Notes to Schedule of Investments

† In accordance with Accounting Standards Codification ("ASC") 820 "Fair Value Measurements and Disclosures" ("ASC 820"), all investments held by Neuberger Berman High Yield Strategies Fund Inc. (the "Fund") are carried at the value that Neuberger Berman Management LLC ("Management") believes the Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment under current market conditions. Various inputs, including the volume and level of activity for the asset or liability in the market, are considered in valuing the Fund's investments, some of which are discussed below. Significant management judgment may be necessary to value investments in accordance with ASC 820.

ASC 820 established a three-tier hierarchy of inputs to create a classification of value measurements for disclosure purposes. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

Level 1 – quoted prices in active markets for identical investments Level 2 – other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, amortized cost, etc.)

Level 3 – significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing an investment are not necessarily an indication of the risk associated with investing in those securities.

The value of the Fund's investments in debt securities is determined by Management primarily by obtaining valuations from independent pricing services based on readily available bid quotations, or if quotations are not available, by methods which include various considerations based on security type (generally Level 2 inputs). In addition to the consideration of yields or prices of securities of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions, the following is a description of other Level 2 inputs and related valuation techniques used by an independent pricing service to value certain types of debt securities of the Fund:

Corporate Debt Securities. Inputs used to value corporate debt securities generally include relative credit information, observed market movements, sector news, spread to the U.S. Treasury market, and other market information which may include benchmark yields, reported trades, broker-dealer quotes, issuer spreads, benchmark securities, bids, offers, and reference data, such as market research publications, when available ("Other Market Information").

High Yield Securities. Inputs used to value high yield securities generally include a number of observations of equity and credit default swap curves related to the issuer and Other Market Information.

The value of bank loan securities is determined by Management primarily by obtaining valuations from independent pricing services based on broker quotes (generally Level 2 or Level 3 inputs depending on the number of quotes available).

The value of the Fund's investments in interest rate swap contracts is determined by Management primarily by obtaining valuations from independent pricing services based on references to the underlying rates including the overnight index swap rate and London Interbank Offered Rate ("LIBOR") forward rate to produce the daily settlement price (generally Level 2 inputs).

Management has developed a process to periodically review information provided by independent pricing services for all types of securities.

Investments in investment companies are valued using the fund's daily calculated net asset value per share (Level 2 inputs).

If a valuation is not available from an independent pricing service, or if Management has reason to believe that the valuation received does not represent the amount the Fund might reasonably expect to receive on a current sale in an orderly transaction, the Fund seeks to obtain quotations from principal market makers (generally considered Level 3 inputs). If such quotations are not readily available, the security is valued using methods the Fund's Board of Directors (the "Board") has approved on the belief that they reflect fair value. Numerous factors may be considered when determining the fair value of a security based on Level 2 or 3 inputs, including available analyst, media or other reports, trading in futures or ADRs and whether the issuer of the security being fair valued has other securities outstanding.

For information on the Fund's significant accounting policies, please refer to the Fund's most recent shareholder reports.

Fair value prices are necessarily estimates, and there is no assurance that such a price will be at or close to the price at which the security is next quoted or next trades.

The following is a summary, categorized by Level, of inputs used to value the Fund's investments as of July 31, 2013:
