Notes to Consolidated Financial Statements
June 30, 2009
(Unaudited)

Note 1. Summary of Significant Accounting Policies

Certain information and footnote disclosures normally included in the unaudited consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”). These unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Annual Report on Form 10-K for the fiscal year ended December 31, 2008.

Principles of consolidation

The consolidated financial statements include the accounts of Stewardship Financial Corporation (the “Corporation”) and its wholly owned subsidiary, Atlantic Stewardship Bank (the “Bank”). The Bank includes its wholly owned subsidiaries, Stewardship Investment Corp., Stewardship Realty, LLC and Atlantic Stewardship Insurance Company, LLC. All significant intercompany accounts and transactions have been eliminated in the consolidated financial statements. Certain prior period amounts have been reclassified to conform to the current presentation. The consolidated financial statements of the Corporation have been prepared in conformity with accounting principles generally accepted in the United States of America. In preparing the financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the dates of the statements of financial condition and revenues and expenses during the reporting periods. Actual results could differ significantly from those estimates.

Material estimates

Material estimates that are particularly susceptible to significant changes relate to the determination of the allowance for loan losses and fair value of financial instruments. Management believes that the allowance for loan losses is adequate. While management uses available information to recognize probable incurred losses on loans, future additions to the allowance for loan losses may be necessary based on changes in economic conditions in the market area.

Basis of presentation

The interim unaudited consolidated financial statements included herein have been prepared in accordance with instructions for Form 10-Q and the rules and regulations of the SEC and, therefore, do not include information or footnotes necessary for a complete presentation of consolidated financial condition, results of operations, and cash flows in conformity with accounting principles generally accepted in the United States of America. However, all adjustments, consisting only of normal recurring adjustments, which in the opinion of management are necessary for a fair presentation of the consolidated financial statements, have been included. The results of operations for the six months ended June 30, 2009 are not necessarily indicative of the results which may be expected for the entire year. All share and per share amounts have been restated for stock splits and stock dividends.

Derivatives

Derivative financial instruments are recognized as assets or liabilities at fair value. The Corporation's derivative consists of an interest rate swap agreement, which is used as part of its asset liability management to help manage interest rate risk related to its Subordinated Debentures. The Corporation does not use derivatives for trading purposes.

The Corporation designated the hedge as a cash flow hedge, which is a hedge of a forecasted transaction or the variability of cash flows to be received or paid related to a recognized asset or liability. For a cash flow hedge, the gain or loss on the derivative is reported in other comprehensive income and is reclassified into earnings in the same periods during which the hedged transaction affects earnings. Net cash settlements on derivatives that qualify for hedge accounting are recorded in interest income or interest expense, based on the item being hedged.

The Corporation formally documented the risk-management objective and the strategy for undertaking hedge transactions at the inception of the hedging relationship. This documentation includes linking the fair value of cash flow hedge to specific assets and liabilities on the balance sheet or to specific firm commitments or forecasted transactions. The Corporation formally assessed, both at the hedge's inception and on an ongoing basis, whether the derivative instrument used is highly effective in offsetting changes in fair values or cash flows of the hedged items.

Index

When a cash flow hedge is discontinued but the hedged cash flows or forecasted transactions are still expected to occur, gains or losses that would be accumulated in other comprehensive income are amortized into earnings over the same periods which the hedged transactions will affect earnings.

Subsequent events

Subsequent events have been evaluated through August 14, 2009 which is the date the financial statements were issued.

Adoption of New Accounting Standards

In December 2007, the Financial Accounting Standards Board (“FASB”) issued Statement No. 141 (revised 2007), “Business Combinations” (“SFAS 141(R)”), which establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in an acquiree, including the recognition and measurement of goodwill acquired in a business combination. The adoption SFAS 141(R) did not have a material effect on the Corporation’s results of operations or financial position.

In December 2007, the FASB issued Statement No. 160, “Noncontrolling Interest in Consolidated Financial Statements, an amendment of ARB No. 51” (“SFAS 160”), which changes the accounting and reporting for minority interests, which are now re-characterized as noncontrolling interests and classified as a component of equity within the consolidated balance sheet. The adoption of SFAS No. 160 did not have a significant impact on the Corporation’s results of operations or financial position.

In March 2008, the FASB issued Statement No. 161, “Disclosures about Derivative Instruments and Hedging Activities, an amendment of SFAS No. 133” (“SFAS 161”). SFAS 161 amends and expands the disclosure requirements of SFAS 133 for derivative instruments and hedging activities. SFAS 161 requires qualitative disclosure about objectives and strategies for using derivative and hedging instruments, quantitative disclosures about fair value amounts of the instruments and gains and losses on such instruments, as well as disclosures about credit-risk features in derivative agreements. The adoption of SFAS 161 did not have a material effect on the Corporation’s results of operations or financial position.

In April 2009, the FASB issued Staff Position No. 107-1 and APB 28-1 (“FSP 107-1”), Interim Disclosures about Fair Value of Financial Instruments. FSP 107-1 amends FASB Statement No. 107, Disclosures about Fair Value of Financial Instruments, to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies that were previously only required in annual financial statements. The adoption of FSP 107-1 did not have a material effect on the Corporation’s results of operations or financial position.

In April 2009, the FASB issued Staff Position No. 115-2 and FAS 124-2 (“FSP 115-2 / 124-2”), Recognition and presentation of Other-Than-Temporary Impairments, which amends existing guidance for determining whether impairment is other-than-temporary for debt securities. FSP 115-2 / 124-2 requires an entity to assess whether it intends to sell, or it is more likely than not that it will be required to sell a security in an unrealized loss position before recovery of its amortized cost basis. If either of these criteria is met, the entire difference between amortized cost and fair value is recognized in earnings. For securities that do not meet the aforementioned criteria, the amount of impairment recognized in earnings is limited to the amount related to credit losses, while impairment related to other factors is recognized in other comprehensive income. Additionally, this FSP expands and increases the

frequency of existing disclosures about other-than-temporary impairments for debt and equity securities. The adoption of FSP 115-2 / 124-2 did not have a material effect on the Corporation's results of operations or financial position.

