Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements
(Unaudited)

Note 1. Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, these statements do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the quarter and six months ended December 31, 2009 are not necessarily indicative of the results that may be expected for the year ending June 30, 2010. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended June 30, 2009.

Subsequent Events

The Company has performed a review of subsequent events through the date the financial statements were filed with the Securities and Exchange Commission (SEC), and concluded there were no events or transactions occurring during this period that required recognition or disclosure in our financial statements.

Adoption of New Accounting Standards

On July 1, 2009, the Company adopted Financial Accounting Standards Board (FASB) amended guidance in Accounting Standards Codification (ASC) Topic 805, Business Combinations, which changes the financial accounting and reporting of business combination transactions. The guidance is to be applied prospectively to business combinations completed on or after the adoption date. This amended guidance requires recognizing, with certain exceptions, 100 percent of the fair values of assets acquired, liabilities assumed, and noncontrolling interests in acquisitions of less than a 100 percent controlling interest when the acquisition constitutes a change in control of the acquired entity; measuring acquirer shares issued and contingent consideration arrangements in connection with a business combination at fair value on the acquisition date with subsequent changes in fair value reflected in earnings; and expensing as incurred acquisition-related transaction costs. The amended guidance also includes requirements relating to the accounting for assets acquired and liabilities assumed in a business combination that arise from contingencies and establishes a model to account for certain pre-acquisition contingencies. Under the amended guidance, an acquirer is required to recognize at fair value an asset acquired or a liability assumed in a business combination that arises from a contingency if the acquisition-date fair value of that asset or liability can be determined during the measurement period. If the acquisition-date fair value cannot be determined, the acquirer should follow the recognition criteria in ASC Topic 450, Contingencies. There was no material effect on the Company's consolidated financial statements as a result of the adoption of this amended guidance.

On July 1, 2009, the Company adopted the amended guidance in ASC Topic 470-20, Debt with Conversion and Other Options, which specifies that issuers of convertible debt instruments that may settle in cash upon conversion must bifurcate the proceeds from the debt issuance between the debt and equity components in a manner that reflects the entity's nonconvertible debt borrowing rate when interest cost is recognized in subsequent periods. The equity component reflects the value of the conversion feature of the notes. The amended guidance requires retrospective application to all periods presented. See Note 6 for further information regarding the impact of adoption.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)
(Unaudited)

Note 1. Basis of Presentation (Continued)

On July 1, 2009, the Company adopted amended guidance in ASC Topic 810, Consolidation, pertaining to the accounting and reporting of noncontrolling interests in financial statements. The amended guidance establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. As required by the amended guidance, the Company reclassified \$26 million attributable to noncontrolling interests from other long-term liabilities to a separate component of shareholders' equity and the net earnings attributable to noncontrolling interests is now presented as a separate line item on the consolidated statements of earnings. Presentation and disclosure requirements are to be applied retrospectively for all periods presented and accordingly, the Company's consolidated financial statements have been restated for the impact of the amended guidance. In addition, the Company consolidates certain noncontrolling interests which are associated with mandatorily redeemable instruments outside of the Company's control. In accordance with guidance contained in SEC Accounting Series Release 268, Redeemable Preferred Stock and ASC Topic 480, Distinguishing Liabilities from Equity, noncontrolling interests which are associated with mandatorily redeemable instruments outside of the Company's control have not been reclassified as a separate component of shareholders' equity.

On July 1, 2009 the Company adopted the amended guidance in ASC Topic 260, Earnings per Share, which addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and, therefore, need to be included in the earnings allocation in computing earnings per share (EPS) under the two-class method. It also clarifies that all outstanding unvested share-based payment awards that contain rights to nonforfeitable dividends participate in undistributed earnings with common shareholders and are considered to be participating securities, thus requiring the issuing entity to apply the two-class method of computing basic and diluted EPS. There was no material effect on the Company's consolidated financial statements as a result of the adoption of this amended guidance.

On July 1, 2009, the Company adopted the guidance in ASC Topic 820, Fair Value Measurements and Disclosures, for its nonfinancial assets and liabilities that are recognized at fair value on a nonrecurring basis, including goodwill, other intangible assets, and asset retirement obligations. The Company recorded no significant new or remeasured fair values during the period for its nonfinancial assets and liabilities that are recognized on a nonrecurring basis.

On October 1, 2009, the Company adopted the amended guidance in ASC Topic 820, Fair Value Measurements and Disclosures. The amendment permits certain entities to use Net Asset Value (NAV) as a practical expedient to estimate the fair value of investments within its scope provided the NAV is calculated as of the Company's reporting date. The amendment also indicates how investments within its scope would be classified in the fair value hierarchy and requires enhanced disclosures about the nature and risks of investments. The disclosure requirements apply to all investments within the scope of the amendment, regardless of whether the Company elects to measure the investment using NAV as a practical expedient. The adoption of this amendment requires expanded disclosure in the notes to the Company's consolidated financial statements but will not materially impact financial results.

Effective December 31, 2009, the Company adopted the amendment to ASC Topic 820 which provides guidance for the fair value measurement of liabilities. It clarifies that in circumstances in which a quoted price in an active market for the identical liability is not available, fair value must be measured using specified valuation techniques. It further clarifies that both (a) a quoted price in an active market for the identical liability at the measurement date, and (b) the quoted price for the identical liability when traded as an asset in an active market (such as bonds), when no

adjustments to the quoted price of the asset are required, are Level 1 fair value measurements. There was no material effect on the Company's consolidated financial statements as a result of the adoption of this amended guidance.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)
(Unaudited)

Note 1. Basis of Presentation (Continued)

Reclassifications

Certain items in prior year's consolidated statements of cash flows have been reclassified to conform to the current year's presentation with no impact to total cash provided by (used in) operating, investing, or financing activities.

Last-in, First-out (LIFO) Inventories

Interim period LIFO calculations are based on interim period costs and management's estimates of year-end inventory levels. Because the availability and price of agricultural commodity-based LIFO inventories are unpredictable due to factors such as weather, government farm programs and policies, and changes in global demand, quantities of LIFO-based inventories at interim periods may vary significantly from management's estimates of year-end inventory levels.

Note 2. New Accounting Standards

Effective June 30, 2010, the Company will be required to adopt the amended guidance in ASC Topic 715, Compensation – Retirement Benefits, which expands disclosure requirements and requires entities to disclose investment policies and strategies, major categories of plan assets, fair value measurements for each major category of plan assets segregated by fair value hierarchy level as defined in ASC Topic 820, the effect of fair value measurements using Level 3 inputs on changes in plan assets for the period, and significant concentrations of risk within plan assets. The adoption of this amended guidance will require expanded disclosure in the notes to the Company's consolidated financial statements but will not impact financial results.

