6

IMAGE TECHNOLOGY LABORATORIES, INC.

NOTES TO CONDENSED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 1 - BASIS OF PRESENTATION:

In the opinion of management, the accompanying unaudited condensed financial statements reflect all adjustments, consisting of normal recurring accruals, necessary to present fairly the financial position of Image Technology Laboratories, Inc. (the "Company") as of September 30, 2004, its results of operations for the nine and three month periods ended September 30, 2004 and 2003, changes in stockholders' deficiency for the nine months ended September 30, 2004 and cash flows for the nine months ended September 30, 2004 and 2003. Certain terms used herein are defined in the audited financial statements of the Company as of December 31, 2003 and for the years ended December 31, 2003 and 2002 (the "Audited Financial Statements") included in the Company's Annual Report on Form 10-KSB previously filed with the Securities and Exchange Commission (the "SEC"). Pursuant to rules and regulations of the SEC, certain information and disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed in or omitted from these financial statements unless significant changes have taken place since the end of the most recent fiscal year. Accordingly, the accompanying unaudited condensed financial statements should be read in conjunction with the Audited Financial Statements and the other information included in the Form 10-KSB.

The Company has had recurring losses and negative cash flows from its operating activities since inception, at September 30, 2004 its cash and cash equivalents were approximately \$30,000 and it had a working capital deficiency of approximately \$125,000. A substantial portion of the Company's historical losses were attributable to non-cash charges. As of September 30, 2004, the Company's principal stockholders had deferred approximately \$184,000 of compensation due them pursuant to their employment agreements, of which approximately \$160,000 was contributed to capital on April 9, 2004. These deferrals and capital contributions have helped and will continue to help preserve the Company's liquidity.

Edgar Filing: IMAGE TECHNOLOGY LABORATORIES INC - Form 10QSB

Additionally, management expects to be raising capital through a proposed private placement of the Company's convertible preferred stock, which, if successful, will help fund its future growth and provide working capital. (See Note 7 - Subsequent event.) There can be no assurance, however, that the Company will be successful in obtaining such additional capital or that the principal stockholder will be able to fund the Company to the extent necessary, if the outside financing is not obtained.

Management believes that the Company's costs and expenses increases are related, in large part, to anticipated future growth and that the Company has the ability to control the pace of its expenditures relative to available resources. Included in such resources is the expectation of management that, if needed, the Company's principal stockholders will provide additional capital contributions, short-term loans and/or will purchase additional common stock up to the amount of funds anticipated to be required. The Company believes that its maximum need for additional cash for the next twelve months will be approximately \$500,000. The Company's principal stockholder has agreed to fund up to this amount, if needed. There can be no assurance, however, that, if needed, such contributions, loans and/or purchases will be available. If necessary, the Company, also, has the ability to reduce or curtail its planned level of activity.

The results of operations for the nine and three month-periods ended September 30, 2004 are not necessarily indicative of the results of operations to be expected for the full year ending December 31, 2004.

7

IMAGE TECHNOLOGY LABORATORIES, INC.

NOTES TO CONDENSED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 2 - EARNINGS (LOSS) PER SHARE:

The Company presents basic earnings (loss) per share and, if appropriate, diluted earnings per share in accordance with the provisions of Statement of Financial Accounting Standards No. 128, "Earnings per Share" ("SFAS 128") as explained in Note 1 to the financial statements in the Form 10-KSB.

The rights of the Company's preferred and common stockholders are substantially equivalent. The Company has included the 1,500,000 outstanding preferred shares from the date of their issuance in the weighted average number of shares outstanding in the computation of basic loss per share for the nine and three months ended September 30, 2004 and 2003, in accordance with the "two class" method of computing earnings (loss) per share set forth in SFAS 128.

Since the Company had net losses for the nine and three months ended September 30, 2004 and 2003, the assumed effects of the exercise of options to purchase 2,112,500 and 2,000,000 common shares outstanding at September 30, 2004 and 2003, respectively, and warrants to purchase 1,999,029 common shares outstanding at September 30, 2003 would be anti-dilutive and, therefore, they have not been considered in the calculations of diluted per share amounts in the accompanying condensed statements of operations for those periods.

