**Notes to Consolidated Financial Statements
September 30, 2006**

Note 1 Basis of Presentation

In the opinion of management, the accompanying unaudited consolidated balance sheets, the consolidated statements of income, the consolidated statements of changes in shareholders' equity and comprehensive income (loss), and the consolidated statements of cash flows of First Community Corporation (the Company), present fairly in all material respects the Company's financial position at September 30, 2006 and December 31, 2005, the Company's results of operations for the three and nine months ended September 30, 2006 and 2005, and the Company's cash flows for the nine months ended September 30, 2006 and 2005. The results of operations for the three and nine months ended September 30, 2006 are not necessarily indicative of the results that may be expected for the year ending December 31, 2006.

In the opinion of management, all adjustments necessary to fairly present the consolidated financial position and consolidated results of operations have been made. All such adjustments are of a normal, recurring nature. All significant intercompany accounts and transactions have been eliminated in consolidation. The consolidated financial statements and notes thereto are presented in accordance with the instructions for Form 10-Q. The information included in the Company's 2005 Annual Report on Form 10-K should be referred to in connection with these unaudited interim financial statements. As of December 31, 2004, the Company no longer met the requirements to qualify as a small business issuer as defined in Rule 12b-2 of the Securities Exchange Act of 1934 (the Exchange Act). All reports of the Company, beginning with the Form 10-Q for the quarter ended March 31, 2005, are presented in accordance with Regulation S-K. The Company, however, is not an accelerated filer as defined in Rule 12b-2 of the Exchange Act. As a result, the Company qualifies for the extended compliance period with respect to the accountants' report on management's assessment of internal control over financial reporting and management's annual report on internal control over financial reporting required by PCAOB Auditing Standards No.2.

Note 2 Earnings per share

The following reconciles the numerator and denominator of the basic and diluted earnings per share computation:

	<u>Nine months ended</u> <u>September 30,</u>		<u>Three months ended</u> <u>September 30,</u>	
	<u>2006</u>	<u>2005</u>	<u>2006</u>	<u>2005</u>
Numerator (Included in basic and diluted earnings per share)	\$ 2,640,513	\$ 2,238,747	\$ 902,906	\$ 751,658
Denominator				
Weighted average common shares				
Outstanding for:				
Basic earnings per share	3,041,824	2,830,055	3,267,820	2,840,814
Dilutive securities:

Diluted earnings per share	3,137,899	2,964,965	3,361,917	2,970,903
The average market price used in calculating assumed number of				
Shares	\$ 18.06	\$ 19.35	\$ 17.99	\$ 19.01

Note 3 Stock Based Compensation

In December 2004, the FASB issued SFAS No. 123 (revised), Share-Based Payment (SFAS 123(R)). SFAS 123(R) replaces SFAS No. 123, Accounting for Stock-Based Compensation (SFAS 123), and supersedes APB Opinion No. 25, Accounting for Stock Issued to Employees (APB 25). SFAS 123(R) requires compensation costs related to share-based payment transactions to be recognized in the financial statements over the period that an employee provides service in exchange for the award. Public companies are required to adopt, and the Company has adopted effective January 1, 2006, the new standard using a modified prospective method. Under the modified prospective method, companies are allowed to record compensation cost for new and modified awards over the related vesting period of such awards prospectively and record compensation cost prospectively on the nonvested portion, at the date of adoption, of previously issued and outstanding awards over the remaining vesting period of such awards. No change to prior periods presented is permitted under the modified prospective method.

At December 31, 2005, the Company had a stock-based payment plan for directors, officers and other key employees, which is described below. Prior to December 31, 2005, the Company, as permitted under SFAS 123, applied the intrinsic value method under APB 25, and related interpretations in accounting for its stock-based compensation plan.

Effective January 1, 2006, the Company adopted the provisions of SFAS 123(R) which requires expensing employee stock-based compensation using the fair value method prospectively for all awards granted, modified, or settled on or after January 1, 2006. The fair value at date of grant of the stock option is estimated using the Black-Scholes option-pricing model based on assumptions noted in a table below. The dividend yield is based on estimated future dividend yields. The risk-free rate for periods within the contractual term of the share option is based on the U.S. Treasury yield curve in effect at the time of grant. Expected volatilities are based on historical volatilities. The expected term of share options granted is generally derived from historical experience.

As of September 30, 2006 there was no unrecognized compensation cost related to non-vested share based compensation arrangements granted under the plan. There was no compensation cost recognized during the three and nine month periods ended September 30, 2006 as all options had vested prior to January 1, 2006.

The Company's stock option plan (the Plan), which was approved by shareholders, provides for stock options to be granted primarily to directors, officers and other key employees. Options granted under the stock option plan may be incentive stock options or non-incentive stock options. Share option awards have previously all been granted with an exercise price equal to the market price of the Company's shares at the date of grant. The shares reserved under the option plan at September 30, 2006 amounted to approximately 190,000 shares.

Effective December 31, 2005, the vesting period for approximately 67,000 options awarded during 2003, 2004 and 2005 that would otherwise vest at various times through fiscal 2010 was accelerated, as more fully described in note 15 of the 2005 Annual Report to Shareholders. All other terms and conditions of the accelerated options remained unchanged as a result of the acceleration.

There were no options granted under the option plan during the nine months ended September 30, 2006. There were 63,500 options granted to officers and employees during the nine months ended September 30, 2005. The assumptions used in estimating the weighted average fair value for these options (using the Black-Scholes pricing model) included dividend yield of 1.0%, volatility of 24.3%, risk free interest rate of 4.3% and an expected life of 8 years.

