OncoCyte within 30 days after receipt. Any invoice, or portion thereof, not paid in full when due will bear interest at the rate of 15% per annum until paid, unless the failure to make a payment is due to any inaction or delay in making a payment by BioTime employees from OncoCyte funds available for such purpose, rather than from the unavailability of sufficient funds legally available for payment or from an act, omission, or delay by any employee or agent of OncoCyte. Through June 30, 2018, BioTime has not charged OncoCyte any interest.

In addition to the Use Fees, OncoCyte will reimburse BioTime for any out of pocket costs incurred by BioTime for the purchase of office supplies, laboratory supplies, and other goods and materials and services for the account or use of OncoCyte, provided that invoices documenting such costs are delivered to OncoCyte with each invoice for the Use Fee. BioTime has no obligation to purchase or acquire any office supplies or other goods and materials or any services for OncoCyte, and if any such supplies, goods, materials or services are obtained for OncoCyte, BioTime may arrange for the suppliers thereof to invoice OncoCyte directly.

The Shared Facilities Agreement will remain in effect, unless either party gives the other party written notice stating that the Shared Facilities Agreement will terminate on December 31 of that year, or unless the agreement otherwise is terminated under another provision of the agreement.

In the aggregate, Use Fees charged to OncoCyte by BioTime are as follows (in thousands):

	Three Months Ended June 30, (unaudited)		Six Months Ended June 30, (unaudited)	
	2018	2017	2018	2017
Research and development	\$217	\$312	\$438	\$629
General and administrative	79	78	153	157
Sales and marketing	95	-	193	-
Total use fees	\$391	\$390	\$784	\$786

As of June 30, 2018 and December 31, 2017, OncoCyte had \$2.1 million outstanding and payable to BioTime and affiliates included in current liabilities on account of Use Fees under the Shared Facilities Agreement. Since those amounts are due and payable within 30 days of being invoiced, the payables are classified as current liabilities for all

periods presented.

The minimum fixed payments due under the Shared Facilities Agreement are approximately \$131,000 per month.

5. Loan Payable to Silicon Valley Bank

On February 21, 2017, OncoCyte entered into a Loan and Security Agreement (the “Loan Agreement”) with Silicon Valley Bank (the “Bank”) pursuant to which OncoCyte borrowed \$2 million on March 23, 2017. Payments of interest only on the principal balance were due monthly from the draw date through October 31, 2017, and, beginning on November 1, 2017, monthly payments of principal of approximately \$67,000 plus interest are due and payable. The outstanding principal balance of the loan bears interest at a stated floating annual interest rate equal to the greater of (i) three-quarters of one percent (0.75%) above the prime rate or (ii) four and one-quarter percent (4.25%). As of June 30, 2018, the latest published prime rate plus 0.75% was 5.75% per annum.

The outstanding principal amount plus accrued interest will be due and payable to the Bank at maturity on April 1, 2020. At maturity, OncoCyte will also pay the Bank an additional final payment fee of 5.8% of the original principal borrowed. OncoCyte accrued the \$116,000 final payment fee included in the loan payable as a deferred financing cost on the March 23, 2017 draw date.

OncoCyte may prepay in full the outstanding principal balance at any time, subject to a prepayment fee equal to 2.0% of the outstanding principal balance if prepaid on or before February 21, 2019, or 1.0% of the outstanding principal balance if prepaid after February 21, 2019. Any amounts borrowed and repaid may not be reborrowed. There are no amounts available to be borrowed on the Loan Agreement.

The outstanding principal amount of the loan, with interest accrued, the final payment fee, and the prepayment fee may become due and payable prior to the applicable maturity date if an “Event of Default” as defined in the Loan Agreement occurs and is not cured within any applicable cure period. Upon the occurrence and during the continuance of an Event of Default, all obligations due to the Bank will bear interest at a rate per annum which is 5% above the then applicable interest rate. An Event of Default includes, among other events, failure to pay interest and principal when due, material adverse changes, which include a material adverse change in OncoCyte’s business, operations, or condition (financial or otherwise), failure to provide the bank with timely financial statements and copies of filings with the Securities and Exchange Commission, as required, legal judgments or pending or threatened legal actions of \$50,000 or more, insolvency, and delisting from the NYSE American. OncoCyte’s obligations under the Loan Agreement are collateralized by substantially all of its assets other than intellectual property such as patents and trade secrets that OncoCyte owns. Accordingly, if an Event of Default were to occur and not be cured, the Bank could foreclose on its security interest in the collateral. OncoCyte was in compliance with the Loan Agreement as of the filing date of this Report.

Under the provisions of the Loan Agreement, as consented by the Bank on October 26, 2017, any proceeds received by OncoCyte from sales of BioTime shares may be used by OncoCyte to fund its operations.

Bank Warrants

On February 21, 2017, and in conjunction with the \$2.0 million becoming available under the Loan Agreement, OncoCyte issued common stock purchase warrants to the Bank (the “Bank Warrants”) entitling the Bank to purchase shares of OncoCyte common stock in tranches related to the availability and borrowing of loan funds under the Loan Agreement. In conjunction with the availability of the loan, the Bank was issued warrants to purchase 8,247 shares of OncoCyte common stock at an exercise price of \$4.85 per share, through February 21, 2027. On March 23, 2017, in conjunction with borrowing \$2 million, the Bank was issued warrants to purchase an additional 7,321 shares at an exercise price of \$5.46 per share, through March 23, 2027. The Bank may elect to exercise the Bank Warrants on a “cashless exercise” basis and receive a number of shares determined by multiplying the number of shares for which the applicable tranche is being exercised by (A) the excess of the fair market value of the common stock over the applicable exercise price, divided by (B) the fair market value of the common stock. The fair market value of the common stock will be the last closing or sale price on a national securities exchange, interdealer quotation system, or over-the-counter market.

The Bank Warrants are classified as equity since, among other factors, they are not mandatorily redeemable, cannot be settled in cash or other assets and require settlement by issuing a fixed number of shares of common stock of OncoCyte. OncoCyte determined the fair value of the Bank Warrants using the Black-Scholes option pricing model to be approximately \$62,000, which was recorded as a deferred financing cost against the loan payable balance. Aggregate deferred financing costs of \$196,000, recorded against the loan payable balance, are amortized to interest expense over the term of the loan using the effective interest method. As of June 30, 2018, unamortized deferred financing costs were \$69,000.