In April 2009, the FASB issued Staff Position 157-4 ("FSP 157-4"), Determining Fair Value When the Volume and Level of Activity for the Asset and Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly. FSP 157-4 emphasizes that even if there has been a significant decrease in the volume and level of activity, the objective of a fair value measurement remains the same. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants. The FSP provides a number of factors to consider when evaluating whether there has been a significant decrease in the volume and level of activity for an asset or liability in relation to normal market activity. In addition, when transactions or quoted prices are not considered orderly, adjustments to those prices based on the weight of available information may be needed to determine the appropriate fair value. The FSP also requires increased disclosures. The adoption of FSP 157-4 did not have a material effect on the Corporation's results of operations or financial position.

In May 2009, the FASB issued Statement No. 165, "Subsequent Events" ("SFAS 165"), which establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. The adoption SFAS 165 did not have a material effect on the Corporation's results of operations or financial position.

Index

Recently Issued But Not Yet Effective Accounting Standards

In June 2009, the FASB issued Statement No. 166, “Accounting for Transfers of Financial Assets—an amendment of FASB Statement No. 140” (“SFAS 166”), whose objective is to improve the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its financial reports about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor’s continuing involvement in transferred financial assets. SFAS 166 is effective for interim and annual reporting periods ending after November 15, 2009. Early adoption is not permitted. The Corporation plans to adopt this FASB in the first quarter of 2010. The adoption SFAS 166 is not expected to have a material effect on the Corporation’s results of operations or financial position.

In June 2009, the FASB issued Statement No. 167, “Amendments to FASB Interpretation No. 46(R)” (“SFAS 167”), whose objective is to improve financial reporting by corporations involved with variable interest entities. SFAS 167 is effective for interim and annual reporting periods ending after November 15, 2009. Early adoption is not permitted. The Corporation plans to adopt this FASB in the first quarter of 2010. The adoption SFAS 167 is not expected to have a material effect on the Corporation’s results of operations or financial position.

In June 2009, the FASB issued Statement No. 168, “The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles—a replacement of FASB Statement No. 162” (“SFAS 168”). This Codification will become the source of authoritative U.S. generally accepted accounting principles (GAAP) recognized by the FASB to be applied by nongovernmental entities. The Board will not issue new standards in the form of Statements, FASB Staff Positions, or Emerging Issues Task Force Abstracts, but will, instead, issue Accounting Standards Updates. SFAS 168 is effective for interim and annual reporting periods ending after September 15, 2009. The Corporation plans to adopt this FASB in the third quarter. The adoption SFAS 168 is not expected to have a material effect on the Corporation’s results of operations or financial position.

Note 2. Securities – Available for Sale and Held to Maturity

The fair value of the available for sale securities and the related gross unrealized gains and losses recognized in accumulated other comprehensive income were as follows:

	Fair Value	June 30, 2009	
		Gross Unrealized Holding Gains	Gross Unrealized Holding Losses
U.S. government-sponsored agencies	\$25,359,000	\$ 177,000	\$ 109,000
Obligations of state and political subdivisions	5,610,000	18,000	157,000
Mortgage-backed securities	53,755,000	1,041,000	31,000
Other equity investments	3,004,000	37,000	15,000
	\$87,728,000	\$ 1,273,000	\$ 312,000
	Fair	December 31, 2008	
		Gross Unrealized	Gross Unrealized

	Value	Holding Gains	Holding Losses
U.S. government-sponsored agencies	\$49,660,000	\$ 741,000	\$ 30,000
Obligations of state and political subdivisions	5,820,000	6,000	190,000
Mortgage-backed securities	31,670,000	716,000	15,000
Other equity investments	2,873,000	-	35,000
	\$90,023,000	\$ 1,463,000	\$ 270,000

The following is a summary of the held to maturity securities and related unrecognized gains and losses:

Index

	June 30, 2009			Fair Value

	\$48,856,000	\$ 598,000	\$ 304,000	\$49,150,000

The following table presents the amortized cost and fair value of the investment securities portfolio by contractual maturity. As issuers may have the right to call or prepay obligations with or without call or prepayment penalties, the actual maturities may differ from contractual maturities. Securities not due at a single maturity date, such as mortgage-backed securities, are shown separately.

Maturity	June 30, 2009	
	Amortized Cost	Fair Value
Available for sale		
Within one year	\$460,000	\$461,000
After one year, but within five years	2,304,000	2,289,000
After five year, but within ten years	8,741,000	8,809,000

Total temporarily impaired securities	\$ 16,155,000	\$ (304,000)	\$ -	\$ -	\$ 16,155,000	\$ (304,000)

On a quarterly basis, the Corporation makes an assessment to determine whether there have been any events or economic circumstances to indicate that a security is impaired on an other-than-temporary basis. The Corporation considers many factors including the length of time the security has had a market value less than the cost basis; the intent

Index

and ability of the Corporation to hold the security for a period of time sufficient for a recovery in value; and recent events specific to the issuer or industry. Management considers the decline in market value of these securities to be temporary.

Mortgage-backed securities are comprised primarily of government agencies such as the Government National Mortgage Association ("GNMA") and government-sponsored agencies such as the Federal National Mortgage Association ("FNMA"), the Federal Home Loan Banks ("FHLB") and the Federal Home Loan Mortgage Corporation ("FHLMC").

