CAPITAL SENIOR LIVING CORPORATION
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2010

1. BASIS OF PRESENTATION

Capital Senior Living Corporation, a Delaware corporation (together with its subsidiaries, the Company), is one of the largest operators of senior living communities in the United States in terms of resident capacity. The Company owns, operates, develops and manages senior living communities throughout the United States. As of September 30, 2010, the Company operated 78 senior living communities in 23 states with an aggregate capacity of approximately 11,000 residents, including 32 senior living communities which the Company either owned or in which the Company had an ownership interest, 45 senior living communities that the Company leased and one senior living community it managed for a third party. As of September 30, 2010, the Company also operated one home care agency. The accompanying consolidated financial statements include the financial statements of Capital Senior Living Corporation and its wholly owned subsidiaries. All material intercompany balances and transactions have been eliminated in consolidation. The Company accounts for significant investments in unconsolidated companies, in which the Company has significant influence, using the equity method of accounting.

The accompanying consolidated balance sheet, as of December 31, 2009, has been derived from audited consolidated financial statements of the Company for the year ended December 31, 2009, and the accompanying unaudited consolidated financial statements, as of September 30, 2010 and 2009, have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and note disclosures normally included in the annual financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to those rules and regulations. For further information, refer to the financial statements and notes thereto for the year ended December 31, 2009 included in the Company's Annual Report on Form 10-K filed with the SEC on March 11, 2010.

In the opinion of the Company, the accompanying consolidated financial statements contain all adjustments (all of which were normal recurring accruals) necessary to present fairly the Company's financial position as of September 30, 2010, results of operations for the three and nine months ended September 30, 2010 and 2009, respectively, and cash flows for the nine months ended September 30, 2010 and 2009. The results of operations for the nine months ended September 30, 2010 are not necessarily indicative of the results for the year ending December 31, 2010.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments in Joint Ventures

The Company accounts for its investments in joint ventures under the equity method of accounting. The Company owns member interests in seven joint ventures. The Company has not consolidated these joint venture interests because the Company has concluded that the limited partners or the other members of each joint venture have substantive kick-out rights or substantive participating rights. Under the equity method of accounting, the Company records its investments in joint ventures at cost and adjusts such investments for its share of earnings and losses of the joint ventures.

Development Guarantees

The Company, on three joint venture developments, has guaranteed that the communities will be completed and operated at budgeted costs approved by the joint venture members. These costs include the hard and soft construction costs and operating costs until each community reaches breakeven. The budgeted costs include contingency reserves for potential cost overruns and other unforeseen costs. The terms of these guarantees generally do not provide for a limitation on the maximum potential future payments. The Company has not made any payments under these guarantees. These joint ventures are currently in lease up and one of the joint ventures has exhausted all of its reserves under the existing loan commitment at September 30, 2010. The Company will be required to fund these deficits until the joint venture reaches breakeven for three consecutive months. Any amounts funded by the Company under this commitment, up to \$0.5 million, may be recoverable from the joint venture in the event of liquidation. At September 30,

Table of Contents

2010, the Company has not been required to fund any amounts to the joint ventures. The Company does not currently anticipate funding any deficits in excess of the amounts estimated to be recoverable from the joint ventures.

Assets Held for Sale

Assets are classified as held for sale when the Company has committed to selling the asset and believes that it will be disposed of within one year. The Company determines the fair value, net of costs of disposal, of an asset on the date the asset is categorized as held for sale, and the asset is recorded at the lower of its fair value, net of cost of disposal, or carrying value on that date. The Company periodically reevaluates assets held for sale to determine if the assets are still recorded at the lower of fair value, net of cost of disposal, or carrying value. The fair value of properties are generally determined based on market rates, industry trends and recent comparable sales transactions. The Company had one parcel of land, in Fort Wayne, Indiana, held for sale at September 30, 2010.

The Company currently estimates that the parcel of land held for sale in Fort Wayne, Indiana, has an aggregate fair value, net of costs of disposal, that exceeds its carrying value of \$0.4 million at September 30, 2010. The amount that the Company will ultimately realize on the parcel of land could differ materially from this estimate.

Lease Accounting

The Company determines whether to account for its leases as either operating, capital or financing leases depending on the underlying terms of each lease agreement. This determination of classification is complex and requires significant judgment relating to certain information including the estimated fair value and remaining economic life of the community, the Company's cost of funds, minimum lease payments and other lease terms. As of September 30, 2010, the Company leased 45 communities and classified each of the leases as an operating lease. The Company incurs lease acquisition costs and amortizes these costs over the term of the respective lease agreement. The Company's lease obligations are subject to contingent rent increases based on changes in the consumer price index or certain operational performance measures. Certain leases entered into by the Company qualified as sale/leaseback transactions and as such any related gains have been deferred and are being amortized over the respective lease term. Facility lease expense in the Company's statement of income includes rent expense plus amortization expense relating to leasehold acquisition costs offset by the amortization of deferred gains and lease incentives.

There are various financial covenants and other restrictions in our lease agreements. Under the terms of certain lease agreements, the Company was required to pay additional cash collateral of approximately \$0.2 million and \$0.7 million during the three and nine month periods ended September 30, 2010, respectively. No additional cash collateral was required to be paid by the Company during the three and nine month periods ended September 30, 2009. Once the Company reaches certain performance targets, the additional cash collateral paid is returnable to the Company. The Company was in compliance with all of its lease covenants at September 30, 2010.