6. Shareholders' Equity

Preferred Stock

OncoCyte is authorized to issue 5,000,000 shares of no par value preferred stock. As of June 30, 2018, no preferred shares were issued or outstanding.

Common Stock

OncoCyt e has up to 50,000,000 shares of no par value common stock authorized.

On March 28, 2018, OncoCyt e entered into a securities purchase agreement with two accredited investors. The agreement provides for the private placement of 7,936,508 shares of OncoCyt e's common stock for \$1.26 per share, for total gross proceeds of \$10.0 million before deducting offering expenses, \$8.0 million of which was received in March 2018 and \$2.0 million in May 2018. The agreement contains certain registration rights. The investors are Broadwood Partners, L.P. and George Karfunkel, who beneficially own more than 5% of OncoCyt e's outstanding common stock.

As of June 30, 2018, and December 31, 2017, OncoCyt e had 39,407,566 (see Note 10) and 31,451,558 issued and outstanding common shares, respectively.

Issuance of common stock and warrants

On August 29, 2016, OncoCyt e sold an aggregate of 3,246,153 immediately separable units, with each unit consisting of one share of OncoCyt e common stock and one warrant to purchase one share of OncoCyt e common stock (the "2016 Warrants"), at a price of \$3.25 per unit (the "Offering"). The sales were made pursuant to the terms and conditions of certain Purchase Agreements between OncoCyt e and the purchasers in the Offering. OncoCyt e received \$9.8 million in net proceeds after discounts, commissions and expenses from the Offering (see Note 10).

2016 Warrants and New Warrants

The 2016 Warrants have an exercise price of \$3.25 per Warrant Share, and may be exercised for five years from October 17, 2016, the date the 2016 Warrants became exercisable. The 2016 Warrants may be exercised on a net "cashless exercise" basis, meaning that the value of a portion of Warrant Shares may be used to pay the exercise price (rather than payment in cash), in certain circumstances, including if the Resale Registration Statement is not effective when and as required by the Purchase Agreements. The exercise price and the number of Warrant Shares will be adjusted to account for certain transactions, including stock splits, dividends paid in common stock, combinations or reverse splits of common stock, or reclassifications of common stock.

Under certain provisions of the 2016 Warrants, in the event of a Fundamental Transaction, as defined in the 2016 Warrants, OncoCyte will use reasonable best efforts for the acquirer, or any successor entity other than OncoCyte, to assume the 2016 Warrants. If the acquirer does not assume the OncoCyte Offering Warrant obligations, then the acquirer shall pay the holders of 2016 Warrants an amount equal to the aggregate value equal to the Black Scholes Value, as defined in the 2016 Warrants. The payment of the Black Scholes Value shall be made in cash or such other consideration as the acquirer paid to the other OncoCyte shareholders in the Fundamental Transaction.

OncoCyte is not required to net cash settle the 2016 Warrants under any circumstance. OncoCyte considered the guidance in ASC 815-40, which states that contracts that require or may require the issuer to settle the contract for cash are liabilities recorded at fair value, irrespective of the likelihood of the transaction occurring that triggers the net cash settlement feature. Since solely an acquirer, and not OncoCyte itself, may be required to net cash settle the 2016 Warrants in the event of a Fundamental Transaction, the 2016 Warrants are classified as equity.

On February 17, 2017, certain OncoCyte investors exercised 2016 Warrants to acquire 625,000 shares of common stock at an exercise price of \$3.25 per warrant for total exercise cash proceeds of \$2.0 million (the “Warrant exercise”). In order to induce the investors to complete the Warrant exercise and, in conjunction with the Warrant exercise, OncoCyte issued new warrants to those investors (the “New Warrants”). Certain investors received New Warrants to purchase 200,000 shares of common stock at an exercise price of \$5.50 per share and one investor received New Warrants to purchase 212,500 shares of common stock at an exercise of \$3.25 per share. The New Warrants are exercisable at any time for five years from February 17, 2017.

The New Warrants are classified as equity as their terms are consistent with the 2016 Warrants. For financial reporting purposes, the issuance of the New Warrants was treated as an inducement offer to certain shareholders to exercise their 2016 Warrants. Accordingly, the fair value of the New Warrants, determined using the Black-Scholes option pricing model, approximating \$1.1 million was recognized by OncoCyte as a noncash charge to shareholder expense included in general and administrative expenses and a corresponding increase to equity on February 17, 2017, the issuance date.

On July 21, 2017, OncoCyte entered into three forms of Warrant Exercise Agreements (each, an “Exercise Agreement”) with certain holders of the 2016 Warrants providing for the cash exercise of their 2016 Warrants and the issuance of new warrants (the “July 2017 Warrants”) to them.

Pursuant to one form of Exercise Agreement, two investors exercised 2016 Warrants to purchase 226,923 shares of OncoCyte’s common stock at the exercise price of \$3.25 per share, and OncoCyte issued to them July 2017 Warrants expiring five years from the date of issue, to purchase 226,923 shares of common stock at an exercise price of \$5.50 per share.

Pursuant to a second form of Exercise Agreement, one investor exercised 2016 Warrants to purchase 540,000 shares of common stock at the exercise price of \$3.25 per share, and OncoCyte issued to the investor a July 2017 Warrant, expiring five years from the date of issue, to purchase 270,000 shares of common stock at an exercise price of \$3.25 per share. In this alternative form of Exercise Agreement, OncoCyte also agreed to use commercially reasonable efforts to file with the SEC a registration statement covering the resale of the shares of common stock issuable upon exercise of the July 2017 Warrant and to keep it continuously effective for up to five years, subject to conditions set forth in the Exercise Agreement.

Pursuant to a third form of Exercise Agreement, one investor exercised 2016 Warrants to purchase 1,000,000 shares of common stock at the exercise price of \$3.25 per share, and OncoCyte issued to the investor (i) a July 2017 Warrant, expiring two years from the date of issue, to purchase 500,000 shares of common stock at an exercise price of \$5.50 per share, and (ii) a July 2017 Warrant, expiring two years from the date of issue, to purchase 500,000 shares of common stock at an exercise price of \$3.25 per share. In this alternative form of Exercise Agreement, OncoCyte also agreed to use commercially reasonable efforts to file with the SEC a registration statement covering the resale of the shares of common stock issuable upon exercise of the July 2017 Warrant and to keep it continuously effective for up to five years, subject to conditions set forth in the Exercise Agreement.