Note 3. Loans

The following table sets forth the composition of loans:

		June 30, 2009	December 31, 2008
Mortgage			
	Residential	\$ 38,188,000	\$ 40,337,000
	Commercial	230,400,000	226,183,000
Commercial		101,601,000	100,282,000
Equity		23,115,000	21,208,000
Installment		46,829,000	51,290,000
Other		301,000	356,000
	Total loans	440,434,000	439,656,000
Less:			
	Deferred loan fees	425,000	387,000
	Allowance for loan losses	6,342,000	5,166,000
		6,767,000	5,553,000
	Loans, net	\$ 433,667,000	\$ 434,103,000

Note 4. Allowance for Loan Losses

		Six Months Ended June 30, 2009	2008
Balance, beginning of period	\$	5,166,000	\$ 4,457,000
Provision charged to operations		1,175,000	360,000
Recoveries of loans charged off		92,000	19,000
Loans charged off		(91,000)	(68,000)
Balance, end of period	\$	6,342,000	\$ 4,768,000

Note 5. Loan Impairment

The Corporation has defined the population of impaired loans to include all nonaccrual loans. The following table sets forth information regarding the impaired loans as of the periods indicated.

June 30, December 31,

	2009	2008
Impaired loans		
With related allowance for loan losses	\$ 8,186,000	\$ 2,762,000
Without related allowance for loan losses	3,347,000	1,468,000
Total impaired loans	\$ 11,533,000	\$ 4,230,000
Related allowance for loan losses	\$ 1,526,000	\$ 481,000

Index

Note 6. Interest Rate Swap

The Corporation utilizes interest rate swap agreements as part of its asset liability management strategy to help manage its interest rate risk position. The notional amount of the interest rate swaps does not represent amounts exchanged by the parties. The amount exchanged is determined by reference to the notional amount and the other terms of the individual interest rate swap agreements.

Interest Rate Swap Designated as Cash Flow Hedge: During the second quarter of 2009, the Corporation entered into a swap with an effective date of March 17, 2010. An interest rate swap with a notional amount of \$7 million as of June 30, 2009 was designated as a cash flow hedge of the Subordinated Debentures and was determined to be fully effective during the three and six months ended June 30, 2009. As such, no amount of ineffectiveness has been included in net income. Therefore, the aggregate fair value of the swap is recorded in other assets (liabilities) with changes in fair value recorded in other comprehensive income (loss). The amount included in accumulated other comprehensive income (loss) would be reclassified to current earnings should the hedge no longer be considered effective. The Corporation expects the hedges to remain fully effective during the remaining terms of the swaps. As of June 30, 2009, the interest rate swap is secured by investment securities with a fair value of \$492,000.

Summary information about the interest-rate swap designated as a cash flow hedge as of June 30, 2009 is as follows:

Notional amount	\$ 7,000,000
Pay rate	7.00%
Receive rate	3 month LIBOR plus 2.95%
Maturity	March 17, 2016
Unrealized loss	\$ 99,000

Note 7. Fair Value of Financial Instruments

Statement of Financial Accounting Standard No. 157, "Fair Value Measurements", establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The fair values of securities available for sale are determined by matrix pricing, which is a mathematical technique widely used in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities (Level 2 inputs).

The interest rate swaps are reported at fair values obtained from brokers who utilize internal models with observable market data inputs to estimate the values of these instruments (Level 2 inputs).

The Corporation measures impairment of collateralized loans based on the estimated fair value of the collateral less estimated costs to sell, incorporating assumptions that experienced parties might use in estimating the value of such collateral (Level 3 inputs).

Assets and Liabilities Measured on a Recurring Basis

Assets and liabilities measured at fair value on a recurring basis are summarized below:

Index

	Carrying Value	Fair Value Measurements Using:		
		Quoted Prices in Active Markets for Identical Assets (Level 1) At June 30, 2009	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Available for sale securities				
U.S. government - sponsored agencies	\$25,359,000	\$ -	\$25,359,000	\$ -
Obligations of state and political subdivisions	5,610,000	-	5,610,000	-
Mortgage-backed securities	53,755,000	-	53,755,000	-
Other securities	3,004,000	-	3,004,000	-
Total available for sale securities	\$87,728,000	\$ -	\$87,728,000	\$ -
Liabilities				
Interest rate swap	\$99,000	\$ -	\$99,000	\$ -
At December 31, 2008				
Assets:				
Available for sale securities				
U.S. government - sponsored agencies	\$49,660,000	\$ -	\$49,660,000	\$ -
Obligations of state and political subdivisions	5,820,000	-	5,820,000	-
Mortgage-backed securities	31,670,000	-	31,670,000	-
Other securities	2,873,000	-	2,873,000	-
Total available for sale securities	\$90,023,000	\$ -	\$90,023,000	\$ -

Index

Assets and Liabilities Measured on a Non-Recurring Basis

Assets and liabilities measured at fair value on a non-recurring basis are summarized below:

	Carrying Value	Fair Value Measurements Using:		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
At June 30, 2009				
Assets:				
Impaired loans	\$6,660,000	\$-	\$ -	\$ 6,660,000

At December 31, 2008

Assets:				
Impaired loans	\$2,281,000	\$-	\$ -	\$ 2,281,000

Impaired loans, which are measured for impairment using the fair value of the collateral for collateral dependent loans, had a carrying amount of \$8,186,000 at June 30, 2009, with a valuation allowance of \$1,526,000, resulting in an additional provision for loan losses of \$1,045,000 for the six months ended June 30, 2009.

Fair value estimates, methods and assumptions are set forth below, for items not previously presented, for the Corporation's financial instruments.

	June 30, 2009		December 31, 2008	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
(Dollars in thousands)				
Financial assets:				
Cash and cash equivalents	\$11,401	\$ 11,401	\$12,814	\$ 12,814
Securities held to maturity	74,756	74,965	48,856	49,150
FHLB-NY stock	2,538	N/A	2,420	N/A
Net loans	433,667	433,951	434,103	436,193
Accrued interest receivable	3,197	3,197	3,371	3,371
Financial liabilities:				
Deposits	518,500	520,850	506,531	508,325
Securities sold under agreements to repurchase	15,163	15,163	15,160	15,160
Other borrowings	39,300	36,383	36,900	34,973
Subordinated debenture	7,217	5,040	7,217	7,399
Accrued interest payable	1,602	1,602	1,582	1,582

The following methods and assumptions were used to estimate the fair value of each class of financial instruments:

Cash and cash equivalents – The carrying amount approximates fair value.