Effective July 1, 2010, the Company will be required to adopt the amended guidance in ASC Topic 810, Consolidations, which will change how a reporting entity determines when an entity that is insufficiently capitalized or is not controlled through voting or similar rights (known as variable interest entities or VIEs) should be consolidated. The determination of whether a reporting entity is required to consolidate another entity is based on, among other things, the other entity's purpose and design and the reporting entity's ability to direct the activities of the other entity that most significantly impact the other entity's economic performance. This amended guidance will require a number of new disclosures including disclosures about the reporting entity's involvement with VIEs, how its involvement with VIEs affects the reporting entity's financial statements, and any significant changes in risk exposure due to that involvement. The Company has not yet assessed the impact of the adoption of this amended guidance on the Company's financial statements.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)
(Unaudited)

Note 2. New Accounting Standards (Continued)

Effective January 1, 2010 the Company will be required to adopt a portion of the amended guidance in ASC Topic 820, Fair Value Measurements and Disclosures, which requires a number of additional disclosures regarding fair value measurements. The Company will be required to disclose the amounts of significant transfers between Level 1 and Level 2 and the reasons for the transfers; the reasons for any transfers in or out of Level 3; and information in the reconciliation of recurring Level 3 measurements about purchases, sales, issuances and settlements on a gross basis. ASC 820 is also amended to clarify that the Company is required to provide fair value measurement disclosures for each class of assets and liabilities and disclose information about both the valuation techniques and inputs used in estimating Level 2 and Level 3 fair value measurements. The Company will adopt these disclosure requirements for its quarter ending March 31, 2010 with the exception of the requirement to disclose information about purchases, sales, issuances and settlement in the reconciliation of recurring Level 3 measurements on a gross basis, which is effective for the Company on July 1, 2011. The adoption of this amended guidance will require expanded disclosure in the notes to the Company's consolidated financial statements but will not impact financial results.

Note 3. Fair Value Measurements

The Company determines the fair market value of certain of its inventories of agricultural commodities, derivative contracts, and marketable securities based on the fair value definition and hierarchy levels established in the guidance of ASC Topic 820, Fair Value Measurements and Disclosures. Three levels are established within the hierarchy that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 1 assets and liabilities include exchange-traded derivative contracts, U.S. treasury securities and certain publicly traded equity securities.

Level 2: Observable inputs, including Level 1 prices that have been adjusted; quoted prices for similar assets or liabilities; quoted prices in markets that are less active than traded exchanges; and other inputs that are observable or can be substantially corroborated by observable market data.

Level 3: Unobservable inputs that are supported by little or no market activity and that are a significant component of the fair value of the assets or liabilities. In evaluating the significance of fair value inputs, the Company generally classifies assets or liabilities as Level 3 when their fair value is determined using unobservable inputs that individually or when aggregated with other unobservable inputs, represent more than 10% of the fair value of the assets or liabilities. Judgment is required in evaluating both quantitative and qualitative factors in the determination of significance for purposes of fair value level classification. Level 3 amounts can include assets and liabilities whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as assets and liabilities for which the determination of fair value requires significant management judgment or estimation.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)
(Unaudited)

Note 3. Fair Value Measurements (Continued)

The following table sets forth, by level, the Company's assets and liabilities that were accounted for at fair value on a recurring basis as of December 31, 2009. In many cases, a valuation technique used to measure fair value includes inputs from multiple levels of the fair value hierarchy. The lowest level of input that is a significant component of the fair value measurement determines the placement of the entire fair value measurement in the hierarchy. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the classification of fair value assets and liabilities within the fair value hierarchy levels.

	Fair Value Measurements at December 31, 2009			
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
	(In millions)			
Assets:				
Inventories carried at market	\$ -	\$ 3,972	\$ 609	\$ 4,581
Unrealized gains on derivative contracts	847	916	143	1,906
Marketable securities	902	594	-	1,496
Total Assets	\$ 1,749	\$ 5,482	\$ 752	\$ 7,983
Liabilities:				
Unrealized losses on derivative contracts	\$ 1,010	\$ 785	\$ 66	\$ 1,861
Inventory-related liabilities	-	485	9	494
Total Liabilities	\$ 1,010	\$ 1,270	\$ 75	\$ 2,355

The Company uses the market approach valuation technique to measure the majority of its assets and liabilities carried at fair value. Estimated fair market values for inventories carried at market are based on exchange-quoted prices, adjusted for differences in local markets, broker or dealer quotations, or market transactions in either listed or over-the-counter (OTC) markets. In such cases, the inventory is classified in Level 2. Certain inventories may require management judgment or estimation for a significant component of the fair value amount. In such cases, the inventory is classified as Level 3. Changes in the fair market value of inventories are recognized in the consolidated statements of earnings as a component of cost of products sold.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)
(Unaudited)

Note 3. Fair Value Measurements (Continued)

The Company's derivative contracts that are measured at fair value include forward commodity purchase and sale contracts, exchange-traded commodity futures and option contracts, and OTC instruments related primarily to agricultural commodities, energy, and foreign currencies. Exchange-traded futures and options contracts are valued based on unadjusted quoted prices in active markets and are classified in Level 1. The majority of the Company's exchange-traded futures and options contracts are cash settled on a daily basis and, therefore, are not included in this table. Fair value for forward commodity purchase and sale contracts is estimated based on exchange-quoted prices adjusted for differences in local markets. These differences are generally determined using inputs from broker or dealer quotations or market transactions in either the listed or OTC markets. When observable inputs are available for substantially the full term of the asset or liability, the derivative contracts are classified in Level 2. When unobservable inputs have a significant impact on the measurement of fair value, the contract's fair value is classified in Level 3. Based on historical experience with the Company's suppliers and customers, the Company's own credit risk, and the Company's knowledge of current market conditions, the Company does not view nonperformance risk to be a significant input to fair value for the majority of its forward commodity purchase and sale contracts. However, in situations when the Company believes the nonperformance risk to be a significant input, the Company records estimated fair value adjustments, and classifies the contracts in Level 3 in the fair value hierarchy. Changes in the fair market value of commodity-related derivatives are recognized in the consolidated statements of earnings as a component of cost of products sold. Changes in the fair market value of foreign currency-related derivatives are recognized in the consolidated statements of earnings as a component of net sales and other operating income, cost of products sold, and other (income) expense – net. The effective portions of changes in the fair market value of derivatives designated as cash flow hedges are recognized in the consolidated balance sheets as a component of accumulated other comprehensive income (loss) until the hedged items are recorded in earnings.

The Company's marketable securities are comprised of U.S. Treasury securities, obligations of U.S. government agencies, corporate and municipal debt securities, and equity investments. U.S. Treasury securities and certain publicly traded equity investments are valued using quoted market prices and are classified in Level 1. U.S. government agency obligations, corporate and municipal debt securities and certain equity investments are valued using third-party pricing services and substantially all are classified as Level 2. Security values that are determined using pricing models are classified in Level 3. Unrealized changes in the fair market value of available-for-sale marketable securities are recognized in the consolidated balance sheets as a component of accumulated other comprehensive income (loss) unless a decline in value is deemed to be other than temporary at which point the decline is recorded in earnings.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)
(Unaudited)

Note 3. Fair Value Measurements (Continued)

The following table presents a reconciliation of all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the quarter ended December 31, 2009.

Level 3 Fair Value Measurements			
	Inventories Carried at Market, Net	Derivative Contracts, Net (In millions)	Total
Balance, September 30, 2009	\$ 530	\$ (45)	\$ 485
Total gains (losses), realized or unrealized, included in earnings before income taxes*	(49)	74	25
Purchases, issuances and settlements	14	(8)	6
Transfers in and/or out of Level 3	105	56	161
Ending balance, December 31, 2009	\$ 600	\$ 77	\$ 677

*Includes gains of \$98 million that are attributable to the change in unrealized gains or losses relating to Level 3 assets and liabilities still held at December 31, 2009.

The following table presents a reconciliation of all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the six months ended December 31, 2009.