In the aggregate, upon the exercise of 2016 Warrants under the Exercise Agreements, OncoCyte received gross proceeds of approximately \$5.74 million and issued July 2017 Warrants to purchase 1,496,923 shares of common stock at a weighted average price of \$4.34 per share.

The July 2017 Warrants are classified as equity as their terms are consistent with the 2016 Warrants. For financial reporting purposes, the issuance of the July 2017 Warrants is treated as an inducement offer to certain investors to exercise their 2016 Warrants. Accordingly, the fair value of the July 2017 Warrants, determined to be approximately \$3.0 million using the Black-Scholes option pricing model, was recorded as a noncash charge to shareholder expense included in general and administrative expenses, and a corresponding increase was recorded to equity on July 21, 2017, the issuance date.

As of June 30, 2018, OncoCyte has an aggregate of 2,779,221 warrants issued and outstanding at exercise prices ranging from \$3.25 and \$5.50 per warrant (see Note 10).

Stock option exercises

During the six months ended June 30, 2018, 19,500 shares of common stock were issued upon the exercise of stock options, from which OncoCyte received approximately \$56,000 in cash proceeds.

7. Stock-based Compensation

Options Granted

OncoCyte has adopted a 2010 Stock Option Plan (the “Plan”) under which 5,200,000 shares of common stock are authorized for the grant of stock options or the sale of restricted stock. The Plan also permits OncoCyte to issue such other securities as its Board of Directors or the Compensation Committee administering the Plan may determine.

A summary of OncoCyte stock option activity under the Plan and related information follows (in thousands except weighted average exercise price):

	Shares	Number	Weighted
	Available	of Options	Average
Options	for Grant	Outstanding	Exercise Price
	(unaudited)	(unaudited)	(unaudited)
December 31, 2017	1,384	3,390	\$ 3.25
Options granted	(1,121)	1,121	2.38
Options exercised	-	(20)	2.87
Options forfeited and canceled	126	(126)	5.10
June 30, 2018	389	4,365	\$ 2.97
Exercisable at June 30, 2018		2,208	\$ 2.70

During the six months ended June 30, 2018, OncoCyte granted 1,050,200 stock options to employees and consultants with exercise prices ranging from \$2.35 per share to \$2.85 per share, which will vest in increments upon the attainment of specified performance conditions related to the development of DetermaVu™ and obtaining Medicare reimbursement coverage for that test. As of June 30, 2018, none of the vesting conditions were met and, accordingly, no stock-based compensation expense was recorded during the three and six months ended June 30, 2018 with regard to those stock options.

OncoCyte recorded stock-based compensation expense in the following categories on the accompanying condensed statements of operations for the three and six months ended June 30, 2018 and 2017 (in thousands):

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2018	2017	2018	2017
Research and development	\$57	\$163	\$ (22) ⁽¹⁾	\$368
General and administrative	318	183	574	328
Sales and marketing	15	-	183	-
Total stock-based compensation expense	\$390	\$346	\$735	\$696

The negative stock-based compensation expense is primarily attributable to the decrease in the OncoCyte stock (1)price from \$4.65 per share at December 31, 2017 to \$2.55 per share at June 30, 2018 for consultant stock options which require mark-to-market adjustment each quarter for unvested shares.

The assumptions that were used to calculate the grant date fair value of OncoCyt e's employee and non-employee stock option grants for the six months ended June 30, 2018 and 2017 were as follows.

	2018	2017
Expected life (in years)	9.74	5.37
Risk-free interest rates	2.97 %	1.79 %
Volatility	82.21 %	73.39 %
Dividend yield	- %	- %

With the adoption of ASU 2016-09, effectively January 1, 2017, forfeitures are accounted for as they occur instead of based on the number of awards that were expected to vest.

The determination of stock-based compensation is inherently uncertain and subjective and involves the application of valuation models and assumptions requiring the use of judgment. If OncoCyt e had made different assumptions, its stock-based compensation expense and net loss for the three and six months ended June 30, 2018 and 2017 may have been significantly different.

OncoCyt e does not recognize deferred income taxes for incentive stock option compensation expense and records a tax deduction only when a disqualified disposition has occurred.

8. Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate. The effective tax rate may be subject to fluctuations during the year as new information is obtained, which may affect the assumptions used to estimate the annual effective tax rate, including factors such as valuation allowances against deferred tax assets, the recognition or de-recognition of tax benefits related to uncertain tax positions, if any, and changes in or the interpretation of tax laws in jurisdictions where OncoCyt e conducts business. Due to losses incurred for all periods presented, OncoCyt e did not record any provision or benefit for income taxes.

A valuation allowance is provided when it is more likely than not that some portion of the deferred tax assets will not be realized. OncoCyt e established a full valuation allowance for all periods presented due to the uncertainty of realizing future tax benefits from its net operating loss carryforwards and other deferred tax assets.

9. Commitments and Contingencies

OncoCyte has certain commitments other than those under the Shared Facilities agreement discussed in Note 4.

Master Lease Line Agreement

On April 7, 2016, OncoCyte entered into a Master Lease Line Agreement (“Lease Agreement”) with an unrelated financing company for the purchase and financing of certain equipment. OncoCyte may use up to \$881,000, as amended, for purchases of equipment financed under the Lease Agreement through April 2017. Each lease schedule OncoCyte enters into under Lease Agreement must be in minimum increments of \$50,000 each with a 36-month lease term, collateralized by the equipment financed under the lease schedule. Each lease schedule requires a deposit for the first and last payment under that schedule. Monthly payments will be determined using a lease factor approximating an interest rate of 10% per annum. At the end of each lease schedule under Lease Agreement, assuming no default has occurred, OncoCyte may either return the equipment financed under the schedule for a restocking fee of 7.5% of the original cost of the equipment or purchase the equipment from the financing company at a fair value not less than 12.5% of the original cost of the equipment.