Securities held to maturity – All securities held to maturity are actively traded and have been valued using quoted market prices.

FHLB-NY stock – It is not practicable to determine the fair value of FHLB-NY stock due to restrictions placed on the transferability of the stock.

Net loans – Fair values are estimated for portfolios of loan with similar financial characteristics. Loans are segregated by type such as residential and commercial mortgages, commercial and other installment. The fair value of loans is estimated by discounting cash flows using estimated marked discount rates which reflect the credit and interest rate risk inherent in the loans.

Accrued interest receivable – The carrying amount approximates fair value.

Deposits – The fair value of deposits, with no stated maturity, such as noninterest-bearing demand deposits, savings, NOW and money market accounts, is equal to the amount payable on demand. The fair value of the certificates of deposit is based on the discounted value of cash flows. The discount rate is estimated using marked discount rates which reflect interest rate risk inherent in the certificates of deposit.

Index

Securities sold under agreements to repurchase – The carrying value approximates fair value due to the relatively short time before maturity.

Other borrowings – The carrying amount of the borrowings which mature in one day approximates fair value. For borrowings with a longer maturity, the fair value is based on the discounted value of cash flows. The discount rate is estimated using market discount rates which reflect the interest rate risk inherent in the term borrowings.

Subordinated debenture – The fair value of the subordinated debenture is based on the discounted value of cash flows. The discount rate is estimated using market rates which reflect the interest rate risk inherent in the debenture.

Accrued interest payable – The carrying amount approximates fair value.

Commitments to extend credit – The fair value of commitments is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present credit worthiness of the counter parties, and at June 30, 2009 and December 31, 2008 the fair value of such commitments were not material.

The preceding fair value estimates were made at June 30, 2009 and December 31, 2008, based on pertinent market data and relevant information on the financial instruments. These estimates do not include any premium or discounts that could result from an offer to sell at one time the Corporation's entire holdings of a particular financial instrument or category thereof. Since no market exists for a substantial portion of the Corporation's financial instruments, fair value estimates were necessarily based on judgments with respect to future expected loss experience, current economic conditions, risk assessments of various financial instruments, and other factors. Given the subjective nature of these estimates, the uncertainties surrounding them and the matters of significant judgment that must be applied, these fair value estimates cannot be calculated with precision. Modifications in such assumptions could meaningfully alter these estimates.

Since these fair value approximates were made solely for on and off balance sheet financial instruments at June 30, 2009 and December 31, 2008, no attempt was made to estimate the value of anticipated future business. Furthermore, certain tax implications related to the realization of unrealized gains and losses could have a substantial impact on these fair value estimates and have not been incorporated into the estimates.

Note 8. Earnings Per Share

Basic earnings per share is calculated by dividing net income available to common stockholders by the average daily number of common shares outstanding during the period. Common stock equivalents are not included in the calculation. Diluted earnings per share is computed similar to that of basic earnings per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if all potential dilutive common shares were issued.

The following is a reconciliation of the calculation of basic and diluted earnings per share.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
	(in thousands, except per share data)			
Net income	\$780	\$1,179	\$1,967	\$2,240
Dividends on preferred stock and accretion	137	-	229	-
Net income available to common stockholders	\$643	\$1,179	\$1,738	\$2,240
Weighted average shares	5,554	5,581	5,553	5,575

Edgar Filing: STEWARDSHIP FINANCIAL CORP - Form 10-Q

Effect of dilutive stock options	4	10	5	12
Total weighted average dilutive shares	5,558	5,591	5,558	5,586
Basic earnings per common share	\$0.12	\$0.21	\$0.31	\$0.40
Diluted earnings per common share	\$0.12	\$0.21	\$0.31	\$0.40

Stock options to purchase 67,073 and 51,418 average shares of common stock were not considered in computing diluted earnings per share for the six months ended June 30, 2009 and 2008, respectively, because they were antidilutive. A common stock warrant to purchase 127,119 and 106,050 average shares of common stock was not considered in computing diluted earnings per share for the three and six months ended June 30, 2009, respectively, because it was antidilutive.

Index

All share and per share amounts have been restated to reflect a 5% stock dividend declared on September 16, 2008 and paid November 17, 2008.

Note 9. Preferred Stock

On January 30, 2009, in exchange for issuing 10,000 shares of Series A Preferred Stock (the "Senior Preferred Shares") and a warrant to purchase 127,119 shares of common stock, the Corporation received \$10.0 million as part of the United States Treasury Department's Capital Purchase Program ("CPP").

The Senior Preferred Shares pay a cumulative dividend of 5% per annum for the first five years and 9% per annum thereafter. Dividends are payable quarterly in arrears and the Corporation accrues the preferred dividends as earned over the period the Senior Preferred Shares are outstanding.

The warrant to purchase 127,119 of common shares has an exercise price of \$11.80 per share. The exercise price for the warrant was calculated based on the average of the closing prices of the Corporation's common stock on the 20 trading days ending on the last trading day prior to the date of the Treasury's approval of the Corporation's application under the program.

Of the \$10 million of proceeds, \$9.7 million was allocated to the Senior Preferred Shares and \$269,000 was allocated to the warrant based on their estimated relative fair values as of January 30, 2009. The resulting discount on the Senior Preferred Shares of \$269,000 is being accreted through a charge to retained earnings over an estimated five year life of the stock offering using an effective yield method. The Senior Preferred Shares and warrant issued under the CPP are includable in Tier I capital for regulatory capital.