At December 31, 2005 there were 328,092 options outstanding and exercisable with a weighted average exercise price of \$11.87. During the nine months ended September 30, 2006, 98,438, options were exercised at an average exercise price of \$8.57. At September 30, 2006 there were 299,265 options outstanding and exercisable with a weighted average exercise price of \$13.29 (including 71,227 options assumed in connection with consummation of the merger with DeKalb Bancshares, Inc. (DeKalb) on June 9, 2006). Cash received during the nine months ended September 30, 2006 from share option exercises amounted to \$844,000.

In connection with the merger with DeKalb, the Company assumed the equivalent of 71,227 fully vested options issued to employees of DeKalb at an average exercise price of \$13.33.

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

Prior to adoption of SFAS 123R the Company used the intrinsic value method to account for stock options in accordance with Accounting Principles Board Opinion No. 25 Accounting for Stock Issued to Employees . The following summarizes pro-forma data in accordance with Statement of Financial Accounting Standards No. 123 Accounting for Stock Based Compensation for the nine and three months ended September 30, 2005.

	<u>Nine months</u> <u>ended September 30,</u> <u>2005</u>	<u>Three months</u> <u>ended September 30,</u> <u>2005</u>
Net income as reported	\$ 2,238,747	\$ 751,658
Less: Stock based compensation using fair value method (net of tax)	96,269	32,090
Pro forma net income	\$ 2,142,478	\$ 719,568
Basic earnings per share		
As reported	\$ 0.79	\$ 0.26
Pro forma	\$ 0.76	\$ 0.25
Diluted earnings per share

Pro forma	\$ 0.77	\$ 0.24

Note 4 Acquisition

On June 9, 2006, the Company acquired 100% of the outstanding shares of DeKalb Bancshares, Inc., the parent company of The Bank of Camden. In addition, The Bank of Camden was merged with and into the Company's wholly owned banking subsidiary, First Community Bank, NA, and the Camden office is now operated as a branch of First Community Bank. The aggregate acquisition cost was \$10,223,000 including \$2,369,000 of cash, 364,064 shares of the Company's common stock valued at \$7,577,000, stock options valued at \$585,000 and direct acquisition costs of \$277,000. The value of the 364,064 shares of common stock issued at \$19.22 per share was determined based on the average closing price of the Company's common shares over the two-day period before and after December 8, 2005 the date the terms were agreed to and announced.

The primary intangible assets acquired in conjunction with the purchase of DeKalb Bancshares, Inc. are core deposit intangible assets with an estimated useful life of approximately seven years and goodwill. The transaction was a tax-free reorganization for federal income tax purposes and intangible assets are not deductible in determining taxable income.

10

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed June 9, 2006. We obtained third party evaluations of certain intangible assets.

(Dollars in thousands)

Cash and cash equivalents	\$ 1,015
Federal funds sold	402
Investment securities	10,152
Loans, net of allowance	26,315
Premises and equipment	2,613
Core deposit intangible asset	522
Goodwill	4,903
Other assets	524
Total assets acquired	46,446

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

(Dollars in thousands)

Deposits	27,302
Advances from the Federal Home Loan Bank	4,939
Other borrowed money	2,977
Other liabilities	1,005

Total liabilities assumed	36,223

Net assets acquired	\$ 10,223

Note 5 Recently Issued Accounting Pronouncements

The following is a summary of recent authoritative pronouncements that could impact the accounting, reporting, and / or disclosure of financial information by the Company.

In February 2006, the FASB issued SFAS No. 155, Accounting for Certain Hybrid Financial Instruments an amendment of FASB Statements No. 133 and 140. This Statement amends SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, and SFAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. This Statement resolves issues addressed in SFAS No. 133 Implementation Issue No. D1, Application of Statement 133 to Beneficial Interests in Securitized Financial Assets. SFAS No. 155 is effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. The Company does not believe that the adoption of SFAS No. 155 will have a material impact on its financial position, results of operations and cash flows.

In March 2006, the FASB issued SFAS No. 156, Accounting for Servicing of Financial Assets an amendment of FASB Statement No. 140. This Statement amends FASB No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities, with respect to the accounting for separately recognized servicing assets and servicing liabilities. SFAS No. 156 requires an entity to recognize a servicing asset or servicing liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract; requires all separately recognized servicing assets and servicing liabilities to be initially measured at fair value, if practicable; permits an entity to choose its subsequent measurement methods for each class of separately recognized servicing assets and servicing liabilities; at its initial adoption, permits a one-time reclassification of available-for-sale securities to trading securities by entities with recognized servicing rights, without calling into question the treatment of other available-for-sale securities under Statement 115, provided that the available-for-sale securities are identified in some manner as offsetting the entity's exposure to changes in fair value of servicing assets or servicing liabilities that a servicer elects to subsequently measure at fair value; and requires separate presentation of servicing assets and servicing liabilities subsequently measured at fair value in the statement of financial position and additional disclosures for all separately recognized servicing assets and servicing liabilities. An entity should adopt SFAS No. 156 as of the beginning of its first fiscal year that begins after September 15, 2006. The Company does not believe the adoption of SFAS No. 156 will have a material impact on its financial position, results of operations and cash flows.

11

In July 2006, the FASB issued FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, Accounting for Income Taxes. FIN 48 prescribes a recognition threshold and measurement attributable for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosures and transitions. FIN 48 is effective for fiscal years beginning after December 15, 2006. The Company is currently analyzing the effects of FIN 48.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements." SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 is effective for the Company on January 1, 2008 and is not expected to have a significant impact on the Company's financial statements.

In September 2006, the FASB issued SFAS No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans (SFAS 158), which amends SFAS 87 and SFAS 106 to require recognition of the overfunded or underfunded status of pension and other postretirement benefit plans on the balance sheet. Under SFAS 158, gains and losses, prior service costs and credits, and any remaining transition amounts under SFAS 87 and SFAS 106 that have not yet been recognized through net periodic benefit cost will be recognized in accumulated other comprehensive income, net of tax effects, until they are amortized as a component of net periodic cost. The measurement date the date at which

the benefit obligation and plan assets are measured is required to be the company's fiscal year end. SFAS 158 is effective for publicly-held companies for fiscal years ending after December 15, 2006, except for the measurement date provisions, which are effective for fiscal years ending after December 15, 2008. The Company is currently analyzing the effects of SFAS 158 but does not expect its implementation will have a significant impact on the Company's financial conditions or results of operations.