Income Taxes

At September 30, 2010, the Company had recorded on its consolidated balance sheet deferred tax assets of approximately \$5.4 million. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Management regularly evaluates the future realization of deferred tax assets and provides a valuation allowance, if considered necessary, based on such evaluation. As part of the evaluation, management has evaluated future expectations of net income and various tax planning strategies that it believes are both prudent and feasible, including various strategies to utilize net built-in gains on the Company's appreciated assets. However, the benefits of the net deferred tax assets might not be realized if actual results differ from expectations. The Company believes based upon this analysis that the realization of the net deferred tax assets is reasonably assured and therefore has not provided for a valuation allowance.

The Company evaluates uncertain tax positions through consideration of accounting and reporting guidance on thresholds, measurement, derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition that is intended to provide better financial-statement comparability among different companies. The Company is required to recognize a tax benefit in its financial statements for an uncertain tax position only if management's assessment is that its position is more likely than not (i.e., a greater than 50 percent likelihood) to be upheld on audit based only on the technical merits of the tax position. The Company's policy is to recognize interest related to unrecognized tax benefits as interest expense and penalties as income tax expense. The Company is not

subject to income tax examinations for tax years prior to 2006.

Table of Contents*Net Income Per Share*

Basic net income per common share is computed by dividing net income remaining after allocation to unvested restricted shares by the weighted average number of common shares outstanding for the period. Except when the effect would be anti-dilutive, the calculation of diluted net income per common share includes the net impact of unvested restricted shares and shares that could be issued under outstanding stock options.

The following table sets forth the computation of basic and diluted net income per share (in thousands, except for per share amounts):

	Three Months Ended September 30,		Nine months Ended September 30,

Diluted income per share	\$ 0.02	\$ 0.03	\$ 0.10	\$ 0.07

Awards of unvested restricted stock representing approximately 467,000 and 625,000 shares were outstanding for the three months ended September 30, 2010 and 2009, respectively, and 469,000 and 644,000 shares were outstanding for the nine months ended September 30, 2010 and 2009, respectively, and were included in the computation of undistributed net income allocated to common shares.

Treasury Stock

The Company accounts for treasury stock under the cost method and includes treasury stock as a component of stockholders' equity.

New Accounting Guidance

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 810-10 (formerly FASB Statement No. 167, Amendments to FASB Interpretation No. 46(R)) requires an enterprise to perform an analysis to determine whether the enterprise's variable interest or interests give it a controlling financial interest in a variable interest entity. This analysis identifies the primary beneficiary of a variable interest entity as the enterprise that has both the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance and the obligation to absorb losses of the entity that could potentially be significant to the variable interest entity or the right to receive benefits from the entity that could potentially be significant to the variable interest entity. This guidance also requires ongoing reassessments of whether an enterprise is the primary beneficiary of a variable interest entity and was effective for the Company on January 1, 2010. The adoption did not have an impact on the Company's earnings or financial position.

4. FACILITY LEASE TRANSACTIONS

Signature

Capital Senior Living Acquisition, LLC, a wholly owned subsidiary of the Company, entered into an Asset Purchase Agreement, dated as of June 25, 2010 (the Asset Purchase Agreement), with Signature Assisted Living of Texas, LLC (Signature) to acquire the leasehold interests in 12 senior housing communities and certain related personal property from Signature (the Signature Transaction). On September 10, 2010, the Company completed the Signature Transaction pursuant to the terms of the Asset Purchase Agreement for \$25.8 million. Simultaneously with closing the Signature Transaction, the Company executed a Master Lease Agreement with affiliates of Health Care REIT, Inc. (HCN) for the 12 communities (the Master Lease Agreement) valued at \$78.8 million. The Master Lease Agreement has a term of 15 years with one 15-year renewal option beyond the initial lease term. The initial lease rate is 8.5% and is subject to certain conditional escalation clauses. The Company has accounted for this lease as an operating lease. The Asset Purchase Agreement was funded by HCN with the intent to result in the same economic impact to the

Company as a \$104.6 million lease at current market rates. The \$25.8 million funding provided by HCN for the transaction is non-recourse to the Company with identical terms as the Master Lease and includes a lease incentive to act as an agent in acquiring and terminating the leasehold interests of Signature. Therefore, a principal obligation has not been recorded by the Company within its consolidated financial statements. As a result of this transaction, the Company recorded within its consolidated Balance Sheet the assets acquired and retained, which will be amortized over their respective useful lives and a corresponding lease incentive within

Table of Contents

Other Long-Term Liabilities, the future benefit of which will be amortized over the initial lease term as a reduction in Facility Lease Expense. The current estimate of the lease intangibles acquired and retained and the corresponding lease incentive is \$2.0 million and is subject to final valuation adjustments. Additionally, the Company incurred \$0.6 million in lease transaction costs of which \$0.4 million have been deferred and are being amortized within the Company's Statement of Income over the initial 15-year lease term. The Master Lease Agreement is a triple net lease pursuant to which the Company pays all expenses of the properties except principal and interest on any mortgage debt of the properties. holders of common stock are subject to the rights of the holders of preferred stock. No preferred stock was outstanding as of September 30, 2010 and 2009.