Level 3 Fair Value Measurements			
	Inventories Carried at Market, Net	Derivative Contracts, Net (In millions)	Total
Balance, June 30, 2009	\$ 468	\$ (2)	\$ 466
Total gains (losses), realized or unrealized, included in earnings before income taxes*	(42)	44	2
Purchases, issuances and settlements	(28)	(17)	(45)
Transfers in and/or out of Level 3	202	52	254
Ending balance, December 31, 2009	\$ 600	\$ 77	\$ 677

*Includes gains of \$96 million that are attributable to the change in unrealized gains or losses relating to Level 3 assets and liabilities still held at December 31, 2009.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)
(Unaudited)

Note 4. Derivative Instruments and Hedging Activities

ASC Topic 815, Derivatives and Hedging, requires the Company to recognize all of its derivative instruments as either assets or liabilities in its consolidated balance sheet at fair value. The accounting for changes in the fair value (i.e., gains or losses) of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship and further, on the type of hedging relationship. For those derivative instruments that are designated and qualify as hedging instruments, a reporting entity must designate the hedging instrument, based upon the exposure being hedged, as a fair value hedge, a cash flow hedge, or a hedge of a net investment in a foreign operation. The Company does not currently have any derivatives designated as hedges of net investment in foreign operations or fair value hedges. The Company has certain derivatives designated as cash flow hedges; however, the majority of the Company's derivatives have not been designated as hedging instruments.

Derivatives Not Designated as Hedging Instruments

To reduce price risk caused by market fluctuations in agricultural commodities and foreign currencies, the Company generally follows a policy of using exchange-traded futures and exchange-traded and OTC options contracts to minimize its net position of merchandisable agricultural commodity inventories and forward cash purchase and sales contracts. The Company also uses exchange-traded futures and exchange-traded and OTC options contracts as components of merchandising strategies designed to enhance margins. The results of these strategies can be significantly impacted by factors such as the volatility of the relationship between the value of exchange-traded commodities futures contracts and the cash prices of the underlying commodities, counterparty contract defaults, and volatility of freight markets. Exchange-traded futures and exchange-traded and OTC options contracts, and forward cash purchase and sales contracts of certain merchandisable agricultural commodities are valued at fair value. Inventories of certain merchandisable agricultural commodities, which include amounts acquired under deferred pricing contracts, are stated at market value. Inventory is not a derivative and therefore is not included in the tables below. Changes in the market value of inventories of merchandisable agricultural commodities, forward cash purchase and sales contracts, and exchange-traded futures and exchange-traded and OTC options contracts are recognized in earnings immediately, resulting in cost of products sold approximating first-in, first-out (FIFO) cost. Unrealized gains and unrealized losses on forward cash purchase contracts, forward foreign currency exchange (FX) contracts, forward cash sales contracts, and exchange-traded and OTC options contracts represent the fair value of such instruments and are classified on the Company's consolidated balance sheet as receivables and accrued expenses, respectively.

The following table sets forth the fair value of derivatives not designated as hedging instruments as of December 31, 2009.

	Assets	Liabilities
	(In millions)	
FX Contracts	\$ 67	\$ 98
Commodity Contracts	1,797	1,758
Total	\$ 1,864	\$ 1,856

Commodity Contracts		
Cost of products sold	\$ (584)	\$ (409)
Total loss recognized in earnings	\$ (550)	\$ (374)

Derivatives Designated as Cash Flow Hedging Strategies

For derivative instruments that are designated and qualify as cash flow hedges (i.e., hedging the exposure to variability in expected future cash flows that is attributable to a particular risk), the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income (OCI) and reclassified into earnings in the same line item affected by the hedged transaction and in the same period or periods during which the hedged transaction affects earnings. The remaining gain or loss on the derivative instrument that is in excess of the cumulative change in the cash flows of the hedged item, if any (i.e., the ineffective portion), hedge components excluded from the assessment of effectiveness, and gains and losses related to discontinued hedges are recognized in the consolidated statement of earnings during the current period.

For each of the commodity hedge programs described below, the derivatives are designated as cash flow hedges. The changes in the market value of such derivative contracts have historically been, and are expected to continue to be, highly effective at offsetting changes in price movements of the hedged item. Once the hedged item is recognized in earnings, the gains/losses arising from the hedge will be reclassified from accumulated other comprehensive income (AOCI) to either net sales and other operating income, or cost of products sold. As of December 31, 2009, the Company has \$26 million of after-tax gains in AOCI related to gains and losses from commodity cash flow hedge transactions. The Company expects to recognize all of these after-tax gains in the statement of earnings during the next 14 months. During the current period, the Company had no amounts recognized in earnings from cash flow hedges that were discontinued.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)
(Unaudited)

Note 4. Derivative Instruments and Hedging Activities (Continued)

The Company, from time to time, uses futures or options contracts to fix the purchase price of anticipated volumes of corn to be purchased and processed in a future month. The objective of this hedging program is to reduce the variability of cash flows associated with the Company's forecasted purchases of corn. The Company's corn processing plants currently grind approximately 67 million bushels of corn per month which is expected to increase to approximately 75 million bushels per month when the Company's second new dry-grind ethanol plant in the U.S. is completed. Most of the finished goods produced from this corn grind are sold at fixed prices and many of these finished goods are unable to be hedged. The Company will fix the purchase price of the corn that will be used, thereby economically protecting the margin on these finished goods sales. During the past 12 months, the Company hedged between 35% and 95% of its monthly anticipated grind. At December 31, 2009, the Company has hedged portions of its anticipated monthly purchases of corn over the next 14 months, ranging from 1% to 100% of its anticipated monthly grind.

The Company, from time to time, also uses futures, options, and swaps to fix the purchase price of the Company's anticipated natural gas requirements for certain production facilities. The objective of this hedging program is to reduce the variability of cash flows associated with the Company's forecasted purchases of natural gas. These production facilities use approximately 3.5 million MMBtus of natural gas per month. During the past 12 months, the Company hedged between 18% and 60% of the quantity of its anticipated monthly natural gas purchases. At December 31, 2009, the Company has hedged portions of its anticipated monthly purchases of natural gas over the next 12 months, ranging from 16% to 77% of its anticipated monthly natural gas purchases.

To protect against fluctuations in cash flows due to foreign currency exchange rates, the Company from time to time will use forward foreign exchange contracts with banks as foreign currency cash flow hedge programs. Certain production facilities have manufacturing expenses and some sales contracts denominated in non-functional currency. To reduce the risk of fluctuations in cash flows due to changes in the exchange rate between functional versus non-functional currency, the Company will hedge some portion of the forecasted foreign currency expenditures and/or receipts. The fair value of foreign exchange contracts designated as cash flow hedging instruments as of December 31, 2009 was immaterial.

At December 31, 2009, AOCI included \$28 million of after-tax gains related to treasury-lock agreements and interest rate swaps. The instruments were executed in order to lock in the Company's interest rate prior to the issuance or remarketing of debentures. Both the treasury-lock agreements and interest rate swaps are designated as cash flow hedges of the risk of changes in the future interest payments attributable to changes in the benchmark interest rate. The objective of the treasury-lock agreements is to protect the Company from changes in the benchmark rate from the date the Company decided to issue the debt to the date when the debt will actually be issued. The Company will recognize the \$28 million of gains in its consolidated statement of earnings over the terms of the hedged items.