On April 7, 2016, OncoCyte entered into a lease schedule under the Lease Agreement (“Lease Schedule No. 1”) for certain equipment costing approximately \$435,000 applied against the lease line, requiring payments of \$14,442 per month over 36 months. In December 2016, OncoCyte entered into another lease schedule (“Lease Schedule No. 2”) for certain equipment costing approximately \$161,000, requiring payments of \$5,342 per month over 36 months. In April 2017, OncoCyte entered into a third and final lease schedule (“Lease Schedule No. 3”) for certain equipment costing approximately \$285,000, requiring payments of \$9,462 per month over 36 months. After this last tranche, the Lease Agreement was closed and has no remaining financing available.

OncoCyte has accounted for these leases as a capital lease in accordance with ASC 840, *Leases*, due to the net present value of the payments under the lease approximating the fair value of the equipment at inception of the lease. The payments under the lease schedules will be amortized to capital lease obligations and interest expense using the interest method at an imputed rate of approximately 10% per annum.

On May 11, 2017, OncoCyte entered into another Master Lease Line Agreement (“Lease Agreement No. 2”) with the same finance company above and similar terms. OncoCyte may use up to \$900,000 for purchases of equipment financed under Lease Agreement No. 2 through October 28, 2018. As of June 30, 2018, \$820,000 under Lease Agreement No. 2 was available to OncoCyte (see Note 10).

Litigation – General

OncoCyte will be subject to various claims and contingencies in the ordinary course of its business, including those related to litigation, business transactions, employee-related matters, and other matters. When OncoCyte is aware of a claim or potential claim, it assesses the likelihood of any loss or exposure. If it is probable that a loss will result and the amount of the loss can be reasonably estimated, OncoCyte will record a liability for the loss. If the loss is not probable or the amount of the loss cannot be reasonably estimated, OncoCyte discloses the claim if the likelihood of a potential loss is reasonably possible and the amount involved could be material. OncoCyte is not aware of any claims likely to have a material adverse effect on its financial condition or results of operations.

Employment Contracts

OncoCyte has entered into employment contracts with certain executive officers. Under the provisions of the contracts, OncoCyte may be required to incur severance obligations for matters relating to changes in control, as defined, and involuntary terminations.

Indemnification

In the normal course of business, OncoCyte may provide indemnification of varying scope under OncoCyte's agreements with other companies or consultants, typically OncoCyte's clinical research organizations, investigators, clinical sites, suppliers and others. Pursuant to these agreements, OncoCyte will generally agree to indemnify, hold harmless, and reimburse the indemnified parties for losses and expenses suffered or incurred by the indemnified parties arising from claims of third parties in connection with the use or testing of OncoCyte's diagnostic tests. Indemnification provisions could also cover third party infringement claims with respect to patent rights, copyrights, or other intellectual property pertaining to OncoCyte's diagnostic tests. The term of these indemnification agreements will generally continue in effect after the termination or expiration of the particular research, development, services, or license agreement to which they relate. The potential future payments OncoCyte could be required to make under these indemnification agreements will generally not be subject to any specified maximum amounts. Historically, OncoCyte has not been subject to any claims or demands for indemnification. OncoCyte also maintains various liability insurance policies that limit OncoCyte's financial exposure. As a result, OncoCyte management believes that the fair value of these indemnification agreements is minimal. Accordingly, OncoCyte has not recorded any liabilities for these agreements as of June 30, 2018 and December 31, 2017.

10. Subsequent Events

On July 2, 2018, OncoCyte entered into a lease schedule under the Lease Agreement No. 2 for certain equipment costing approximately \$202,000, requiring payments of \$6,709 per month over 36 months, and a \$116,000 prepaid maintenance contract for the equipment requiring 12 monthly payments of \$10,238, including imputed interest. After the financing of this equipment and the prepaid maintenance contract, there is approximately \$502,000 of remaining financing available under Lease Agreement No. 2.

On July 31, 2018, OncoCyte raised approximately \$3.3 million in net proceeds from the sale of 1,256,118 shares of its common stock and warrants. The shares of common stock and warrants were sold in “Units” at a purchase price of \$2.86 per Unit, with each Unit consisting of one share of common stock and one warrant to purchase one share of its common stock. The Units of common stock and warrants were sold in a registered direct offering (the “Offering”). OncoCyte’s Chief Executive Officer, the Chief Financial Officer, the Senior Vice President of Research and Development, and certain members of OncoCyte’s Board of Directors purchased Units in the Offering on the same terms as other investors.

Each warrant has an initial exercise price of \$3.00 per share, will be exercisable six months after the date of issuance and will expire five years from the date it becomes exercisable. Subject to limited exceptions, a holder of the warrants will not have the right to exercise any portion of such securities if the holder, together with its affiliates, would beneficially own in excess of 4.99% of the number of shares of OncoCyte’s common stock outstanding immediately after the exercise. The exercise price of the warrants, and in some cases the number of shares of common stock issuable upon exercise of the warrants, will be subject to adjustment in the event of stock splits, stock dividends, combinations, rights offerings and similar events affecting the common stock.

OncoCyte has appointed Albert P. Parker as Chief Operating Officer, effective August 6, 2018. Mr. Parker will receive an annual salary of \$340,000. In addition to his base salary, OncoCyte will pay the cost of hotel accommodations and meals, and will pay Mr. Parker up to \$10,000 for certain other expenses he may incur, in connection with his employment in the state of California.

OncoCyte granted Mr. Parker options to purchase 250,000 shares of OncoCyte common stock, 200,000 of which will vest, and thereby become exercisable, in installments based upon the attainment of certain milestones in the development of DetermaVu™, and 50,000 of which will vest upon his completion of six months of service as an OncoCyte employee. All of the options will be exercisable at an exercise price of \$2.30 per share. Mr. Parker’s stock options will be subject to the terms and conditions of a stock option agreement and the OncoCyte Employee Stock Option Plan.

