**L. B. FOSTER COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

1. FINANCIAL STATEMENTS

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all estimates and adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. However, actual results could differ from those estimates. The results of operations for interim periods are not necessarily indicative of the results that may be expected for the year ended December 31, 2009. Amounts included in the balance sheet as of December 31, 2008 were derived from our audited balance sheet. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2008.

2. NEW ACCOUNTING PRINCIPLES

In December 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 141(R), Business Combinations, (SFAS 141R) which replaces SFAS No. 141. SFAS 141R retains the purchase method of accounting for acquisitions, but requires a number of changes, including changes in the way assets and liabilities are recognized in the purchase accounting. It also changes the recognition of assets acquired and liabilities assumed arising from contingencies, requires the capitalization of in-process research and development at fair value, and requires the expensing of acquisition-related costs as incurred. SFAS 141R is effective for business combinations for which the acquisition date is on or after the beginning of the first fiscal year beginning after December 15, 2008. The Company adopted the provisions of this standard beginning January 1, 2009.

In February 2008, the FASB issued FASB Staff Position (FSP) FAS 157-2, Effective Date of FASB Statement No. 157, (FSP FAS 157-2). FSP FAS 157-2 delayed the effective date of SFAS 157 (refer to Note 3) for all non-recurring fair value measurements of nonfinancial assets and liabilities until fiscal years beginning after November 15, 2008. The Company adopted the provisions of this standard beginning January 1, 2009.

3. FAIR VALUE MEASUREMENTS

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in accordance with accounting principles generally accepted in the United States, and expands disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements, but it does apply to existing accounting pronouncements that require or permit fair value measurements. The Company adopted SFAS 157 on January 1, 2008. The adoption of this standard did not impact our financial position or results of operations, as the Company had previously determined the fair value of these instruments in a manner consistent with the requirements of SFAS 157.

SFAS 157 applies to all assets and liabilities that are being measured and reported on a fair value basis. This standard discusses valuation techniques, such as the market approach (comparable market prices), the income approach (present value of future income or cash flow) and the cost approach (cost to replace the service capacity of an asset or replacement cost). SFAS 157 enables readers of financial statements to assess the inputs used to develop those measurements by establishing a hierarchy, which prioritizes those inputs used, for ranking the quality and reliability of the information used to determine fair values. The standard requires that each asset and liability carried at fair value be classified into one of the following categories:

Level 1: Quoted market prices in active markets for identical assets or liabilities.

Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data.

Level 3: Unobservable inputs that are not corroborated by market data.

The Company has an established process for determining fair value for its financial assets and liabilities, principally cash and cash equivalents, available-for-sale securities and foreign exchange contracts. Fair value is based on quoted market prices, where available. If quoted market prices are not available, fair value is based on assumptions that use inputs market-based parameters. The following sections describe the valuation methodologies used by the Company to measure different financial instruments at fair value, including an indication of the level in the fair value hierarchy in

which each instrument is generally classified. Where appropriate the description includes details of the key inputs to the valuations and any significant assumptions.

Table of Contents

Cash and cash equivalents. Included within Cash and cash equivalents are principally our investments in tax-free money market funds with municipal bond issuances as the underlying securities all of which maintain AAA credit ratings. Also included within cash and cash equivalents are our investments in bank certificates of deposit. The Company uses quoted market prices to determine the fair value of these investments and they are classified in Level 1 of the fair value hierarchy. The carrying amounts approximate fair value because of the short maturity of the instruments.

Available-for-sale securities. The Company uses quoted market prices to determine the fair value of its available-for-sale securities. These instruments consist of exchange-traded equity securities, are included within Investments and are classified in Level 1 of the fair value hierarchy. Unrealized gains and temporary unrealized losses are included in accumulated other comprehensive income or loss, respectively.

Derivative contracts. The Company uses significant other observable inputs that are readily available in public markets or can be derived from information available in publicly quoted markets to determine the fair value of its derivative contracts. These instruments consist of foreign exchange contracts, are included within Other accrued liabilities, and are classified in Level 2 of the fair value hierarchy. Fluctuations in the fair values of derivative instruments are recorded in accumulated other comprehensive loss and reclassified into earnings as the underlying hedged items affect earnings.

Table of Contents

The following assets and liabilities were measured at fair value on a recurring basis subject to the disclosure requirements of SFAS 157 at March 31, 2009 and December 31, 2008:

(in thousands)	March 31, 2009	Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Money market funds	\$84,145	\$ 84,145	\$	\$
Bank certificates of deposit	12,717	12,717		
Cash equivalents at fair value	96,862	96,862		
Available-for-sale securities	2,524	2,524		
Total investments	2,524	2,524		
Total Assets	\$99,386	\$ 99,386	\$	\$
Liabilities				
Derivatives	\$ (39)	\$	\$ (39)	\$
Total other accrued liabilities	(39)		(39)	
Total Liabilities	\$ (39)	\$	\$ (39)	\$
(in thousands)	December 31, 2008	Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Money market funds	\$104,257	\$ 104,257	\$	\$
Bank certificates of deposit	10,158	10,158		

Cash equivalents at fair value	114,415	114,415		
Available-for-sale securities	2,856	2,856		
Total investments	2,856	2,856		
Total Assets	\$ 117,271	\$ 117,271	\$	\$
Liabilities				
Derivatives	\$ (54)	\$	\$ (54)	\$
Total other accrued liabilities	(54)		(54)	
Total Liabilities	\$ (54)	\$	\$ (54)	\$

4. ACCOUNTS RECEIVABLE

Credit is extended based upon an evaluation of the customer's financial condition and, generally, collateral is not required. Credit terms are consistent with industry standards and practices. Trade accounts receivable at March 31, 2009 and December 31, 2008 have been reduced by an allowance for doubtful accounts of (\$2,649,000) and (\$2,637,000), respectively. Bad debt expense (recovery) was \$12,000 and (\$5,000) for the three-month periods ended March 31, 2009 and 2008, respectively.

Table of Contents**5. INVENTORIES**

Inventories of the Company at March 31, 2009 and December 31, 2008 are summarized in the following table:

(in thousands)	March 31, 2009	December 31, 2008
Finished goods	\$ 92,607	\$ 89,935
Work-in-process	5,230	13,275
Raw materials	25,408	25,198
Total inventories at current costs	123,245	128,408
Less:		
LIFO reserve	(21,066)	(21,316)
Inventory valuation reserve	(4,121)	(4,176)
	 \$ 98,058	 \$ 102,916

Inventories of the Company are generally valued at the lower of last-in, first-out (LIFO) cost or market. Other inventories of the Company are valued at average cost or market, whichever is lower. An actual valuation of inventory under the LIFO method is made at the end of each year based on the inventory levels and costs at that time.