In September, 2006, The FASB ratified the consensus reached by the FASB's Emerging Issues Task Force (EITF) relating to EITF 06-4 Accounting for the Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements. EITF 06-4 addresses employer accounting for endorsement split-dollar life insurance arrangements that provide a benefit to an employee that extends to postretirement periods should recognize a liability for future benefits in accordance with FASB Statement of Financial Accounting Standards (SFAS) No. 106, Employers' Accounting for Postretirement Benefits Other Than Pensions, or Accounting Principles Board (APB) Opinion No. 12, Omnibus Opinion 1967. EITF 06-4 is effective for fiscal years beginning after December 15, 2006. Entities should recognize the effects of applying this Issue through either (a) a change in accounting principle through a cumulative-effect adjustment to retained earnings or to other components of equity or net assets in the statement of financial position as of the beginning of the year of adoption or (b) a change in accounting principle through retrospective application to all prior periods. The Company is currently analyzing the effects of EITF 06-4 but does not believe the adoption of EITF 06-4 will have a material impact on its financial position, results of operations and cash flows.

On September 13, 2006, the SEC issued Staff Accounting Bulletin No. 108 (SAB 108). SAB 108 provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a potential current year misstatement. Prior to SAB 108, Companies might evaluate the materiality of financial statement misstatements using either the income statement or balance sheet approach, with the income statement approach focusing on new misstatements added in the current year, and the balance sheet approach focusing on the cumulative amount of misstatement present in a company's balance sheet. Misstatements that would be material under one approach could be viewed as immaterial under another approach, and not be corrected. SAB 108 now requires that companies view financial statement misstatements as material if they are material according to either the income statement or balance sheet approach. The Company has analyzed SAB 108 and determined that upon adoption it will have no impact on the reported results of operations or financial conditions.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies are not expected to have a material impact on the Company's financial position, results of operations and cash flows.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Report contains statements which constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements are based on many assumptions and estimates and are not guarantees of future performance. Our actual results may differ materially from those projected in any forward-looking statements, as they will depend on many factors about which we are unsure, including many factors, which are beyond our control. The words may, would, could, will, expect, anticipate, believe, intend, plan, and estimate, as well as similar expressions, are meant to identify such forward-looking statements. Potential risks and uncertainties include, but are not limited to those described below under Item 1A- Risk Factors and the following:

- the businesses of First Community and DeKalb Bancshares may not be integrated successfully or such integration may take longer to accomplish than expected;
- the expected cost savings and any revenue synergies from the merger may not be fully realized within the expected timeframes;
- significant increases in competitive pressure in the banking and financial services industries;
- changes in the interest rate environment which could reduce anticipated or actual margins;
- changes in political conditions or the legislative or regulatory environment;
- general economic conditions, either nationally or regionally and especially in our primary service area, becoming less favorable than expected resulting in, among other things, a deterioration in credit quality;
- changes occurring in business conditions and inflation;
- changes in technology;
- the level of allowance for loan loss;
- the rate of delinquencies and amounts of charge-offs;
- the rates of loan growth;
- adverse changes in asset quality and resulting credit risk-related losses and expenses;
- changes in monetary and tax policies;
- loss of consumer confidence and economic disruptions resulting from terrorist activities;
- changes in the securities markets; and
- other risks and uncertainties detailed from time to time in our filings with the Securities and Exchange Commission.

Overview

The following discussion describes the our results of operations for the three and nine month periods ended September 30, 2006, as compared to the three and nine month periods ended September 30, 2005, and also analyzes our financial condition as of September 30, 2006 as compared to December 31, 2005. Like most community banks, we derive most of our income from interest we receive on our loans and investments. Our primary source of funds for making these loans and investments is our deposits, on which we pay interest. Consequently, one of the key measures of our success is our amount of net interest income, or the difference between the income on our interest-earning assets, such as loans and investments, and the expense on our interest-bearing liabilities, such as deposits. Another key measure is the spread between the yield we earn on these interest-earning assets and the rate we pay on our interest-bearing liabilities. Of course, there are risks inherent in all loans, so we maintain an allowance for loan losses to absorb probable losses on existing loans that may become uncollectible. We establish and maintain this allowance by charging a provision for loan losses against our operating earnings. In the following section we have included a detailed discussion of this process. In addition to earning interest on our loans and investments, we earn income through fees and other expenses we charge to our customers. We describe the various components of this non-interest income, as well as our non-interest expense, in the following discussion.

The following discussion and analysis also identifies significant factors that have affected our financial position and operating results during the periods included in the accompanying financial statements. We encourage you to read this discussion and analysis in conjunction with the financial statements and the related notes and the other statistical information also included in this report.

Critical Accounting Policies

We have adopted various accounting policies that govern the application of accounting principles generally accepted in the United States and with general practices within the banking industry in the preparation of our financial statements. Our significant accounting policies are described in the footnotes to our audited consolidated financial statements as of December 31, 2005, as filed in our annual report on Form 10-K

Certain accounting policies involve significant judgments and assumptions by us that have a material impact on the carrying value of certain assets and liabilities. We consider these accounting policies to be critical accounting policies. The judgments and assumptions we use are based on historical experience and other factors, which we believe to be reasonable under the circumstances. Because of the nature of the judgments and assumptions we make, actual results could differ from these judgments and estimates that could have a material impact on the carrying values of our assets and liabilities and our results of operations.

