PROSPECTUS SUMMARY

This summary highlights selected information about us, this offering and other information contained in this prospectus and the documents incorporated by reference herein. This summary is not complete and may not contain all of the information that is important to you.

Business

We are a managed care organization operating in the United States whose primary focus is Medicare, the federal government-sponsored health insurance program primarily for United States citizens aged 65 and older, qualifying disabled persons, and persons suffering from end-stage renal disease. Pursuant to the Medicare program, Medicare-eligible beneficiaries may receive healthcare benefits, including prescription drugs, through a managed care health plan. Medicare premiums, including premiums paid to our stand-alone prescription drug plans, accounted for substantially all of our revenue in 2010. Our total revenue in 2010 was approximately \$3.1 billion.

Our concentration on Medicare in general, and the Medicare Advantage program in particular, provides us with opportunities to understand the complexities of the Medicare program, design competitive products, better manage medical costs, and offer high quality healthcare benefits to Medicare beneficiaries in our service areas. Our Medicare Advantage experience also allows us to create coordinated care structures of comprehensive networks of local hospitals and physicians. We attempt to center our networks on a primary care physician, or PCP, who is experienced and effective in managing the healthcare needs of the Medicare population, and align our incentives with those of the PCP through a payment structure that rewards cost-effective care and improved outcomes.

We operate Medicare Advantage plans in Alabama, Delaware, Florida, Georgia, Illinois, Maryland, Mississippi, New Jersey, Pennsylvania, Tennessee, Texas and the District of Columbia. As of December 31, 2010, our Medicare Advantage plans had over 304,000 members. We also operate both national and regional stand-alone prescription drug plans, or PDPs, in accordance with Medicare Part D. As of December 31, 2010, our PDPs had over 724,000 members.

Corporate Information

We were incorporated in October 2004 in Delaware; however, our predecessor, NewQuest, LLC, commenced operations in 2000. We conducted our initial public offering in February 2006 and our common stock is listed on the New York Stock Exchange under the symbol HS . Our corporate headquarters are located at 9009 Carothers Parkway, Suite 501, Franklin, Tennessee 37067, and our telephone number is (615) 291-7000. Our corporate website address is www.healthspring.com. Information contained on our website is not incorporated by reference into this prospectus and we do not intend the information on or linked to our website to constitute part of this prospectus.

Recent Developments

Although the 2011 first quarter has not yet been completed, we currently believe that in the aggregate, our business is in line with management's expectations for this point in the year.

Opportunistic acquisitions of other health plans are an important element of our growth strategy and management believes that maintaining a flexible capital structure is important to allow us to respond to opportunities that may arise from time to time. As a result of recent health insurance reform legislation and other factors, we believe consolidation in the managed care industry will be likely and we will selectively pursue opportunistic acquisitions that are consistent with our strategic and financial objectives.

RISK FACTORS

Before deciding to invest in our common stock, you should carefully consider each of the risks and uncertainties described below and all of the other information set forth in this prospectus and incorporated in this prospectus by reference, including in Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2010. The risks and uncertainties described below and incorporated by reference herein are not the only ones facing us. Additional risks not presently known to us or that we currently deem immaterial may also impair our business operations. Our business, financial condition, results of operations or prospects could be materially adversely affected by any of these risks. The market price of our common stock could decline due to any of these risks, and you may lose all or part of your investment. This prospectus, including the documents incorporated by reference herein, also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the risks faced by us described below, elsewhere in this prospectus and in our Annual Report on Form 10-K.

Risks Related to This Offering

Sales of a Significant Number of Shares of Our Common Stock in the Public Markets, or the Perception of Such Sales, Could Depress the Market Price of Our Common Stock.

The issuance of new shares of our common stock in this offering could have the effect of depressing the market price for shares of our common stock, and resales after completion of this offering of our common stock could cause its market price to fall. Except as described in the section entitled Underwriting, we are not restricted from issuing additional shares of our common stock or securities that are convertible into or exchangeable for, or that represent the right to receive, our common stock. We evaluate opportunities to access the capital markets taking into account our financial condition and other relevant considerations. Subject to market conditions, we may take additional actions to raise capital. Such actions could include, among other things, the issuance of additional shares of our common stock.

The issuance of any additional shares of our common stock or securities convertible into or exchangeable for our common stock or that represent the right to receive our common stock, or the exercise of such securities, could be substantially dilutive to our earnings per share. The market price of our common stock could decline as a result of sales of shares of our common stock made in or after this offering or the perception that such sales could occur.

Our Stock Price has been and is Likely to Continue to be Volatile, which Could Cause the Value of Your Investment to Decline.