NOTE 3 - NOTES PAYABLE TO VALLEY COMMERCIAL CAPITAL LLC:

Edgar Filing: IMAGE TECHNOLOGY LABORATORIES INC - Form 10QSB

In February 2004, the Company borrowed \$125,000 from Valley Commercial Capital, LLC ("Valley"). This loan is evidenced by a promissory note, which provides for interest at 8% per annum and calls for monthly payments of principal and interest of \$3,917 through February 2, 2007. In March 2004, the Company borrowed an additional \$138,997 from Valley, also evidenced by a promissory note, which provides for interest at 8% per annum and calls for monthly payments of principal and interest of \$4,356 through March 29, 2007. As of September 30, 2004, the outstanding balances on these loans aggregated \$221,245. These loans are secured by the personal guarantee of the Company's principal stockholder.

NOTE 4 - COMMON STOCK:

In March 2004, in a private transaction, the Company issued to Robert Carpenter, a member of its Board of Directors, 100,000 shares of its common stock. The purchase price was \$.50 per share (which approximates market value), resulting in aggregate proceeds to the Company of \$50,000.

In April 2004, the Company agreed to issue to Richard L. Feinstein, a consultant, as its Chief Financial Officer, 50,000 shares of its common stock as compensation. Pursuant to an employment agreement with Mr. Feinstein, such shares vest and are to be issued 25% as of April 20, 2004, (the "Effective Date") and 25% on each of the first, second and third anniversaries of the Effective Date. Accordingly, the Company recorded a compensation charge of \$10,625 in the second quarter of 2004 for the vested 12,500 shares at \$.85 per share, the closing price of the Company's common stock on the Effective Date.

8

IMAGE TECHNOLOGY LABORATORIES, INC.

NOTES TO CONDENSED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 5 - STOCK OPTIONS:

Also, in connection with his consulting agreement, the Company has agreed to issue Mr. Feinstein options to purchase 50,000 shares of its common stock. The options are to be issued and vest 25% as of the Effective Date and 25% on each of the first, second and third anniversaries of the Effective Date. The exercise price of the options is \$.85 per share, the closing price of the Company's common stock on the Effective Date. In this connection the Company has recorded a compensation charge of \$8,800 in the second quarter of 2004 for the fair value of such vested options.

Effective May 5, 2004 (the "Start Date"), the Company engaged Barry Muradian as its Chief Operating Officer as evidenced by an employment agreement. Pursuant to the terms of such agreement, the duration of which is four years from the Start Date, Mr. Muradian will be paid an annual base salary, initially, of \$125,000, increased to \$150,000 on August 1, 2004 and subject to subsequent periodic reviews. Mr. Muradian is eligible to participate in all of the Company's incentive plans. Additionally, the Company is issuing to Mr. Muradian options to purchase 100,000 shares of its common stock. The options vest 25% on the first anniversary of the Start Date and 25% on each of the succeeding three anniversaries of the Start Date. The exercise price of the options is \$.75 per share, the opening price of the Company's common stock on the Start Date.

The Company continues to measure compensation cost related to stock options

Edgar Filing: IMAGE TECHNOLOGY LABORATORIES INC - Form 10QSB

issued to employees using the intrinsic value method of accounting prescribed by Accounting Principles Board Opinion No. 25 ("APB 25"), "Accounting For Stock Issued To Employees". The Company has adopted the disclosure-only provisions of Statement of Financial Accounting Standards No. 123 ("SFAS 123"), "Accounting For Stock-Based Compensation." Accordingly, no earned or unearned compensation cost was recognized in the accompanying condensed financial statements for the stock options granted by the Company to Mr. Muradian, since all of those options have been granted at exercise prices that equaled or exceeded the market value at the date of grant. The Company's historical net loss and loss per share and pro forma net loss and loss per share, assuming compensation cost had been determined in 2003 and 2002 based on the fair value at the grant date for all awards by the Company consistent with the provisions of SFAS 123, are set forth below:

9

IMAGE TECHNOLOGY LABORATORIES, INC.

NOTES TO CONDENSED FINANCIAL STATEMENTS (UNAUDITED)

	NINE MONTHS ENDED SEPTEMBER 30,		THREE MONTHS ENDED SEPTEMBER 30,	
	2004	2003	2004	2003
	----	----	----	----
Net loss, as reported	\$ (292,898)	\$ (198,265)	\$ (96,916)	\$ (104,350)
Deduct total stock-based employee compensation expense determined under a fair value based method for all awards	(30,000)	(2,000)	--	--
	-----	-----	-----	-----
Net loss - pro forma	\$ (322,898)	\$ (200,265)	\$ (96,916)	\$ (104,350)
	=====	=====	=====	=====
Net loss per share				
Basic - as reported	\$ (0.02)	\$ (0.01)	\$ (0.01)	\$ (0.01)