Share Repurchases

On January 22, 2009, the Company's board of directors approved a share repurchase program that authorized the Company to purchase up to \$10.0 million of the Company's common stock. Purchases may be made from time to time using a variety of methods, which may include open market purchases, privately negotiated transactions or block trades, or by any combination of such methods, in accordance with applicable insider trading and other securities laws and regulations. The size, scope and timing of any purchases will be based on business, market and other conditions and factors, including price, regulatory and contractual requirements or consents, and capital availability. The repurchase program does not obligate the Company to acquire any particular amount of common stock and the share repurchase authorization has no stated expiration date. Shares of stock repurchased under the program will be held as treasury shares. Pursuant to this authorization, during fiscal 2009, the Company purchased 349,800 shares at an average cost of \$2.67 per share for a total cost to the Company of approximately \$0.9 million. All such purchases were made in open market transactions. No shares have been purchased by the Company during the first nine months of fiscal 2010.

7. STOCK-BASED COMPENSATION

The Company recognizes compensation expense for share-based stock awards to employees, including grants of employee stock options and awards of restricted stock, in the statement of income based on their fair values.

On May 8, 2007, the Company's stockholders approved the 2007 Omnibus Stock and Incentive Plan for Capital Senior Living Corporation (the 2007 Plan), which provides for, among other things, the grant of restricted stock awards and stock options to purchase shares of the Company's common stock. The 2007 Plan authorizes the Company to issue up to 2.6 million shares of common stock and the Company has reserved 1.9 million shares of common stock for future issuance pursuant to awards under the 2007 Plan. Effective May 8, 2007, the 1997 Omnibus Stock and Incentive Plan (as amended, the 1997 Plan) was terminated and no additional shares will be granted under the 1997 Plan, although certain awards remain outstanding under the 1997 Plan. The Company has reserved 0.9 million shares of common stock for future issuance upon the exercise of outstanding stock options pursuant to the 1997 Plan.

Stock Options

The Company's stock option program is a long-term retention program that is intended to attract, retain and provide incentives for employees, officers and directors and to align more closely stockholder and employee interests. The Company's options generally vest over a period of one to five years and the related expense is amortized on a straight-line basis over the vesting period.

A summary of the Company's stock option activity and related information for the nine months ended September 30, 2010, is presented below:

	Outstanding at Beginning of				Outstanding End of	Options
	Period	Granted	Exercised	Forfeited	Period	Exercisable
Shares	642,120		98,252	26,034	517,834	517,834
Weighted average price	\$ 4.34	\$	\$ 3.55	\$ 5.21	\$ 4.44	\$ 4.44

The stock options outstanding and the options exercisable at September 30, 2010, each had an intrinsic value of \$0.8 million. The Company awarded no stock options during the first nine months of fiscal 2010.

Restricted Stock

The Company may also grant restricted stock awards to employees, officers, and directors in order to attract, retain, and provide incentives for such individuals and to more closely align stockholder and employee interests. Restricted stock awards generally vest over a period of three to four years but such awards are considered outstanding at the time of grant, since the holders thereof are entitled to dividends and voting rights. The Company recognizes compensation expense of a restricted stock award over its vesting period based on the fair value of the award on the grant date, net of

forfeitures.

Table of Contents

A summary of the Company's restricted stock awards activity and related information for the nine months ended September 30, 2010, is presented below:

	Outstanding at Beginning of				Outstanding End of Period
Shares	Period	Granted	Vested	Forfeited	Period
	649,207	55,000	218,222	18,562	467,423

The restricted stock awards outstanding at September 30, 2010, had an intrinsic value of \$2.5 million.

During the nine months ended September 30, 2010, the Company awarded 55,000 shares of restricted common stock to certain employees and directors of the Company. The average market value of the common stock on the date of grant was \$4.92. These awards of restricted shares vest over a three to four-year period and had an intrinsic value of \$0.3 million on the date of issue.

Stock Based Compensation

The Company uses the Black-Scholes option pricing model to estimate the grant date fair value of its stock options. The Black-Scholes model requires the input of certain assumptions, including expected volatility, expected dividend yield, expected life of the option and the risk free interest rate. The expected volatility used by the Company is based primarily on an analysis of historical prices of the Company's common stock. The expected term of options granted is based primarily on historical exercise patterns on the Company's outstanding stock options. The risk free rate is based on zero-coupon U.S. Treasury yields in effect at the date of grant with the same period as the expected option life. The Company does not currently plan to pay dividends on its common stock and therefore has used a dividend yield of zero in determining the fair value of its awards. The option forfeiture rate assumption used by the Company, which affects the expense recognized as opposed to the fair value of the award, is based primarily on the Company's historical option forfeiture patterns.

The Company has total stock-based compensation expense, net of estimated forfeitures, of \$1.2 million not recognized as of September 30, 2010, and expects this expense to be recognized over approximately a three to four year period.

8. CONTINGENCIES

The Company has claims incurred in the normal course of its business. Most of these claims are believed by management to be covered by insurance, subject to normal reservations of rights by the insurance companies and possibly subject to certain exclusions in the applicable insurance policies. Whether or not covered by insurance, these claims, in the opinion of management, based on advice of legal counsel, should not have a material effect on the consolidated financial statements of the Company if determined adversely to the Company.