Of the \$21 million in unrealized losses at December 31, 2009, \$2 million arose within the last 12 months. The market value of the investments that have been in an unrealized loss position for less than 12 months and for 12 months and longer is \$337 million and \$38 million, respectively. The market value of United States government obligations, government-sponsored enterprise obligations, and other debt securities with unrealized losses as of December 31, 2009, is \$348 million. The \$3 million of unrealized losses associated with United States government obligations, government sponsored enterprise obligations and other debt securities are not considered to be other-than-temporary because the present value of expected cash flows to be collected is equivalent to or exceeds the amortized cost basis of the securities. The market value of available-for-sale equity securities with unrealized losses as of December 31, 2009, is \$27 million. All of the \$18 million in unrealized losses associated with available-for-sale equity securities is related to the Company's investment in one security. The Company does not intend to sell any of its impaired debt and equity securities, and, based upon its evaluation, the Company does not believe it is likely that the Company will be required to sell the investments before recovery of their amortized cost bases which is expected in the foreseeable future.

Note 6. Debt and Financing Arrangements

The Company has outstanding \$1.15 billion principal amount of convertible senior notes (the Notes) due in 2014. As of December 31, 2009, none of the conditions permitting conversion of the Notes had been satisfied. Therefore, no share amounts related to the conversion of the Notes or exercise of the warrants sold in connection with the issuance of the Notes were included in diluted average shares outstanding.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)
(Unaudited)

Note 6. Debt and Financing Arrangements (Continued)

On July 1, 2009, the Company began accounting for the Notes in accordance with the amended guidance in ASC Topic 470-20, Debt with Conversion and Other Options, pertaining to convertible debt instruments with cash settlement features. The amendment addresses the accounting for convertible debt securities that, upon conversion, may be settled by the issuer fully or partially in cash. Previously, most forms of convertible debt securities were treated solely as debt. Under the new guidance, issuers of convertible debt securities within its scope must separate these securities into two accounting components; a debt component, representing the issuer's contractual obligation to pay principal and interest; and an equity component, representing the holder's option to convert the debt security into equity of the issuer or, if the issuer so elects, an equivalent amount of cash.

The amended guidance required retrospective application to all periods presented. The following tables reflect the Company's previously reported amounts, along with adjustments required by the amended guidance:

Consolidated Statement of Earnings Impact

Three Months Ended December 31, 2008

	As Originally Reported	Adjustment due to Topic 470-20	As Adjusted
(In millions, except per share amounts)

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)
(Unaudited)

Note 6. Debt and Financing Arrangements (Continued)

Consolidated Balance Sheet Impact

	As Originally Reported	June 30, 2009 Adjustment due to Topic 470-20 (In millions)	As Adjusted
Other assets	\$ 610	\$ (3)	\$ 607
Long-term debt	7,800	(208)	7,592
Deferred income taxes	230	78	308
Common stock	5,022	182	5,204
Reinvested earnings	8,832	(54)	8,778

The Company also has outstanding \$1.75 billion principal amount of Equity Units (the Units) due in 2011. The Units are a combination of (a) debt and (b) forward purchase contracts for the holder to purchase the Company's common stock. The forward purchase contracts issued in connection with the Units will be settled for the Company's common stock no later than June 1, 2011. Until settlement of the forward purchase contracts, the shares of stock underlying each forward purchase contract are not outstanding. The forward purchase contracts will only be included in the computation of diluted earnings per share to the extent they are dilutive. As of December 31, 2009, the forward purchase contracts were not considered dilutive and therefore were not included in the computation of diluted earnings per share.

At December 31, 2009, the fair value of the Company's long-term debt exceeded the carrying value by \$511 million, as estimated using quoted market prices or discounted future cash flows based on the Company's current incremental borrowing rates for similar types of borrowing arrangements.

For further information on the Notes and Units and additional information on the impact of ASC Topic 470-20 (formerly FSP APB 14-1), refer to Note 1 "Summary of Significant Accounting Policies" and Note 8 "Debt and Financing Arrangements" in the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended June 30, 2009.

Note 7. Income Taxes

The Company's effective tax rate for the quarter and six months ended December 31, 2009, was 28.4% and 29.5%, respectively, compared to 29.1% and 29.4% for the quarter and six months ended December 31, 2008. The decrease in the Company's effective tax rate for the quarter is primarily due to changes in the geographic mix of pretax earnings.

The Company has an investment in Wilmar International Holdings, Limited (WIHL), a subsidiary of ADM Asia Pacific, Limited (ADMAP), a wholly-owned subsidiary of the Company. Through WIHL, ADMAP holds an indirect ownership interest in Wilmar International Ltd. (WIL). Historically, the Company considered the retained earnings of

its investment in ADMAP to be permanently reinvested outside the U.S. and did not provide a deferred income tax liability associated with the undistributed earnings of this investment. In February, 2009, the shareholders of WIHL approved a plan of voluntary liquidation which was followed by a partial liquidating distribution in April, 2009. Pursuant to this distribution, ADMAP received publicly traded shares of WIL that represented approximately 40% of the WIL shares indirectly held by WIHL. The liquidation caused the difference between the market value of the WIL shares received and the tax basis of ADMAP's investment in WIHL to be subject to U.S. income tax as a deemed distribution from ADMAP to the Company. Consequently, the Company concluded that a portion of its investment in ADMAP related to its investment in WIHL was not permanently reinvested.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)
(Unaudited)

Note 7. Income Taxes (Continued)

The finalization of the liquidation process is expected to occur during calendar year 2010 and is contingent on certain regulatory approvals. While the ultimate impact of the transaction is uncertain, based on the February 5, 2010 market value of WIL shares and certain other assumptions, including the applicable foreign currency exchange rate and the U.S. income tax rate, the finalization of the liquidation could result in additional income tax expense for the Company of approximately \$530 million in the period(s) that the liquidation occurs.

The Company is subject to income taxation in many jurisdictions around the world. The Company is subject to routine examination by domestic and foreign tax authorities and frequently faces challenges regarding the amount of taxes due. These challenges include questions regarding the timing, nature and amount of deductions and the allocation of income among various tax jurisdictions. Resolution of the related tax positions through negotiation with relevant tax authorities or through litigation may take years to complete. Therefore, it is difficult to predict the timing for resolution of tax positions. In its routine evaluations of the exposure associated with various tax filing positions, the Company recognizes a liability, when necessary, for estimated potential additional tax owed by the Company in accordance with ASC 740, Income Taxes. However, the Company cannot accurately predict or provide assurance as to the ultimate outcome of these ongoing or future examinations.

In December 2009, the Company's wholly-owned subsidiary, ADM do Brasil Ltda. ("ADM do Brasil"), received a tax assessment in the amount of \$457 million (subject to variation in currency exchange rates) consisting of tax, penalty, and interest, from the Brazilian Federal Revenue Service challenging the tax deductibility of commodity hedging losses incurred by ADM do Brasil in 2004. Commodity hedging transactions can result in gains, which are included in ADM do Brasil's calculations of taxable income in Brazil, and losses, which ADM do Brasil deducts from its taxable income in Brazil. If the Brazilian Federal Revenue Service were to challenge similar deductions in all tax years still open to assessment (2005-2009), the Company estimates it could receive further assessments totaling approximately \$150 million in addition to the \$457 million assessment related to 2004 (as at December 31, 2009 and subject to variation in currency exchange rates).

The Company has evaluated its tax position regarding these hedging transactions and concluded, based in part upon advice from Brazilian legal counsel, that it was appropriate to recognize both gains and losses resulting from hedging transactions when determining its Brazilian income tax expense. Therefore, the Company has continued to recognize the tax benefit from hedging losses in its financial statements and has not recorded any tax liability for the amounts assessed by the Brazilian Federal Revenue Service. The Company intends to vigorously defend its position against the current assessment and any similar assessments that may be issued for future years.

In January 2010, ADM do Brasil filed an appeal with the Brazilian Federal Revenue Service. If ADM do Brasil is unsuccessful in the administrative appellate process, further appeals are available in the Brazilian federal courts. While the Company believes that its consolidated financial statements properly reflect the tax deductibility of these hedging losses, the ultimate resolution of this matter could result in the future recognition of significant additional payments of and expense for income tax and the associated interest and penalties.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)
(Unaudited)

Note 10. Segment Information

The Company is principally engaged in procuring, transporting, storing, processing, and merchandising agricultural commodities and products. The Company's operations are classified into three reportable business segments: Oilseeds Processing, Corn Processing and Agricultural Services. Each of these segments is organized based upon the nature of products and services offered. The Company's remaining operations are aggregated and classified as Other.

The Oilseeds Processing segment includes activities related to the crushing and origination of oilseeds such as soybeans, cottonseed, sunflower seeds, canola, rapeseed, peanuts, and flaxseed into vegetable oils and protein meals principally for the food and feed industries. In addition, oilseeds and oilseed products may be processed internally or resold into the marketplace as raw materials for other processing. Crude vegetable oil is sold "as is" or is further processed by refining, bleaching, and deodorizing into salad oils. Salad oils can be further processed by hydrogenating and/or interesterifying into margarine, shortening, and other food products. Partially refined oil is sold for use in paints and other industrial products. Refined oil can be further processed for use in the production of biodiesel. Oilseed meals are primary ingredients used in the manufacture of commercial livestock and poultry feeds. Oilseeds Processing includes activities related to the production of natural health and nutrition products and the production of other specialty food and feed ingredients. This segment also includes activities related to the Company's interest in its unconsolidated affiliate in Asia, Wilmar International Limited.

The Corn Processing segment includes activities related to the production of sweeteners, starches, dextrose, and syrups primarily for the food and beverage industry as well as activities related to the production by fermentation of bioproducts such as ethanol, amino acids, and other food, feed and industrial products. The Corn Processing segment also includes activities related to the processing of sugarcane into ethanol.

The Agricultural Services segment utilizes the Company's extensive grain elevator and transportation network to buy, store, clean, and transport agricultural commodities, such as oilseeds, corn, wheat, milo, oats, rice, and barley, and resells these commodities primarily as food and feed ingredients for the agricultural processing industry. In addition, the Agricultural Services segment includes activities related to edible bean procurement, rice milling, formula feed, and animal health and nutrition. Agricultural Services' grain sourcing and transportation network also provides reliable and efficient services to the Company's agricultural processing operations. Also included in Agricultural Services are the activities of A.C. Toepfer International, a global merchant of agricultural commodities and processed products.

Other includes the Company's remaining processing operations, consisting of activities related to processing agricultural commodities into food ingredient products such as wheat into wheat flour, cocoa into chocolate and cocoa products, and barley into malt. The Company sold its malt operations on July 31, 2008. Other also includes financial activities related to banking, captive insurance, private equity fund investments, and futures commission merchant activities.

Intersegment sales have been recorded at amounts approximating market. Operating profit for each segment is based on net sales less identifiable operating expenses, including an interest charge related to working capital usage. Also included in segment operating profit are equity in earnings of affiliates based on the equity method of accounting. Unallocated corporate expenses, investment income, unallocated interest expense, marketable securities transactions, FIFO to LIFO inventory adjustments, and noncontrolling interests have been excluded from segment

operations and classified as Corporate.

For detailed information regarding the Company's reportable segments, see Note 15 to the consolidated financial statements included in the Company's annual report on Form 10-K for the year ended June 30, 2009.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Company Overview

The Company is principally engaged in procuring, transporting, storing, processing, and merchandising agricultural commodities and products. The Company's operations are classified into three reportable business segments: Oilseeds Processing, Corn Processing and Agricultural Services. Each of these segments is organized based upon the nature of products and services offered. The Company's remaining operations are aggregated and classified as Other.

The Oilseeds Processing segment includes activities related to the origination and crushing of oilseeds such as soybeans, cottonseed, sunflower seeds, canola, rapeseed, peanuts, and flaxseed into vegetable oils and protein meals principally for the food and feed industries. In addition, oilseeds and oilseed products may be processed internally or resold into the marketplace as raw materials for other processing. Crude vegetable oil is sold "as is" or is further processed by refining, bleaching, and deodorizing into salad oils. Salad oils can be further processed by hydrogenating and/or interesterifying into margarine, shortening, and other food products. Partially refined oil is sold for use in paints and other industrial products. Refined oil can be further processed for use in the production of biodiesel. Oilseed protein meals are primary ingredients used in the manufacture of commercial livestock and poultry feeds. Oilseeds Processing includes activities related to the production of natural health and nutrition products and the production of other specialty food and feed ingredients. This segment also includes activities related to the Company's unconsolidated affiliate in Asia, Wilmar International Limited.

The Corn Processing segment includes activities related to the production of sweeteners, starches, dextrose, and syrups primarily for the food and beverage industry as well as activities related to the production by fermentation of bioproducts such as ethanol, amino acids, and other food, feed and industrial products. The Corn Processing segment also includes activities related to the processing of sugarcane into ethanol.

The Agricultural Services segment utilizes the Company's extensive grain elevator and transportation network to buy, store, clean, and transport agricultural commodities, such as oilseeds, corn, wheat, milo, oats, rice, and barley, and resells these commodities primarily as food and feed ingredients for the agricultural processing industry. In addition, the Agricultural Services segment includes activities related to edible bean procurement, rice milling, formula feed, and animal health and nutrition. Agricultural Services' grain sourcing and transportation network also provides reliable and efficient services to the Company's agricultural processing operations. Also included in Agricultural Services are the activities of A.C. Toepfer International, a global merchant of agricultural commodities and processed products.

Other includes the Company's remaining processing operations, consisting of activities related to processing agricultural commodities into food ingredient products such as wheat into wheat flour, cocoa into chocolate and cocoa products, and barley into malt. The Company sold its malt operations on July 31, 2008. Other also includes financial activities related to banking, captive insurance, private equity fund investments, and futures commission merchant activities.

Operating Performance Indicators

The Company is exposed to certain risks inherent to an agricultural-based commodity business. These risks are further described in Item 1A, "Risk Factors" included in the Company's annual report on Form 10-K for the year ended June 30, 2009.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

The Company's Oilseeds Processing, Agricultural Services, and wheat processing operations are principally agricultural commodity-based businesses where changes in selling prices move in relationship to changes in prices of the commodity-based agricultural raw materials. Therefore, changes in agricultural commodity prices have relatively equal impacts on both net sales and other operating income and cost of products sold and minimal impact on the gross profit of underlying transactions. As a result, changes in gross profit of these businesses do not necessarily correspond to the changes in net sales and other operating income amounts.