	=====	=====	=====	=====

The fair value of options granted were determined using a Black-Scholes pricing model in accordance with SFAS 123, with the following assumptions used during the nine and three months ended September 30:

	2004	2003
	----	----
Risk-free interest rate	3.5%	6.0%
Volatility	99.9%	29.0%
Dividend yield	0.0%	0.0%

NOTE 6 - CONTRIBUTIONS TO CAPITAL:

Effective April 9, 2004, the two principal stockholders of the Company contributed to capital the balance of the amounts of compensation owing to

Edgar Filing: IMAGE TECHNOLOGY LABORATORIES INC - Form 10QSB

them at March 31, 2004, an aggregate of \$159,692. Such aggregate amount has been included in additional paid-in capital on the Company's balance sheet at September 30, 2004.

10

IMAGE TECHNOLOGY LABORATORIES, INC.

NOTES TO CONDENSED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 7 - SUBSEQUENT EVENT:

On November 17, 2004, the Company accepted an offer from vFinance Investments, Inc. to raise between \$750,000 and \$1,500,000 through the sale, pursuant to a Regulation D offering, of shares of convertible preferred stock of the Company. The terms of the offer include a conversion price equal to a maximum of \$.225 per share or a 25% discount to the closing bid price of the Company's stock on the day preceding funding. In addition, the preferred shares will have a coupon interest rate of 5% per year, payable in cash or common stock. Furthermore, the Company will issue warrants to purchase shares of common stock in an amount equal to 50% of the preferred shares issued in the transaction. Such warrants will have a cash exercise price equal to 120% of the closing bid price of the Company's common stock on the day of the initial closing.

As part of this transaction, the Company will be required to file a registration statement to register the underlying securities and to pay, up to \$25,000, the legal fees incurred by the placement agent.

11

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

OVERVIEW

The following is a discussion of certain factors affecting Image Technology Laboratories, Inc.'s results of operations, assets, liquidity and capital resources. You should read the following discussion and analysis in conjunction with Image Technology Laboratories, Inc.'s unaudited condensed financial statements and related notes, which are included elsewhere in this filing.

Image Technology Laboratories, Inc. ("we", "our" or the "Company"), has entered the medical image management segment of the healthcare information systems market. We were incorporated in Delaware on December 5, 1997. We have developed a fully integrated "radiology information system/picture archiving and communications system," known as RIS/PACS for use in the management of medical diagnostic images and patient information by hospitals and diagnostic centers. The PACS portion of the system inputs and stores diagnostic images in digital format from original imaging sources such as: computerized tomography, or CT scans, magnetic resonance imaging, or MRIs, ultrasound, nuclear imaging and digital fluoroscopy. The RIS portion of the system inputs and stores patient demographics, along with the appropriate insurance, billing and scheduling information required to complete the patient visit. All of the data is retained in standard formats, including DICOM and HL-7 standards.

We have had recurring losses and negative cash flows from our operating

Edgar Filing: IMAGE TECHNOLOGY LABORATORIES INC - Form 10QSB

activities since inception, we have cash and cash equivalents of approximately \$30,000 and a working capital deficiency of approximately \$125,000 as of September 30, 2004. A substantial portion of our historical losses has been attributable to non-cash charges. As of September 30, 2004, our principal stockholders had deferred approximately \$184,000 of compensation due them pursuant to their employment agreements, of which approximately \$160,000 was contributed to capital on April 9, 2004. These deferrals and capital contributions have helped and will continue to help preserve our liquidity. Additionally, we expect to be raising capital through a proposed private placement of our convertible preferred stock, which will fund our future growth and provide working capital. (See Note 7 - Subsequent event, to the condensed financial statements, included elsewhere herein.) There can be no assurance, however, that we will be successful in obtaining such additional capital.

Our costs and expenses increases are related, in large part, to our anticipated future growth. We believe, however, that we have the ability to control the pace of our expenditures relative to our available resources. Included in such resources is the expectation of additional capital contributions and/or purchases of additional common stock by our principal stockholders. We believes that our maximum need for additional cash for the next twelve months will be approximately \$500,000. Our principal stockholder has agreed to fund up to this amount, if needed. There can be no assurance, however, that, if needed, such contributions or purchases will be available. If necessary, we, also, have the ability to reduce or curtail our planned level of activity.