We believe the allowance for loan losses is the critical accounting policy that requires the most significant judgments and estimates used in preparation of our consolidated financial statements. Some of the more critical judgments supporting the amount of our allowance for loan losses include judgments about the credit worthiness of borrowers, the estimated value of the underlying collateral, the assumptions about cash flow, determination of loss factors for estimating credit losses, the impact of current events, and conditions, and other factors impacting the level of probable inherent losses. Under different conditions or using different assumptions, the actual amount of credit losses incurred by us may be different from management's estimates provided in our consolidated financial statements. Refer to the portion of this discussion that addresses our allowance for loan losses for a more complete discussion of our processes and methodology for determining our allowance for loan losses.

Merger Completed on June 9, 2006

On June 9, 2006 we consummated our acquisition of DeKalb Bancshares, Inc. (DeKalb), the parent company of The Bank of Camden. In addition, The Bank of Camden was merged with and into our wholly owned banking subsidiary, First Community Bank, NA, and the Camden office is now operated as a branch of First Community Bank. Pursuant to the merger, we issued 364,064 shares of common stock valued at \$7.6 million and paid \$2.4 million in cash to shareholders of DeKalb. Other cost related to the merger included stock options valued at \$585,000 and direct acquisition cost of \$277,000. Periods prior to June 9, 2006 do not include the effect of the merger and, as a result, the discussion of the nine and three months ended September 30, 2005 does not reflect any results from the former DeKalb.

Comparison of Results of Operations for Nine Months Ended September 30, 2006 to the Nine Months Ended September 30, 2005:Net Income

Our net income for the nine months ended September 30, 2006 was \$2.6 million, or \$.84 diluted earnings per share, as compared to \$2.2 million, or \$.76 diluted earnings per share, for the nine months ended September 30, 2005. The increase in net income is due to an increase in net interest income due to additional earning assets as well as an increase in non-interest income. These increases were somewhat offset by an increase in

non-interest expense during the two periods. Average earning assets were \$430.9 million during the nine months ended September 30, 2006 as compared to \$390.4 million during the nine months ended September 30, 2005. The increase in average earning assets resulted in an increase in net interest income of \$912,000 in the first nine months of 2006 as compared to the first nine months of 2005. Non-interest income increased \$1.2 million in the first nine months of 2006 as compared to the same period of 2005. Non-interest expense increased \$1.2 million in the first nine months of 2006 as compared to the first nine months of 2005.

The table on page 23 shows yield and rate data for interest-bearing balance sheet components during the nine month periods ended September 30, 2006 and 2005, along with average balances and the related interest income and interest expense amounts. Net interest income was \$10.5 million for the nine months ended September 30, 2006 as compared to \$9.6 million for the nine months ended September 30, 2005. This again was primarily due to increase in the level of earning assets. The yield on earning assets increased by 81 basis points due to the continued increasing short-term interest rate environment throughout 2005 and continuing into the first half of 2006. In addition, we continue to make progress in changing the mix of the earning asset portfolios. The investment portfolio and short term investments represented 43.8% of the average interest earning assets in the

14

nine months ended September 30, 2006 as compared to 49.4% during the comparable period in 2005. Since the consummation of the merger with DutchFork Bankshares, Inc. in October 2004 our objective has been to increase the percentage of earning assets in the loan portfolio as compared to other earning assets. This began by restructuring the investment portfolio in late 2004 and early 2005 in order to shorten the maturity and purchase investments that provided ongoing cash flow. Yields on loans are typically higher than yields on other types of earning assets and thus one of our goals continues to be to grow the loan portfolio as a percentage of earning assets.

The yield on earning assets for the nine months ended September 30, 2006 and 2005 was 6.13% and 5.32%, respectively. The cost of interest-bearing liabilities during the first nine months of 2006 was 3.23% as compared to 2.25% in the same period of 2005. The increase in the cost of interest-bearing liabilities was a result of increasing interest rates throughout 2005 and the first nine months of 2006. The net interest margin was 3.27% for the nine months ended September 30, 2006 and 3.30% for the nine months ended September 30, 2005. On a fully taxable equivalent basis the net interest margin was 3.36% and 3.44% for the nine months ended September 30, 2006 and 2005, respectively.

Provision and Allowance for Loan Losses

At September 30, 2006 the allowance for loan losses amounted to \$3.3 million, or 1.21% of total loans, as compared to \$2.7 million, or 1.22% of total loans, at December 31, 2005. In the merger with DeKalb, we acquired an allowance for loan losses of \$320,000. In December 2003, the Accounting Standards Executive Committee (AcSEC) issued Statement of Position No. 03-3 (SOP No. 03-3), Accounting for Certain Loans or Debt Securities Acquired in a Transfer. SOP No. 03-3 addresses accounting for differences between contractual cash flows and cash flows expected to be collected from an investor's initial investment in loans or debt securities (loans) acquired in a transfer or business combination if those differences are attributable, at least in part, to credit quality. SOP No. 03-3 prohibits the carry over or creation of valuation allowances in the initial accounting of all loans acquired that are within the scope of the SOP. SOP No. 03-3 was effective for loans acquired in years beginning after December 15, 2004. At the date of our acquisition of DeKalb the acquired loan portfolio had no loans that were impaired and none that were delinquent greater than 30 days. Therefore, there were no loans acquired that were deemed to be within the scope of SOP No. 03-3.