9. FAIR VALUE OF FINANCIAL INSTRUMENTS

The carrying amounts and fair values of financial instruments are as follows (in thousands):

	September 30, 2010		December 31, 2009	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Cash and cash equivalents	\$ 33,055	\$ 33,055	\$ 28,972	\$ 28,972
Restricted cash	6,327	6,327	2,167	2,167
Notes payable	177,605	167,777	183,169	170,393

The following methods and assumptions were used in estimating its fair value disclosures for financial instruments:

Cash and cash equivalents and Restricted cash: The carrying amounts reported in the balance sheets for cash and cash equivalents and restricted cash approximate fair value.

Notes payable: The fair value of notes payable is estimated using discounted cash flow analysis, based on current incremental borrowing rates for similar types of borrowing arrangements.

The global markets have experienced disruption in the credit markets. The full extent of these disruptions on the market and the ultimate severity and length is not predictable. Therefore, the estimated fair value of these assets and

liabilities could be affected by these market changes and this effect could be material.

The Company cautions readers that forward-looking statements, including, without limitation, those relating to the Company's future business prospects, revenues, working capital, liquidity, capital needs, interest costs, and income, are subject to certain risks and uncertainties that could cause actual results to differ materially from those indicated in the forward-looking statements, due to several important factors herein identified. These factors include the Company's ability to find suitable acquisition properties at favorable terms, financing, licensing, business conditions, risks of downturn in economic conditions generally, satisfaction of closing conditions such as those pertaining to licensure, availability of insurance at commercially reasonable rates, and changes in accounting principles and interpretations, among others, and other risks and factors identified from time to time in the Company's reports filed with the SEC.

Overview

The following discussion and analysis addresses (i) the Company's results of operations for the three and nine months ended September 30, 2010 and 2009, respectively, and (ii) liquidity and capital resources of the Company, and should be read in conjunction with the Company's consolidated financial statements contained elsewhere in this report and the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

The Company is one of the largest operators of senior living communities in the United States. The Company's operating strategy is to provide quality senior living services to its residents, while achieving and sustaining a strong, competitive position within its chosen markets, as well as to continue to enhance the performance of its operations. The Company provides senior living services to the elderly, including independent living, assisted living, skilled nursing and home care services.

As of September 30, 2010, the Company operated 78 senior living communities in 23 states with an aggregate capacity of approximately 11,000 residents, including 25 senior living communities that the Company owned, 7 senior living communities in which the Company had an ownership interest, 45 senior living communities that the Company leased and one senior living community that it managed for a third party. As of September 30, 2010, the Company also operated one home care agency.

Significant Financial and Operational Highlights

The Company's operating strategy is to provide quality senior living communities and services to its residents, while achieving and sustaining a strong, competitive position within its chosen markets, as well as to continue to enhance the performance of its operations. The Company provides senior living services to the elderly, including independent living, assisted living, skilled nursing and home care services. Many of the Company's communities offer a continuum of care to meet its residents' needs as they change over time. This continuum of care, which integrates independent living and assisted living and is bridged by home care through independent home care agencies or the Company's home care agency, sustains residents' autonomy and independence based on their physical and mental abilities. The Company primarily derives its revenue by providing senior living and healthcare services to the elderly and operating senior living communities leased from real estate investment trusts (REITs) and under joint venture arrangements. Despite challenging economic conditions, the Company has been able to increase total revenues approximately \$8.7 million, or 6.1%, during the first nine months of fiscal 2010 of which approximately 92.3% of revenues were derived from resident and healthcare services, compared to the first nine months of fiscal 2009 when approximately 89.3% of revenues were derived from resident and healthcare services.

On September 10, 2010, the Company acquired the leasehold interests in 12 senior housing communities and certain related personal property from Signature for aggregate consideration of \$25.8 million and executed a Master Lease Agreement with affiliates of HCN valued at \$78.8 million. Funds for the transaction were provided by HCN and are non-recourse to the Company, the intent of which was to result in the same economic impact to the Company as a \$104.6 million lease at current market rates. Therefore, a principal obligation has not been recorded by the Company

within its consolidated financial statements. The Master Lease Agreement has a term of 15 years with one 15-year renewal option beyond the initial lease term. The Master Lease Agreement is a triple net lease pursuant to which the Company pays all expenses of the properties except principal and interest on any mortgage debt of the properties. The Master Lease Agreement contains customary representations and warranties as well as affirmative and negative covenants and the lease payments are guaranteed by subsidiaries of the Company.

Table of Contents

During the first nine months of fiscal 2010, the Company extinguished \$5.6 million of its outstanding debt obligations, which further reduced the Company's exposure to the volatility in the credit markets and enabled the Company to reduce interest expense by approximately \$0.4 million, or 4.9%, during the first nine months of fiscal 2010 when compared to the first nine months of fiscal 2009.

The senior living industry continues to be negatively impacted by unfavorable conditions in the housing, credit and financial markets and deteriorating conditions in the overall economy, generally resulting in lower than anticipated occupancy rates. During the first nine months of fiscal 2010, in response to these conditions, the Company has continued to focus on maintaining an emphasis on occupancy increases, improvement in rental rates, expense management and growth in net operating income per unit, increasing levels of care through conversions, and other opportunities to enhance cash flow and shareholder value.