12

RESULTS OF OPERATIONS FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2004
COMPARED WITH THE NINE MONTHS ENDED SEPTEMBER 30, 2003 AND FOR THE THREE
MONTHS ENDED SEPTEMBER 30, 2004 COMPARED WITH THE THREE MONTHS ENDED
SEPTEMBER 30, 2003

REVENUES:

During the nine months ended September 30, 2004, our total revenue increased approximately \$221,000, or 41.2% to approximately \$758,000 from approximately \$537,000 in the prior year's comparable period. For the three months ended September 30, 2004, our total revenue was approximately \$240,000, an increase of \$68,000, or 39.5%, from approximately \$172,000 in the prior year's comparable period. These increases are attributable to our service revenue, which grew to \$665,000 in the 2004 nine-month period, an increase of 53.9% from \$432,000 in the first nine months of 2003. In the third quarter of 2004, our service revenue was approximately \$216,000 compared with \$137,000 of service revenues in the 2003 comparable quarter, an increase of \$79,000, or 57.7 %. We intend to sell and install additional software units that will generate increased service revenues in future periods.

In addition, during the nine months ended September 30, 2004, we earned \$93,333 from the sale of our initial unit compared with \$105,000 in the comparable prior period and in the third quarter of 2004 we earned \$23,333 compared with \$35,000 in the third quarter of 2003. The decrease of \$11,667 in each period is because we recognized such revenues from an advance deposit ratably over the period in which we were required to provide maintenance and other services. This agreement expired during the third quarter of 2004 and was replaced by one requiring monthly service fees, rather than license fees. It is our intention to continue to grow our service revenue.

COST OF REVENUES:

Our cost of revenues is comprised of the direct expense, primarily payroll, we

Edgar Filing: IMAGE TECHNOLOGY LABORATORIES INC - Form 10QSB

incur in providing service in connection with the products we sell and the services we provide.

RESEARCH AND DEVELOPMENT EXPENSES:

During the nine months ended September 30, 2004, we incurred research and development expenses (primarily attributable to our founders' compensation pursuant to their employment contracts) of \$64,000 as compared with research and development expenses of \$225,000 during the first nine months of 2003, a decrease of \$161,000, or 71.6 %. The amounts for the third quarters of 2004 and 2003 were \$23,000 and \$75,000, respectively, a decrease of \$52,000, or 69.3%. These decreases are reflective of our shift in focus from our development activities, after having developed a successful product, towards the sales, marketing and servicing of such product.

GENERAL AND ADMINISTRATIVE EXPENSES:

During the nine months ended September 30, 2004, our general and administrative expenses increased approximately \$398,000, or 186.0%, to \$612,000 from general and administrative expenses of approximately \$214,000 during the first nine months of 2003. The increase in general and administrative expenses in the third quarter of 2004 from the prior year's comparable period was approximately \$76,000, or 89.4% to \$161,000 in 2004 from \$85,000 in 2003. These increases are substantially attributable to costs incurred, primarily compensation, travel and infrastructure-related, as we continue our transition from a development orientation to a product and sales driven organization and included the addition of two executive officers during the second quarter of 2004. We expect that these costs will continue to grow as we position ourselves to promote and administer our anticipated growth. We believe, however, that such expenditures are largely scalable and controllable based on current and anticipated revenue streams and cash availability.

13

SALES AND MARKETING EXPENSES:

Sales and marketing expense increased approximately \$62,000, or 29.0%, to approximately \$276,000 during the nine months ended September 30, 2004 from approximately \$214,000 of such costs in the comparable prior period. For the third quarter of 2004 such expenses aggregated approximately \$118,000, an increase of \$29,000, or 32.6%, from sales and marketing expenses incurred during the comparable period in 2003. These expenses are also expected to continue their increase as we make the investments in infrastructure, personnel and other marketing expenditures that we believe are necessary for us to achieve our revenue goals. .

NET LOSS:

As described above, although our revenues increased in the nine months and third quarter of 2004 from the comparable periods in 2003, such increases were more than offset by increases in expenses in such periods. As a result, we incurred a loss of approximately \$293,000 (\$.02 per share) for the nine months ended September 30, 2004 as compared with a loss of \$198,000 (\$.01 per share) for the nine months ended September 30, 2003 and a loss of \$96,000 (\$.01 per share) in the third quarter of 2004 as compared with a loss of \$104,000 (\$.01 per share) in the prior year's comparable period.