The Company's Corn Processing operations and certain other food and animal feed processing operations also utilize agricultural commodities (or products derived from agricultural commodities) as raw materials. In these operations, agricultural commodity market price changes can result in significant fluctuations in cost of products sold, and such price changes cannot necessarily be passed directly through to the selling price of the finished products.

The Company conducts its business in many countries. For the majority of the Company's subsidiaries located outside the United States, the local currency is the functional currency. Revenues and expenses denominated in foreign currencies are translated into U.S. dollars at the weighted average exchange rates for the applicable periods. Fluctuations in the exchange rates of foreign currencies, primarily the Euro, British pound, and Canadian dollar, as compared to the U.S. dollar will result in corresponding fluctuations in the U.S. dollar value of revenues and expenses reported by the Company. The impact of these currency exchange rate changes, where significant, is discussed below.

The Company measures the performance of its business segments using key financial metrics such as segment operating profit, return on fixed capital investment, return on net assets, and return on equity. The Company's operating results can vary significantly due to changes in factors such as fluctuations in energy prices, weather conditions, crop plantings, government programs and policies, changes in global demand resulting from population growth, general global economic conditions, and changes in standards of living, and global production of similar and competitive crops. Due to these unpredictable factors, the Company does not provide forward-looking information in "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Three Months Ended December 31, 2009 Compared to Three Months Ended December 31, 2008

Net earnings attributable to controlling interests decreased 2% to \$567 million primarily due to a \$177 million pre-tax decline in Corporate results related to the change in LIFO inventory valuations partially offset by increased segment operating profit.

As an agricultural commodity-based business, the Company is subject to a variety of market factors which affect the Company's operating results. The global supply chain for soybeans was challenged by lower 2009 South American production. The current improved global crop outlook, coupled with uncertainty about short-term demand resulting from the pace of the global economic recovery, led to lower agricultural commodity market prices and less volatile commodity market conditions. The late, extended U.S. harvest also reduced profit opportunities this quarter. Regional biodiesel markets continued to develop in North America, South America and Europe and increase overall demand for refined and crude vegetable oils. Compared to last year, net corn costs decreased resulting in lower raw material costs for Corn Processing. Lower energy, fuel and chemical costs positively impacted the Company's manufacturing costs. Ethanol selling prices and volumes increased due to improved gasoline blending economics and higher gasoline prices.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Analysis of Statements of Earnings

Net sales and other operating income decreased 5% to \$15.9 billion primarily due to lower average selling prices, in line with lower underlying commodity prices. Increased sales quantities and the impact of foreign currency translation partially offset the impact from lower average selling prices

Net sales and other operating income by segment for the quarter are as follows:

	Three Months Ended December 31,		Change
	2009	2008	
	(In millions)		
Oilseeds Processing			
Crushing & Origination	\$3,008	\$2,982	\$26
Refining, Packaging, Biodiesel & Other	1,828	2,264	(436)
Asia	44	50	(6)
Total Oilseeds Processing	4,880	5,296	(416)
Corn Processing			
Sweeteners & Starches	818	944	(126)
Bioproducts	1,211	909	302
Total Corn Processing	2,029	1,853	176
Agricultural Services			
Merchandising & Handling	7,597	8,062	(465)
Transportation	43	79	(36)
Total Agricultural Services	7,640	8,141	(501)
Other			
Wheat, Cocoa & Malt	1,341	1,353	(12)
Financial	23	30	(7)
Total Other	1,364	1,383	(19)
Total	\$15,913	\$16,673	\$(760)

Oilseeds Processing sales decreased 8% to \$4.9 billion primarily due to lower average selling prices of vegetable oils and biodiesel partially offset by higher sales volumes and higher average selling prices of protein meal. Corn Processing sales increased 9% to \$2.0 billion, due principally to higher average selling prices and higher sales volumes of ethanol. Agricultural Services sales decreased 6% to \$7.6 billion, due to lower average selling prices of grain partially offset by higher soybean sales volumes. Other sales were relatively unchanged at \$1.4 billion.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Cost of products sold decreased 4% to \$14.9 billion reflecting decreased agricultural commodity costs partially offset by a \$0.6 billion increase from foreign currency translation effects. Manufacturing expenses decreased \$57 million due to lower energy, chemical and fuel costs.

Selling, general and administrative expenses increased 6% to \$358 million. Higher employee-related costs, increased expenses for commercial services, and an \$11 million impact from foreign currency translation were partially offset by decreased provisions for doubtful accounts.

Other (income) expense – net decreased \$147 million primarily due to decreased minority interest eliminations, lower interest expense and higher income from equity affiliates, partially offset by decreased interest income.

Operating profit by segment for the quarter is as follows:

	Three Months Ended December 31,		Change
	2009	2008	
	(In millions)		
Oilseeds Processing			
Crushing & Origination	\$ 193	\$ 187	\$ 6

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Corporate Results

	Three Months Ended December 31, 2009 2008 Change (In millions)		
LIFO credit (charge)	\$(54)	\$123)	\$(177)
Interest expense - net	(71)	(42)	(29)
Corporate costs	(70)	(35)	(35)
Other	9	(44)	53
Total Corporate	\$(186)	\$2)	\$(188)

Oilseeds Processing operating profit increased 10% to \$352 million. Crushing and origination results increased \$6 million as stronger crush margins in North America and the absence of fertilizer inventory write-downs recognized last year were partially offset by weaker year-over-year European results. Refining, packaging, biodiesel and other operating profit decreased \$10 million as lower European biodiesel margins were only partially offset by improved South American refining and biodiesel results. North American sales volumes and margins decreased due to lower demand for vegetable oil. Oilseeds results in Asia increased \$37 million as the Company's investments, principally its equity interest in Wilmar International Limited, continued to perform well.

Corn Processing operating profit increased \$261 million to \$290 million. Sweeteners and starches operating profit increased \$31 million due to lower net corn and manufacturing costs partially offset by lower sales volumes. Bioproducts operating profit increased \$230 million due to improved ethanol margins and higher sales volumes resulting from lower net corn costs, decreased manufacturing costs, and favorable gasoline blending economics. Bioproducts operating profit also reflected increased sales volumes and margins for lysine, increased citric acid margins, and increased startup costs related to the Company's new industrial chemical plants, ethanol dry grind mills, sugarcane processing plant, and co-generation facilities.

Agricultural Services operating profit decreased 68% to \$150 million. Merchandising and handling results decreased \$282 million. While demand for exports of U.S. soybeans was strong during the quarter, enhanced volume and margin opportunities created by last year's volatile commodity markets and tight credit markets did not recur during the current quarter. Transportation results decreased \$30 million due to lower barge freight rates and decreased barge utilization levels resulting from the late, extended North American harvest.

Other operating profit increased \$173 million to \$178 million. Wheat, cocoa and malt operating profit increased \$108 million due to increased equity earnings from the Company's investment in Gruma S.A.B. de C.V., improved global wheat milling margins, and increased cocoa processing earnings. Wheat, cocoa and malt earnings include mark-to-market gains of \$46 million related to certain forward sales commitments accounted for as derivatives. Other financial operating profit increased \$65 million due to the absence of losses experienced last year by the Company's captive insurance operations and improved results of the Company's brokerage services business.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Corporate results decreased \$188 million. Market prices for LIFO-based inventories generally increased this quarter resulting in a \$54 million increase in LIFO inventory valuations compared to a \$123 million decrease in last year's quarter. Corporate unallocated interest increased \$29 million reflecting a reduction in interest income caused by lower short-term interest rates and lower working capital requirements of the operating segments. Corporate costs increased \$35 million due to higher employee-related costs and commercial services expenses. Other principally represents the elimination of after-tax earnings of mandatorily redeemable interests in consolidated subsidiaries.