Joint Venture Transactions and Management Contracts

As of September 30, 2010, the Company managed 7 communities owned by joint ventures in which the Company has a minority interest and one community owned by a third party. For communities owned by joint ventures and third parties, the Company typically receives a management fee of 5% of gross revenues.

The Company believes that the factors affecting the financial performance of communities managed under contracts with third parties do not vary substantially from the factors affecting the performance of owned and leased communities, although there are different business risks associated with these activities.

The Company's third-party management fees are primarily based on a percentage of gross revenues. As a result, the cash flow and profitability of such contracts to the Company are more dependent on the revenues generated by such communities and less dependent on net cash flow than for owned or leased communities. Further, the Company is not responsible for capital investments in managed communities. The management contracts are generally terminable only for cause or upon the sale of a community, subject to the Company's right to offer to purchase such community.

SHPII/CSL Transactions

In November 2004, the Company formed SHPII/CSL with SHPII. SHPII/CSL is owned 95% by SHPII and 5% by the Company. In November 2004, SHPII/CSL acquired the Spring Meadows Communities which currently comprise 628 units with a combined capacity of 758 residents. The Company has contributed \$1.3 million for its interests in SHPII/CSL. The Company accounts for its investment in SHPII/CSL under the equity method of accounting and the Company recognized earnings in the equity of SHPII/CSL of \$0.1 million and \$0.2 million in each of the three and nine month periods ended September 30, 2010 and 2009, respectively. The SHPII/CSL Management Agreements currently extend until various dates through November 2014. The SHPII/CSL Management Agreements generally provide for management fees of 5% of gross revenue plus reimbursement for costs and expenses related to the communities.

The Company has contributed \$0.8 million to SHPIII/CSL Miami for its 10% interest. Recently Issued Accounting Standards

FASB ASC 810-10 (formerly FASB Statement No. 167, Amendments to FASB Interpretation No. 46(R)) requires an enterprise to perform an analysis to determine whether the enterprise's variable interest or interests give it a controlling financial interest in a variable interest entity. This analysis identifies the primary beneficiary of a variable interest entity as the enterprise that has both the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance and the obligation to absorb losses of the entity that could potentially be significant to the variable interest entity or the right to receive benefits from the entity that could potentially be significant to the variable interest entity. This guidance also requires ongoing reassessments of whether an enterprise is the primary beneficiary of a variable interest entity and was effective for the Company on January 1, 2010. The adoption did not have an impact on the Company's earnings or financial position.

Three Months Ended September 30, 2010 Compared to the Three Months Ended September 30, 2009

Revenues.

Total revenues were \$53.6 million for the three months ended September 30, 2010 compared to \$48.1 million for the three months ended September 30, 2009, representing an increase of approximately \$5.5 million, or 11.4%. This increase in revenue is primarily the result of an increase in resident and healthcare revenue of \$7.7 million offset by a decrease in affiliated management services revenue of \$0.3 million and a decrease in community reimbursement revenue of \$1.9 million.

The increase in resident and healthcare revenue primarily results from an increase of \$5.7 million from the consolidation of eight communities previously owned by Midwest I and Midwest II that were sold to HCN and leased back by the Company in April 2010, an increase of \$1.8 million from the addition of the leasehold interests in 12 communities from Signature in September 2010, and an increase in average rental rates of 0.3% and occupancy of 0.3% at the Company's other consolidated communities.

The decrease in affiliated management services revenue of \$0.3 million primarily results from the sale of the eight communities owned by Midwest I and Midwest II to HCN and leased back by the Company in April 2010.

Community reimbursement revenue is comprised of reimbursable expenses from non-consolidated communities that the Company operates under long-term management agreements.

Table of Contents

Expenses.

Total expenses were \$49.8 million in the third quarter of fiscal 2010 compared to \$43.9 million in the third quarter of fiscal 2009, representing an increase of \$5.9 million, or 13.5%. This increase in expenses is primarily the result of a \$4.5 million increase in operating expenses, a \$0.8 million increase in general and administrative expenses, a \$2.4 million increase in facility lease expense, and a \$0.2 million increase in depreciation and amortization expense offset by a \$0.1 million decrease in stock-based compensation expense and a \$1.9 million decrease in community reimbursement expense.

The increase in operating expenses primarily results from an increase of \$3.3 million from the consolidation of eight communities previously owned by Midwest I and Midwest II that were sold to HCN and leased back by the Company in April 2010, an increase of \$0.9 million from the addition of the leasehold interests in 12 communities from Signature in September 2010, and an increase in operating costs at the Company's other consolidated communities of \$0.3 million primarily due to an increase in labor and benefit costs of \$0.1 million and utilities of \$0.2 million.

General and administrative expenses increased \$0.8 million, or 32.2%, primarily due to an increase in employee benefit claims paid, which resulted in higher health insurance costs to the Company.

Facility lease expense increased \$1.7 million from the consolidation of eight communities previously owned by Midwest I and Midwest II that were sold to HCN and leased back by the Company in April 2010, \$0.6 million from the addition of the leasehold interests in 12 communities from Signature in September 2010, and \$0.1 million for contingent annual rental rate escalations for certain existing leases.