The market price of our common stock has been and is likely to continue to be highly volatile and subject to wide fluctuations in price. This volatility is in response to various factors, many of which are beyond our control, including:

actual or anticipated variations in quarterly operating results from historical results or estimates of results prepared by securities analysts;

additional changes in existing laws or regulations applicable to us, or their interpretations, or the enactment of new laws or the issuance of new regulations;

Medicare budget decreases or changes in Medicare premium levels or reimbursement methodologies;

expectations regarding increases or decreases in medical claims and medical care costs;

adverse publicity regarding HMOs, other managed care organizations and health insurers in general;

Table of Contents

conditions generally affecting the managed care industry or our provider networks;

announcements by us of significant acquisitions, strategic partnerships, joint ventures or capital commitments;

additions or departures of key personnel;

changes in financial estimates by securities analysts;

general economic conditions and interest rates; and

sales of our common stock.

General market fluctuations, industry factors, failure to comply with the laws and regulations applicable to us and general economic and geopolitical conditions and events also could cause our stock price to decrease. In addition, the stock market in general has experienced extreme volatility that has often been unrelated to the operating performance of a particular company. These broad market fluctuations also may adversely affect the market price of our common stock.

Management will have Broad Discretion as to the Use of the Proceeds from this Offering

Pursuant to the terms of our credit agreement, we are required to use 50% of the net proceeds from this offering to prepay obligations under our existing credit facilities. We have not designated any particular purpose for the amount of net proceeds remaining after we satisfy our prepayment obligations. Accordingly, our management will have broad discretion regarding the use of the remaining net proceeds from this offering and could use those proceeds for purposes other than those contemplated at the time of this offering. Our stockholders may not agree with the manner in which our management chooses to allocate and spend the net proceeds.

We Do Not Pay Dividends on Our Common Stock and Do Not Anticipate Paying Cash Dividends on Our Common Stock in the Foreseeable Future.

We have not declared or paid any cash dividends on our common stock since our incorporation and do not anticipate paying cash dividends in the foreseeable future. Our ability to pay cash dividends is limited by our credit agreement. As a holding company, our ability to pay cash dividends is also dependent on the availability of cash dividends and distributions from our regulated insurance subsidiaries, which are restricted by the laws of the states in which we operate, as well as limitations under our credit agreement. Any future determination to declare and pay dividends will be at the discretion of our board of directors, subject to compliance with applicable law and the other limitations described above. Because we do not anticipate paying cash dividends for the foreseeable future, holders of shares of our common stock will not realize a return on their investment unless the market price of our common stock appreciates, which we cannot assure.

Table of Contents

USE OF PROCEEDS

We estimate that the net proceeds we will receive from the sale of 7,500,000 shares of our common stock in this offering, after deducting estimated expenses payable by us, will be approximately \$262 million, or approximately \$301 million if the underwriters exercise their option in full.

Pursuant to our credit agreement, at least 50% of the net proceeds from this offering will be applied to the repayment of term loans outstanding under our senior secured credit facilities. A portion of those term loans bear interest at LIBOR plus 3.75% and mature on February 11, 2015, and the remainder of those term loans bear interest at LIBOR plus 4.50% and mature on October 22, 2016.

We intend to use the remaining net proceeds from this offering for general corporate purposes, which will include paying down our revolving credit facility. Our management will have broad discretion to allocate the remaining net proceeds from this offering for such purposes as potential acquisitions, repayment or repurchase of additional indebtedness, capital expenditures, and additions to working capital. Pending such uses, we plan to invest the net proceeds from this offering in highly liquid, secure short-term securities.

Table of Contents

MATERIAL TAX CONSEQUENCES TO NON-UNITED STATES HOLDERS

The following is a general discussion of the material United States federal income and estate tax considerations applicable to a non-U.S. holder (as defined below) with respect to the acquisition, ownership and disposition of our common stock as of the date hereof. This discussion is for general information only and is not tax advice. As used in this discussion, the term non-U.S. holder means a beneficial owner of our common stock that is, for United States federal income tax purposes, neither a partnership nor any of the following:

an individual who is a citizen or resident of the United States;

a corporation, or other entity treated as a corporation for U.S. federal income tax purposes, created or organized in or under the laws of the United States or any political subdivision of the United States;

an estate whose income is includible in gross income for United States federal income tax purposes regardless of its source; or

a trust, in general, if (a) a United States court is able to exercise primary supervision over the administration of the trust, and one or more United States persons have the authority to control all substantial decisions of the trust, or (b) the trust has a valid election in effect under applicable United States Treasury Regulations to be treated as a United States person.

If an entity classified as a partnership for United States federal income tax purposes holds our common stock, the tax treatment of a partner in such partnership generally depends on the status of the partner and the activities of the partnership. If you are a partnership holding our common stock, or a partner in such a partnership, you should consult your tax advisers.