Mr. Parker will be entitled to severance benefits in the event that his employment is terminated by OncoCyte without “cause” as defined in his Employment Agreement, or if he terminates his employment for “good reason” following a “change of control” of OncoCyte, as those terms are defined in his Employment Agreement. If OncoCyte terminates Mr. Parker’s employment without “cause,” the severance benefits will be payment of six months base salary. However, if after November 6, 2018 a termination of his employment without “cause” or for “good reason” occurs within twelve

months following a “change of control” of OncoCyte, his severance benefits will include twelve months base salary.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The matters addressed in this Item 2 that are not historical information constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, including statements about any of the following: any projections of earnings, revenue, cash, effective tax rate, use of net operating losses, or any other financial items; the plans, strategies and objectives of management for future operations or prospects for achieving such plans, and any statements of assumptions underlying any of the foregoing. Any statements contained herein that are not statements of historical fact may be deemed to be forward-looking statements. Without limiting the foregoing, the words "believes," "anticipates," "plans," "expects," "seeks," "estimates," and similar expressions are intended to identify forward-looking statements. While OncoCyte may elect to update forward-looking statements in the future, it specifically disclaims any obligation to do so, even if the OncoCyte estimates change and readers should not rely on those forward-looking statements as representing OncoCyte views as of any date subsequent to the date of the filing of this Quarterly Report. Although we believe that the expectations reflected in these forward-looking statements are reasonable, such statements are inherently subject to risks and OncoCyte can give no assurances that its expectations will prove to be correct. Actual results could differ materially from those described in this report because of numerous factors, many of which are beyond the control of OncoCyte. A number of important factors could cause the results of the company to differ materially from those indicated by such forward-looking statements, including those detailed under the heading "Risk Factors" in this Form 10-Q, our Form 10-K, as amended, for the year ended December 31, 2017, and our other reports filed with the SEC from time to time.

The following discussion should be read in conjunction with OncoCyte's condensed interim financial statements and the related notes provided under "Item 1- Financial Statements" above.

Critical Accounting Policies

This Management's Discussion and Analysis of Financial Condition and Results of Operations discusses and analyzes data in our unaudited condensed interim financial statements, which we have prepared in accordance with U.S. generally accepted accounting principles. Preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. Management bases its estimates on historical experience and on various other assumptions that it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Senior management has discussed the development, selection and disclosure of these estimates with the Audit Committee of our Board of Directors. Actual conditions may differ from our assumptions and actual results may differ from our estimates.

An accounting policy is deemed critical if it requires an accounting estimate to be made based on assumptions about matters that are highly uncertain at the time the estimate is made, if different estimates reasonably could have been used, or if changes in the estimate are reasonably likely to occur, that could materially impact the financial statements. Management believes that there have been no significant changes during the six months ended June 30, 2018 to the items that we disclosed as our critical accounting policies and estimates in Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K, as amended, for the year ended December 31, 2017, except as follows:

Accounting for BioTime shares

We account for the BioTime shares we hold as marketable equity securities in accordance with ASC 320-10-25, *Investments – Debt and Equity Securities*, as amended by Accounting Standards Update (“ASU”) 2016-01, *Financial Instruments—Overall: Recognition and Measurement of Financial Assets and Financial Liabilities*, as the shares have a readily determinable fair value quoted on the NYSE American and are held principally to meet future working capital purposes, as necessary. The securities are measured at fair value and reported as current assets on the condensed balance sheet based on the closing trading price of the security as of the date being presented.

Beginning on January 1, 2018, with the adoption of ASU 2016-01, these securities are now called “marketable equity securities” and unrealized holding gains and losses on these securities are reported in the condensed statements of operations in other income and expenses, net. Prior to January 1, 2018 and the adoption of ASU 2016-01, these securities were called “available-for-sale securities” and unrealized holding gains and losses were reported in other comprehensive income or loss, net of tax, and were a component of the accumulated other comprehensive income or loss on the balance sheet. Realized gains and losses are included in other income and expenses, net, in the condensed statements of operations.

On January 1, 2018, in accordance with the adoption of ASU 2016-01, we recorded a cumulative-effect adjustment for these available-for-sale-securities to reclassify the unrealized loss of \$888,000 included in accumulated other comprehensive loss to accumulated deficit. For the three months ended June 30, 2018, we recorded an unrealized loss of \$223,000 included in other income and expenses, net, due to the increase in fair market value of the marketable equity securities from March 31, 2018 to June 30, 2018. For the six months ended June 30, 2018, we recorded an unrealized loss of \$32,000 included in other income and expenses, net, due to the increase in fair market value of the marketable equity securities from December 31, 2017 to June 30, 2018.

See Note 2 of our condensed interim financial statements included elsewhere in this Report.

Results of Operations

Comparison of three and six months ended June 30, 2018 and 2017

The following tables show our operating expenses for the three and six months ended June 30, 2018 and 2017 (in thousands).

	Three Months Ended				
	June 30,				
	2018	2017	\$	%	
			Increase	Increase	
Research and development expenses	\$2,322	\$1,997	\$325	16.3	%
General and administrative expenses	1,335	1,115	220	19.7	%
Sales and marketing expenses	569	477	92	19.3	%

**Six Months
Ended****June 30,**

			\$ Increase		% Increase	
	2018	2017	(Decrease)		(Decrease)	
Research and development expenses	\$3,784	\$3,831	\$	(47)	(1.2)	%
General and administrative expenses	3,122	3,158		(36)	(1.1)	%
Sales and marketing expenses	1,227	1,132		95	8.4	%

Research and development expenses

The increase in research and development expenses of \$325,000 for the three months ended June 30, 2018, as compared to the three months ended June 30, 2017, is primarily attributable to the \$625,000 noncash impairment charge recorded as of June 30, 2018 related to our intangible assets mainly comprised of patents and patent rights that we had acquired for therapeutic uses that we no longer plan to develop or commercialize. The impact of that expense on our results of operations was partially offset by a decrease in laboratory expenses of \$130,000 and a decrease in stock-based compensation expense of \$106,000. The reduction in stock-based compensation expense was attributable to the decrease in OncoCyte stock price during the relevant periods for consultant stock options which require mark-to-market adjustment each quarter for unvested shares.

The decrease in research and development expenses of \$47,000 for the six months ended June 30, 2018 compared to the six months ended June 30, 2017, is primarily attributable to the following decreases: \$390,000 in stock-based compensation expense and \$285,000 in laboratory expenses. The reduction in stock-based compensation expense was attributable to the decrease in OncoCyte stock price from \$4.65 per share at December 31, 2017 to \$2.55 per share at June 30, 2018 for consultant stock options which require mark-to-market adjustment each quarter for unvested shares. The decreases were offset by a \$625,000 noncash impairment charge recorded as of June 30, 2018 related to intangible assets mainly comprised of patents and patent rights for therapeutic uses that that we no longer plan to develop or commercialize.