Our provision for loan loss was \$389,000 for the nine months ended September 30, 2006, as compared to \$217,000 for the nine months ended September 30, 2005. The provision is made based on our assessment of general loan loss risk and asset quality. The allowance for loan losses represent an amount which we believe will be adequate to absorb probable losses on existing loans that may become uncollectible. Our judgment as to the adequacy of the allowance for loan losses is based on a number of assumptions about future events, which we believe to be reasonable, but which may or may not prove to be accurate. Our determination of the allowance for loan losses is based on evaluations of the collectibility of loans, including consideration of factors such as the balance of impaired loans, the quality, mix, and size of our overall loan portfolio, economic conditions that may affect the borrower's ability to repay, the amount and quality of collateral securing the loans, our historical loan loss experience, and a review of specific problem loans. We also consider subjective issues such as changes in the lending policies and procedures, changes in the local/national economy, changes in volume or type of credits, changes in volume/severity of problem loans, quality of loan review and board of director oversight, concentrations of credit. Periodically, we adjust the amount of the allowance based on changing circumstances. We charge recognized losses to the allowance and add subsequent recoveries back to the allowance for loan losses.

We perform an analysis quarterly to assess the risk within the loan portfolio. The portfolio is segregated into similar risk components for which historical loss ratios are calculated and adjusted for identified changes in current portfolio characteristics. Historical loss ratios are calculated by product type and by regulatory credit risk classification. The allowance consists of an allocated and unallocated allowance. The allocated portion is determined by types and ratings of loans within the portfolio. The unallocated portion of the allowance is established for losses that exist in the remainder of the portfolio and compensates for uncertainty in estimating the loan losses.

There can be no assurance that charge-offs of loans in future periods will not exceed the allowance for loan losses as estimated at any point in time or that provisions for loan losses will not be significant to a particular accounting period. The allowance is also subject to examination and testing for adequacy by regulatory agencies, which may consider such factors as the methodology used to determine adequacy and the size of the allowance relative to that of peer institutions. Such regulatory agencies could require us to adjust our allowance based on information available to them at the time of their examination.

At September 30, 2006 we had \$51,000 loans delinquent more than 90 days and still accruing interest, and loans totaling \$2.4 million that were delinquent 30 days to 89 days. We had three loans in a nonaccrual status in the amount of \$46,000 at September 30, 2006. Our management continuously monitors non-performing, classified and past due loans, to identify deterioration regarding the condition of these loans. We identified 8 loans in the amount of \$282,000 that are current as to principal and interest and not included in non-performing assets that could be potential problem loans. Also included in loans 30 to 89 days delinquent is one loan relationship in the amount of approximately \$1.5 million which has subsequently become delinquent greater than 90 days. This loan is secured by commercial real estate with a loan-to-value of approximately 60%. Management does not anticipate that there will be any loss of principal or interest if this loan ultimately goes into foreclosure.

Allowance for Loan Losses

<i>(Dollars in thousands)</i>	Nine Month Ended	
	September 30,	
	2006	2005
Average loans outstanding	\$ 242,263	\$ 197,473

Unallocated	176	N/A	75	N/A
Total	\$ 3,252	100.0%	\$ 2,701	100.0%

Accrual of interest is discontinued on loans when management believes, after considering economic and business conditions and collection efforts that a borrower's financial condition is such that the collection of interest is doubtful. A delinquent loan is generally placed in nonaccrual status when it becomes 90 days or more past due. At the time a loan is placed in nonaccrual status, all interest, which has been accrued on the loan but remains unpaid is reversed and deducted from earnings as a reduction of reported interest income. No additional interest is accrued on the loan balance until the collection of both principal and interest becomes reasonably certain.

Non-interest Income and Non-interest Expense

Non-interest income during the first nine months of 2006 was \$3.4 million as compared to \$2.2 million during the same period in 2005. The growth in non-interest income consisted of increases in deposit service charges of \$853,000, mortgage origination fees of \$95,000, commissions on the sale of non-deposit investment products of \$104,000. The increase in non-interest-income includes an increase in the Other category of \$249,000. This reflects an increase in ATM debit card fees transaction and surcharge fees of \$99,000 and an increase in the value of bank owned life insurance of \$98,000. The increase in deposit service charges as well as ATM transaction and surcharge fees resulted from an increase in deposit balances and number of accounts between the two periods. In addition, during the fourth quarter of 2005 we introduced a formalized overdraft privilege program, which contributed to the increase in deposit service charges in the first nine months of 2006 as compared to the same period in 2005. Mortgage origination fees increased due to the continued relatively low mortgage loan rate environment as well as continued emphasis on this source of revenue. The increase in commissions on the sale of non-deposit investment products also resulted from a continued emphasis on this source of revenue. During the first nine months of 2005 we realized gains on the sale of securities in the amount of \$188,000 as compared to a loss of \$69,000 during the same period of 2006. The proceeds from the sale of securities in the first quarter of 2006 were used to pay down approximately \$5.0 million in a Federal Home Loan Bank advance, which resulted in a gain on the early extinguishment of debt of \$159,000. These advances were acquired in the DutchFork merger. Non-interest income also increased in the first nine months of 2006 as a result of recognizing the increase in the market value of the interest rate cap agreement acquired in the third quarter of 2005 and an

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

interest rate floor agreement entered into in July 2006, discussed further in the **Market Risk Management** section.

Total non-interest expense increased by \$1.2 million during the first nine months of 2006 as compared to the same period of 2005. Salaries and employee benefits increased \$481,000 in the nine months ended September 30, 2006 as compared to the same period in 2005. We had 131 full time equivalent employees at September 30, 2006 as compared to 121 full time equivalents at September 30, 2005. Eleven employees were added as a result of the acquisition of the Bank of Camden. Occupancy expense increased \$121,000 during the first nine months of 2006 as compared to the same period in 2005. In July 2006 we moved into a newly constructed 27,000 square foot administrative center adjacent to the main office facility. The new administrative facility provided space to consolidate various administrative and operation functions that had previously been

17

located in several branch and leased facilities. In addition, the acquisition of The Bank of Camden branch facility contributed to the increased occupancy cost in the first nine months of 2006. There was a \$614,000 increase in other expenses in the first nine months of 2006 as compared to the same period in 2005. This increase primarily resulted from an increase of \$296,000 in consulting and professional fees, \$76,000 in telephone and data communication expenses and \$45,000 in ATM and debit card processing fees. Professional fees increased primarily as a result of \$220,000 in fees associated with implementing the formal overdraft protection program. These costs are based on increased monthly fee income over a one year period ending in January 2007. Telephone and data communication expenses increased as a result of upgrading and improving the bank's wide area network. ATM and debit card processing fees as well as other expenses increased as a result of the continued asset growth of the bank and the growth in the number of accounts.

