TRI-VALLEY CORPORATION
NOTES TO CONDENSED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED
MARCH 31, 2001 AND 2000
(Unaudited)

## NOTE 1 - BASIS OF PRESENTATION

The financial information included herein is unaudited; however, such information reflects all adjustments (consisting solely of normal recurring adjustments) which are, in the opinion of management, necessary for a fair statement of results for the interim periods. The results of operations for the three month period ended March 31, 2001, are not necessarily indicative of the results to be expected for the full year.

The accompanying consolidated financial statements do not include footnotes and certain financial presentations normally required under generally accepted accounting principles; and, therefore, should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2000.

## NOTE 2 - PER SHARE COMPUTATIONS

Per share computations are based upon the weighted average number of common shares outstanding during each year. Common stock equivalents are not included in the computations since their effect would be anti-dilutive.

ITEM 2. MANAGEMENT DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS
OF OPERATIONS

BUSINESS REVIEW

Notice Regarding Forward-Looking Statements

This report contains forward-looking statements. The words, "anticipate," "believe," "expect," "plan," "intend," "estimate," "project," "could," "may,"

"foresee," and similar expressions are intended to identify forward-looking statements. These statements include information regarding expected development of the Company's business, lending activities, relationship with customers, and development in the oil and gas industry. Should one or more of these risks or uncertainties occur, or should underlying assumptions prove incorrect, actual results may vary materially and adversely from those anticipated, believed, estimated or otherwise indicated.

Petroleum Activities

We drilled the Ekho No. 1 well in the fiscal year 2000. However we encountered "tight" sands that require artificial fracturing of the oil-bearing zones to enable the well to be completed as a commercial well. All but one of our Canadian partners were financially unable to continue with this project and unfortunately were forced to withdraw. Consequently, we are in the process of attracting new partners to participate in completing this project.

We drilled the Sunrise-Mayel No. 1 in December of 2000 and during the first quarter of 2001 we hydraulically fractured, 'frac-ed', a lower zone in the well. We were not satisfied with those results and in April we fractured another zone and are analyzing that data. Additionally during the first quarter of 2001 we reworked the Hanson 3 and 4 to increase production.

Currently we are in the process of permitting for the drilling of a well in our Sonata prospect. The actual date of drilling will depend on the time it takes to get a permit and contract a drilling rig. We are not able to contract the drilling rig until the permit is issued. It has generally been taking 60 days for this permitting process.

Precious Metals

There was no exploration activity on our Alaska project in the first quarter. Normally our activity begins there in late May or early June due to weather constraints. Again this season, as in years past, a team of Russian scientists from TsNIGRI, the Russian Mineral Institute, will be performing field research activities under our joint scientific research agreement.

ITEM 2. MANAGEMENT DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS
OF OPERATIONS

Three Months Ended March 31, 2001 as compared with Three Months ended March 31, 2000

The Company had revenues of \$749,810 for the three months ended March 31, 2001 an increase of \$506,056 (207%), over revenues of \$243,754 for the three months ended March 31, 2000. For the first quarter of 2001, the Company recorded a net profit of \$252,254 compared to a profit of \$17,409 in the first quarter of 2000. The increase in revenues and profits for the first three months of 2001 resulted from increased natural gas prices paid for our production in Northern

California. The Company received \$729,114 from oil and gas sales in the first quarter of 2001, an increase of \$594,934 (443%) over oil and gas sales of \$134,180 in the first quarter of 2000. In the first quarter of 2000, we sold interest in a prospect to third parties, therefore our "other income", in 2000 was greater than the comparable period in 2001.

Costs and expenses were \$497,556 for the quarter ended March 31, 2001, compared to \$488,647 for the same period for 2000. This increase was due in part to expenses incurred for the two Hanson wells being reworked. The Sunrise GGL&A costs were \$81,833 for the quarter ended March 31, 2001 due to lease renewals. In the same quarter in 2000 related costs of \$111,470 were recognized as costs related to the sale of the Sunrise-Mayel prospect.

General and Administrative costs decreased \$29,500 for this quarter compared to the same quarter in 2000. This decrease was due to reduced legal expenses.

Capital Resources and Liquidity

At March 31, 2001, we had current assets totaling \$1,635,176 and current liabilities totaling \$2,903,609. This was a decrease of current assets of \$568,784 from December 31, 2000. This decrease was from expenses incurred and paid related to the drilling of the Sunrise Mayel \$1.

Operating Activities. For the three months ended March 31, 2001, cash provided by operating activities is a deficit of \$286,672 compared to a deficit of \$885,240 at March 31, 2000. This was due to operations related to Sunrise-Mayel No. 1.

Financing Activities. For the three months ended March 31, 2001, the Company received \$49,501 (net of selling expenses) from selling its common stock in private transactions.

11

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

None

ITEM 2. CHANGES IN SECURITIES

During the first quarter of 2001, we issued 110,000 shares of our common stock to 3 individuals in private transactions pursuant to the exemption contained in Section 4(2) of the Securities Act of 1933, for aggregate consideration of \$50,000. The shares sold are restricted securities which bear a legend restricting transfer of the shares unless registered or sold under an exemption from registration requirements under the Securities Act.