We expect to continue to incur a significant amount of research and development expenses during the foreseeable future.

General and administrative expenses

General and administrative expenses for the three months ended June 30, 2018 increased by \$220,000 in comparison to the three months ended June 30, 2017. This increase is primarily attributable to \$135,000 in stock-based compensation expense and \$128,000 in personnel and related expenses.

General and administrative expenses for the six months ended June 30, 2018 were relatively unchanged from the comparative period in 2017. During the six months ended June 30, 2017, we incurred a noncash expense of \$1.1 million for the issuance of warrants to certain investors who exercised warrants. We did not incur a similar expense during the same period in 2018. However, during the six months ended June 30, 2018, general and administrative expenses increased by \$640,000 in legal, financing and patent related expenses, an increase \$247,000 in stock-based compensation expense, and an increase of \$155,000 in personnel and related expenses.

Sales and marketing expenses

Sales and marketing expenses for the three months ended June 30, 2018 increased by \$92,000 in comparison to the three months ended June 30, 2017, and increased by \$95,000 for the six months ended June 30, 2018 as compared to the same period in 2017. The increases were primarily attributable to personnel and related expenses for severance costs recorded in the second quarter of 2018.

Other income and expenses, net

Other income and expenses, net, is primarily comprised of interest expense, net, incurred from our capital lease obligations and a loan payable to the Silicon Valley Bank, and unrealized and realized losses on BioTime marketable equity securities we hold.

During the six months ended June 30, 2017, we sold 266,442 shares of BioTime stock for net proceeds of \$934,000 and used those proceeds to pay down amounts owed to BioTime and affiliates. We recognized a \$155,000 and \$309,000 loss from the sale of the BioTime shares for the three and six months ended June 30, 2017, respectively, included in other income and expenses, net.

We did not sell any shares of BioTime common stock during the six months ended June 30, 2018. For the three and six months ended June 30, 2018, we recorded unrealized losses of \$223,000 and \$32,000, respectively, included in other income and expenses, net, due to the decrease in fair market value of the marketable equity securities from the respective balance sheet dates. As of June 30, 2018 and December 31, 2017, we held 353,264 BioTime common shares as marketable equity securities with a fair market value of \$728,000 and \$760,000, respectively.

Income taxes

Due to the losses incurred for all periods presented, we did not record any provision or benefit for income taxes for any period presented.

A valuation allowance will be provided when it is more likely than not that some portion of the deferred tax assets will not be realized. We established a full valuation allowance for all periods presented due to the uncertainty of realizing future tax benefits from our net operating loss carryforwards and other deferred tax assets.

Liquidity and Capital Resources

Since inception, we have financed our operations through the sale of our common stock and warrants, warrant exercises, a bank loan, and sales of BioTime common shares that we hold as marketable equity securities. BioTime also provided OncoCyte with the use of BioTime facilities and services under a Shared Facilities and Services Agreement as described in Note 4 to the condensed interim financial statements. We have incurred operating losses and negative cash flows since inception, and had an accumulated deficit of \$63.8 million at June 30, 2018. We expect to continue to incur operating losses and negative cash flows for the near future.

At June 30, 2018, we had \$10.3 million of cash and cash equivalents and held BioTime common shares as marketable equity securities valued at \$728,000 and, on July 31, 2018, we received an additional \$3.3 million in net proceeds from completion of a financing discussed in Note 4 to our condensed interim financial statements. We believe that our current cash, cash equivalents and marketable equity securities is sufficient to carry out our current operations through at least twelve months from the issuance date of the condensed interim financial statements included in this Report.

We will need to continue to raise additional capital to finance our operations, including the development of our cancer diagnostic tests, until such time as we are able to complete development and commercialize one or more diagnostic tests and generate sufficient revenues to cover our operating expenses. We are devoting substantially all of our research and development resources to the completion of the development of DetermaVu™. If we determine to build our own integrated marketing and sales force to commercialize DetermaVu™ after development is completed, we will need to raise additional capital for that purpose. We may also explore a range of other commercialization options in order to reduce our capital needs and the risks associated with the timelines and uncertainty for attaining the Medicare and

commercial reimbursement approvals that will be essential for the successful commercialization of DetermaVu™ and any other diagnostic tests that we may develop. Those alternative arrangements could include marketing arrangements with other diagnostic companies through which we might receive a royalty on sales, or through which we might form a joint venture to market DetermaVu™ and share in net revenues.

Delays in the development of DetermaVu™ could prevent us from raising sufficient additional capital to finance the completion of development and commercial launch of DetermaVu™ or any other cancer diagnostic tests. Even if we are successful in completing the development of DetermaVu™, investors may be reluctant to provide us with capital until DetermaVu™ is approved for reimbursement by Medicare or private payers. The unavailability or inadequacy of financing or revenues to meet future capital needs could force us to modify, curtail, delay, or suspend some or all aspects of our planned operations. Sales of additional equity securities could result in the dilution of the interests of our shareholders. We cannot assure that adequate financing will be available on favorable terms, if at all.

Cash used in operations

During the six months ended June 30, 2018 and 2017, our total research and development expenses were \$3.8 million for each respective period, our general and administrative expenses were \$3.1 million and \$3.2 million, and our sales and marketing expenses were \$1.2 million and \$1.1 million, respectively. Net loss for the six months ended June 30, 2018 amounted to \$8.3 million and net cash used in operating activities amounted to \$6.7 million. The amount by which our net loss exceeded net cash used in our operating activities during the six months ended June 30, 2018 is primarily due to the following noncash items: \$735,000 in stock-based compensation, a \$625,000 impairment charge recorded for our intangible assets, \$328,000 in depreciation and amortization expenses, \$44,000 in amortization of debt issuance costs, and a \$32,000 unrealized loss on BioTime shares held as marketable equity securities. Changes in working capital were approximately \$212,000 as a use of cash.

Cash used in investing activities

During the six months ended June 30, 2018, cash used for investing activities was insignificant.

Cash provided by financing activities

During the six months ended June 30, 2018, we received \$10.0 million in cash proceeds from the sale of 7,936,508 shares of our common stock in a private offering and received \$56,000 from exercise of stock options. These cash inflows were offset by \$565,000 used to repay the loan payable and capital lease obligations and \$65,000 paid in financing costs to issue the common stock.