Depreciation and amortization expense increased \$0.2 million primarily as a result of an increase in depreciable assets at the Company's consolidated communities.

Stock-based compensation decreased \$0.1 million in the third quarter of fiscal 2010 compared to the third quarter of fiscal 2009 primarily due to a decrease in the number of unvested restricted shares outstanding during these periods.

Community reimbursement expense represents payroll and administrative costs paid by the Company for the benefit of non-consolidated communities and joint ventures.

Other income and expense.

Interest income reflects interest earned on the investment of cash balances and interest earned on escrowed funds. Interest income decreased primarily due to lower interest rates in the third quarter of fiscal 2010 compared to the third quarter of fiscal 2009.

Interest expense decreased \$0.2 million in the third quarter of fiscal 2010 when compared to the third quarter of fiscal 2009. The decrease in interest expense results from less debt outstanding during the third quarter of fiscal 2010 compared to the third quarter of fiscal 2009.

Other (expense) income in the third quarters of fiscal 2010 and 2009 relates to the Company's equity in the net losses of unconsolidated affiliates, which represents the Company's share of the net losses on its investments in joint ventures.

Provision for income taxes.

Provision for income taxes for the third quarter of fiscal 2010 was \$0.5 million, or 49.3% of income before taxes, compared to a provision for income taxes of \$0.5 million, or 40.1% of income before taxes, for the third quarter of fiscal 2009. The effective tax rates for the third quarters of fiscal 2010 and 2009 differ from the statutory tax rates due to state income taxes and permanent tax differences. The Company is impacted by the Texas Margin Tax (TMT) and Michigan Business Tax (MBT), which effectively impose taxes on modified gross revenues for communities within the States of Texas and Michigan, respectively. As of September 30, 2010, the Company consolidated 29 Texas

communities and two Michigan communities and the TMT and MBT increased the overall provision for income taxes. Management regularly evaluates the future realization of deferred tax assets and provides a valuation allowance, if considered necessary, based on such evaluation. At September 30, 2010, no valuation allowance was considered necessary based on this evaluation.

Net income.

As a result of the foregoing factors, the Company reported net income of \$0.5 million for the three months ended September 30, 2010, compared to net income of \$0.8 million for the three months ended September 30, 2009.

Nine Months Ended September 30, 2010 Compared to the Nine Months Ended September 30, 2009

Revenues.

Total revenues were \$152.0 million for the nine months ended September 30, 2010 compared to \$143.3 million for the nine months ended September 30, 2009, representing an increase of approximately \$8.7 million, or 6.1%. This increase in revenue is primarily the result of a \$12.3 million increase in resident and healthcare revenue offset by a decrease in affiliated management services revenue of \$0.4 million and a decrease in community reimbursement revenue of \$3.2 million.

The increase in resident and healthcare revenue primarily results from an increase of \$9.9 million from the consolidation of eight communities previously owned by Midwest I and Midwest II that were sold to HCN and leased back by the Company in April 2010, an increase of \$1.8 million from the addition of the leasehold interests in 12 communities from Signature in September 2010, and an increase in average rental rates of 0.6% which was partially offset by a decrease in occupancy of 0.3% at the Company's other consolidated communities.

The decrease in affiliated management services revenue reflects a decrease of \$0.5 million from the sale of the eight communities owned by Midwest I and Midwest II to HCN and leased back by the Company in April 2010, offset by an increase of \$0.1 million for management services revenue earned by the Company from the two SHPIII/CSL joint venture communities that opened in April 2009.

Community reimbursement revenue is comprised of reimbursable expenses from non-consolidated communities that the Company operates under long-term management agreements.

Expenses.

Total expenses were \$139.5 million in the first nine months of fiscal 2010 compared to \$131.0 million in the first nine months of fiscal 2009, representing an increase of \$8.5 million, or 6.4%. This increase is primarily the result of a \$7.2 million increase in operating expenses, a \$0.2 million increase in general and administrative expenses, a \$3.8 million increase in facility lease expense, and a \$0.6 million increase in depreciation and amortization expense, offset by a \$0.1 million decrease in stock-based compensation, and a \$3.2 million decrease in community reimbursement expense.

The increase in operating expenses primarily results from an increase of \$5.6 million from the consolidation of eight communities previously owned by Midwest I and Midwest II that were sold to HCN and leased back by the Company in April 2010, an increase of \$0.9 million from the addition of the leasehold interests in 12 communities from Signature in September 2010, and an increase in operating costs at the Company's other consolidated communities of \$0.7 million primarily due to an increase in labor and benefit costs of \$0.4 million, utilities of \$0.2 million, and promotional advertising of \$0.1 million.

General and administrative expenses increased \$0.2 million or 2.1% primarily due to an increase in employee benefit claims paid, which resulted in higher health insurance costs to the Company.

Facility lease expense increased \$3.1 million from the consolidation of eight communities previously owned by Midwest I and Midwest II that were sold to HCN and leased back by the Company in April 2010, \$0.6 million from the addition of the leasehold interests in 12 communities from Signature in September 2010, and \$0.1 million for contingent annual rental rate escalations for certain existing leases.