Accordingly, interim LIFO calculations are based on management's estimates of expected year-end levels and costs.

6. SALE-LEASEBACK

On March 3, 2008, the Company sold approximately 63 acres of real estate located in Houston, TX used primarily by the Company's Tubular Products segment for approximately \$6,500,000 and recorded a gain of \$1,486,000.

Pursuant to this sale, the Company entered into a sale-leaseback transaction, as amended on April 30, 2008, with the purchaser of the Houston, TX real estate for approximately 20 acres of the real estate and certain other assets for a ten year term at a monthly rental rate of \$1,000 per acre with annual 3% increases. The April 30, 2008 amendment added approximately 9 acres of real estate (Temporary Premises) on a month to month term basis. The January 6, 2009 amendment terminated approximately 4 acres of the Temporary Premises. The lease is a net lease with the Company being responsible for taxes, maintenance, insurance and utilities. The Company will use the leased property for its threaded product operations.

This lease is being accounted for as an operating lease with an interest rate of 5.25% for the transaction. The transaction qualifies as a sale-leaseback under applicable guidance, including SFAS No. 98, Accounting for Leases, and the Company recorded as a deferred gain the present value of the minimum lease payments of the operating lease, \$2,146,000. This deferred gain is being amortized over the life of the lease, 120 months.

7. RETIREMENT PLANS**Retirement Plans**

The Company has four plans covering all hourly and salaried employees, specifically two defined benefit plans (one active / one frozen) and two defined contribution plans. Employees are eligible to participate in these specific plans based on their employment classification. The Company's funding to the defined benefit and defined contribution plans is governed by the Employee Retirement Income Security Act of 1974 (ERISA), applicable plan policy and investment guidelines. The Company policy is to contribute at least the minimum funding required by ERISA.

Table of Contents**Defined Benefit Plans**

Net periodic pension costs for both plans for the three months ended March 31, 2009 and 2008 are as follows:

(in thousands)	Three Months Ended March 31,	
	2009	2008
Service cost	\$ 7	\$ 5
Interest cost	65	63
Expected return on plan assets	(57)	(72)
Prior service cost	1	2
Recognized net actuarial loss	35	13
Net periodic benefit cost	\$ 51	\$ 11

The Company expects to contribute \$135,000 to its defined benefit plans in 2009.

Defined Contribution Plans

The Company has a defined contribution plan that covers all non-union hourly and all salaried employees. This plan permits both pretax and after-tax employee contributions. Participants can contribute, subject to statutory limitations, between 1% and 75% of eligible pre-tax pay and between 1% and 100% of eligible after-tax pay.

The Company's employer match is 100% of the first 1% of deferred eligible compensation and up to 50% of the next 6%, based on years of service, of deferred eligible compensation, for a total maximum potential match of 4%. The Company may also make discretionary contributions to the Plan.

The expense associated with this plan for the three months ended March 31 was \$415,000 in 2009 and \$438,000 in 2008.

The Company also has a defined contribution plan for union hourly employees with contributions made by both the participants and the Company based on various formulas. The expense associated with this active plan for the three months ended March 31, 2009 and 2008 was \$7,000 and \$8,000, respectively.

8. BORROWINGS

The Company's maximum credit line is \$90,000,000 under a fourth amendment to the Amended and Restated Revolving Credit and Security Agreement (Agreement) with a syndicate of three banks led by PNC Bank, N.A. The revolving credit facility is secured by substantially all of the trade receivables and inventory owned by the Company. Revolving credit facility availability under the Agreement is limited by the amount of eligible accounts receivable and inventory, applied against certain advance rates, and are limited to 85% of eligible receivables and 60% of eligible inventory. Additionally, the fourth amendment established a \$20,000,000 term loan that was immediately applied to pay down existing amounts outstanding on the revolving credit facility. The term loan is being amortized on a term of seven years with a balloon payment on the remaining outstanding principal due at the maturity of the Agreement, May 2011. If average availability should fall below \$10,000,000 over a 30-day period, the loans become immediately secured by a lien on the Company's equipment that is not encumbered by other liens.

Revolving credit facility borrowings placed in LIBOR contracts are priced at prevailing LIBOR rates, plus 1.25%. Borrowings placed in other tranches are priced at the prevailing prime rate, minus 1.00%. The term loan base rate spread is fixed at minus 0.75% and the LIBOR spread is fixed at plus 1.50%.

The Company is permitted to use various additional debt instruments to finance capital expenditures, outside of borrowings under the Agreement, limited to an additional \$10,000,000, and increases the Company's permitted annual capital expenditures to \$12,000,000. Under the amended Agreement, the Company maintains dominion over its cash at all times, as long as excess availability stays over \$5,000,000 and there is no uncured event of default.

In March 2009, the Company entered into a fifth amendment to the Agreement which became effective as of December 31, 2008 and changed certain financial covenants included in the Agreement by creating an exclusion standard in the Agreement. This standard, which is met by the Company when revolving credit facility borrowings do

not exceed \$20,000,000 and unused borrowing commitment is at least \$50,000,000, allows for certain items, as defined in the amendment, to be excluded in determining the minimum level for the fixed charge coverage ratio. Additionally, the amendment redefines the Company's calculation of earnings before interest and taxes by excluding any charges and credits related to the Company's LIFO method of accounting for inventory.

Table of Contents

The fifth amendment also includes a revised minimum net worth covenant and a revised maximum level for annual consolidated capital expenditures of \$15,000,000. As of March 31, 2009 the Company was in compliance with all of the Agreement's covenants.

Under the term loan, the Company had \$15,238,000 outstanding at March 31, 2009 of which \$12,619,000 was noncurrent. At December 31, 2008 the Company had \$15,952,000 outstanding of which \$13,333,000 was noncurrent. At March 31, 2009, there were no outstanding borrowings under the revolving credit facility and the Company had approximately \$85,071,000 in unused borrowing commitment.