Income taxes decreased \$15 million due principally to lower pretax earnings. The Company's effective tax rate for the quarter is 28.4% as compared to 29.1% in the prior year's quarter. The decrease in the Company's effective tax rate is primarily due to changes in the geographic mix of pretax earnings.

Six Months Ended December 31, 2009 Compared to Six Months Ended December 31, 2008

Net earnings attributable to controlling interests decreased 35% to \$1.06 billion for the six months due to lower segment operating profit and lower corporate results arising from a \$554 million pre-tax change in LIFO inventory valuations.

As an agricultural commodity-based business, the Company is subject to a variety of market factors which affect the Company's operating results. The global supply chain for soybeans was challenged by lower 2009 South American production. The current improved global crop outlook, coupled with uncertainty about short-term demand resulting from the pace of the global economic recovery, led to lower agricultural commodity market prices and less volatile commodity market conditions. The late, extended U.S. harvest also reduced profit opportunities this year. Regional biodiesel markets continued to develop in North America, South America and Europe and increase overall demand for refined and crude vegetable oils. Compared to last year, net corn costs decreased resulting in lower raw material costs for Corn Processing. Lower energy, fuel and chemical costs positively impacted the Company's manufacturing costs. Ethanol selling prices and volumes increased due to improved gasoline blending economics.

Analysis of Statements of Earnings

Net sales and other operating income decreased 18% to \$30.8 billion for the six months due principally to lower average selling prices in line with year-over-year declines in underlying commodity costs. Sales volumes were comparable overall.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Net sales and other operating income by segment for the six months are as follows:

	Six Months Ended December 31, 2009 2008		Change
	(In millions)		
Oilseeds Processing			
Crushing & Origination	\$7,512	\$7,865	\$(353)
Refining, Packaging, Biodiesel & Other	3,642	5,108	(1,466)
Asia	84	95	(11)
Total Oilseeds Processing	11,238	13,068	(1,830)
Corn Processing			
Sweeteners and Starches	1,704	1,983	(279)
Bioproducts	2,241	2,111	130
Total Corn Processing	3,945	4,094	(149)
Agricultural Services			
Merchandising & Handling	12,878	17,558	(4,680)
Transportation	84	152	(68)
Total Agricultural Services	12,962	17,710	(4,748)
Other			
Wheat, Cocoa & Malt	2,643	2,903	(260)
Financial	46	58	(12)
Total Other	2,689	2,961	(272)
Total	\$30,834	\$37,833	\$(6,999)

Oilseeds Processing sales decreased 14% to \$11.2 billion due principally to lower average selling prices partially offset by higher sales volumes. Corn Processing sales decreased 4% to \$3.9 billion. Sweeteners and starches sales decreased primarily due to lower sales volumes. Bioproducts sales increased primarily as a result of increased sales volumes of ethanol and lysine partially offset by lower average selling prices. Agricultural Services sales decreased 27% to \$13.0 billion, due primarily to lower average selling prices of grain and decreased sales volumes. Other sales decreased 9% to \$2.7 billion, primarily due to lower average selling prices of wheat flour partially offset by increased wheat flour sales volumes.

Cost of products sold decreased 17% to \$28.8 billion due principally to decreased agricultural commodity costs and decreased LIFO inventory reserves. Manufacturing expenses decreased \$252 million primarily due to lower energy, chemical and fuel costs.

Selling, general and administrative expenses decreased 5% to \$712 million due principally to decreased provisions for doubtful accounts.

Other (income) expense-net decreased \$217 million due principally to higher earnings from equity affiliates, lower interest expense and decreased minority interest eliminations, partially offset by reduced interest income.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Operating profit by segment for the six months is as follows:

	Six Months Ended December 31, 2009 (In millions)	2008	Change

Other	10	(65)	75
Total Corporate	\$ (243)	\$ 312	\$ (555)

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Oilseeds Processing operating profit decreased 23% to \$636 million. Crushing and origination results decreased \$198 million as margins declined from high prior-year levels, as favorable impacts from raw material positioning and risk management results in the prior year did not recur. Global soybean supply shortages resulted in lower production volumes in the early part of this fiscal year. Refining, packaging, biodiesel and other operating profit decreased \$46 million. Lower European biodiesel margins were only partially offset by improved South American refining and biodiesel results. North American sales volumes and margins decreased. Oilseeds results in Asia increased \$51 million to \$162 million as the Company's investments, principally its equity interest in Wilmar International Limited, continued to perform well.

Corn Processing operating profit increased \$331 million to \$478 million. Sweetener and starches operating profit increased \$160 million due to lower net corn and manufacturing costs partially offset by lower sales volumes. Bioproducts operating profit increased \$171 million due to improved sales volumes and improved ethanol margins resulting from lower net corn costs, decreased manufacturing costs, and favorable gasoline blending economics.

Agricultural Services operating profit decreased \$565 million to \$325 million. Merchandising and handling results decreased \$510 million. Enhanced volume and margin opportunities created by last year's volatile commodity markets and tight credit markets did not recur. Transportation results decreased \$55 million due to lower barge freight rates and decreased barge utilization levels resulting from the late, extended North American harvest.

Other operating profit increased \$180 million to \$305 million. Wheat, cocoa and malt operating profit increased \$112 million due to increased equity earnings from the Company's investment in Gruma S.A.B. de C.V., improved global wheat milling margins, and increased cocoa processing earnings. Wheat, cocoa and malt earnings include mark-to-market gains of \$63 million related to certain forward sales commitments accounted for as derivative. Other financial operating profit increased \$68 million due to the absence of losses experienced last year by the Company's captive insurance operations and improved results from the Company's brokerage services business.

Corporate results decreased \$555 million. LIFO inventory valuations decreased \$22 million for the six months ended December 31, 2009 compared to a \$576 million decrease in the same period last year. Interest expense – net increased \$66 million reflecting a reduction in corporate interest income caused by lower short-term rates and lower working capital requirements of the operating segments. Corporate costs increased primarily due to higher commercial services expenses. Other principally represents the elimination of after-tax earnings of mandatorily redeemable interests in consolidated subsidiaries.

Income taxes decreased \$235 million due to lower pretax earnings. The Company's effective tax rate for the six months is 29.5% as compared to 29.4% in the prior year's six months.

Liquidity and Capital Resources

The Company's key financial objectives include having sufficient liquidity, balance sheet strength, and financial flexibility to fund the operating and capital requirements of a capital intensive agricultural-based commodity business.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

At December 31, 2009, the Company had \$1.6 billion of cash, cash equivalents, and short-term marketable securities and a current ratio, defined as current assets divided by current liabilities, of 2.1 to 1. Included in working capital is \$6.0 billion of readily marketable commodity inventories. Cash provided by operating activities totaled \$1.4 billion for the six months compared to \$5.9 billion the same period last year. Cash provided by operating activities in the prior year benefited from a reduction in working capital requirements principally related to decreasing agricultural commodity market prices. Cash used in investing activities was \$780 million for the six months compared to \$1.6 billion the same period last year due principally to a decrease in purchases of marketable securities. Cash used in financing activities was \$338 million for the six months compared to \$2.9 billion the same period last year due principally to a decrease in repayments of commercial paper borrowings. Net short-term borrowings decreased primarily as a result of decreased working capital requirements.