LIQUIDITY AND CAPITAL RESOURCES:

As of September 30, 2004, we had cash and cash equivalents and a working capital

Edgar Filing: IMAGE TECHNOLOGY LABORATORIES INC - Form 10QSB

deficiency of \$30,000 and \$125,000, respectively. Historically, the principal sources of our capital resources include proceeds from issuance of shares of common stock to our founders and in private placements. These proceeds have been used for working capital and general corporate purposes.

The net decrease in cash and cash equivalents of \$166,000 in the first nine months of 2004 was primarily attributable to the net cash used in our operating activities of approximately \$332,000. Of this amount, approximately \$293,000 is related to our net loss.

Our investing activities, i.e. the purchase of fixed assets, used an additional \$85,000 of cash.

These uses of cash, aggregating \$417,000, were partially offset by the cash generated through our financing activities of \$252,000, primarily from the proceeds of long-term debt and a private placement of common stock.

The foregoing activities, i.e., operating, investing and financing, resulted in our net cash decrease of \$166,000 for the nine months ended September 30, 2004.

During September 2002, we obtained a \$75,000 working capital loan from a financial institution. As of September 30, 2004, we have approximately \$47,000 outstanding under that loan. Additionally, in February and March 2004, we obtained two loans from a different financial institution that provided us with an aggregate principal amount of approximately \$264,000. As of September 30, 2004, we had approximately \$221,000 outstanding under these arrangements.

14

In the first quarter of 2004, we sold 100,000 shares of our common stock, in a private transaction, to a member of our Board of Directors. The sales price was \$.50 per share, resulting in gross proceeds to the Company of \$50,000.

During the nine months ended September 30, 2004, our principal stockholders contributed an aggregate of approximately \$160,000 of previously deferred compensation to the Company's capital. Since that time through September 30, 2004, the Company's principal stockholder has deferred receipt of an additional \$24,000 of compensation owed to him.

In April 2004, we entered into an engagement agreement with an investment advisory firm to assist us in raising capital by acting as a financial advisor and placement agent for a proposed private placement of our common stock.

We require cash to fund our working capital needs and capital expenditures, as well as to meet existing commitments. Such commitments include payments to our officers who have employment contracts, payments of existing loans including our line of credit and two notes payable, which call for aggregate monthly payments of approximately \$8,300 through March 2007 and \$700 per month pursuant to a five-year lease commitment ending in October 2007 for our operations center in Kingston, New York. At times, in order to help in maximizing our working capital, our officers have contributed to capital or deferred compensation due under their agreements. It is anticipated, but not assured, that, should the need arise, such contributions or deferrals might be available to us in the future. Additionally, we are going to the marketplace with an offer to sell additional shares of our common stock to raise funds to help support our anticipated growth. There can be no assurance that such efforts will be successful.

We believe that the cash generated from existing operations, together with cash on hand, available credit from our current lenders, including banks and, if the

Edgar Filing: IMAGE TECHNOLOGY LABORATORIES INC - Form 10QSB

need arises, our principal stockholder, will be sufficient to finance our debt and lease obligations, employment commitments, current operations and internal growth through, at least, September 30, 2005.

FORWARD-LOOKING STATEMENTS

When used in the Quarterly Report on Form 10-QSB, the words "may", "will", "should", "expect", "believe", "anticipate", "continue", "estimate", "project", "intend" and similar expressions are intended to identify forward-looking statements within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act regarding events, conditions and financial trends that may affect our future plans of operations, business strategy, results of operations and financial condition. We wish to ensure that such statements are accompanied by meaningful cautionary statements pursuant to the safe harbor established in the Private Securities Litigation Reform Act of 1995. Prospective investors are cautioned that any forward-looking statements are not guarantees of future performance and are subject to risks and uncertainties and that actual results may differ materially from those included within the forward-looking statements as a result of various factors including our ability to consummate, and the terms of, acquisitions, if any. Such forward-looking statements should, therefore, be considered in light of various important factors, including those set forth herein and others set forth from time to time in our reports and registration statements filed with the Securities and Exchange Commission (the "Commission"). We disclaim any intent or obligation to update such forward-looking statements.

ITEM 3. CONTROLS AND PROCEDURES.

The Company's management evaluated, with the participation of the Chief Executive Officer and Chief Financial Officer, the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report. There has been no change in the Company's internal control over financial reporting that occurred during the quarter covered by this report that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

16

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

During the quarter, there were no significant developments in our legal proceedings. For a detailed discussion of our legal proceedings, please refer to our Annual Report on Form 10-KSB for the fiscal year ended December 31, 2003.

ITEM 2. CHANGES IN SECURITIES.

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None.