9. EARNINGS PER COMMON SHARE

The following table sets forth the computation of basic and diluted earnings per common share:

(in thousands, except earnings per share)	Three Months Ended March 31,	
	2009	2008
Numerator:		
Numerator for basic and diluted earnings per common share - net income available to common stockholders:	\$ 3,019	\$ 6,306
Denominator:		
Weighted average shares	10,203	10,977
Denominator for basic earnings per common share	10,203	10,977
Effect of dilutive securities:		
Employee stock options	100	162
Other stock compensation plans	36	2
Dilutive potential common shares	136	164
Denominator for diluted earnings per common share - adjusted weighted average shares and assumed conversions	10,339	11,141
Basic earnings per common share	\$ 0.30	\$ 0.57
Diluted earnings per common share	\$ 0.29	\$ 0.57

10. STOCK-BASED COMPENSATION**Stock Option Awards**

The Company recorded stock compensation expense related to stock option awards of \$16,000 and \$29,000 for the three month periods ending March 31, 2009 and 2008, respectively. The related deferred tax benefits were \$6,000 and \$11,000, respectively.

The fair value of non-vested options at March 31, 2009 and December 31, 2008 was \$71,000, with weighted average, grant date fair values of \$5.71. At March 31, 2009, there was \$9,000 of compensation expense related to nonvested awards, which is expected to be recognized over a weighted-average period of 0.1 years. At March 31, 2008, there was \$101,000 of compensation expense related to nonvested awards which was expected to be recognized over a weighted-average period of 0.9 years.

There were no stock options granted during the first quarter of 2009 or 2008.

At March 31, 2009 and 2008, common stock options outstanding under the plans had option prices ranging from \$2.75 to \$14.77, with a weighted average exercise price of \$5.54 and \$5.85 per share, respectively.

Table of Contents

The weighted average remaining contractual life of the stock options outstanding at March 31, 2009 and 2008 are 3.3 years and 5.3 years.

There were no options exercised during the three month period ended March 31, 2009. Options exercised during the three month period ended March 31, 2008 totaled 99,380 shares. The weighted average exercise price per share of the options exercised during the three month period ended March 31, 2008 was \$4.67. The total intrinsic value of options exercised during the three month period ended March 31, 2008 was \$3,898,000.

A summary of the option activity as of March 31, 2009 is presented below.

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at January 1, 2009	194,700	\$5.54	3.6	
Granted				
Canceled				
Exercised				
Outstanding at March 31, 2009	194,700	\$5.54	3.3	\$3,755,763
Exercisable at March 31, 2009	184,700	\$5.15	3.2	\$3,634,896

Shares issued as a result of stock option exercises generally are authorized but previously unissued common stock.

Restricted Stock Awards

For the three month periods ended March 31, 2009 and 2008, the Company granted approximately 18,000 and 19,000 shares, respectively, of restricted stock.

The 2005 - 2007 Three Year Incentive Plan

The Company granted, pursuant to the 2006 Omnibus Plan, as amended, approximately 11,000 fully-vested shares during 2008 in lieu of a portion of the cash payment earned under the Three Year Incentive Plan. This non-cash transaction of \$467,000 is reflected as an increase to Paid-in capital in the Consolidated Balance Sheet at December 31, 2008. These shares are not voluntarily transferable until May 1, 2010. The number of shares awarded under this plan was determined using an average share price of \$43.91 over a ten day period in February 2008. When these shares were awarded on March 6, 2008, the grant date fair value per share was \$40.03.

Performance Unit Awards

Under separate three year incentive plans pursuant to the 2006 Omnibus Plan, as amended, the Company granted the following performance units during the three month periods ended March 31:

Incentive Plan	Grant Date	Units	Grant Date Fair Value	Aggregate Fair Value	Vesting Date
2008 - 2010	March 6, 2008	23,273	\$40.03	\$ 931,618	March 6, 2011
2009 - 2011	March 3, 2009	52,672	20.63	1,086,623	March 3, 2012

Table of Contents

These awards can be earned based upon the Company's performance relative to performance measures as defined in the plan. These awards are subject to forfeiture, cannot be transferred until four years after their grant date and will be converted into common stock of the Company based upon conversion multiples as defined in the underlying plan. The number of shares awarded under the 2009-2011 Three Year Incentive Plan was determined using an average grant date fair value of \$23.21 over a ten day period in February 2009. The number of shares awarded under the 2008-2010 Three Year Incentive Plan was determined using an average grant date fair value of \$43.91 over a ten day period in February 2008.

Other Long-term Awards

The Company granted the following restricted stock awards during the three month periods ended March 31:

Grant Date	Units	Grant Date Fair Value	Aggregate Fair Value	Vesting Date
March 6, 2008	7,756	\$40.03	\$310,473	March 6, 2012
March 3, 2009	17,561	20.63	362,283	March 3, 2013

These forfeitable restricted stock awards time-vest after a four year holding period.

The Company recorded compensation expense of \$106,000 and \$135,000 for the three month periods ending March 31, 2009 and 2008, respectively, relative to the awards granted pursuant to the Performance Unit Awards and the Other Long-term Awards. Shares issued as a result of restricted stock awards generally are authorized but previously unissued common stock.

11. COMMITMENTS AND CONTINGENT LIABILITIES

The Company is subject to laws and regulations relating to the protection of the environment, and the Company's efforts to comply with environmental regulations may have an adverse effect on its future earnings. In the opinion of management, compliance with the present environmental protection laws will not have a material adverse effect on the financial condition, results of operations, cash flows, competitive position, or capital expenditures of the Company. The Company is subject to legal proceedings and claims that arise in the ordinary course of its business. In the opinion of management, the amount of ultimate liability with respect to these actions will not materially affect the financial condition or liquidity of the Company. The resolution, in any reporting period, of one or more of these matters could have a material effect on the Company's results of operations for that period.

In the second quarter of 2004, a gas company filed a complaint against the Company in Allegheny County, PA, alleging that in 1989 the Company had applied epoxy coating on 25,000 feet of pipe and that, as a result of inadequate surface preparation of the pipe, the coating had blistered and deteriorated. The Company does not believe that the gas company's alleged problems are the Company's responsibility. Although no assurances can be given, the Company believes that it has meritorious defenses to such claims and will vigorously defend against such a suit. The Company's insurance carrier, although it reserved its right to deny coverage, has undertaken the defense of this claim.

In November 2005, the City of Clearfield, Utah, filed suit in the Second District Court, Davis County, Utah, against the Utah Department of Transportation, a general contractor, four design engineers and/or consultants, a bonding company and the Company. The City alleged that the design and engineering of an overpass in 2000 had been faulty and that the Company had provided the mechanical stabilized earth wall system for the project. The City alleged that the embankment to the overpass began, in 2001, to fail and slide away from the stabilized earth wall system, resulting in damage in excess of \$3,000,000. The Company believes that it has meritorious defenses to these claims, that the Company's products complied with all applicable specifications and that other factors accounted for any alleged failure. The Company has referred this matter to its insurance carrier, which, although it reserved its right to deny coverage, has undertaken the defense of this claim.