Off-Balance Sheet Arrangements

As of June 30, 2018 and December 31, 2017, we did not have any off-balance sheet arrangements, as defined in Item 303(a)(4)(ii) of SEC Regulation S-K.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

There have been no material changes in our qualitative and quantitative market risk since the disclosure in our Annual Report on Form 10-K, as amended, for the year ended December 31, 2017.

Marketable equity securities at fair value

As of June 30, 2018, we held 353,264 BioTime common shares at fair value as marketable equity securities. Those shares are subject to changes in market value. BioTime common shares trade on the NYSE American under the ticker “BTX”. As of June 30, 2018, the 52-week high/low stock price per share range for BioTime was \$3.15 to \$2.03.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

It is management’s responsibility to establish and maintain adequate internal control over all financial reporting pursuant to Rule 13a-15 under the Securities Exchange Act of 1934 (“Exchange Act”). Our management, including our principal executive officer and principal financial officer, have reviewed and evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Following this review and evaluation, the principal executive officer and principal financial officer determined that our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act (i) is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms, and (ii) is accumulated and communicated to management, including our principal executive officer, and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Controls

There were no changes in our internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

From time to time, we may be involved in routine litigation incidental to the conduct of our business. We are not presently involved in any material litigation or proceedings, and to our knowledge no such litigation or proceedings are contemplated.

Item 1A. Risk Factors

Our business is subject to various risks, including those described below. You should consider the following risk factors, together with all of the other information included in this Report and the risks described in our Annual Report on Form 10-K, as amended, for the year ended December 31, 2017 and in our other filings with the Securities and Exchange Commission (the “SEC”), which could materially adversely affect our proposed operations, business prospects, and financial condition, and the value of an investment in our business. There may be other factors that are not mentioned here or of which we are not presently aware that could also affect our business operations and prospects.

Risks Related to Our Business Operations

We have incurred operating losses since inception and we do not know if we will attain profitability.

Since our inception in September 2009, we have incurred operating losses and negative cash flows and we expect to continue to incur losses and negative cash flows in the future. Our net losses for the six months ended June 30, 2018 and for the years ended December 31, 2017 and 2016 were \$8.3 million, \$19.4 million and \$11.2 million, respectively, and we had an accumulated deficit of \$63.8 million and \$54.7 million as of June 30, 2018 and December 31, 2017, respectively. Since inception, we have financed our operations through sales of our common stock and warrants, loans from BioTime and BioTime affiliates, warrant exercises, a bank loan and sale of BioTime common shares that we hold as marketable equity securities. Although BioTime may continue to provide administrative support to us on a reimbursable basis, there is no assurance that BioTime will provide future financing. There is no assurance that we will be able to obtain any additional financing that we may need, or that any such financing that may become available will be on terms that are favorable to us and our shareholders. Ultimately, our ability to generate sufficient operating revenue to earn a profit depends upon our success in developing and marketing or licensing our diagnostic tests and

technology.

We have experienced a delay in conducting our clinical validation study of DetermaVu™.

During the process of running initial samples for the clinical validation study of DetermaVu™ in 2017, inconsistent analytic results were observed by our technical team. We determined that the inconsistent results were caused by a variance in the lots of consumables used in the diagnostic testing platform that we were using to analyze blood samples for the genetic biomarkers that may indicate whether lung nodules found in patients are benign or suspicious. Due to the issues with that diagnostic testing platform, we have evaluated and provisionally selected an alternative diagnostic testing platform for DetermaVu™. We plan to complete our DetermaVu™ development work on the selected platform by carrying out an R&D validation study followed by an analytical validation study, and if those studies are successfully completed, we plan to conduct a clinical validation study. Clinical validation is the final step prior to commercial launch of a diagnostic test, and we are targeting completion of a clinical validation during the first half of 2019. If these studies are completed successfully, we plan to commercialize or to arrange for the commercialization of the test. Until we perform these studies, we will not know whether we can successfully complete the development of DetermaVu™.

The need to address the issues we encountered with the original diagnostic testing platform caused a delay in the development of DetermaVu™ and has caused us to incur additional costs. In addition to a loss of productivity during the period of the delay, we incurred additional quality control costs, the cost of acquiring new diagnostic testing platform equipment and reagents, and the time and cost of training our staff in the use of the new platform, and we will be incurring the costs of conducting additional development work and studies. Any further delays in the successful completion of the clinical validation study and commercialization of DetermaVu™ could prevent us from raising, when needed, sufficient additional capital to finance the completion of development and commercial launch of DetermaVu™ or the other cancer diagnostic tests that we have been developing.

We may record an impairment of assets and take a charge to earnings for financial reporting purposes in the future if we discontinue the use of our original diagnostic testing platform in our CLIA lab.

Although we have changed diagnostic testing platforms for research and development purposes, we are continuing to use our original platform for clinical testing in our CLIA laboratory for certification purposes. If we discontinue that use of the original diagnostic testing platform, that equipment could be considered an impaired asset for financial reporting purposes and we would write down the value of that equipment on our condensed balance sheet and take a charge to earnings for the impaired value. We acquired the equipment through a lease and we would remain obligated to continue to make payments under the lease even if we discontinue use of the equipment.

We will spend a substantial amount of our capital on research and development, but we might not succeed in developing diagnostic tests and technologies that are useful in clinical practice.

We are attempting to develop new medical diagnostic tests and technologies. The focus of our business is on diagnostic tests for cancer. Our diagnostic tests are being developed through the use of blood and urine samples obtained in prospective and retrospective clinical trials involving humans, but none of our diagnostic tests have been used in clinical practice to diagnose cancer. Our technologies may not prove to be sufficiently efficacious to use in the diagnosis of cancer.

The experimentation we are doing is costly, time consuming, and uncertain as to its results. We incurred research and development expenses amounting to approximately \$3.8 million, \$7.2 million and \$5.7 million during the six months ended June 30, 2018 and years ended December 31, 2017 and 2016, respectively. Since 2011, most of our research has been devoted to the development of our lead diagnostic tests to detect lung cancer, breast cancer, and bladder cancer.

If we are successful in developing a new technology or diagnostic test, refinement of the new technology or diagnostic test and definition of the practical applications and limitations of the technology or diagnostic test may take years and require the expenditure of large sums of money.

We will need to issue additional equity or debt securities in order to raise additional capital needed to pay our operating expenses.