The Corporation may repay the funds provided under the CPP without regard to whether the Corporation has replaced such funds from any other source or to any waiting period, subject to regulatory approval. Until the earlier of the third anniversary of the Treasury's investment in the Senior Preferred Shares or when all of the Senior Preferred Shares have been redeemed by the Corporation or transferred by the Treasury to third parties, the Corporation may not, without the consent of the Treasury, increase the common stock cash dividend.

Stewardship Financial Corporation
Management's Discussion and Analysis of
Financial Condition and Results of Operations

Cautionary Note Regarding Forward-Looking Statements

This Form 10-Q contains certain "forward looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, and may be identified by the use of such words as "believe," "expect," "anticipate," "should," "plan," "estimated," and "potential." Examples of forward looking statements include, but are not limited to, estimates with respect to the financial condition, results of operations and business of the Corporation that are subject to various factors which could cause actual results to differ materially from these estimates. These factors include: changes in general, economic, and market conditions, legislative and regulatory conditions, or the development of an interest rate environment that adversely affects the Corporation's interest rate spread or other income anticipated from operations and investments. As used in this Form 10-Q, "we" and "us" and "our" refer to Stewardship Financial Corporation and its consolidated subsidiary, Atlantic Stewardship Bank, depending on the context.

Critical Accounting Policies and Estimates

"Management's Discussion and Analysis of Financial Condition and Results of Operations," as well as disclosures found elsewhere in this Form 10-Q, are based upon the Corporation's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires the Corporation to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. Note 1 to the Corporation's Audited Consolidated Financial Statements for the year ended December 31, 2008 included in our Annual Report on Form 10-K for the year ended December 31, 2008, as supplemented by this report, contains a summary of the Corporation's significant accounting policies. Management believes the Corporation's policy with respect to the methodology for the determination of the allowance for loan losses involves a higher degree of complexity and requires management to make difficult and subjective judgments, which often require assumptions or estimates about highly uncertain matters. Changes in these judgments, assumptions or estimates could materially impact results of operations. This critical policy and its application are periodically reviewed with the Audit Committee and the Board of Directors.

The allowance for loan losses is based upon management's evaluation of the adequacy of the allowance, including an assessment of known and inherent risks in the portfolio, giving consideration to the size and composition of the loan portfolio, actual loan loss experience, level of delinquencies, detailed analysis of individual loans for which full collectability may not be assured, the existence and estimated net realizable value of any underlying collateral and guarantees securing the loans, and current economic and market conditions. Although management uses the best information available, the level of the allowance for loan losses remains an estimate, which is subject to significant judgment and short-term change. Various regulatory agencies, as an integral part of their examination process, periodically review the Corporation's allowance for loan losses. Such agencies may require the Corporation to make additional provisions for loan losses based upon information available to them at the time of their examination. Furthermore, the majority of the Corporation's loans are secured by real estate in the State of New Jersey. Accordingly, the collectability of a substantial portion of the carrying value of the Corporation's loan portfolio is susceptible to changes in local market conditions and may be adversely affected should real estate values decline or the northern New Jersey area experience an adverse economic shock. Future adjustments to the allowance for loan losses may be necessary due to economic, operating, regulatory and other conditions beyond the Corporation's control.

Financial Condition

Total assets increased \$27.5 million, or 4.5%, to \$639.3 million at June 30, 2009 from \$611.8 million at December 31, 2008. Securities available for sale decreased \$2.3 million while securities held to maturity increased \$25.9 million. The overall increase in securities was primarily attributable to the initial investing and leveraging of the \$10.0 million of funds received under the Capital Purchase Program principally in mortgage-backed securities. The cash flows from the amortization of the mortgage-backed securities will be utilized to continue to fund loan growth. Net loans decreased \$436,000. An increase due to new loans originated was offset by the sale of \$5.9 million of loan participations, a \$1.2 million increase in the allowance for loan losses and regular principal payments and payoffs. Mortgage loans held for sale at June 30, 2009 reflected a \$6.0 million increase from December 31, 2008.

Deposits totaled \$518.5 million at June 30, 2009, an increase of \$12.0 million, or 2.4%, from \$506.5 million at December 31, 2008. The Corporation introduced its Power Rate Checking to customers during the first quarter of 2009. This free checking account rewards customers with a high rate of interest for meeting three simple qualifications that assist the

Index

Bank in reducing our account related expenses. A new online business product was rolled out in the second quarter of 2009. These products and services will allow us to continue to attract new personal and business core deposits.

Results of Operations

General

The Corporation reported net income of \$780,000, or \$0.12 diluted earnings per common share for the three months ended June 30, 2009, compared to \$1.2 million, or \$0.21 diluted earnings common per share for the comparable prior year period. For the six months ended June 30, 2009, net income was \$2.0 million, or \$0.31 diluted earnings per common share. These results compare to net income of \$2.2 million, or \$0.40 diluted earnings per common share for the six months ended June 30, 2008. Results for the current year periods include an increased provision for loan losses and increased expense associated with a FDIC special assessment.

Net Interest Income

Net interest income for the three and six months ended June 30, 2009 was \$5.8 million and \$11.4 million, respectively, compared to \$5.6 million and \$10.7 million recorded in the prior year periods. The increases in the current year periods are primarily due to a decline in the cost of interest bearing liabilities. The net interest rate spread and net yield on interest earning assets for the three months ended June 30, 2009 were 3.45% and 3.89%, respectively, compared to 3.44% and 3.99% for the three months ended June 30, 2008. For the six months ended June 30, 2009, the net interest rate spread and net yield on interest earning assets were 3.42% and 3.88%, respectively, compared to 3.33% and 3.95% for the six months ended June 30, 2008. The net yield on interest earning assets during the current year periods reflect both a decline in loan interest rates and yields on securities as well as a decline in the interest rates on deposits and borrowings.