In December 2008, the Company received a Third-Party Complaint, filed in the US District Court for the Western District of Oklahoma, alleging that the Company and others were responsible for certain contamination which migrated to adjacent properties in Payne County, Oklahoma. The Company is alleged to have owned the initially contaminated property pursuant to a 1978 quit claim deed. The Company sold, by quit claim deed, its interests, if any,

in this property in 1979. The Company has referred this matter to its insurance carrier and, subject to reservations, the insurance carrier is defending this claim.

Table of Contents

In late March of 2009, the Company discovered that some of the prestressed concrete railroad ties manufactured in 2004 by its CXT Rail operation in Grand Island, NE had failed in track. The failure appears to be attributable to the loss of bond between the prestressed wire and the concrete. The Company is currently investigating the cause of the failure and is continuing to work with its customer to perform field inspections of all rail lines where concrete tie failures have been sighted. While a definitive cause of the failure has not yet been determined, the Company believes the cause is related to equipment fatigue on one production line at its Grand Island, NE facility before it was reinforced in the summer of 2004 and subsequently decommissioned in the spring of 2005 when new equipment was installed in the fall of 2005.

The Company recorded a charge of \$1,600,000 within cost of goods sold during the quarter ended March 31, 2009 for this issue. While the Company believes this is a reasonable estimate of this potential warranty claim, this estimate could change due to new information and future events. There can be no assurance at this point that future costs pertaining to this issue will not have a material impact on our results of operations.

At March 31, 2009 the Company had outstanding letters of credit of approximately \$3,805,000.

12. BUSINESS SEGMENTS

The Company is organized and evaluated by product group, which is the basis for identifying reportable segments. The Company is engaged in the manufacture, fabrication and distribution of rail, construction and tubular products. The following table illustrates revenues and profits of the Company by segment:

(in thousands)	Three Months Ended,			
	March 31, 2009		March 31, 2008	
	Net Sales	Segment Profit	Net Sales	Segment Profit
Rail products	\$54,366	\$ 82	\$46,191	\$2,556
Construction products	36,087	2,241	39,986	2,908
Tubular products	7,291	1,360	7,264	1,021
Total	\$97,744	\$3,683	\$93,441	\$6,485

Segment profits, as shown above, include internal cost of capital charges for assets used in the segment at a rate of, generally, 1% per month. There has been no change in the measurement of segment profit from December 31, 2008. The following table provides a reconciliation of reportable segment net profit to the Company's consolidated total:

(in thousands)	Three Months Ended	
	March 31, 2009	March 31, 2008
Income for reportable segments	\$ 3,683	\$ 6,485
Cost of capital for reportable segments	4,935	4,474
Interest expense	(328)	(555)
Gain on sale of DM&E investment		2,022
Gain on sale of Houston, TX property		1,486
Interest income	295	815
Other income (expense)	143	(151)
LIFO credit (expense)	250	(293)
Corporate expense and other unallocated charges	(4,213)	(4,411)
Income before income taxes	\$ 4,765	\$ 9,872

Table of Contents**13. COMPREHENSIVE INCOME**

Comprehensive income represents net income plus certain stockholders' equity changes not reflected in the Condensed Consolidated Statements of Operations. The components of comprehensive income, net of tax, were as follows:

(in thousands)	Three Months Ended March 31,	
	2009	2008
Net income	\$3,019	\$6,306
Market value adjustments for investments	(212)	
Unrealized derivative gains on cash flow hedges	9	76
Comprehensive income	\$2,816	\$6,382

14. DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities, an amendment of SFAS No. 133, (SFAS 161). SFAS 161 requires enhanced disclosures about an entity's derivative and hedging activities, including (i) how and why an entity uses derivative instruments, (ii) how derivative instruments and related hedged items are accounted for under SFAS 133, and (iii) how derivative instruments and related hedged items affect an entity's financial position, results of operations and cash flows. The Company adopted the required enhanced disclosures of SFAS 161 on January 1, 2009.

The Company does not purchase or hold any derivative financial instruments for trading purposes. The Company uses derivative financial instruments to manage interest rate exposure on variable-rate debt, primarily by using interest rate collars and variable interest rate swaps. The Company's primary source of variable-rate debt comes from its revolving credit agreement.

At contract inception, the Company designates its derivative instruments as hedges. The Company recognizes all derivative instruments on the balance sheet at fair value. Fluctuations in the fair values of derivative instruments designated as cash flow hedges are recorded in accumulated other comprehensive income and reclassified into earnings within other income as the underlying hedged items affect earnings. To the extent that a change in interest rate derivative does not perfectly offset the change in value of the interest rate being hedged, the ineffective portion is recognized in earnings immediately.

The Company is not subject to significant exposures to changes in foreign currency exchange rates. The Company will, however, manage its exposure to changes in foreign currency exchange rates on firm sale and purchase commitments by entering into foreign currency forward contracts. The Company's risk management objective is to reduce its exposure to the effects of changes in exchange rates on these transactions over the duration of the transactions.

During 2006, the Company entered into commitments to sell Canadian funds based on the anticipated receipt of Canadian funds from the sale of certain rail commencing in the second quarter of 2007 through the third quarter of 2008. All of these contracts were settled as of December 31, 2008. During 2008, two of these Canadian dollar denominated commitments matured for a realized loss of approximately \$129,000 which was reported as Other (Income) Expense within the Condensed Consolidated Statements of Operations.

In the fourth quarter of 2008, the Company entered into a commitment with a notional amount of approximately \$630,000 to buy Euro funds based on the anticipated receipt of Euro funds from the purchase of certain rail in the first quarter of 2009. During the first quarter of 2009, the Company determined that the receipt of Euros would not coincide with the purchase commitment and the Company recorded a loss of approximately \$7,000 to record this commitment at market which was reported as Other (Income) Expense within the Condensed Consolidated Statements of Operations. The fair value of this instrument was a liability of \$54,000 and was recorded in Other Accrued Liabilities as of December 31, 2008.