Depreciation and amortization expense increased \$0.6 million primarily as a result of an increase in depreciable assets at the Company's consolidated communities.

Stock-based compensation decreased \$0.1 million in the first nine months of fiscal 2010 compared to the first nine months of fiscal 2009 primarily due to a decrease in the number of unvested restricted shares outstanding during these periods.

Community reimbursement expense represents payroll and administrative costs paid by the Company for the benefit of non-consolidated communities and joint ventures.

Interest income reflects interest earned on the investment of cash balances and interest earned on escrowed funds. Interest income decreased primarily due to lower interest rates in the first nine months of fiscal 2010 compared to the first nine months of fiscal 2009.

Interest expense decreased \$0.4 million in the first nine months of fiscal 2010 when compared to the first nine months of

fiscal 2009. The decrease in interest expense results from less debt outstanding during the first nine months of fiscal 2010 compared to the first nine months of fiscal 2009.

Gain on settlement of debt represents the recognition of the gain associated with the pay-off settlement of the promissory note with the Lehman securitized trust in April 2010.

Other income in the first nine months of fiscal 2010 and 2009 relates to the Company's equity in the net earnings of unconsolidated affiliates, which represents the Company's share of the net earnings on its investments in joint ventures.

Provision for income taxes.

Provision for income taxes for the first nine months of fiscal 2010 was \$2.2 million, or 44.8% of income before taxes, compared to a provision for income taxes of \$1.5 million, or 43.0% of income before taxes, for the first nine months of fiscal 2009. The effective tax rates for the first nine months of fiscal 2010 and 2009 differ from the statutory tax rates due to state income taxes and permanent tax differences. The Company is impacted by the Texas Margin Tax (TMT) and Michigan Business Tax (MBT), which effectively impose taxes on modified gross revenues for communities within the States of Texas and Michigan, respectively. As of September 30, 2010, the Company consolidated 29 Texas communities and two Michigan communities and the TMT and MBT increased the overall provision for income taxes. Management regularly evaluates the future realization of deferred tax assets and provides a valuation allowance, if considered necessary, based on such evaluation. At September 30, 2010, no valuation allowance was considered necessary based on this evaluation.

Net income.

As a result of the foregoing factors, the Company reported net income of \$2.7 million for the nine months ended September 30, 2010, compared to net income of \$2.0 million for the nine months ended September 30, 2009.

Liquidity and Capital Resources

The impact of the current economic environment could result in decreases in the fair value of assets, slowing of transactions, and tightening liquidity and credit markets. These impacts could make securing debt for acquisitions or refinancings for the Company, its joint ventures, or buyers of the Company's properties more difficult or on terms not acceptable to the Company. Additionally, the Company may be more susceptible to being negatively impacted by operating or performance deficits based on the exposure associated with certain of its development guarantees or lease coverage requirements.

In addition to approximately \$33.1 million of unrestricted cash balances on hand as of September 30, 2010, the Company's principal sources of liquidity are expected to be cash flows from operations, proceeds from the sale of assets, cash flows from SHPIII/CSL Miami, SHP III/CSL Richmond Heights, and SHPIII/CSL Levis Commons and/or additional debt refinancings. The Company expects its available cash and cash flows from operations, proceeds from the sale of assets, and cash flows from SHPIII/CSL Miami, SHP III/CSL Richmond Heights, and SHPIII/CSL Levis Commons to be sufficient to fund its short-term working capital requirements and the Company's stock repurchase program. The Company's long-term capital requirements, primarily for acquisitions and other corporate initiatives, could be dependent on its ability to access additional funds through joint ventures and the debt and/or equity markets. The Company from time to time considers and evaluates transactions related to its portfolio including refinancings, purchases and sales, reorganizations and other transactions. There can be no assurance that the Company will continue to generate cash flows at or above current levels or that the Company will be able to obtain the capital necessary to meet the Company's short and long-term capital requirements.

In summary, the Company's cash flows were as follows (in thousands):

	Nine Months Ended September 30,	
	2010	2009
Net cash provided by operating activities	\$ 13,483	\$ 16,472
Net cash used in investing activities	(3,253)	(5,737)
Net cash used in financing activities	(6,147)	(8,198)

Operating Activities.

The net cash provided by operating activities for the first nine months of fiscal 2010 primarily results from net income of \$2.7 million, net non-cash charges of \$12.7 million, an increase in accounts payable and accrued expenses of \$4.7 million, and an increase in customer deposits of \$0.1 million, offset by an increase in accounts receivable of \$0.7 million, an increase in property tax and insurance deposits of \$1.7 million, and an increase in prepaid expenses and other assets of \$2.6 million, and an increase in federal and state income taxes receivable of \$1.7 million,. The net cash provided by operating activities for the first nine months of fiscal 2009 primarily results from net income of \$2.0 million, net non-cash charges of \$10.5 million, a decrease in property tax and insurance deposits of \$0.7 million, a decrease in prepaid expenses and other assets of \$2.0 million, and a decrease in federal and state income taxes receivable of \$1.9 million offset by an increase in accounts receivable of \$0.2 million, a decrease in accounts payable and accrued expenses of \$0.2 million, and a decrease in customer deposits of \$0.2 million.

Investing Activities.