The following tables reflect the components of the Corporation's net interest income for the three and six months ended June 30, 2009 and 2008 including, (1) average assets, liabilities, and stockholders' equity based on average daily balances, (2) interest income earned on interest-earning assets and interest expense paid on interest-bearing liabilities, (3) average yields earned on interest-earning assets and average rates paid on interest-bearing liabilities, and (4) net yield on interest-earning assets. Nontaxable income from investment securities and loans is presented on a tax-equivalent basis assuming a statutory tax rate of 34% for the periods presented. This was accomplished by adjusting non-taxable income upward to make it equivalent to the level of taxable income required to earn the same amount after taxes.

Index

For the three months ended June 30, 2009, total interest income on a tax equivalent basis decreased \$157,000, or 1.8%, when compared to the three months ended June 30, 2008 primarily due to a decrease in the total yield on interest-earning assets, partially offset by an increase in the average earning assets. Total interest income on a tax equivalent basis decreased \$324,000 for the six months ended June 30, 2009, or 1.8%, compared to the same period for 2008. Consistent with the three month period, the decrease in the current six month period is due to a decrease in the overall yield on interest-earning assets, partially offset by an increase in the average earning assets. The average rate earned on interest-earning assets was 5.67% and 5.74% for the three and six months ended June 30, 2009, respectively, compared to an average rate of 6.21% and 6.34% for the same prior year periods. The average yield on the loan portfolio decreased 45 and 56 basis points when comparing the three and six months ended June 30, 2009, respectively, to the three months ended June 30, 2008. The decline in short-term interest rates during 2008 resulted in a Prime rate of 3.25% at June 30, 2009 compared to a Prime rate of 5.00% a year earlier. The decline in short-term rates resulted in loans resetting during the past year at lower interest rates, thereby contributing to the decline in yields on earning assets. Average interest-earning assets increased \$42.4 million and \$49.1 million for the three and six months ended June 30, 2009, respectively, when compared to the prior year periods. The increase for the three months ended June 30, 2009 is primarily attributable to an increase in taxable investment securities as a result of the previously mentioned leverage strategy. In addition to the effects of the leverage strategy, the increase for the six months ended June 30, 2009 included an increase in average loans. Taxable investment securities of \$146.2 million and \$140.5 million for the three and six months ended June 30, 2009, respectively, represent increases of \$43.5 million and \$41.8 million when compared to the same prior year periods. Average loans increased \$8.1 million to an average of \$437.8 million for the six months ended June 30, 2009, from an average of \$429.8 million for the comparable period in 2008.

Interest paid on deposits and borrowed money decreased \$432,000, or 13.7%, and \$1.1 million, or 15.8%, for the three and six months ended June 30, 2009 compared to the same periods for 2008. The declines are due to decreases in rates paid on deposits and borrowings, partially offset by increases in average interest-bearing liabilities. The average balance of total interest-bearing deposits and borrowings increased \$34.4 million and \$46.0 million for the three and six months ended June 30, 2009, respectively, from the comparable 2008 periods. In addition to the Corporation's expanding customer base, the increase in average interest-bearing liabilities was a result of increased borrowings to complete the leveraging of the \$10 million of CPP funds. For the three months ended June 30, 2009, the total cost for interest-bearing liabilities declined to 2.22% representing a 55 basis point decline when compared to the same prior year period. Yields on deposits and borrowed money decreased 71 basis points from 3.01% for the six month period ended June 30, 2008 to 2.30% for the comparable period in 2009.

Provision for Loan Losses

The Corporation maintains an allowance for loan losses at a level considered by management to be adequate to cover the probable incurred losses associated with its loan portfolio. On an ongoing basis, management analyzes the adequacy of this allowance by considering the nature and volume of the Corporation's loan activity, financial condition of the borrower, fair market value of the underlying collateral, and changes in general market conditions. Additions to the allowance for loan losses are charged to operations in the appropriate period. Actual loan losses, net of recoveries, serve to reduce the allowance. The appropriate level of the allowance for loan losses is based on estimates, and ultimate losses may vary from the current estimates.

The loan loss provision totaled \$1.0 million and \$1.2 million for the three and six months ended June 30, 2009, respectively. For the three and six months ended June 30, 2008 the provision for loan losses was \$260,000 and \$360,000, respectively. Nonaccrual loans increased from \$4.2 million at December 31, 2008 to \$11.5 million at June 30, 2009. The allowance for loan losses related to the impaired loans increased from \$481,000 at December 31, 2008 to \$1.5 million at June 30, 2009. The current period loan loss provision primarily reflects the increase in impaired loans. The Corporation monitors its loan portfolio and intends to continue to provide for loan loss reserves based on

its ongoing periodic review of the loan portfolio and general market conditions.

See “Asset Quality” section for summary of allowance for loan losses and nonperforming assets.

Noninterest Income

For the three and six months ended June 30, 2009, noninterest income was \$949,000 and \$1.7 million, respectively, compared to \$1.0 million and \$2.0 million for the prior year periods. As previously reported, on December 31, 2008, the Corporation sold its merchant servicing portfolio and, as a result, a decline of \$361,000 in the related noninterest income line as well as a \$320,000 decline in the related noninterest expense line is reflected for the three months ended June 30, 2009. For the six months ended June 30, 2009 the declines in the related noninterest income and noninterest expense lines were \$612,000 and \$537,000, respectively. When compared to the prior periods, fees and service charges increased \$72,000 and \$173,000 for the three and six months ended June 30, 2009, respectively. The increase is partially due to the introduction of the new Power Rate Checking product. In addition, the increase reflects revisions to policies for

Index

the assessment of fees as well as the changes in and additions to the current fee structure. Gains on sales of mortgage loans were \$73,000 and \$84,000 for the three and six months ended June 30, 2009 reflecting an increase in mortgage activity in the current quarter reflective of lower mortgage rates. This recent increase in activity resulted in an increase in the volume of loans sold and ultimately, an increase in gains on mortgages sold.