In the first quarter of 2009, the Company entered into commitments with notional amounts totaling approximately \$974,000 to buy Euro funds based on the anticipated receipt of Euro funds from the purchase of certain rail in the second quarter of 2009. The fair value of these instruments was a liability of \$39,000 and was recorded in Other accrued liabilities and Accumulated other comprehensive loss as of March 31, 2009. For more information concerning the fair value measurements of these instruments, refer to Note 3, Fair Value Measurements.

Table of Contents

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

General

L. B. Foster Company is a leading manufacturer, fabricator and distributor of products for rail, construction, utility and energy markets. The Company is comprised of three business segments: Rail products, Construction products and Tubular products.

Recent Developments

In late March of 2009, we discovered that some of the prestressed concrete railroad ties manufactured in 2004 by our CXT Rail operation in Grand Island, NE had failed in track. The failure appears to be attributed to the loss of bond between the prestressed wire and the concrete. We are currently investigating the cause of the failure and are continuing to work with our customer to perform field inspections of all rail lines where concrete tie failures have been sighted. While a definitive cause of the failure has not yet been determined, we believe the cause is related to equipment fatigue on one production line at our Grand Island, NE facility before it was reinforced in the summer of 2004 and subsequently decommissioned in the spring of 2005 when our new equipment was installed in the fall of 2005.

We recorded a charge of \$1.6 million within cost of goods sold during the quarter ended March 31, 2009 for this issue. While we believe this is a reasonable estimate of this potential warranty claim, this estimate could change due to new information and future events. There can be no assurance at this point that future costs pertaining to this issue will not have a material impact on our results of operations.

Pursuant to the share repurchase program authorized by the Board of Directors in 2008, the Company purchased an additional 86,141 shares of its Common stock for approximately \$1.9 million during the 2009 first quarter. For additional information regarding the Company's share repurchase program, refer to Part II, Item 2 Unregistered Sales of Equity Securities and Use of Proceeds on page 24.

Critical Accounting Policies

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States. When more than one accounting principle, or method of its application, is generally accepted, management selects the principle or method that is appropriate in the Company's specific circumstances. Application of these accounting principles requires management to make estimates about the future resolution of existing uncertainties. As a result, actual results could differ from these estimates. In preparing these financial statements, management has made its best estimates and judgments of the amounts and disclosures included in the financial statements giving due regard to materiality. There have been no material changes in the Company's policies or estimates since December 31, 2008. For more information regarding the Company's critical accounting policies, please see the Management's Discussion & Analysis of Financial Condition and Results of Operations in Form 10-K for the year ended December 31, 2008.

New Accounting Pronouncements

In December 2007, the FASB issued SFAS No. 141(R), Business Combinations, (SFAS 141R) which replaces SFAS No. 141. SFAS 141R retains the purchase method of accounting for acquisitions, but requires a number of changes, including changes in the way assets and liabilities are recognized in the purchase accounting. It also changes the recognition of assets acquired and liabilities assumed arising from contingencies, requires the capitalization of in-process research and development at fair value, and requires the expensing of acquisition-related costs as incurred. SFAS 141R is effective for business combinations for which the acquisition date is on or after the beginning of the first fiscal year beginning after December 15, 2008. The Company adopted the provisions of this standard beginning January 1, 2009.

In February 2008, the FASB issued FASB Staff Position (FSP) FAS 157-2, Effective Date of FASB Statement No. 157, (FSP FAS 157-2). FSP FAS 157-2 delayed the effective date of SFAS 157 for all non-recurring fair value measurements of nonfinancial assets and liabilities until fiscal years beginning after November 15, 2008. The Company adopted the provisions of this standard beginning January 1, 2009.

First Quarter 2009 Compared to First Quarter 2008 – Company Analysis

Net income for the first quarter of 2009 was \$0.29 per diluted share which compares to net income for the first quarter of 2008 of \$0.57 per diluted share. Included in net income for the prior year quarter were pre-tax gains from the receipt of escrow proceeds related to the sale of our investment in the DM&E Railroad (\$2.0 million) and the sale-leaseback of our Houston, TX facility (\$1.5 million). Excluding these gains, net income for the prior year period was \$0.36 per diluted share.

Our gross profit margin includes our current estimate of the impact of the LIFO method of accounting for inventory. Due principally to declining steel prices, we currently anticipate a positive adjustment resulting from our provision for LIFO while the prior year period included an estimated negative impact caused by inflation. Gross profit was adversely affected by the \$1.6 million warranty charge, previously discussed in more detail in Recent Developments, related to certain concrete ties that failed in track.

Beginning in 2009 we began to see the impacts of our various initiatives designed to control selling and administrative expenses. The 2009 first quarter decrease primarily resulted from lower travel and entertainment expenses and outside services fees, offset in part by increased salaries. Interest expense decreased from the prior year period due principally to reduced borrowings and, to a lesser extent, lower interest rates. Reduced average cash and cash equivalents balances and lower rates contributed to reduced interest income earned on our various short-term investments during the first quarter of 2009. Income taxes in the first quarter were recorded at approximately 36.6%, a nominal increase from the prior year period of 36.1%.

Table of Contents**Results of Operations Segment Analysis****Rail Products**

	Three Months Ended March 31,		Percent Increase/(Decrease)	
	2009	2008	2009 vs. 2008 Dollars in thousands	2009 vs. 2008
Net Sales	\$54,366	\$46,191	\$ 8,175	17.7%
Gross Profit	\$ 4,522	\$ 7,097	(\$2,575)	-36.3%
Gross Profit Percentage	8.3%	15.4%	-7.0%	-45.9%

First Quarter 2009 Compared to First Quarter 2008

Increased volumes within our new rail distribution business along with an increase in selling prices drove the increase in our Rail Products sales over the 2008 period. The rest of the rail businesses experienced decreased sales in the first quarter of 2009 compared to the prior year period. Our relay rail distribution business continues to be negatively impacted by significantly reduced Industrial market demand and due to low scrap steel prices. Ongoing reduced UPRR concrete tie purchasing levels continues to negatively impact our Grand Island, NE and Tucson, AZ facilities. Additionally, customer requested delivery delays and reduced overall demand have hampered our sales of concrete ties produced at our Spokane, WA facility. Finally, a lack of government funding has led to a reduction in sales within our transit products division.

The predominate cause of the decrease in our Rail Products gross profit in the 2009 first quarter was the \$1.6 million concrete tie warranty expense recognized at our Grand Island, NE facility, discussed previously. In addition to the concrete tie warranty issue, the gross profit at our Grand Island, NE and Tucson, AZ facilities continues to be negatively impacted by the UPRR volume reductions, which has also led to increased unabsorbed plant expense. Also, our relay rail distribution business was negatively impacted by a significant decrease in the cost of scrap steel prices which has resulted in our selling higher priced inventory in a declining price environment. Our Spokane, WA facility has been negatively impacted due to the lack of higher margin sales of concrete turnout ties as well as competitive pricing pressures. Finally, product mix and competitive pricing pressures have reduced our gross profit in our transit products division.