The net cash used in investing activities for the first nine months of fiscal 2010 primarily results from capital expenditures of \$6.4 million and \$2.0 million for the acquisition of the Signature Transaction offset by distributions from joint ventures of \$5.1 million. The net cash used in investing activities for the first nine months of fiscal 2009 primarily results from capital expenditures of \$6.3 million offset by distributions from joint ventures of \$0.6 million.

Financing Activities.

The net cash used in financing activities for the first nine months of fiscal 2010 results from net repayments of notes payable of \$4.6 million and additions to restricted cash of \$4.2 million offset by \$2.0 million in lease incentives from the Signature Transaction, an increase in capital lease obligations of \$0.2 million and proceeds and excess tax benefits from the issuance of common stock of \$0.4 million. The net cash used in financing activities for the first nine months of fiscal 2009 primarily results from net repayments of notes payable of \$5.1 million, additions to restricted cash of \$2.2 million, and purchases of treasury stock of \$0.9 million.

Debt Transactions.

On September 10, 2010, in conjunction with the Signature Transaction described above, a non-cancelable lease which expires in 2013 for ten 12-passenger Ford Minibuses that are used to transport residents of the communities was transferred from Signature to the Company. The lease is classified as a capital lease because it contains a bargain purchase option which resulted in the Company recording a Capital Lease Obligation for \$0.2 million.

On September 10, 2010, the Company obtained certain insurance policies and entered into a finance agreement totaling \$0.2 million. The finance agreement has a fixed interest rate of 3.30% with principal being repaid over a 7-month term.

On May 31, 2010, the Company renewed certain insurance policies and entered into a finance agreement totaling \$3.7 million. The finance agreement has a fixed interest rate of 3.30% with principal being repaid over a 12-month term.

On April 15, 2010, the Company negotiated a pay-off settlement with a Lehman securitized trust for a promissory note of one of the Company's wholly owned subsidiaries that matured on September 1, 2009. The securitized promissory note carried an outstanding principal balance of \$4.6 million which was collateralized with the assets of the subsidiary and was nonrecourse to the Company. The pay-off settlement was for \$3.7 million, excluding amounts reserved and escrowed, with no further obligation to the Company's subsidiary and resulted in a gain to the Company of approximately \$0.7 million.

On October 31, 2009, the Company renewed certain insurance policies and entered into a finance agreement totaling \$0.5 million. The finance agreement has a fixed interest rate of 3.66% with principal being repaid over a 10-month term.

On May 31, 2009, the Company renewed certain insurance policies and entered into a finance agreement totaling \$1.6 million. The finance agreement has a fixed interest rate of 3.66% with principal being repaid over a 10-month term.

The 25 senior housing communities owned by the Company and encumbered by mortgage debt are provided as collateral under their respective loan agreements. At September 30, 2010, and December 31, 2009, these communities carried a total net book value of \$220.5 million and \$224.9 million, respectively, with total mortgage loans

outstanding of \$174.9 million and \$182.3 million, respectively.

Table of Contents

The Company must maintain certain levels of tangible net worth and comply with other restrictive covenants under the terms of certain promissory notes. The Company was in compliance with all of its debt covenants at September 30, 2010 and 2009.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

The Company's primary market risk is exposure to changes in interest rates on debt and lease instruments. As of September 30, 2010, the Company had \$177.6 million in outstanding debt comprised solely of fixed rate debt instruments. In addition, as of September 30, 2010, the Company had \$420.1 million in future lease obligations with contingent rent increases based on changes in the consumer price index or certain operational performance measures. Changes in interest rates would affect the fair market values of the Company's fixed rate debt instruments, but would not have an impact on the Company's earnings or cash flows. Increases in the consumer price index could have an effect on future facility lease expense if the leased community exceeds the contingent rent escalation thresholds set forth in each of the Company's lease agreements.

Item 4. CONTROLS AND PROCEDURES.

The Company's management, with the participation of the Company's Chief Executive Officer (CEO) and Chief Financial Officer (CFO), has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the

Exchange Act)) as of the end of the period covered by this report. The Company's disclosure controls and procedures are designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. The Company's disclosure controls and procedures are also designed to ensure that such information is accumulated and communicated to the Company's management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

Based upon the controls evaluation, the Company's CEO and CFO have concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures are effective.

There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the Company's fiscal quarter ended September 30, 2010 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS.

The Company has claims incurred in the normal course of its business. Most of these claims are believed by management to be covered by insurance, subject to normal reservations of rights by the insurance companies and possibly subject to certain exclusions in the applicable insurance policies. Whether or not covered by insurance, these claims, in the opinion of management, based on advice of legal counsel, should not have a material effect on the consolidated financial statements of the Company if determined adversely to the Company.

Item 1A. RISK FACTORS.

Our business involves various risks. When evaluating our business the following information should be carefully considered in conjunction with the other information contained in our periodic filings with the SEC. Additional risks and uncertainties not known to us currently or that currently we deem to be immaterial also may impair our business operations. If we are unable to prevent events that have a negative effect from occurring, then our business may suffer. Negative events are likely to decrease our revenue, increase our costs, make our financial results poorer and/or decrease our financial strength, and may cause our stock price to decline. There have been no material changes in our risk factors from those disclosed in Part 1, Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2009.