At December 31, 2009, the Company had lines of credit totaling \$6.3 billion, of which \$6.2 billion was unused. Of the Company's total lines of credit, \$4.2 billion support a commercial paper borrowing facility, against which there were no borrowings at December 31, 2009.

Capital resources remained strong as reflected by the Company's net worth of \$14.8 billion. The Company's ratio of long-term debt to total capital (the sum of the Company's long-term debt and shareholders' equity) was 33% at December 31, 2009 and 36% at June 30, 2009. This ratio is a measure of the Company's long-term liquidity and is an indicator of financial flexibility.

Contractual Obligations and Commercial Commitments

The Company's purchase obligations as of December 31, 2009 were \$12.6 billion. As of December 31, 2009, the Company expects to make payments related to purchase obligations of \$11.2 billion within the next twelve months, principally related to obligations to purchase agricultural commodity inventories. There were no other material changes in the Company's contractual obligations and off balance sheet arrangements during the three months ended December 31, 2009.

Critical Accounting Policies

There were no material changes in the Company's critical accounting policies during the six months ended December 31, 2009.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The market risk inherent in the Company's market risk sensitive instruments and positions is the potential loss arising from adverse changes in: commodity prices as they relate to the Company's net commodity position; marketable equity security prices; foreign currency exchange rates; and interest rates. Significant changes in market risk sensitive instruments and positions for the quarter ended December 31, 2009 are described below. There were no material changes during the quarter in the Company's potential loss arising from changes in marketable equity securities, foreign currency exchange rates, and interest rates.

For detailed information regarding the Company's market risk sensitive instruments and positions, see Item 7A, "Quantitative and Qualitative disclosures About Market Risk" included in the Company's annual report on Form 10-K

for the year ended June 30, 2009.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
(Continued)

Commodities

The availability and price of agricultural commodities are subject to wide fluctuations due to unpredictable factors such as weather, plantings, global government farm programs and policies, changes in global demand resulting from population growth and changes in standards of living, and global production of similar and competitive crops. A sensitivity analysis has been prepared to estimate the Company's exposure to market risk of its commodity position. The Company's daily net commodity position consists of inventories, related purchase and sale contracts, and exchange-traded futures and exchange-traded and over-the-counter option contracts, including those used to hedge portions of production requirements. The fair value of such position is a summation of the fair values calculated for each commodity by valuing each net position based on quoted futures prices. Market risk is estimated as the potential loss in fair value resulting from a hypothetical ten percent adverse change in such prices. Actual results may differ.

Long/(Short)	Six months ended December 31, 2009		Year ended June 30, 2009	
	Fair Value	Market Risk	Fair Value	Market Risk
	(In millions)			
Highest position	\$ 216	\$ 22	\$ 845	\$ 85
Lowest position	(667)	(67)	(1,342)	(134)
Average position	(226)	(23)	(392)	(39)

The change in fair value of the average position was principally the result of an increase in quantities underlying the daily net commodity position.

ITEM 4. CONTROLS AND PROCEDURES

As of December 31, 2009, an evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's "disclosure controls and procedures" (as defined in Rules 13a – 15(e) and 15d – 15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")). Based on that evaluation, the Company's management, including the Chief Executive Officer and Chief Financial Officer, concluded the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is (a) recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms and (b) accumulated and communicated to the Company's management, including the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosure. There was no change in the Company's internal controls over financial reporting during the Company's most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal controls over financial reporting.

PART II – OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

None.

ITEM 1A. RISK FACTORS

There were no significant changes in the Company's risk factors during the three months ended December 31, 2009.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program (2)	Number of Shares Remaining that May be Purchased Under the Program (2)
October 1, 2009 to October 31, 2009	19,704	\$ 30.308	262	71,345,455
November 1, 2009 to November 30, 2009	33,197	32.360	308	71,345,147
December 1, 2009 to December 31, 2009	864	31.318	84	71,345,063
Total	53,765	\$ 31.591	654	71,345,063

- (1) Total shares purchased represents those shares purchased as part of the Company's publicly announced share repurchase program described below, shares received as payment of the exercise price for stock option exercises, and shares received as payment of the withholding taxes on vested restricted stock grants.
- (2) On November 4, 2004, the Company's Board of Directors approved a stock repurchase program authorizing the Company to repurchase up to 100,000,000 shares of the Company's common stock during the period commencing January 1, 2005 and ending December 31, 2009. This program expired on December 31, 2009. On November 5, 2009, the Company's Board of Directors approved a stock repurchase program authorizing the Company to repurchase up to 100,000,000 shares of the Company's common stock during the period commencing January 1, 2010 and ending December 31, 2014.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

The Annual Meeting of Stockholders was held on November 5, 2009. Proxies for the Annual Meeting were solicited pursuant to Regulation 14A of the Securities Exchange Act of 1934, as amended. There was no solicitation in opposition to the Board of Director nominees as listed in the proxy statement and all nominees were elected as follows:

Nominee	Shares Cast For	Shares Withheld
G. W. Buckley	509,051,181	30,339,261
M. H. Carter	490,131,478	49,258,964
D. E. Felsinger	507,276,098	32,114,344
V. F. Haynes	529,499,455	9,890,987
A. Maciel	528,518,155	10,872,287
P. J. Moore	507,898,159	31,492,283
T. F. O'Neill	532,925,151	6,465,291
K. R. Westbrook	511,724,223	27,666,219
P. A. Woertz	518,888,693	20,501,749

The adoption of the Archer-Daniels-Midland Company 2009 Incentive Compensation Plan was approved as follows:

For	Against	Abstain
428,514,338	43,327,347	2,361,098

The appointment of Ernst & Young LLP as independent accountants was ratified at the meeting by the following votes:

For	Against	Abstain
527,151,235	10,679,453	1,559,754

The Stockholder's Proposal No. 1 (Code of Conduct Regarding Global Human Rights Standards) was defeated as follows:

For	Against	Abstain
118,741,562	298,837,225	56,623,996

ITEM 6. EXHIBITS

- (3)(i) Composite Certificate of Incorporation, as amended, filed on November 13, 2001 as Exhibit 3(i) to Form 10-Q for the quarter ended September 30, 2001 (File No. 1-44), is incorporated herein by reference.
 - (ii) Bylaws, as amended, filed on February 9, 2009 as Exhibit 3(ii) to Form 10-Q for the quarter ended December 31, 2008 (File No. 1-44), is incorporated herein by reference.
 - (10)(i) The Archer-Daniels-Midland Company 2009 Incentive Compensation Plan, filed on September 25, 2009 as Exhibit A to the Company's Definitive Proxy Statement (File No. 1-44) is incorporated herein by reference.
 - (31.1) Certification of Chief Executive Officer pursuant to Rule 13a-14(a) and Rule 15d-14(a) of the Securities Exchange Act, as amended.
 - (31.2) Certification of Chief Financial Officer pursuant to Rule 13a-14(a) and Rule 15d-14(a) of the Securities Exchange Act, as amended.
 - (32.1) Certification of Chief Executive Officer pursuant to 18 U.S.C. 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
 - (32.2) Certification of Chief Financial Officer pursuant to 18 U.S.C. 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