Due to the recessionary economic environment that has negatively impacted freight railroad car loadings and our expectations that Class 1 railroad capital spending will decline by approximately 10%, we anticipate Rail Products Segment sales and gross profit to decline in 2009.

Construction Products

	Three Months Ended March 31,		Percent Increase/(Decrease)	
	2009	2008	2009 vs. 2008 Dollars in thousands	2009 vs. 2008
Net Sales	\$36,087	\$39,986	(\$3,899)	-9.8%

Gross Profit	\$ 7,249	\$ 7,657	(\$408)	-5.3%
Gross Profit Percentage	20.1%	19.1%	0.9%	4.9%

First Quarter 2009 Compared to First Quarter 2008

Decreased volumes of piling products, partially offset by higher selling prices in the current quarter, led to the overall reduction in Construction Products sales. Offsetting these reductions in piling sales was improvement from our concrete buildings division which continues to benefit from increased new orders and unit installations.

In addition to the impact of volume declines within certain aspects of our piling division, selling higher priced inventory in a declining price environment also contributed to the reduction in our Construction Products gross profit margin. Volume related gross profit margin increases from our concrete buildings and product mix within our fabricated products divisions partially offset these decreases.

Table of Contents

The heavy civil and public works construction markets that we participate in were soft nationwide during the first quarter of 2009 leading to a substantial reduction in bookings and backlog. However, we anticipate that this softening may be mitigated, in part, by strength in the bridge markets as well as certain other projects that may be funded from the recently signed American Recovery and Reinvestment Act stimulus bill.

Tubular Products

	Three Months Ended March 31,		Percent Increase/(Decrease)	
	2009	2008	Increase/(Decrease) 2009 vs. 2008 Dollars in thousands	Increase/(Decrease) 2009 vs. 2008
Net Sales	\$7,291	\$7,264	\$ 27	0.4%
Gross Profit	\$2,014	\$1,527	\$487	31.9%
Gross Profit Percentage	27.6%	21.0%	6.6%	31.4%

First Quarter 2009 Compared to First Quarter 2008

While we believe that the end markets served by our Tubular Products will remain strong over the long term, downward trends in pricing and demand will reduce our profitability over the short term.

Changes within our product mix and favorable manufacturing variances have led to an increase in 2009 gross profit by our Tubular Products segment over the prior year period.

Liquidity and Capital Resources

The Company's capitalization is as follows:

Debt:

(In millions)	March 31, 2009	December 31, 2008
Term Loan, due May 2011	\$ 15.2	\$ 16.0
Capital Leases and Interim Lease Financing	8.2	9.0
Other (primarily revenue bonds)	2.6	2.5
Total Debt	26.0	27.5
Equity	218.6	217.6
Total Capitalization	\$244.6	\$ 245.1

The Company's need for liquidity relates primarily to seasonal working capital requirements, capital expenditures, common stock repurchases and debt service obligations. We may also use cash to pursue potential strategic acquisitions.

Table of Contents

The following table summarizes the year-to-date impact of these items:

(In millions)	2009	March 31, 2008
Liquidity needs:		
Working capital and other assets and liabilities	(\$17.4)	(\$14.2)
Common stock purchases	(1.9)	
Capital expenditures	(0.6)	(2.1)
Scheduled repayments of long-term debt	(0.7)	(0.7)
Other long-term debt scheduled repayments	(0.8)	(0.8)
Cash interest paid	(0.5)	(0.5)
Net liquidity requirements	(21.9)	(18.3)
Liquidity sources:		
Internally generated cash flows before interest paid	5.8	5.4
Proceeds from the sale of DM&E investment		2.0
Proceeds from asset sales		6.5
Equity transactions		0.5
Net liquidity sources	5.8	14.4
Net Change in Cash	(\$16.1)	(\$3.9)

Cash Flow from Operating Activities

During the first quarter of 2009, cash flows from operations used \$12.1 million, an unfavorable increase of \$2.9 million compared to the first quarter of 2008. Net income and adjustments to net income provided \$5.2 million for the 2009 period. Offsetting this amount was cash used by certain operating activities of \$17.3 million. The pay down of trade accounts payable, notably in our rail distribution business, was the primary cause of the reduction in cash for the three months ended March 31, 2009. Partially offsetting this cash reduction were the positive impacts from collections of trade accounts receivable and the utilization of inventories.

Cash Flow from Investing Activities

Capital expenditures were \$0.6 million for the first three months of 2009 compared to \$2.1 million for the same 2008 period. Current period expenditures were for plant and equipment improvements as well as technology infrastructure and application software. We anticipate total capital spending in 2009 will be approximately \$4.0 million and funded by cash flow from operations.

Cash flows provided by investing activities for the three months ended March 31, 2008 included proceeds of \$6.5 million and \$2.0 million from the aforementioned threaded products facility and DM&E investment sale respectively.

Cash Flow from Financing Activities

The increase in cash used by financing activities is primarily related to purchases of 86,141 shares of our Common stock under our share repurchase program for approximately \$1.9 million.

Financial Condition

Included within cash and cash equivalents are principally our investments in tax-free money market funds with municipal bond issuances as the underlying securities all of which maintain AAA credit ratings and remain guaranteed by the United States Treasury. Additionally included therein are our investments in bank certificates of deposit.

We also have a revolving credit agreement which expires in May 2011 and provides for up to \$90.0 million in borrowings to support our working capital and other liquidity requirements. Borrowings under this agreement are secured by substantially all the trade receivables and inventory owned by us, and are limited to 85% of eligible receivables and 60% of eligible inventory. Additionally, the revolving credit agreement provided for a \$20.0 million term loan that was immediately applied to pay down existing drawings on the revolving credit facility. If average availability should fall below \$10.0 million over a 30-day period, the loans become immediately secured by a lien on the Company's equipment that is not encumbered by other liens.

Under the term loan, we had \$15.2 million outstanding at March 31, 2009 of which \$12.6 million was noncurrent.

