Item 2.02 Results of Operations and Financial Condition

On July 29, 2010, Kennametal Inc. (Kennametal or the Company) issued an earnings announcement for its fiscal fourth quarter ended June 30, 2010.

The press release contains certain non-generally accepted accounting principles (GAAP) financial measures. The following GAAP financial measures have been presented on an adjusted basis: gross profit, operating expense, operating income (loss), Corporate operating loss, Metalworking Sales and Services Group (MSSG) operating income (loss) and margin, Advanced Materials Solutions Group (AMSG) operating income and margin, income (loss) from continuing operations, net income (loss) and diluted earnings (loss) per share. Adjustments include: (1) restructuring and related charges for the three and twelve months ended June 30, 2010 and 2009, respectively (2) loss on divestiture and related charges for the three months ended June 30, 2009 and the twelve months ended June 30, 2010 and 2009, respectively, and (3) asset impairment charges for the twelve months ended June 30, 2009. Management adjusts for these items in measuring and compensating internal performance and to more readily compare the Company's financial performance period-to-period. The press release also contains free operating cash flow, which is also a non-GAAP measure and is defined below.

Management believes that presentation of these non-GAAP financial measures provides useful information about the results of operations of the Company for the current and past periods. Management believes that investors should have available the same information that management uses to assess operating performance, determine compensation and assess the capital structure of the Company. These non-GAAP measures should not be considered in isolation or as a substitute for the most comparable GAAP measures. Investors are cautioned that non-GAAP financial measures utilized by the Company may not be comparable to non-GAAP financial measures used by other companies.

Free Operating Cash Flow

Free operating cash flow is a non-GAAP financial measure and is defined by the Company as cash provided by operations (which is the most directly comparable GAAP measure) less capital expenditures plus proceeds from disposals of fixed assets. Management considers free operating cash flow to be an important indicator of Kennametal's cash generating capability because it better represents cash generated from operations that can be used for dividends, debt repayment, strategic initiatives (such as acquisitions), and other investing and financing activities.

A copy of the Company's earnings announcement is furnished under Exhibit 99.1 attached hereto. Reconciliations of the above non-GAAP financial measures are included in the earnings announcement.

Additionally, during our quarterly earnings teleconference we may use various non-GAAP financial measures to describe the underlying operating results. Accordingly, we have compiled below certain reconciliations as required by Regulation G. These non-GAAP measures should not be considered in isolation or as a substitute for the most comparable GAAP measures. Investors are cautioned that non-GAAP financial measures utilized by the Company may not be comparable to non-GAAP financial measures used by other companies.

Debt to Capital

Debt to capital is a non-GAAP financial measure and is defined by Kennametal as total debt divided by the sum of total Kennametal shareowners' equity plus noncontrolling interest plus total debt. The most directly comparable GAAP measure is debt to equity, which is defined as total debt divided by shareowners' equity. Management believes that debt to capital provides additional insight into the underlying capital structuring and performance of the Company.