An individual may be treated as a resident of the United States in any calendar year for United States Federal income tax purposes, instead of a nonresident, by, among other ways, being present in the United States on at least 31 days in that calendar year and for an aggregate of at least 183 days during the current calendar year and the two immediately preceding calendar years. For purposes of this calculation, you would count all of the days present in the current year, one-third of the days present in the immediately preceding year and one-sixth of the days present in the second preceding year. Residents are taxed for United States federal income purposes as if they were United States citizens.

This discussion does not consider:

United States state and local or non-United States tax consequences;

specific facts and circumstances that may be relevant to a particular non-U.S. holder's tax position, including, if the non-U.S. holder is a partnership, that the United States tax consequences of holding and disposing of our common stock may be affected by certain determinations made at the partner level;

the tax consequences to the stockholders or beneficiaries of a non-U.S. holder;

special tax rules that may apply to controlled foreign corporations, passive foreign investment companies and corporations that accumulate earnings to avoid United States federal income tax;

special tax rules that may apply to particular non-U.S. holders, including financial institutions, insurance companies, tax-exempt organizations, United States expatriates, broker-dealers and traders in securities; or

special tax rules that may apply to a non-U.S. holder that holds our common stock as part of a straddle, hedge, conversion transaction or other integrated investment.

Table of Contents

The following discussion is based on provisions of the United States Internal Revenue Code of 1986, as amended, applicable United States Treasury Regulations promulgated thereunder and administrative and judicial interpretations, all as in effect on the date of this prospectus supplement, and all of which are subject to change, retroactively or prospectively. Any changes could alter the tax consequences to non-U.S. holders described in this prospectus supplement. The following discussion also assumes that a non-U.S. holder holds our common stock as a capital asset.

EACH NON-U.S. HOLDER IS URGED TO CONSULT ITS TAX ADVISER REGARDING THE UNITED STATES FEDERAL, STATE, LOCAL, AND NON-UNITED STATES INCOME AND OTHER TAX CONSEQUENCES OF ACQUIRING, HOLDING AND DISPOSING OF SHARES OF OUR COMMON STOCK.

Distributions on Our Common Stock

Distributions on our common stock generally will constitute dividends for United States federal income tax purposes to the extent paid from our current or accumulated earnings and profits, as determined under United States federal income tax principles. If a distribution exceeds our current and accumulated earnings and profits as determined under United States federal income tax principles, the excess will be treated first as a tax-free return of your adjusted tax basis in our common stock and thereafter as capital gain, subject to the tax treatment described below in Sale, Exchange or Other Disposition of Our Common Stock.

The gross amount of dividends paid to a non-U.S. holder of our common stock ordinarily will be subject to withholding of United States federal income tax at a 30% rate, or at a lower rate if an applicable income tax treaty so provides and we have received proper certification of the application of that treaty.

If you are a non-U.S. holder and conduct a trade or business within the United States, you generally will be taxed at ordinary United States federal income tax rates (on a net income basis) on dividends that are effectively connected with the conduct of such trade or business or, if certain tax treaties apply, on dividends that are attributable to your permanent establishment in the United States, and such dividends will not be subject to the withholding described above. If you are a non-United States corporation, you may also be subject to a 30% branch profits tax unless you qualify for a lower rate under an applicable United States income tax treaty.

Generally, to claim the benefit of any applicable United States tax treaty or an exemption from withholding because the income is effectively connected with the conduct of a trade or business in the United States, you must provide a properly executed IRS Form W-8BEN for treaty benefits or IRS Form W-8ECI for effectively connected income (or such successor form as the IRS designates), before the distributions are made. These forms must be periodically updated. If you are a non-U.S. holder, you may obtain a refund of any excess amounts withheld by timely filing an appropriate claim for refund with the IRS. Non-U.S. holders should consult their tax advisers regarding their entitlement to benefits under an applicable income tax treaty and the specific manner of claiming the benefits of the treaty.

Sale, Exchange or Other Disposition of Our Common Stock

A non-U.S. holder generally will not be taxed on gain recognized on a disposition of our common stock unless:

the non-U.S. holder is an individual who is present in the United States for 183 days or more during the taxable year of the disposition and meets certain other conditions;

the gain is effectively connected with the non-U.S. holder's conduct of trade or business in the United States and, in some instances if an income tax treaty applies, is attributable to a permanent establishment or fixed base maintained by the non-U.S. holder in the United States; or

Table of Contents

we are or have been a United States real property holding corporation for U.S. Federal income tax purposes at any time during the shorter of the five-year period ending on the date of disposition and the period that the non-U.S. holder held our common stock.

We have determined that we are not, and we believe we will not become, a United States real property holding corporation.