Table of Contents

Revolving credit facility borrowings placed in LIBOR contracts are priced at prevailing LIBOR rates, plus 1.25%. Borrowings placed in other tranches are priced at the prevailing prime rate, minus 1.00%. The term loan base rate spread is fixed at minus 0.75% and the LIBOR spread is fixed at plus 1.50%. Under the credit agreement, we maintain dominion over our cash at all times, as long as excess availability stays over \$5.0 million and there is no uncured event of default.

In March 2009, we entered into a fifth amendment to the Agreement which became effective as of December 31, 2008 and changed certain financial covenants included in the Agreement by creating an exclusion standard in the Agreement. This standard, which is met when revolving credit facility borrowings do not exceed \$20.0 million and unused borrowing commitment is at least \$50.0 million, allows for certain items, as defined in the amendment, to be excluded in determining the minimum level for the fixed charge coverage ratio. Additionally, the amendment redefines our calculation of earnings before interest and taxes by excluding any charges and credits related to our LIFO method of accounting for inventory.

The fifth amendment also includes a revised minimum net worth covenant and a revised maximum level for consolidated capital expenditures. As of March 31, 2009 we were in compliance with all of the Agreement's covenants.

We routinely review our portfolio of businesses and contemplate potential acquisitions and dispositions from time to time. We are currently assessing a number of options for the potential use of the above funds and sources of financing, including, but not limited to, debt reduction, strategic acquisitions, organic reinvestment in the existing business, continued share repurchases and other general corporate purposes.

As far as near-term future business activity levels for 2009 are concerned, we have seen recent evidence of both strength and weakness, with more evidence of weakness. At the present time we are unable to determine the extent or the duration of any additional effects that the current credit and economic crisis will have on our results of operations and financial position.

We do, however, continue in this period of uncertainty in an extremely strong financial position. As noted, as of March 31, 2009, we had approximately \$99.0 million in cash and short-term instruments and a \$90.0 million revolving credit facility with approximately \$85.1 million of availability and \$26.0 million in long-term debt. We believe this capacity will afford us the flexibility to take advantage of opportunities that we may encounter or weather the current economic downturn, if need be, as future circumstances dictate.

Off-Balance Sheet Arrangements

The Company's off-balance sheet arrangements include operating leases, purchase obligations and standby letters of credit. A schedule of the Company's required payments under financial instruments and other commitments as of December 31, 2008 is included in the Liquidity and Capital Resources section of the Company's 2008 Annual Report filed on Form 10-K. There have been no significant changes to the Company's contractual obligations relative to the information presented in the Form 10-K. These arrangements provide the Company with increased flexibility relative to the utilization and investment of cash resources.

Dakota, Minnesota & Eastern Railroad

During the fourth quarter of 2007, we sold our investment in the Dakota, Minnesota & Eastern Railroad (DM&E). At the time of the closing of this transaction, we fully reserved approximately \$2.1 million of the proceeds which were being held in escrow, until the completion of all post-closing transactions, to secure certain of the DM&E's obligations. This amount was fully reserved due to the uncertainty surrounding the amount of any future payout as well as the timing of such payout.

During the first quarter of 2008, upon completion of the buyer's working capital audit, the applicable proceeds were released from escrow. We recognized a pre-tax gain of approximately \$2.0 million related to the receipt of these proceeds.

For more information regarding the sale of our investment in the DM&E, please see our Management's Discussion & Analysis of Financial Condition and Results of Operations in Form 10-K for the year ended December 31, 2007.

Outlook

Our businesses and results of operations have recently been impacted by the downturn in the global economy beginning in late 2008. We believe that the current recession, continued credit concerns and uncertain stimulus

legislation will present challenges to the many end markets to which we sell. As a result of anticipated reduced demand for certain of our products as well as sharply falling commodity prices over the last several months, we expect to battle margin

Table of Contents

compression for at least the next six months and we have implemented certain cost reduction measures in January 2009 in anticipation of these concerns. While we expect to be challenged in 2009 by reduced sales volumes, reduced production volumes and a recessionary economic environment, we also expect to be profitable and to generate solid positive cash flow. We believe that when conditions do improve, and we do not know when that might be, the markets we participate in will be among the first to benefit from such an improvement. As previously mentioned, we also continue in this period of uncertainty in an extremely strong financial position.

Our agreement with the Union Pacific Railroad (UPRR) includes their purchasing concrete ties from our Grand Island, NE facility through 2010 and our Tucson, AZ facility through 2012. While the UPRR will continue to purchase concrete ties under this agreement, total concrete ties purchased by the UPRR in 2009 will be at best consistent with its 2008 purchase levels. We are currently uncertain when the UPRR purchasing level for concrete ties will improve and as a result both of our Grand Island, NE and Tucson, AZ facilities are operating at approximately 40% of capacity. We are actively pursuing product sales opportunities to other third parties at both of these locations.

Our ARP facilities in Niles, OH and Pueblo, CO have contracts with Class 1 railroads that are periodically subject to renewal which account for a significant portion of this division's business. If we are unable to successfully renew these contracts, our results of operations and financial position could be negatively impacted.

We have made a strategic decision to limit our use of foreign suppliers for our North American rail distribution business, as we believe that the long-term impact of this decision will deliver positive impacts to our results of operations and financial position. Additionally, there have been more significant increases in the prices of these products from our international suppliers. Due to this decision, the short-term impact may reduce the sales recorded by our rail distribution division and negatively impact our results of operations and financial position.

Certain of our businesses rely heavily on spending authorized by the federal highway and transportation funding bill, SAFETEA-LU, enacted in August 2005. This legislation authorized \$286 billion for United States transportation improvement spending and will expire in September 2009. Certain of our businesses, especially our fabricated products group, were hampered with low volumes and margins due to the delay in passing the current legislation. We are not sure how the recently passed American Recovery and Reinvestment Act stimulus bill will impact the reauthorization of successor legislation to SAFETEA-LU.

Although backlog is not necessarily indicative of future operating results, total Company backlog at March 31, 2009, was approximately \$130.9 million, a 24.6% decrease compared to March 31, 2008. The following table provides the backlog by business segment:

(In thousands)	Backlog		
	March 31, 2009	December 31, 2008	March 31, 2008
Rail Products	\$ 56,705	\$ 68,438	\$ 57,410
Construction Products	69,401	57,626	110,215
Tubular Products	4,794	6,524	6,035
Total Backlog	\$ 130,900	\$ 132,588	\$ 173,660

We continue to evaluate the overall performance of our operations. A decision to down-size or terminate an existing operation could have a material adverse effect on near-term earnings but would not be expected to have a material adverse effect on the financial condition of the Company.