We plan to continue to incur substantial research and development expenses and we anticipate that we will be incurring significant sales and marketing costs as we develop and commercialize our diagnostic test candidates. We will need to raise additional capital to pay operating expenses until we are able to generate sufficient revenues from diagnostic test sales, royalties, and license fees, and we will need to sell additional equity or debt securities to meet those capital needs.

Our ability to raise additional equity or debt capital will depend not only on progress made in developing our diagnostic tests and receiving reimbursement approval from Medicare and other third-party payors, but also will depend on access to capital and conditions in the capital markets. Obtaining Medicare reimbursement approval for a diagnostic test generally takes two to three years, and investors may be reluctant to provide us with capital until we obtain Medicare reimbursement approval for any diagnostic tests we develop. There is no assurance that we will be able to raise capital at times and in amounts needed to finance the development and commercialization of our diagnostic tests and general operations. Even if capital is available, it may not be available on terms that we or our shareholders would consider favorable.

Sales or other issuances of additional equity securities by us could result in the dilution of the interests of our shareholders.

We have limited capital, marketing, and sales resources and no distribution resources for the commercialization of any diagnostic tests that we might successfully develop.

If we are successful in developing marketable diagnostic tests, we will need to build our own marketing and sales capability, which will require the investment of significant financial and management resources to recruit, train, and manage a sales force. In the alternative, due to our limited capital resources, we may need to enter into marketing arrangements with other diagnostic companies for our diagnostic tests. Under such marketing arrangements we may license marketing rights to one or more other companies or to one or more joint venture companies formed to market our diagnostic tests, and we might receive only a royalty on sales of the diagnostic tests or an equity interest in a joint venture company. As a result, our revenues from the sale of those diagnostic tests may be substantially less than the amount of revenues and gross profits that we might receive if we were to market the diagnostic tests ourselves.

The reduction of our sales and marketing staff as part of a cost savings plan could delay our ability to commercialize our diagnostic tests, and we may explore a range of alternative options for commercialization.

We have reduced our sales and marketing staff to reduce our operating costs while we are developing DetermaVu™. This staff reduction could delay commercial availability or a full commercial launch of DetermaVu™ or could result in an acceleration of expenses to build a commercialization staff.

While we may elect to build our own integrated commercial organization if we successfully complete the development of DetermaVu™, we may also explore a range of other commercialization options in order to reduce our capital needs and the risks associated with the timelines and uncertainty for attaining Medicare and commercial reimbursement approval. These other options may include entering into arrangements with other companies for the commercialization of DetermaVu™ or other diagnostic tests that we may develop, or pursuing other business development opportunities. There is no assurance that we will be able to make alternative arrangements for the commercialization of any diagnostic tests that we may develop.

You may experience dilution of your ownership interests if we issue additional shares of common stock or preferred stock.

In the future, we may issue our authorized but previously unissued equity securities, resulting in the dilution of the ownership interests of our present shareholders. We are currently authorized to issue an aggregate of 55,000,000 shares of capital stock consisting of 50,000,000 shares of common stock and 5,000,000 “blank check” shares of preferred stock. At June 30, 2018, there were 39,407,566 shares of common stock outstanding, 2,779,221 shares of common stock reserved for exercise of warrants and 4,365,219 shares of common stock reserved for issuance upon the exercise of options under our employee stock option plan. We issued an additional 1,256,118 shares of common stock and stock purchase warrants in a financing during July 2018. No shares of preferred stock are presently outstanding. We are asking our shareholders, at our annual meeting, to approve an amendment to our Articles of Incorporation to increase the number of shares of common stock that we are authorized to issue from 50,000,000 shares to 85,000,000 shares. We may issue additional common stock or other securities that are convertible into or exercisable for common stock in order to raise additional capital, or in connection with hiring or retaining employees, directors, or consultants, or in connection with future acquisitions of licenses to technology or diagnostic tests in connection with future business acquisitions, or for other business purposes. The future issuance of any such additional common stock or other securities may create downward pressure on the trading price of our common stock.

We may also issue preferred stock having rights, preferences, and privileges senior to the rights of our common stock with respect to dividends, rights to share in distributions of our assets if we liquidate our company, or voting rights. Any preferred stock may also be convertible into common stock on terms that would be dilutive to holders of common stock.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3 Default Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5 Other Information

On August 10, 2018, OncoCyte's Board of Directors approved an amendment to Section 8 of Article II of our Bylaws (the "Amendment"). The Amendment changes the last sentence of the first paragraph of Section 8 of Article II to read as follows:

Subject to Section 6 of this Article II, on any matter (other than the election of directors) the affirmative vote of a majority of the shares represented and voting at a duly held meeting at which a quorum is present shall be the act of the shareholders if such shares voting affirmatively also constitute at least a majority of the required quorum, unless the vote of a greater number of shares or voting by classes is required by California General Corporation Law or by the articles of incorporation.

The Amendment conforms the Bylaws voting requirement with the minimum shareholder vote required under the California General Corporation Law by requiring the affirmative vote of a majority of the shares represented *and voting* at a meeting at which a quorum is present, if the affirmative vote also constitutes a majority of the quorum, to approve matters other than the election of directors and certain other matters for which the law requires a greater vote or voting by class.

In contrast, the prior to the Amendment the Bylaws required approval by a majority of the shares represented at the meeting and *entitled to vote* on any matter other than the election of directors and those matters for which a greater number or voting by classes is required by the California General Corporation Law or by the articles of incorporation. Prior to the Amendment, the last sentence of the first paragraph of Section 8 of Article II read as follows:

If a quorum is present, the affirmative vote of the majority of the shares represented at the meeting and entitled to vote on any matter (other than the election of directors) shall be the act of the shareholders, unless the vote of a greater number or voting by classes is required by California General Corporation Law or by the articles of incorporation.

The Amendment could facilitate shareholder approval of certain matters that are subject to "broker non-votes." Broker non-votes can arise for, certain matters, due to stock exchange rules prohibiting brokers from voting shares they hold in street name for their customers unless their customers instruct them how to vote on those matters.

The foregoing discussion of the Amendment and the Bylaws is a summary only, and is qualified in its entirety by the full text of the Bylaws, as amended, which is being filed as an Exhibit to this Report and is incorporated by reference herein.