Noninterest Expense

Noninterest expenses for the three and six months ended June 30, 2009 were \$4.7 million and \$9.1 million, respectively. For the comparable prior year periods, noninterest expenses were \$4.6 million and \$9.0 million, respectively. As previously reported, on December 31, 2008, the Corporation sold its merchant servicing portfolio and, as a result, a \$320,000 decline in the related noninterest expense line as well as a decline of \$361,000 in the related noninterest income line is reflected for the three months ended June 30, 2009. For the six months ended June 30, 2009, the declines in the related noninterest expense and noninterest income lines were \$537,000 and \$612,000, respectively. Due to an increase in the FDIC insurance assessment rate as well as an increase in deposits, FDIC insurance premiums reflect the recording of an industry-wide special assessment which amounted to \$300,000 for the Corporation for the three and six months ended June 30, 2009. The assessment is payable on September 30, 2009.

Income Tax Expense

Income tax expense totaled \$280,000 for the three months ended June 30, 2009 compared to an income tax expense of \$572,000 for the three months ended June 30, 2008. Income tax expense was \$840,000 for the six months ended June 30, 2009 compared to \$1.1 million for the six months ended June 30, 2008. The effective tax rate for the three and six months ended June 30, 2009 was 26.4% and 29.9%, respectively, compared to 32.7% and 32.3% for the three and six months ended June 30, 2008.

Asset Quality

The Corporation's principal earning assets are its loans to businesses and individuals located in northern New Jersey. Inherent in the lending function is the risk of deterioration in the borrowers' ability to repay their loans under their existing loan agreements. Risk elements include nonaccrual loans, past due and restructured loans, potential problem loans, loan concentrations and other real estate owned. The following table shows the composition of nonperforming assets at the end of the last four quarters:

	June 30, 2009	March 31, 2009	December 31, 2008	September 30, 2008
Nonaccrual loans (1)	\$ 11,533	\$ 6,592	\$ 4,230	\$ 6,884
Loans past due 90 days or more and accruing (2)	-	414	353	268
Total nonperforming loans	11,533	7,006	4,583	7,152
Restructured loans	2,460	2,375	1,855	-
Total nonperforming loans	\$ 13,993	\$ 9,381	\$ 6,438	\$ 7,152
Allowance for loan losses	\$ 6,342	\$ 5,324	\$ 5,166	\$ 5,930
Nonperforming loans to total loans	3.18 %	2.15 %	1.46 %	1.61 %

Edgar Filing: STEWARDSHIP FINANCIAL CORP - Form 10-Q

Nonperforming loans to total assets	2.19	%	1.45	%	1.05	%	1.17	%
Allowance for loan losses to total loans	1.44	%	1.22	%	1.18	%	1.34	%
Allowance for loan losses to nonperforming loans	45.32	%	56.75	%	80.24	%	82.91	%

(1) Generally represents loans to which the payments of principal or interest are in arrears for a period of more than 90 days. Interest previously accrued on these loans and not yet paid is reversed and charged against income during the current period. Interest earned thereafter is only included in income to the extent that it is received in cash.

(2) Represents loans to which payments of principal or interest are contractually past due 90 days or more but which are currently accruing income at the contractually stated rates. A determination is made to continue accruing income on those loans which are sufficiently collateralized and on which management believes all interest and principal owed will be collected.

Index

The nonaccrual loans are comprised of 28 loans, primarily commercial mortgage, residential mortgage and commercial loans. While the Corporation maintains strong underwriting requirements, the increase is reflective of the current economic and real estate environment.

As of June 30, 2009, there were \$16.7 million of other loans not included in the above table, where credit conditions of borrowers caused management to have concerns about the possibility of the borrowers not complying with the present terms and conditions of repayment and which may result in disclosure of such loans at a future date. These loans have been considered by management in conjunction with the analysis of the adequacy of the allowance for loan losses.

The Corporation's lending activities are concentrated in loans secured by real estate located in northern New Jersey. Accordingly, the collectability of a substantial portion of the Corporation's loan portfolio is susceptible to changes in real estate market conditions in northern New Jersey.

Interest Rate Sensitivity

The Corporation's primary exposure to market risk arises from changes in market interest rates ("interest rate risk"). The Corporation's profitability is largely dependent upon its ability to manage interest rate risk. Interest rate risk can be defined as the exposure of the Corporation's net interest income to adverse movements in interest rates.

The Corporation manages its interest rate risk by utilizing an asset/liability simulation model and by measuring and managing its interest sensitivity gap. The simulation model analyzes the sensitivity of net interest income to movements in interest rates. The simulation model projects net interest income, net income, net margin, and capital to asset ratios based on various interest rate scenarios over a twelve-month period. The model is based on the actual maturity and repricing characteristics of all rate sensitive assets and liabilities. Management incorporates into the model certain assumptions regarding prepayments of certain assets and liabilities. Assumptions have been built into the model for prepayments for assets and decay rates for nonmaturity deposits such as savings and interest bearing demand. The model assumes an immediate rate shock to interest rates without management's ability to proactively change the mix of assets or liabilities. According to reports generated for the quarter ended June 30, 2009, an immediate interest rate increase of 200 basis points would have resulted in a decrease in net interest income of 11.5%, or \$3.1 million, while an immediate decrease of 200 basis points would have resulted in a decrease in net interest income of 2.4%, or \$630,000. Management has a goal to maintain a percentage change of no more than 17.5% given a 200 basis point change in interest rates. Management cannot provide any assurance about the actual effect of changes in interest rates on the Corporation's net interest income.

The Corporation does not have any material exposure to foreign currency exchange rate risk or commodity price risk. The Corporation did not enter into any market sensitive instruments for trading purposes. Beginning during the three months ended June 30, 2009, the Corporation entered into an interest rate swap as a cash flow hedge tied to the subordinated debentures.