Market Risk and Risk Management Policies

The Company does not purchase or hold any derivative financial instruments for trading purposes. The Company uses derivative financial instruments to manage interest rate exposure on variable-rate debt, primarily by using interest rate collars and variable interest rate swaps. The Company's primary source of variable-rate debt comes from its revolving credit agreement.

At contract inception, the Company designates its derivative instruments as hedges. The Company recognizes all derivative instruments on the balance sheet at fair value. Fluctuations in the fair values of derivative instruments designated as cash flow hedges are recorded in accumulated other comprehensive income and reclassified into earnings as the underlying hedged items affect earnings. To the extent that a change in interest rate derivative does not perfectly offset the change in value of the interest rate being hedged, the ineffective portion is recognized in earnings immediately.

Table of Contents

The Company is not subject to significant exposures to changes in foreign currency exchange rates. The Company will, however, manage its exposure to changes in foreign currency exchange rates on firm sale and purchase commitments by entering into foreign currency forward contracts. The Company's risk management objective is to reduce its exposure to the effects of changes in exchange rates on these transactions over the duration of the transactions.

During 2006, the Company entered into commitments to sell Canadian funds based on the anticipated receipt of Canadian funds from the sale of certain rail commencing in the second quarter of 2007 through the third quarter of 2008. All of these contracts were settled as of December 31, 2008. During 2008, two of these Canadian dollar denominated commitments matured for a realized loss of approximately \$0.1 million which was reported as Other (Income) Expense within the Condensed Consolidated Statements of Operations.

In the fourth quarter of 2008, the Company entered into a commitment with a notional amount of approximately \$0.6 million to buy Euro funds based on the anticipated receipt of Euro funds from the purchase of certain rail in the first quarter of 2009. During the first quarter of 2009, the Company determined that the receipt of Euros would not coincide with the purchase commitment and the Company recorded a loss of approximately \$7,000 to record this commitment at market which was reported as Other (Income) Expense within the Condensed Consolidated Statements of Operations. The fair value of this instrument was a liability of \$0.1 million and was recorded in Other Accrued Liabilities as of December 31, 2008.

In the first quarter of 2009, the Company entered into commitments with notional amounts totaling approximately \$1.0 million to buy Euro funds based on the anticipated receipt of Euro funds from the purchase of certain rail in the second quarter of 2009. The fair value of these instruments was a liability of \$39,000 and was recorded in Other accrued liabilities as of March 31, 2009.

Forward-Looking Statements

Statements relating to the value of the Company's share of potential future contingent payments related to the DM&E merger with the Canadian Pacific Railway Limited (CP) are forward-looking statements and are subject to numerous contingencies and risk factors. The CP has stated that it may take several years for it to determine whether to construct the Powder River Basin Expansion Project.

Our businesses could be affected adversely by significant changes in the price of steel, concrete, and other raw materials or the availability of existing and new piling and rail products. Our operating results may also be affected negatively by adverse weather conditions.

A substantial portion of our operations are heavily dependent on governmental funding of infrastructure projects. Many of these projects have Buy America or Buy American provisions. Significant changes in the level of government funding of these projects could have a favorable or unfavorable impact on our operating results.

Additionally, government actions concerning Buy America provisions, taxation, tariffs, the environment, or other matters could impact our operating results.

A significant portion of our Construction segment net sales and profits are related to the purchase and resale of piling products. Our primary supplier relationship with Gerdau Ameristeel Corporation remains intact. However, no assurances can be given and, if we are unable to continue to distribute any of the products of Gerdau Ameristeel Corporation, our results of operations and liquidity could be adversely affected.

Unexpected events including production delays or other problems encountered at our manufacturing facilities, equipment failures, failure to meet product specifications, additional concrete railroad tie defects and the availability of existing and new piling and rail products may cause our operating costs to increase or otherwise impact our financial performance.

The Company cautions readers that various factors could cause the actual results of the Company to differ materially from those indicated by forward-looking statements made from time to time in news releases, reports, proxy statements, registration statements and other written communications (including the preceding sections of this Management's Discussion and Analysis), as well as oral statements, such as references made to the future profitability, made from time to time by representatives of the Company. For a discussion of some of the specific risk factors, that may cause such differences, see the Company's Form 10-K for the year ended December 31, 2008.

Except for historical information, matters discussed in such oral and written communications are forward-looking statements that involve risks and uncertainties, including but not limited to general business conditions, the availability of material from major suppliers, labor disputes, the impact of competition, the seasonality of the Company's business, the adequacy of internal and external sources of funds to meet financing needs, the Company's ability to curb its working capital requirements, taxes, inflation and governmental regulations. Sentences containing words such as believes, intends, anticipates, expects, or will generally should be considered forward-looking statements.

Table of Contents**Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

See the Market Risk and Risk Management Policies section under Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations.

Item 4. CONTROLS AND PROCEDURES

- a) L. B. Foster Company (the Company) carried out an evaluation, under the supervision and with the participation of the Company's management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) under the Securities and Exchange Act of 1934, as amended) as of March 31, 2009. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective to timely alert them to material information relating to the Company (including its consolidated subsidiaries) required to be included in the Company's periodic SEC filings.
- b) There have been no significant changes in the Company's internal controls over financial reporting that occurred in the period covered by this report that have materially affected or are likely to materially affect the Company's internal controls over financial reporting.

PART II OTHER INFORMATION**Item 1. LEGAL PROCEEDINGS**

See Note 11, Commitments and Contingent Liabilities, to the Condensed Consolidated Financial Statements.

Item 1A. RISK FACTORS

There has not been any material change in the risk factors disclosure from that contained in the Company's 10-K for the year ended December 31, 2008.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The Company's and affiliated purchaser's purchases of equity securities for the three month period ended March 31, 2009 were as follows:

	Total Number Of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
As of December 31, 2008	865,532	\$30.60	865,532	\$ 13,518,222
January 1, 2009 - January 31, 2009				
February 1, 2009 - February 28, 2009				
March 1, 2009 - March 31, 2009	86,141	21.63	86,141	1,863,328
Total	951,673	\$30.60	951,673	\$ 11,654,894

- (1) On May 12, 2008, the Board of Directors authorized the

repurchase of up to \$25,000,000 of the Company's common shares until June 30, 2010. On October 28, 2008, the Board of Directors authorized the repurchase of up to an additional \$15,000,000 of the Company's common shares until December 31, 2010 at which time this authorization will expire.

Item 5. OTHER INFORMATION

None.