The following is a summary of the components of other non-interest expense:

(In thousands)	Nine months ended September 30,	
	2006	2005
ATM/debit card processing	\$ 192	\$ 147
Supplies	190	183
Telephone	288	212
Correspondent services	128	125
Insurance	187	181
Postage	121	118
Professional fees	565	269
Other	640	462
	\$ 2,311	\$ 1,697

Income Tax Expense

Our effective tax rate was to 29.7% in the first nine months of 2006 as compared to 25.4% during the same period of 2005. The increase in the effective tax rate is primarily a result of the sale of certain available-for-sale investments, during the first quarter of 2006. The investments paid dividends, a portion of which were non-taxable for federal tax purposes. Our effective tax rate is currently expected to remain between 30.0% to 32.0% throughout the remainder of 2006.

Comparison of Results of Operations for Three Months Ended September 30, 2006 to the Three Months Ended September 30, 2005:

Net Income

Net income for the third quarter of 2006 was \$903,000, or \$0.27 per diluted share, as compared to \$752,000, \$0.25 per diluted share during the comparable period in 2005. Net interest income increased by \$544,000 for the three months ended September 30, 2006 from \$3.2 million in 2005 to \$3.8 million in 2006. The increase in net interest income is primarily due to an increase in the level of average earning assets. Average earning assets were \$454.5 million during the third quarter of 2006 as compared to \$396.8 million during the third quarter of 2005. The table on page 24 shows yield and rate data for interest-bearing balance sheet components during the three month periods ended September 30, 2006 and 2005, along with average balances and the related interest income and interest expense amounts. The yield on average earning assets increased to 6.36% in the third quarter of 2006 as compared to 5.43% in the third quarter of 2005. The cost of interest bearing liabilities also increased to 3.46% in third quarter of 2006 as compared to 2.50% in the third quarter of 2005. The net interest margin was 3.27% for the three months ended September 30, 2006 and 3.21% for the three months ended September 30, 2005. On a fully taxable equivalent basis the net interest margin was

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

3.36% and 3.34% for the three months ended September 30, 2006 and 2005, respectively.

Non-interest Income and Non-interest Expense

Non-interest income increased by \$294,000 from \$782,000 for the three months ended September 30, 2005 to \$1.1 million in the same period of 2006. Deposit service charges increased by \$316,000 as a result of the introduction of the formal overdraft protection program discussed earlier. Slower activity in sales of non-deposit investment products resulted in a decrease of \$40,000 of this fee income for the third quarter of 2006 as compared to the same period in 2005.

18

Total non-interest expense increased by \$493,000 in the third quarter of 2006 as compared to the same quarter of 2005. This results from an increase in all categories primarily resulting from the acquisition of the merger with DeKalb. The DeKalb merger direct incremental increases of approximately \$135,000 in salaries and benefits, \$30,000 in occupancy, \$25,000 in equipment and \$48,000 in other expenses. In addition, indirect increases as a result of higher account volumes and operational support contributed to the increase in non-interest expense. Increased occupancy expense also reflects the additional cost associated with the move into the new Administrative building. The increase in other expenses also reflects approximately \$75,000 in consulting and professional fees associated with the implementation of the overdraft protection program. These fees will be payable through January 2007 and as a result will continue throughout the balance of 2006 in relation to comparable periods in 2005.

Financial Position

Assets totaled \$532.0 million at September 30, 2006 as compared to \$467.5 million at December 31, 2005, an increase of \$64.6 million, or 13.8%. The merger with DeKalb, which was consummated on June 9, 2006, accounted for approximately \$46.4 million of this increase. Short-term investments (Federal funds sold and securities purchased under agreements to resell and interest-bearing bank balances) grew \$1.7 million during the first nine months of 2006 from \$1.2 million at December 31, 2005 to \$2.9 million at September 30, 2006. Loans grew by \$48.1 million during the nine months ended September 30, 2006 from \$221.7 million at December 31, 2005 to \$269.8 million at September 30, 2006. Organic growth (increases excluding the impact of the DeKalb merger) accounted for approximately \$21.6 million (13.0% annualized) of this increase in loans. At September 30, 2006, loans accounted for 59.6% of earning assets, as compared to 55.5% at December 31, 2005. The loan to deposit ratio at September 30, 2006 was 67.6% as compared to 63.4% at December 31, 2005. Investment securities increased from \$176.4 million at December 31, 2005 to \$179.8 million at September 30, 2006. We acquired approximately \$10.2 million in investment securities as a result of the DeKalb merger. Throughout balance of 2006 and into 2007, we will continue to focus on investing more of our assets in the higher earning loan portfolio as compared to the investment portfolio. Associated with the higher loan yields are the inherent credit and liquidity risks, which we attempt to control and counterbalance. We are committed to achieving our asset mix goals without sacrificing asset quality. The increase in earning assets was primarily funded by a \$22.3 million (8.4% annualized) organic deposit growth from December 31, 2005 to September 30, 2006. In addition, we acquired approximately \$27.3 million in deposit accounts in the DeKalb merger. Securities sold under agreements to repurchase increased \$7.5 million from \$13.8 million at December 31, 2005 to \$21.3 million at September 30, 2006. These agreements are substantially all with customers that have other relationships have historically been a predictable and stable funding source. We currently do not accept brokered deposits and therefore our balance sheet continues to be primarily funded from deposit relationships within the markets we serve.

