On February 1, 2005, the Compensation Committee of the Board of Directors of Sykes Enterprises, Incorporated (the Company) approved accelerating the vesting of most out-of-the-money, unvested stock options held by current employees, including executive officers and certain employee directors. An option was considered out-of-the-money if the stated option exercise price was greater than the closing price, \$7.23, of the Company's common stock on the day the Compensation Committee approved the acceleration. The accelerated vesting was effective as of February 1 2005; however, holders of incentive stock options (within the meaning of Section 422 of the Internal Revenue Code of 1986, as amended) to purchase 58,949 shares of common stock and holders of certain stock options issued to certain foreign employees, have the opportunity to decline the accelerated vesting in order to prevent changing the status of the incentive stock option for federal income tax purposes to a non-qualified stock option or the restriction of the availability of favorable tax treatment under applicable foreign law. The following table summarizes the options subject to acceleration:

	Aggregate Number of Shares Issuable Under Accelerated Options	Weighted Average Exercise Price Per Share
Certain Directors & Executive Officers:		
Gordon H. Loetz (former employee director)	8,300	\$ 9.200
Jenna Nelson	16,500	\$ 8.640
William Rocktoff	29,500	\$ 9.050
Charles Sykes (employee director)	11,000	\$ 9.090
Total Certain Directors & Executive Officers	65,300	\$ 8.972
Total Non-officer Employees	101,550	\$ 9.907
Total	166,850	\$ 9.541

The decision to accelerate vesting of these options and eliminate future compensation expense was based on a review of the Company's long-term incentive programs in light of current market conditions and changing accounting rules regarding stock option expensing that the Company must follow beginning July 1, 2005. This accounting rule, entitled *Statement of Financial Accounting Standards No. 123 (Revised 2004), Share-Based Payment* (SFAS 123R), will require that compensation cost related to share-based payment transactions, including stock options, be recognized in the financial statements. Assuming that no holders of incentive stock options or the referenced foreign stock options elect to decline the accelerated vesting, it is estimated that the maximum future compensation expense that would have been charged to earnings, absent the acceleration of these options, based on the Company's implementation date for SFAS 123R of July 1, 2005, was approximately \$0.3 million, of which approximately \$0.1 million was related to options held by executive officers and certain employee directors of the Company. The Company will report this future compensation expense in the 2005 financial statements as pro forma footnote disclosures, as permitted under the transition guidance provided by the Financial Accounting Standards Board.