An individual non-U.S. holder described in the first bullet point immediately above is taxed on the non-U.S. holder's gains (including gain from the sale of our common stock, net of applicable United States source losses incurred on sales or exchanges of other capital assets during the year) at a flat rate of 30%. Other non-U.S. holders who may be subject to United States federal income tax on the disposition of our common stock will be taxed on the disposition in the same manner in which citizens or residents of the United States would be taxed.

Federal Estate Tax

Common stock owned or treated as owned by an individual who is not a citizen or resident of the United States will be included in the individual's gross estate for United States federal estate tax purposes. Such shares, therefore, may be subject to United States federal estate tax unless an applicable estate tax or other treaty provides otherwise.

Information Reporting and Backup Withholding

United States backup withholding and information reporting requirements generally apply to certain payments to certain holders of our common stock. Information reporting generally will apply to payments of dividends on, and to proceeds from the sale or redemption of, common stock within the United States, or by a United States payor or United States middleman, to a holder of common stock, that is not an exempt recipient (which includes a payee that is not a United States person and provides an appropriate certification and certain other persons). A payor will be required to withhold backup withholding from such payments of dividends or proceeds, if such holder fails to furnish its correct taxpayer identification number or otherwise fails to comply with, or establish an exemption from, such backup withholding requirements. The backup withholding rate currently is 28%.

Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules from a payment to a non-U.S. holder can be refunded or credited against the non-U.S. holder's United States federal income tax liability, if any, provided that the required information is furnished to the IRS in a timely manner.

NON-U.S. HOLDERS ARE URGED TO CONSULT THEIR TAX ADVISERS REGARDING THE APPLICATION OF THE INFORMATION REPORTING AND BACKUP WITHHOLDING RULES TO THEM.

Recently Enacted Legislation

Recently enacted legislation will require, after December 31, 2012, withholding at a rate of 30% on dividends in respect of, and gross proceeds from the sale of, our common stock held by or through certain foreign financial institutions (including investment funds), unless such institution enters into an agreement with the Secretary of the Treasury to report, on an annual basis, information with respect to shares in, and accounts maintained by, the institution held by certain U.S. persons and by certain non-U.S. entities that are wholly or partially owned by U.S. persons. Accordingly, the entity through which our common stock is held will affect the determination of whether such withholding is required. Similarly, dividends in respect of, and gross proceeds from the sale of, our common stock held by an investor that is a non-financial non-U.S. entity will be subject to withholding at a rate of

30%, unless such entity either (i) certifies to us that such entity does not have any substantial United States owners or (ii) provides certain information regarding the entity's substantial United States owners, which we will in turn provide to the Secretary of the Treasury. Non-U.S. holders are encouraged to consult with their tax advisors regarding the possible implications of the legislation on their investment in our common stock.

If the underwriters sell more than the total number of shares set forth above, then the underwriters have an option to buy up to an additional 1,125,000 shares from the Company. The underwriters may exercise that option for 30 days.

We have agreed to indemnify the underwriters against certain liabilities, including liabilities under the Securities Act, or to contribute to payments the underwriters may be required to make in respect of those liabilities.

The underwriters may receive from purchasers of the shares normal brokerage commissions in amounts agreed with such purchasers.

The underwriters propose to offer the shares of common stock from time to time for sale in one or more transactions on the New York Stock Exchange, in the over-the-counter market, through negotiated transactions or otherwise at market prices prevailing at the time of sale, at prices related to prevailing market prices or at negotiated prices, subject to receipt and acceptance by it and subject to its right to reject any order in whole or in part. In connection with the sale of the shares of common stock offered hereby, the underwriters may be deemed to have received compensation in the form of underwriting discounts. The underwriters may effect such transactions by selling shares of common stock to or through dealers, and such dealers may receive compensation in the form of discounts, concessions or commissions from the underwriters and / or purchasers of shares of common stock for whom they may act as agents or to whom they may sell as principal.

In connection with the offering, the underwriters may purchase and sell shares of our common stock in the open market. These transactions may include short sales and purchases to cover positions created by short sales. Short sales involve the sale by the underwriters of a greater number of shares than it is required to purchase in the offering. The underwriters will need to close out any short sale by purchasing shares in the open market. The underwriters are likely to create a short position if it is concerned that there may be downward pressure on the price of our common stock in the open market after pricing that could adversely affect investors who purchase in the offering.

Purchases to cover a short position, as well as other purchases by the underwriters for their own account, may have the effect of preventing or retarding a decline in the market price of our common stock, and may maintain or otherwise affect the market price of our common stock. As a result, the price of our common stock may be higher than the price that otherwise might exist in the open market. If these activities are commenced, they may be discontinued at any

time. These transactions may be effected on the New York Stock Exchange, in the over-the-counter market or otherwise.