The Corporation is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These instruments include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated statement of condition. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The Corporation evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Corporation upon extension of credit, is based on management's credit evaluation of the counter-party. Standby letters

of credit are conditional commitments issued by the Corporation to guarantee payment or performance of a customer to a third party up to a stipulated amount and with specified terms and conditions. Commitments to extend credit and standby letters of credit are not recorded on the Corporation's consolidated balance sheet until the instrument is exercised.

Capital Adequacy

The Corporation is subject to capital adequacy guidelines promulgated by the Board of Governors of the Federal Reserve System ("FRB"). The Bank is subject to similar capital adequacy requirements imposed by the Federal Deposit Insurance Corporation. The FRB has issued regulations to define the adequacy of capital based upon the sensitivity of assets and off-balance sheet exposures to risk factors. Four categories of risk weights (0%, 20%, 50%, and 100%) were established to be applied to different types of balance sheet assets and off-balance sheet exposures. The aggregate of the risk-weighted items (risk-based assets) is the denominator of the ratio, the numerator is risk-based capital. Under the regulations, risk-based capital has been classified into two categories. Tier 1 capital includes common and qualifying perpetual preferred stockholders' equity less goodwill. Tier 2 capital includes mandatory convertible debt, allowance for

Index

loan losses, subject to certain limitations, and certain subordinated and term debt securities. Total qualifying capital consists of Tier 1 capital and Tier 2 capital; however, the amount of Tier 2 capital may not exceed the amount of Tier 1 capital. At June 30, 2009, the minimum risk-based capital requirements to be considered adequately capitalized were 4% for Tier 1 capital and 8% for total capital.

Federal banking regulators have also adopted leverage capital guidelines to supplement the risk-based measures. The leverage ratio is determined by dividing Tier 1 capital as defined under the risk-based guidelines by average total assets (non risk-adjusted) for the preceding quarter. At June 30, 2009 the minimum leverage ratio requirement to be considered well capitalized was 4%. The following table reflects the Corporation's capital ratios at June 30, 2009.

	Required	Actual	Excess
Leverage Ratio	4.00%	9.28%	5.28%
Risk-based Capital			
Tier 1	4.00%	12.46%	8.46%
Total	8.00%	13.71%	5.71%

Liquidity and Capital Resources

The Corporation's primary sources of funds are deposits, amortization and prepayments of loans and mortgage-backed securities, maturities of investment securities and funds provided from operations. While scheduled loan and mortgage-backed securities amortization and maturities of investment securities are a relatively predictable source of funds, deposit flow and prepayments on loans and mortgage-backed securities are greatly influenced by market interest rates, economic conditions and competition. The Corporation's liquidity, represented by cash and cash equivalents, is a product of its operating, investing and financing activities.

The primary source of cash from operating activities is net income. Liquidity management is both a daily and long-term function of business management. Excess liquidity is generally invested in short-term investments, such as federal funds sold.

Cash and cash equivalents decreased \$1.4 million during the first six months of 2009. Net financing activities provided \$23.2 million and operating and investing activities used \$2.2 million and \$22.4 million, respectively.

The Corporation anticipates that it will have sufficient funds available to meet its current contractual commitments. Should the Corporation need temporary funding, the Corporation has an overnight line of credit and a one-month overnight repricing line of credit with the FHLB-NY, each in the amount of \$58.5 million. In addition, the Corporation had available overnight variable repricing lines of credit with other correspondent banks totaling \$22 million on an unsecured basis.

ITEM 3. Quantitative and Qualitative Disclosures about Market Risk

Not applicable to smaller reporting companies.

ITEM 4T. Controls and Procedures

(a) Evaluation of internal controls and procedures.

Based on their evaluation as of the end of the period covered by this Quarterly Report on Form 10-Q, our principal executive officer and principal financial officer have concluded that our internal controls and procedures (as defined in Rules 13a-14(c) and 15d-14(c) under the Securities Exchange Act of 1934 (the “Exchange Act”)) are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms.

(b) Management’s Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) of the Exchange Act. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements and can only provide reasonable assurance with respect to financial statement preparation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

We assessed the effectiveness of our internal control over financial reporting as of June 30, 2009. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”) in Internal Control—Integrated Framework. Based on our assessment using those criteria, our management (including our Chief Executive Officer and Chief Financial Officer) concluded that our internal control over financial reporting was effective as of June 30, 2009.

(c) Changes in internal controls over financial reporting.

There were no significant changes in our internal controls over financial reporting or in other factors that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses during the quarter ended June 30, 2009 that have materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Part II -- Other Information

Item 4. Submission of Matters to a Vote of Security Holders

The Corporation held an Annual Meeting of Shareholders on May 18, 2009. At that meeting, the Corporation's shareholders elected three directors for a three year term that will expire in May 2012, or until their successors are duly elected and qualified. The voting results were as follows:

	Votes for	Votes Withheld
Election of Director		
Robert J. Turner	3,957,518	317,163
William J. Vander Eems	4,209,788	64,893
Paul Van Ostenbridge	4,268,780	5,902

There were no broker non-votes on any of the above matters. The following individuals whose terms expire in either 2010 or 2011 or until their successors are duly elected and qualified, continue to serve as directors: Harold Dyer, Abe Van Wingerden, Michael Westra, Howard R. Yeaton, William C. Hanse, Margo Lane, Arie Leegwater and John L. Steen.

The shareholders approved a non-binding advisory proposal on the compensation of the Corporation's executive officers with 4,136,333 shares voting for, 40,876 shares voting against, and 97,472 shares abstaining.

The shareholders ratified the appointment of Crowe Horwath LLP as the Corporation's registered public accounting firm for the fiscal year ending December 31, 2009 with 4,234,793 shares voting for, 4,105 shares voting against, and 35,784 shares abstaining.