The following table shows the composition of the loan portfolio by category:

(In thousands)	<u>September 30,</u>		<u>December 31,</u>	
	<u>2006</u>		<u>2005</u>	
	<u>Amount</u>	<u>Percent</u>	<u>Amount</u>	<u>Percent</u>

Total net loans	\$ 266,521	\$ 218,967

In the context of this discussion, a real estate mortgage loan is defined as any loan, other than loans for construction purposes and advances on home equity lines of credit, secured by real estate, regardless of the purpose of the loan. Advances on home equity lines of credit are included in consumer loans. We follow the common practice of financial institutions in our market areas of obtaining a security interest in real estate whenever possible, in addition to any other available collateral. This collateral is taken to reinforce the likelihood of the ultimate repayment of the loan and tends to increase the magnitude of the real estate loan components. Generally, we limit the loan-to-value ratio to 80%.

Market Risk Management

The effective management of market risk is essential to achieving our strategic financial objectives. Our most significant market risk is interest rate risk. We have established an Asset/Liability Management Committee (ALCO) to monitor and manage interest rate risk. The ALCO monitors and manages the pricing and maturity of assets and liabilities in order to diminish the potential adverse impact that changes in interest rates could have on net interest income. The ALCO has established policy guidelines and strategies with respect to interest rate risk exposure and liquidity.

A monitoring technique employed by the ALCO is the measurement of interest sensitivity gap, which is the positive or negative dollar difference between assets and liabilities that are subject to interest rate repricing within a given period of time. Also, asset/liability simulation modeling is performed to assess the impact varying interest rates and balance sheet mix assumptions will have on net interest income. Interest rate sensitivity can be managed by repricing assets or liabilities, selling securities available-for-sale, replacing an asset or liability at maturity or by adjusting the interest rate during the life of an asset or liability. Managing the amount of assets and liabilities repricing in the same time interval helps to hedge the risk and minimize the impact on net interest income of rising or falling interest rates.

We are currently liability sensitive within one year. However, neither the gap analysis nor asset/liability modeling is a precise indicator of the interest sensitivity position of the company due to the many factors that affect net interest income including changes in the volume and mix of earning assets and interest-bearing liabilities. Net interest income is also impacted by other significant factors, including changes in the volume and mix of earning assets and interest-bearing liabilities. Through simulation modeling, we monitor the effect that an immediate and sustained change in interest rates of 100 basis points and 200 basis points up and down will have on net-interest income over the next twelve months.

During the quarter ended September 30, 2005, we entered into an interest rate cap agreement with a notional amount of \$10.0 million expiring on September 1, 2009. The cap rate of interest is 4.50% and the index is the three-month LIBOR. During the three months ended September 30, 2006 we entered into an interest rate floor agreement with a notional amount of \$10.0 million expiring on August 1, 2011. The floor rate of interest is 5.00% and the index is the three month LIBOR. These agreements provide for a payment to us of the difference between the cap or floor rate of interest and the market rate of interest. Our exposure to credit risk is limited to the ability of the counter party to make potential future payments required pursuant to the agreement. Our exposure to market risk of loss is limited to the market value of the cap and the floor. At September 30, 2006, the market value of this cap was \$193,000 and the market rate of the floor was \$224,000. The gain or loss on the value of this contract is recognized in earnings on a current basis. We received payments of approximately \$27,000 in the first nine months of 2006 under the terms of the cap contract. No payments have been received under the terms of the floor agreement. During the nine months ended September 30, 2006, we recognized no gain or loss on the cap agreement and a gain of \$63,000 in the floor agreement was recognized in other income to reflect the increase in the value of the floor contract.

Based on the many factors and assumptions used in simulating the effect of changes in interest rates, the following table estimates the percentage change in net interest income at September 30, 2006, June 30, 2006, March 31, 2006 and December 31, 2005 over the subsequent twelve months.

Net Interest Income Sensitivity

Change in short-term interest rates	September 30, 2006	June 30, 2006	March 31, 2006	December 31, 2005

Flat	-	-	-	-
-100bp	+0.18%	+0.30%	-1.46%	-2.79%
-200bp	-2.75%	-2.46%	-6.65%	-8.30%

20

As a result of the size of the investment portfolio that was acquired in the DutchFork merger and the amount and type of fixed rate longer-term investments that were in the portfolio, we emphasized restructuring the portfolio beginning in the fourth quarter of 2004 and continuing into the first quarter of 2005. The purpose was to shorten the average life of the portfolio and acquire investments that provided cash flow and/or were adjustable rate instruments. Although this resulted in a reduction in investment yield, we believe that the restructuring positioned us more appropriately for interest rate volatility and continues to provide a significant amount of additional cash flow to fund desired loan growth.

We also perform a valuation analysis projecting future cash flows from assets and liabilities to determine the Present Value of Equity (PVE) over a range of changes in market interest rates. The sensitivity of PVE to changes in interest rates is a measure of the sensitivity of earnings over a longer time horizon. At September 30, 2006 the PVE exposure in a plus 200 basis point increase in market interest rates was estimated to be 11.1% as compared to 10.1% at June 30, 2006, 8.4% at March 31, 2006 and 8.0% at December 31, 2005.

Liquidity and Capital Resources

Our liquidity remains adequate to meet operating and loan funding requirements. Federal funds sold and investment securities available-for-sale represented 33.1% of total assets at September 30, 2006. We believe that our existing stable base of core deposits along with continued growth in this deposit base will enable us to meet our long-term and short-term liquidity needs successfully. These needs include the ability to respond to short-term demand for funds caused by the withdrawal of deposits, maturity of repurchase agreements, extensions of credit and for the payment of operating expenses. Sources of liquidity in addition to deposit gathering activities include maturing loans and investments, purchase of federal funds from other financial institutions and selling securities under agreements to repurchase. We monitor closely the level of large certificates of deposits in amounts of \$100,000 or more as they tend to be more sensitive to interest rate levels, and thus less reliable sources of funding for liquidity purposes. At September 30, 2006, the amount of certificates of deposits of \$100,000 or more represented 20.6% of total deposits. These deposits are issued to local customers, many of whom have other product relationships with the bank. In the past, we have not funded assets with brokered deposits. At September 30, 2006 we had no brokered deposits.

Through the operations of our bank, we have made contractual commitments to extend credit in the ordinary course of our business activities. These commitments are legally binding agreements to lend money to our customers at predetermined interest rates for a specified period of time. At September 30, 2006, we had issued commitments to extend credit of \$43.2 million, including \$23.2 million in unused home equity lines of credit, through various types of lending arrangements. We evaluate each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by us upon extension of credit, is based on our credit evaluation of the borrower. Collateral varies but may include accounts receivable, inventory, property, plant and equipment, commercial and residential real estate. We manage the credit risk on these commitments by subjecting them to normal underwriting and risk management processes.

We are not aware of any trends, events or uncertainties that may result in a significant adverse effect on our liquidity position. However, no assurances can be given in this regard, as rapid growth, deterioration in loan quality, and poor earnings, or a combination of these factors, could change the liquidity position in a relatively short period of time.

With the successful completion of the common stock offering in 1995, the secondary offering completed in 1998, and the trust preferred offering completed in September 2004, we have maintained a high level of liquidity that has been adequate to meet planned capital expenditures, as well as providing the necessary cash requirements needed for operations.

Total shareholders' equity as of September 30, 2006 was \$61.7 million as compared to \$50.8 million at December 31, 2005. During the first, second and third quarter of 2006 we paid a \$.05, \$.06 and \$.06 per share dividend, respectively. We anticipate that the bank will remain a well-capitalized institution.

On June 21, 2006, we approved a new plan to repurchase up to 150,000 shares of the First Community's common stock, or approximately 4.5% of the issued and outstanding shares of First Community, on the open market. The timing, price and quantity of purchases under the plan will be at the discretion of management and the plan may be discontinued, suspended or restarted at any time depending on the facts and circumstances. We believe the repurchase plan, depending upon market and business conditions, will provide capital management opportunities and build value for our shareholders. During the third quarter of 2006 we repurchased 54,600 shares of common stock at an average purchase price of \$17.84. The total amount of the repurchases amounted to \$974,000.

The Federal Reserve Board and bank regulatory agencies require bank holding companies and financial institutions to maintain capital at adequate levels based on a percentage of assets and off-balance sheet exposures, adjusted for risk weights ranging from 0% to 100%. Under the capital adequacy guidelines, regulatory capital is classified into two tiers. These guidelines require an institution to maintain a certain level of Tier 1 and Tier 2 capital to risk-weighted assets. Tier 1 capital consists of common shareholders' equity, excluding the unrealized gain or loss on securities available for sale, minus certain intangible assets. In determining the amount of risk-weighted assets, all assets, including certain off-balance sheet assets, are multiplied by a risk-weight factor of 0% to 100% based on the risks believed to be inherent in the type of asset. Tier 2 capital consists of Tier 1 capital plus the general reserve for loan losses, subject to certain limitations. We are also required to maintain capital at a minimum level based on total average assets, which is known as the Tier 1 leverage ratio. At both the holding company and bank level, we are subject to various regulatory capital requirements administered by the federal banking agencies. To be considered well-capitalized, we must maintain total risk-based capital of at least 10%, Tier 1 capital of at least 6%, and a leverage ratio of at least 5%.

The bank's risk-based capital ratios of Tier 1, total capital and leverage ratio were 12.2%, 13.1% and 8.3%, respectively at September 30, 2006 as compared to 11.8%, 12.6% and 8.2%, respectively at December 31, 2005. The company's risk-based capital ratios of Tier 1, total capital and leverage ratio were 13.3%, 14.3% and 9.1%, respectively at September 30, 2006 as compared to 13.2%, 14.1% and 9.3%, respectively at December 31, 2005. This compares to required OCC and Federal Reserve regulatory capital guidelines for Tier 1 capital, total capital and leverage capital ratios of 4.0%, 8.0% and 4.0%, respectively.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes in our quantitative and qualitative disclosures about market risk as of September 30, 2006 from that presented in our annual report on Form 10-K for the year ended December 31, 2005. See Market Risk Management in Item 2, Management Discussion and Analysis of Financial Condition and Results of Operations, for quantitative and qualitative disclosures about market risk, which information is incorporated herein by reference.

24

Item 4. Controls and Procedures

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our current disclosure controls and procedures are effective as of September 30, 2006. There have been no significant changes in our internal controls over financial reporting during the fiscal quarter ended September 30, 2006 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

The design of any system of controls and procedures is based in part upon certain assumptions about the likelihood of future events. There can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how remote.

PART II
OTHER INFORMATION

Item 1. Legal Proceedings

There are no material pending legal proceedings to which the company or any of its subsidiaries is a party or of which any of their property is the subject.

Item 1A. Risk Factors

There were no material changes from the risk factors presented in our annual report on Form 10-K for the year ended December 31, 2005.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On June 21, 2006, our board of directors approved a new plan to repurchase up to 150,000 shares of our common stock on the open market. The following table reflects share repurchase activity during the third quarter of 2006:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs

			Total Number of	
July 1, 2006 - July 31, 2006	10,000	\$ 17.80	10,000	140,000
August 1, 2006 - August 31, 2006	32,700	\$ 17.79	32,700	107,300
September 1, 2006 to September 30, 2006	11,900	\$ 17.98	11,900	95,400
Total	54,600	\$ 17.84	54,600	95,400
